

**Anadarko Petroleum Corporation**  
**Non-GAAP Financial Measures**

This list of non-GAAP financial measure definitions and related reconciliations is intended to satisfy the requirements of Regulation G of the Securities Exchange Act of 1934, as amended. This information is historical in nature. Anadarko Petroleum Corporation (the “Company”) undertakes no obligation to publicly update or revise any non-GAAP financial measure definitions and related reconciliations.

This non-GAAP information should be considered by the reader in addition to, but not instead of, the financial statements prepared in accordance with GAAP. The non-GAAP financial information presented may be determined or calculated differently by other companies and may not be comparable to similarly titled measures.

**Adjusted Net Income (Loss)**

The Company defines adjusted net income (loss) as net income (loss) attributable to common stockholders, less certain items affecting comparability.

Management uses adjusted net income (loss) to evaluate operating and financial performance and believes the measure is useful to investors because it eliminates the impact of certain noncash and/or other items that management does not consider to be indicative of the Company’s performance from period to period. Management also believes this non-GAAP measure is useful to investors to evaluate and compare the Company’s operating and financial performance across periods, as well as facilitating comparisons to others in the Company’s industry.

#### **Discretionary Cash Flow from Operations (DCF), Free Cash Flow (FCF), Adjusted DCF, and Adjusted FCF**

The Company defines DCF as net cash provided by (used in) operating activities before changes in accounts receivable; changes in accounts payable and accrued expenses; other items, net; Tronox settlement payment; certain nonoperating and other excluded items; and current taxes related to asset monetizations and Tronox tax position.

The Company defines FCF as DCF, less capital expenditures.

The Company defines Adjusted DCF as net cash provided by (used in) operating activities before changes in accounts receivable; changes in accounts payable and accrued expenses; other items, net; Deepwater Horizon and Tronox settlement payments; collections associated with the Algeria exceptional profits tax settlement; certain nonoperating and other excluded items; current taxes related to Tronox tax position; and Western Gas Partners, LP (WES)/Western Gas Equity Partners, LP (WGP) distributions to third parties.

The Company defines Adjusted FCF as Adjusted DCF adjusted by capital expenditures excluding WES and cash received from the Algeria exceptional profits tax settlement and monetizations.

Management believes that these measures are useful to management and investors as a measure of a company's ability to internally fund its capital expenditures and to service or incur additional debt. These measures eliminate the impact of certain items that management does not consider to be indicative of the Company's performance from period to period. Management will also use variations of this metric by including significant cash inflows not included in net cash provided by (used in) operating activities, such as proceeds from monetizations, to better measure the Company's ability to generate cash. To assist in measuring the Company's performance, management will also evaluate Anadarko on a deconsolidated basis, which excludes WES.

### Net Debt to Adjusted Capitalization Ratio

The Company defines net debt as total debt, less cash and cash equivalents. Net debt for Anadarko excluding WGP is Anadarko's Consolidated net debt, less WGP's net debt.

The Company defines net debt to adjusted capitalization ratio as net debt / (net debt + total equity). Net debt to adjusted capitalization ratio for Anadarko excluding WGP excludes WGP's net debt and noncontrolling interest attributable to WGP.

Management uses net debt to determine the Company's outstanding debt obligations that would not be readily satisfied by its cash and cash equivalents on hand. Management believes that using net debt in the capitalization ratio is useful to investors in determining the Company's leverage since the Company could choose to use its cash and cash equivalents to retire debt. In addition, management believes that presenting Anadarko's net debt excluding WGP is useful because WGP is a separate public company with its own capital structure.

	<b>September 30, 2016</b>		
<i>millions</i>	<b>Anadarko Consolidated</b>	<b>WGP* Consolidated</b>	<b>Anadarko excluding WGP</b>
<b>Total debt</b>	\$ 15,878	\$ 2,935	\$ 12,943

<b>Net debt to adjusted capitalization ratio</b>		<b>43%</b>	<b>42%</b>

\* WGP is a publicly traded consolidated subsidiary of Anadarko and WES is a consolidated subsidiary of WGP.

## Adjusted EBITDAX

The Company defines Adjusted EBITDAX as income (loss) before income taxes; gains (losses) on divestitures, net; exploration expense; depreciation, depletion, and amortization (DD&A); impairments; interest expense; total (gains) losses on derivatives, net, less net cash from settlement of commodity derivatives; and certain items not related to the Company's normal operations, less net income (loss) attributable to noncontrolling interests. During the periods presented, items not related to the Company's normal operations included restructuring charges related to the workforce reduction program included in general and administrative expenses, Deepwater Horizon settlement and related costs included in other operating expenses, loss on early extinguishment of debt, Tronox-related contingent loss, and certain other nonoperating items included in other (income) expense, net. The Company's definition of Adjusted EBITDAX excludes gains (losses) on divestitures, net and exploration expense as they are not indicators of operating efficiency for a given reporting period. However, exploration expense is monitored by management as part of costs incurred in exploration and development activities. Similarly, DD&A and impairments are excluded from Adjusted EBITDAX as a measure of operating performance because capital expenditures are evaluated at the time capital costs are incurred. Adjusted EBITDAX also excludes interest expense to allow for assessment of operating results without regard to Anadarko's financing methods or capital structure. Total (gains) losses on derivatives, net, less net cash from settlement of commodity derivatives are excluded from Adjusted EBITDAX because these (gains) losses are not considered a measure of asset operating performance. Finally, net income (loss) attributable to noncontrolling interests is excluded from the Company's measure of Adjusted EBITDAX because it represents earnings that are not attributable to the Company's common stockholders.

Management believes that the presentation of Adjusted EBITDAX provides information useful in assessing the Company's operating and financial performance across periods.

### Oil and Natural Gas Exploration and Development Costs

The Company defines oil and natural gas exploration and development costs as costs incurred, less asset retirement obligation liabilities incurred, plus cash expenditures for asset retirement obligations.

Management believes oil and natural gas exploration and development costs is a more accurate reflection of the expenditures incurred during the current year excluding certain obligations to be paid in future periods.

### Finding and Development Costs

The Company defines finding and development (F&D) costs as oil and natural gas exploration and development costs divided by non-price related reserve additions before divestitures. The Company uses several variations of this calculation, including isolating development costs per producing areas and incorporating price-related and non-price-related reserve additions.

Management believes that the presentation of F&D costs provides useful information in assessing the Company's ability to efficiently manage its capital programs.

<i>millions</i>	Year Ended December 31, 2015
<b>Costs incurred (GAAP)</b>	<b>\$ 5,753</b>
