BENCHMARK ELECTRONICS, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements
(amounts in thousands, except per share data, unless otherwise noted)
(unaudited)

Note 1 – Basis of Presentation

Benchmark Electronics, Inc. (the Company) is a Texas corporation that provides worldwide integrated manufacturing services. The Company provides services to original equipment manufacturers (OEMs) of computers and related products for business enterprises, medical devices, industrial control equipment, which includes equipment for the aerospace and defense industry, testing and instrumentation products and telecommunication equipment. The Company has manufacturing operations located in the Americas, Asia and Europe.

The condensed consolidated financial statements included herein have been prepared by the Company without an audit pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC). The financial statements reflect all normal and recurring adjustments which in the opinion of management are necessary for a fair presentation of the financial position, results of operations and cash flows for the interim periods presented. The results of operations for the periods presented are not necessarily indicative of the results to be expected for the full year. The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the financial statements and notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

Management of the Company has made a number of estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities to prepare these financial statements in accordance with generally accepted accounting principles. Actual results could differ from those estimates.

Certain reclassifications of prior period amounts have been made to conform to the current presentation.

Note 2 – Stock-Based Compensation

The Benchmark Electronics, Inc. 2000 Stock Awards Plan (the 2000 Plan) and the Benchmark Electronics, Inc. 2010 Omnibus Incentive Compensation Plan (the 2010 Plan) authorize the Company, upon recommendation of the compensation committee of the Board of Directors, to grant a variety of types of awards, including stock options, restricted shares, restricted stock units, stock appreciation rights, performance compensation awards, phantom stock awards and deferred share units, or any combination thereof, to any director, officer, employee or consultant (including any prospective director, officer, employee or consultant) of the Company. Stock options are granted to employees with an exercise price equal to the market price of the Company's common shares on the date of grant, generally vest over a four-year period from the date of grant and have a term of ten years. Restricted shares, restricted stock units and phantom stock awards granted to employees generally vest over a four-year period from the date of grant, subject to the continued employment of the employee by the Company. The 2000 Plan expired on February 16, 2010 and no additional grants can be made under that plan. The 2010 Plan was approved by the Company's shareholders on May 18, 2010. Members of the Board of Directors who are not employees of the Company hold awards under the Benchmark Electronics, Inc. 2002 Stock Option Plan for Non-Employee Directors (the 2002 Plan). Stock options were granted pursuant to the 2002 Plan upon the occurrence of the non-employee director's election or re-

election to the Board of Directors. All awards under the 2002 Plan were fully vested upon the date of grant and have a term of ten years. The 2002 Plan was approved by the Company's shareholders on May 14, 2002 and expired February 26, 2012. No additional grants may be made under the 2002 Plan. Non-employee directors are currently eligible to receive equity awards under the 2010 Plan. Beginning in 2011, awards under the 2010 Plan to non-employee directors were in the form of restricted stock units, which vest in equal quarterly installments over a one-year period, starting from the grant date. As of September 30, 2013, 2.2 million additional common shares are available for issuance under the Company's existing plans.

All share-based payments to employees, including grants of employee stock options, are recognized in the financial statements based on their fair values. The total compensation cost recognized for stock-based awards was \$1.9 million and \$5.3 million for the three and nine months ended September 30, 2013 respectively, and \$1.7 million and \$4.7 million for the three and nine months ended September 30, 2012, respectively. The total income tax benefit recognized in the income statement for stock-based awards was \$0.6 million and \$1.5 million for the three and nine months ended September 30, 2013, respectively, and \$0.8 million and \$1.6 million for the three and nine months ended September 30, 2012, respectively. The compensation expense for stock-based awards includes an estimate for forfeitures and is recognized over the vesting period of the awards using the straight-line method. Cash flows from the tax benefits resulting from tax deductions in excess of the compensation cost recognized for stock-based awards (excess tax benefits) are classified as cash flows from financing activities. Awards of restricted shares, restricted stock units, performance based restricted stock units and phantom stock are valued at the closing market price of the Company's common shares on the date of grant. For performance based restricted stock unit awards, compensation expense is based on the probability that the performance goals will be achieved, which is monitored by management throughout the requisite service period. If it becomes probable, based on the Company's expectation of performance during the measurement period, that more or less than the previous estimate of the awarded shares will vest, an adjustment to stock-based compensation expense will be recognized as a change in accounting estimate.

As of September 30, 2013, the unrecognized compensation cost and remaining weighted-average amortization related to stock-based awards are as follows:

	Stock Options	Restricted Shares	Phantom Stock and Restricted Stock Units	Performance Based Restricted Stock Units ⁽¹⁾
(in thousands)				
Unrecognized compensation cost	\$ 4,433	\$ 2,611	\$ 4,512	\$ 1,842
Remaining weighted-average amortization period	1.7 years	1.8 years	2.9 years	2.5 years

⁽¹⁾ Based on the probable achievement of the performance goals identified in each award.

The Company did not issue any stock options during the three months ended September 30, 2013. During the nine months ended September 30, 2013, the Company issued 348 thousand stock options. The Company issued 1 thousand and 431 thousand stock options during the three and nine months ended September 30, 2012, respectively. The weighted-average assumptions used to value the options granted during the three and nine months ended September 30, 2013 and 2012, were as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
Expected term of options	N/A	6.0 years	7.4 years	6.3 years
Expected volatility	N/A	42%	42%	42%
Risk-free interest rate	N/A	1.114%	1.396%	1.305%
Dividend yield	N/A	zero	zero	zero

The expected term of the options represents the estimated period of time until exercise and is based on historical experience, giving consideration to the contractual terms, vesting schedules and expectations of future plan participant behavior. Separate groups of plan participants that have similar historical exercise behavior are considered separately for valuation purposes. Expected stock price volatility is based on the historical volatility of the Company's common shares. The risk-free interest rate is based on the U.S. Treasury zero-coupon rates in effect at the time of grant with an equivalent remaining term. The dividend yield reflects that the Company has not paid any cash dividends since inception and does not anticipate paying cash dividends in the foreseeable future.

The weighted-average fair value per option granted during the nine months ended September 30, 2013 was \$7.87. The total cash received as a result of stock option exercises for the nine months ended September 30, 2013 and 2012 was approximately \$10.4 million and \$3.5 million, respectively. The actual tax benefit realized as a result of stock option exercises and the vesting of other share-based awards during the nine months ended September 30, 2013 and 2012 was \$1.8 million and \$0.9 million, respectively. For the nine months ended September 30, 2013 and 2012, the total intrinsic value of stock options exercised was \$2.9 million and \$1.2 million, respectively.

The Company issued performance based restricted stock unit awards to employees during the nine months ended September 30, 2013 and 2012. The number of performance based restricted stock unit awards that will ultimately be earned will not be determined until the end of the performance periods, which are December 31, 2015 and 2016, and may vary from as low as zero to as high as three times the target number depending on the level of achievement of certain performance goals. The level of achievement of these goals is based upon the audited financial results of the Company for the last full calendar year within the performance period (the years ending December 31, 2015 and 2016). The performance goals consist of certain levels of achievement using the following financial metrics: revenue growth, operating income margin expansion, and return on invested capital. If the performance goals are not met based on the Company's financial results, the applicable performance based restricted stock unit awards will not vest and will be forfeited.

The following table summarizes the activities relating to the Company's stock options:

(in thousands, except per share data)	Number of Options	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding as of December 31, 2012	4,240	\$ 19.88		
Granted	348	\$ 17.37		
Exercised	(666)	\$ 15.61		
Forfeited or expired	(213)	\$ 20.03		
Outstanding as of September 30, 2013	<u>3,709</u>	<u>\$ 20.40</u>	<u>4.44</u>	<u>\$ 11,883</u>
Exercisable as of September 30, 2013	<u>2,879</u>	<u>\$ 21.31</u>	<u>3.30</u>	<u>\$ 7,200</u>

The aggregate intrinsic value in the table above is before income taxes and is calculated as the difference between the exercise price of the underlying options and the Company's closing stock price as of the last business day of the period ended September 30, 2013 for options that had exercise prices that were below the closing price.

The following table summarizes the activities related to the Company's restricted shares:

(in thousands, except per share data)	Shares	Weighted- Average Grant Date Fair Value
Non-vested shares outstanding as of December 31, 2012	340	\$ 16.81
Vested	(80)	\$ 16.89
Forfeited	(38)	\$ 16.35
Non-vested shares outstanding as of September 30, 2013	<u>222</u>	<u>\$ 16.86</u>

The following table summarizes the activities related to the Company's time based restricted stock units and phantom stock awards:

(in thousands, except per share data)	Shares	Weighted- Average Grant Date Fair Value
Non-vested shares outstanding as of December 31, 2012	103	\$ 16.70
Granted	271	\$ 17.54
Vested	(51)	\$ 16.47
Forfeited	(7)	\$ 17.31
Non-vested shares outstanding as of September 30, 2013	<u>316</u>	<u>\$ 17.45</u>

The following table summarizes the activities related to the Company's performance based restricted stock unit awards:

(in thousands, except per share data)	Shares	Weighted-Average Grant Date Fair Value
Non-vested shares outstanding as of December 31, 2012	164	\$ 16.39
Granted ⁽¹⁾	76	\$ 17.37
Forfeited	(25)	\$ 16.03
Non-vested shares outstanding as of September 30, 2013	<u>215</u>	<u>\$ 16.78</u>

⁽¹⁾Represents target number of shares that can vest based on the achievement of the performance goals.

Note 3 – Earnings Per Share

Basic earnings per share is computed using the weighted-average number of shares outstanding. Diluted earnings per share is computed using the weighted-average number of shares outstanding adjusted for the incremental shares attributed to outstanding stock equivalents during the three and nine months ended September 30, 2013, and 2012. Stock equivalents include common shares issuable upon the exercise of stock options and other equity instruments, and are computed using the treasury stock method. Under the treasury stock method, the exercise price of a share, the amount of compensation cost, if any, for future service that the Company has not yet recognized, and the amount of estimated tax benefits that would be recorded in paid-in-capital, if any, when the share is exercised are assumed to be used to repurchase shares in the current period.

The following table sets forth the calculation of basic and diluted earnings per share.

(in thousands, except per share data)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
Net income	\$ <u>23,726</u>	\$ <u>19,314</u>	\$ <u>43,670</u>	\$ <u>38,492</u>
Denominator for basic earnings per share - weighted-average number of common shares outstanding during the period	54,087	55,814	54,361	56,750
Incremental common shares attributable to outstanding dilutive options	360	131	284	155
Incremental common shares attributable to outstanding restricted shares, restricted stock units and phantom stock	<u>164</u>	<u>83</u>	<u>223</u>	<u>149</u>
Denominator for diluted earnings per share	<u>54,611</u>	<u>56,028</u>	<u>54,868</u>	<u>57,054</u>
Basic earnings per share	\$ <u>0.44</u>	\$ <u>0.35</u>	\$ <u>0.80</u>	\$ <u>0.68</u>
Diluted earnings per share	\$ <u>0.43</u>	\$ <u>0.34</u>	\$ <u>0.80</u>	\$ <u>0.67</u>

Options to purchase 2.0 million and 2.3 million common shares for the three and nine months ended September 30, 2013, respectively, were not included in the computation of diluted earnings per share because their effect would have been anti-dilutive. Options to purchase 3.8 million and 3.7 million common shares for the three and nine months ended September 30, 2012, respectively, were not included in the computation of diluted earnings per share because their effect would

have been anti-dilutive.

Note 4 – Goodwill and Other Intangible Assets

Goodwill, all of which is associated with the Company’s Asia business segment, totaled \$37.9 million at both September 30, 2013, and December 31, 2012.

Other assets consist primarily of acquired identifiable intangible assets, capitalized purchased software costs and assets held for sale. Other intangible assets as of September 30, 2013, and December 31, 2012 were as follows:

(in thousands)	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Customer relationships	\$ 17,823	\$ (12,052)	\$ 5,771
Technology licenses	11,300	(8,753)	2,547
Other	868	(160)	708
Other intangible assets, September 30, 2013	<u>\$ 29,991</u>	<u>\$ (20,965)</u>	<u>\$ 9,026</u>

(in thousands)	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Customer relationships	\$ 17,793	\$ (10,702)	\$ 7,091
Technology licenses	11,300	(7,880)	3,420
Other	868	(142)	726
Other intangible assets, December 31, 2012	<u>\$ 29,961</u>	<u>\$ (18,724)</u>	<u>\$ 11,237</u>

Customer relationships are being amortized on a straight-line basis over a period of ten years. Technology licenses are being amortized over their estimated useful lives in proportion to the economic benefits consumed. Amortization of other intangible assets for the nine months ended September 30, 2013, and 2012 was \$2.2 million and \$2.2 million, respectively.

The estimated future amortization expense of other intangible assets for each of the next five years is as follows (in thousands):

Year ending December 31,	Amount
2013 (remaining three months)	\$ 755
2014	2,573
2015	2,573
2016	2,496
2017	24

Note 5 – Borrowing Facilities

Under the terms of a credit agreement (the U.S. Credit Agreement), the Company has a \$200 million five-year revolving credit facility for general corporate purposes with a maturity date of July 30, 2017. The U.S. Credit Agreement includes an accordion feature under which total commitments under the facility may be increased by an additional \$100 million, subject to satisfaction of certain conditions and lender approval.

Interest on outstanding borrowings under the U.S. Credit Agreement is payable quarterly, at the Company's option, at either LIBOR plus 1.75% to 2.75% or a prime rate plus 0.75% to 1.75%, based upon the Company's leverage ratio as specified in the U.S. Credit Agreement. A commitment fee of 0.30% to 0.40% per annum (based upon the Company's liquidity ratio as specified in the U.S. Credit Agreement) on the unused portion of the revolving credit line is payable quarterly in arrears. As of both September 30, 2013 and December 31, 2012, the Company had no borrowings outstanding under the U.S. Credit Agreement, \$0.8 million in outstanding letters of credit and \$199.2 million was available for future borrowings.

The U.S. Credit Agreement is secured by the Company's domestic inventory and accounts receivable, 100% of the stock of the Company's domestic subsidiaries and 65% of the voting capital stock of each direct foreign subsidiary and substantially all of the other tangible and intangible assets of the Company and its domestic subsidiaries. The U.S. Credit Agreement contains customary financial covenants as to debt leverage and fixed charges, and restricts our ability to incur additional debt, pay dividends, repurchase shares, sell assets and merge or consolidate with other persons. As of both September 30, 2013 and December 31, 2012, the Company was in compliance with all such covenants and restrictions.

The Company's Thailand subsidiary has a multi-purpose credit facility with Kasikornbank Public Company Limited (the Thai Credit Facility) that provides for approximately \$11.1 million (350 million Thai baht) in working capital availability. The Thai Credit Facility is secured by land and buildings in Thailand owned by the Company. Availability of funds under the Thai Credit Facility is reviewed annually and is currently accessible through October 2014. As of both September 30, 2013 and December 31, 2012, the Company's Thailand subsidiary had no working capital borrowings outstanding.

Note 6 – Inventories

Inventory costs are summarized as follows:

(in thousands)	September 30, 2013	December 31, 2012
Raw materials	\$ 246,891	\$ 213,027
Work in process	92,162	67,221
Finished goods	55,924	43,793
	<u>\$ 394,977</u>	<u>\$ 324,041</u>

Note 7 – Income Taxes

Income tax expense (benefit) consists of the following:

(in thousands)	Nine Months Ended September 30,	
	2013	2012
Federal – Current	\$ (711)	\$ 930
Foreign – Current	4,292	3,159
State – Current	151	459
Deferred	9,001	7,876
	<u>\$ 12,733</u>	<u>\$ 12,424</u>

In 2013, income tax expense differs from the amount computed by applying the U.S. federal statutory income tax rate to income before income tax primarily due to the mix of taxable income by taxing jurisdiction, the impact of tax incentives and tax holidays in foreign locations, and state income taxes (net of federal benefit). Also in January 2013, the Company recorded \$0.8 million of discrete tax benefits related to the American Taxpayer Relief Act of 2012 (ATRA) consisting of research and experimentation credits and decreases in U.S. taxable income related to previously taxed foreign transactions. The ATRA retroactively restored the research and experimentation credit and other U.S. income tax benefits for 2012 and extends these provisions through the end of 2013.

The Company considers earnings from foreign subsidiaries to be indefinitely reinvested and, accordingly, no provision for U.S. federal and state income taxes has been made for these earnings. Upon distribution of foreign subsidiary earnings in the form of dividends or otherwise, such distributed earnings would be reportable for U.S. income tax purposes (subject to adjustment for foreign tax credits). Determination of the amount of any unrecognized deferred tax liability on these undistributed earnings is not practicable.

The Company has been granted certain tax incentives, including tax holidays, for its subsidiaries in Malaysia and Thailand that will expire at various dates, unless extended or otherwise renegotiated, through 2015 and 2026, respectively, and are subject to certain conditions with which the Company expects to comply. The net impact of these tax incentives was to lower income tax expense for the nine months ended September 30, 2013, and 2012 by approximately \$4.5 million (approximately \$0.08 per diluted share) and \$5.9 million (approximately \$0.10 per diluted share), respectively as follows:

(in thousands)	Nine Months Ended September 30,	
	2013	2012
China	\$ -	\$ 1,900
Malaysia	1,024	676
Thailand	3,476	3,280
	<u>\$ 4,500</u>	<u>\$ 5,856</u>

The Company's Chinese subsidiary had a tax incentive that expired in 2012 and has filed for a new tax incentive in 2013.

As of September 30, 2013, the total amount of the reserve for uncertain tax benefits including interest and penalties is \$21.3 million. The reserve is classified as a current or long-term liability in the consolidated balance sheet based on the Company's expectation of when the items will be settled. The amount of accrued potential interest and penalties on unrecognized tax benefits included in the reserve as of September 30, 2013, is \$1.6 million and \$1.6 million, respectively. No material changes affected the reserve during the nine months ended September 30, 2013. A subsidiary of the Company in Thailand has filed for a refund of \$8.4 million of previously paid income taxes applicable to the years 2004 and 2005, which is included in other assets. The Thai tax authorities conducted an initial examination of the applicable refund filings. During 2011, the Company recorded a reserve for uncertain benefits of \$7.1 million against this refund claim. During the fourth quarter of 2012, the Company received official notification that the tax authorities have rejected its refund claim. The Company has filed an appeal of the rejected refund claim.

The Company and its subsidiaries in Brazil, China, Ireland, Luxembourg, Malaysia, Mexico, the Netherlands, Romania, Singapore, Thailand and the United States remain open to examination by the various local taxing authorities, in total or in part, for fiscal years 2004 to 2012.

The Company is subject to examination by tax authorities for varying periods in various U.S. and foreign tax jurisdictions. During the course of such examinations disputes occur as to matters of fact and/or law. Also, in most tax jurisdictions the passage of time without examination will result in the expiration of applicable statutes of limitations thereby precluding the taxing authority from conducting an examination of the tax period(s) for which such statute of limitation has expired. The Company believes that it has adequately provided for its tax liabilities.

Note 8 – Segment and Geographic Information

The Company has manufacturing facilities in the Americas, Asia and Europe to serve its customers. The Company is operated and managed geographically, and management evaluates performance and allocates the Company's resources on a geographic basis. Intersegment sales are generally recorded at prices that approximate arm's length transactions. Operating segments' measure of profitability is based on income from operations. The accounting policies for the reportable operating segments are the same as for the Company taken as a whole. The Company has three reportable operating segments: the Americas, Asia and Europe. Information about operating segments was as follows:

(in thousands)	September 30,		September 30,	
	2013	2012	2013	2012
Net sales:				
Americas	\$ 358,199	\$ 337,895	\$ 1,017,025	\$ 1,062,521

Note 9 – Supplemental Cash Flow and Non-Cash Information

The following is additional information concerning supplemental disclosures of cash payments.

(in thousands)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
Income taxes paid, net	\$ 34	\$ 1,910	\$ 5,686	\$ 7,760
Interest paid	432	324	1,270	957

During the nine months ended September 30, 2013, the Company recognized a non-cash asset impairment charge of \$3.8 million related to its facility in Tianjin, China that is being held for sale based on recent market activity. Also during the nine months ended September 30, 2013, the Company disposed of a non-manufacturing facility in Thailand for \$1.6 million resulting in a gain of \$1.2 million.

Note 10 – Contingencies

The Company is involved in various legal actions arising in the ordinary course of business. In the opinion of management, the ultimate disposition of these matters will not have a material adverse effect on the Company's consolidated financial position or results of operations.

Note 11 – Impact of Recently Enacted Accounting Standards

In December 2011, the Financial Accounting Standards Board (FASB) issued an amendment to disclosures about offsetting assets and liabilities. The amended standard requires an entity to disclose information about offsetting and related arrangements to enable users of its financial statements to understand the effect of those arrangements on its financial position. The Company adopted the provisions of this update January 1, 2013. The adoption of this standard had no impact on the Company's consolidated financial statements and footnote disclosures.

In March 2013, the FASB issued a new accounting standard on foreign currency matters that clarifies the guidance of a parent company's accounting for the cumulative translation adjustment upon derecognition of certain subsidiaries or groups of assets within a foreign entity or of an investment in a foreign entity. Under this new standard, a parent company that ceases to have a controlling financial interest in a foreign subsidiary or group of assets within a foreign entity shall release any related cumulative translation adjustment into net income only if a sale or transfer results in complete or substantially complete liquidation of the foreign entity. This standard is effective for fiscal years beginning after December 15, 2013. The Company will apply the guidance prospectively to derecognition events occurring after January 1, 2014.

The Company has determined that all other recently issued accounting standards will not have a material impact on its consolidated financial position, results of operations or cash flows, or do not apply to its operations.

Note 12 – Restructuring Charges

The Company has undertaken initiatives to restructure its business operations with the intention of improving utilization and realizing cost savings in the future. These initiatives have included changing the number and location of production facilities, largely to align capacity and infrastructure with current and anticipated customer demand. This alignment includes transferring programs from higher cost geographies to lower cost geographies. The process of restructuring entails, among other activities, moving production between facilities, reducing staff levels, realigning our business processes and reorganizing our management.

The Company recognized restructuring charges during 2013, 2012 and 2011 primarily related to the closure of facilities, capacity reduction and reductions in workforce in certain facilities across various regions. These charges were recorded pursuant to plans developed and approved by management.

The following table summarizes the 2013 activity in the accrued restructuring balances related to the various restructuring activities initiated prior to September 30, 2013:

(in thousands)	Balance as of December 31, 2012	Restructuring Charges	Cash Payment	Non-Cash Activity	Foreign Exchange Adjustments	Balance as of September 30, 2013
2013 Restructuring:						
Severance	\$ -	\$ 2,349	\$ (1,233)	\$ -	\$ (77)	1,039
Other exit costs	-	2,937	(877)	(971)	52	1,141
	-	5,286	(2,110)	(971)	(25)	2,180
2012 Restructuring:						
Severance	538	724	(1,062)	-	94	294
Lease facility costs	-	834	(217)	(39)	-	578
Other exit costs	166	-	(70)	-	(93)	3
	704	1,558	(1,349)	(39)	1	875
2011 Restructuring:						
Lease facility costs	13	(98)	87	-	2	4
	13	(98)	87	-	2	4
Total	\$ 717	\$ 6,746	\$ (3,372)	\$ (1,010)	\$ (22)	3,059

Note 13 – Fair Value

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. A three-tier fair value hierarchy of inputs is employed to determine fair value measurements. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets and liabilities. Level 2 inputs are observable prices that are not quoted on active exchanges, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; and model-derived valuations whose inputs are observable or whose significant value drivers are observable. Level 3 inputs are unobservable inputs employed for measuring the fair value of assets or liabilities. This hierarchy requires the Company to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value.

The carrying amounts of cash equivalents, accounts receivable, accrued liabilities, accounts payable and capital lease obligations approximate fair value. As of September 30, 2013, \$12.1 million (par value) of long-term investments were recorded at fair value. The long-term investments consist of auction rate securities, primarily secured by guaranteed student loans backed by a U.S. government agency, and are classified as available-for-sale. Auction rate securities are adjustable rate debt instruments whose interest rates were intended to reset every 7 to 35 days through an auction process. Overall changes in the global credit and capital markets led to failed auctions for these securities beginning in early 2008. These failed auctions, in addition to overall global economic conditions, impacted the liquidity of these investments and resulted in the Company continuing to hold these securities beyond their typical auction reset dates. The market for these types of securities remains illiquid as of September 30, 2013. These securities are classified as long-term investments, and the contractual maturity of these securities is over ten years.

These long-term investments were valued using Level 3 inputs as of September 30, 2013, as the assets were subject to valuation using significant unobservable inputs. The Company estimated the fair value of each security with the assistance of an independent valuation firm using a discounted cash flow model to calculate the present value of projected cash flows based on a number of inputs and assumptions, including the security structure and terms, the current market conditions and the related impact on the expected weighted-average life, interest rate estimates and default risk of the securities.

As of September 30, 2013, the Company has recorded an unrealized loss of \$1.5 million on the long-term investments based upon this valuation. This unrealized loss reduced the fair value of the Company's auction rate securities as of September 30, 2013 to \$10.6 million. These investments have been in an unrealized loss position for greater than 12 months. During the nine months ended September 30, 2013 and 2012, the Company recorded unrealized gains of \$0.3 million and \$0.4 million, respectively, on its long-term investments.

The Company conducts periodic reviews to identify and evaluate each investment that has an unrealized loss. An unrealized loss exists when the current fair value of an individual security is less than its amortized cost basis. Due to the unrealized losses on the auction rate securities held, the Company has assessed whether the calculated impairment is other-than-temporary. In

performing this assessment, even though the Company has no intention to sell the securities before the amortized cost basis is recovered and believes it is more-likely-than-not that it will not be required to sell the securities prior to recovery, the Company has performed additional analyses to determine if a portion of the unrealized loss is considered a credit loss. A credit loss would be identified as the amount of the principal cash flows not expected to be received over the remaining term of the security as projected using the Company's best estimates. The Company has assessed each security for credit impairment, taking into account factors such as (i) the length of time and the extent to which fair value has been below cost; (ii) activity in the market of the issuer which may indicate adverse credit conditions; (iii) the payment structure of the security; and (iv) the failure of the issuer of the security to make scheduled payments. The Company used an independent valuation firm to assist in making these assessments.

Based on these assessments, the Company has determined that there is no credit loss associated with its auction rate securities as of September 30, 2013, as shown by the cash flows expected to be received over the remaining life of the securities.

The following table provides a reconciliation of the beginning and ending balance of the Company's auction rate securities classified as long-term investments measured at fair value using significant unobservable inputs (Level 3 inputs):

(in thousands)	2013	2012
Balance as of January 1	\$ 10,324	\$ 24,673
Net unrealized gains included in other comprehensive loss	318	351
Sales of investments at par value	(25)	(11,025)
Balance as of September 30	\$ 10,617	\$ 13,999
Unrealized losses still held as of September 30	\$ 1,533	\$ 2,976

The cumulative unrealized loss is included as a component of accumulated other comprehensive loss within shareholders' equity in the accompanying consolidated balance sheet. As of September 30, 2013, there were no long-term investments measured at fair value using Level 1 or Level 2 inputs. All income generated from these investments is recorded as interest income.

Note 14 – Thailand Flood Related Items

The Company's facilities in Ayudhaya, Thailand were flooded and remained closed from October 13, 2011 to December 20, 2011. As a result of the flooding and temporary closing of these facilities, the Company incurred property losses and flood related costs during 2012 and 2011 which were partially offset by insurance recoveries. During the nine months ended September 30, 2013, the Company received \$9.8 million of insurance proceeds and incurred \$0.1 million of flood related costs. During the nine months ended September 30, 2012, the Company recognized flood related charges totaling \$16.0 million offset by insurance recoveries totaling \$4.2 million. The Company will record additional insurance recoveries when the appropriate recognition criteria have been met. Although the Company's management is in ongoing negotiations with insurance companies and expects to finalize all insurance recoveries within the next few quarters, the Company cannot estimate the timing of the receipt of insurance proceeds it will ultimately realize. As a result of the flooding, the Company has been unable to renew or otherwise obtain adequate cost-effective flood insurance to cover assets at its facilities in Thailand. The Company continues to investigate all flood risk-mitigation alternatives in Thailand.

In the event the Company was to experience a significant uninsured loss in Thailand or elsewhere, it could have a material adverse effect on its business, financial condition and results of operations.

Note 15 – Acquisition

On June 3, 2013, the Company acquired all of the outstanding common stock of Suntron Corporation (Suntron), an electronics manufacturing services (EMS) company headquartered in Phoenix, Arizona (the Acquisition) for \$19.3 million in cash, subject to a final purchase price adjustment in accordance with the acquisition agreement. The Acquisition added two manufacturing facilities: Tijuana, Mexico and Phoenix, Arizona. The Acquisition strengthened the Company’s capabilities and global reach to better serve customers in the aerospace and defense industries.

The preliminary allocation of the Acquisition’s net purchase price resulted in no goodwill. The final allocation of the purchase price, which the Company expects to complete as soon as practical but no later than one year from the acquisition date, may differ from the amounts included in these financial statements. Management does not expect the adjustments resulting from the purchase price allocation, if any, to have a material effect on the Company’s financial position or results of operations.

The following is an estimate of the purchase price for Suntron and the preliminary purchase price allocation (in thousands):

Purchase price paid	\$ 19,332
Cash acquired	<u>(62)</u>
Purchase price, net of cash received	<u>\$ 19,270</u>
Acquisition-related costs (included in restructuring charges and integration and acquisition-related costs for the nine months ended September 30, 2013)	<u>\$ 286</u>
Recognized amounts of identifiable assets acquired and liabilities assumed:	
Cash	\$ 62
Accounts receivable	11,561
Inventories	14,747
Other current assets	1,072
Property, plant and equipment	1,869
Other assets	255
Deferred income taxes	3,832
Current liabilities	(13,785)
Other long-term liabilities	<u>(281)</u>
Total identifiable net assets	<u>\$ 19,332</u>

Suntron’s results of operations were included in the Company’s condensed consolidated statement of income beginning on June 3, 2013 which amounted to approximately \$27.3 million in revenue for the nine months ended September 30, 2013. Suntron’s net income during the nine months ended September 30, 2013 was not significant to the consolidated operating results of the Company. The following summary pro forma condensed consolidated financial information reflects the Acquisition as if it had occurred on January 1, 2012 for purposes of the statements of

income. This summary pro forma information is not necessarily representative of what the Company's results of operations would have been had the Acquisition in fact occurred on January 1, 2012 and is not intended to project the Company's results of operations for any future period.

Pro forma condensed consolidated financial information for the nine months ended September 30, 2013, and 2012 (unaudited):

(in thousands, except per share data)	Nine Months Ended September 30,	
	2013	2012
Net sales	\$ 1,783,138	\$ 1,904,352
Net income	\$ 36,491	\$ 27,734

Note 16 – Subsequent Event

On October 2, 2013, the Company acquired the full-service EMS segment of CTS Corporation (CTS) for \$75 million. The acquired business has five locations (4 in North America and 1 in Asia) and approximately 1,000 employees. The CTS acquisition expands the Company's portfolio of customers in non-traditional and highly regulated markets and strengthens the depth and scope of the Company's new product express capabilities on the West Coast. Acquisition-related costs (included in restructuring charges and integration and acquisition-related costs) related to the CTS acquisition totaled \$0.3 million for the nine months ended September 30, 2013.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

References in this report to "the Company," "Benchmark," "we," or "us" mean Benchmark Electronics, Inc. together with its subsidiaries. The following Management's Discussion and Analysis of Financial Condition and Results of Operations contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements are identified as any statement that does not relate strictly to historical or current facts. They use words such as "anticipate," "believe," "intend," "plan," "projection," "forecast," "strategy," "position," "continue," "estimate," "expect," "may," "will," or the negative of those terms or other variations of them or comparable terminology. In particular, statements, express or implied, concerning future operating results or the ability to generate sales, income or cash flow are forward-looking statements. Forward-looking statements are not guarantees of performance. They involve risks, uncertainties and assumptions, including those discussed under Part II, Item 1A of this report. The future results of our operations may differ materially from those expressed in these forward-looking statements. Many of the factors that will determine these results are beyond our ability to control or predict. Undue reliance should not be placed on any forward-looking statements. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual outcomes may vary materially from those indicated.

The following discussion should be read in conjunction with the Condensed Consolidated Financial Statements and Notes thereto.

OVERVIEW

We are a worldwide provider of integrated manufacturing services. We provide our services to original equipment manufacturers (OEMs) of computers and related products for business enterprises, medical devices, industrial control equipment (which includes equipment for the aerospace and defense industry), testing and instrumentation products, and telecommunication equipment. The services that we provide are commonly referred to as electronics manufacturing services (EMS). We offer our customers comprehensive and integrated design and manufacturing services from initial product design to volume production, including direct order fulfillment and post deployment services. Our manufacturing and assembly operations include printed circuit boards and subsystem assembly, box build and systems integration, the process of integrating subsystems and, often, downloading and integrating software, to produce a fully configured product. Our precision technology manufacturing capabilities complement our proven electronic manufacturing expertise by providing further vertical integration of critical mechanical components. These capabilities include precision machining, advanced metal joining, and functional testing for multiple industries including medical, instrumentation, aerospace and semiconductor capital equipment. We also are able to provide specialized engineering services, including product design, printed circuit board layout, prototyping, and test development. We believe that we have developed strengths in the manufacturing process for large, complex, high-density printed circuit boards as well as the ability to manufacture high and low volume products in lower cost regions such as China, Malaysia, Mexico, Romania and Thailand.

As our customers have continued to expand their globalization strategy, we have continued to make the necessary changes to align our business operations with our customers' demand. In support of our growth we do from time to time make acquisitions that expand our global reach, customer access and product capabilities. We believe that our global manufacturing presence increases our ability to be responsive to our customers' needs by providing accelerated time-to-market and time-to-volume production of high quality products. These capabilities enable us to build stronger strategic relationships with our customers and to become a more integral part of their operations. Our customers face challenges in planning, procuring and managing their inventories efficiently due to customer demand fluctuations, product design changes, short product life cycles and component price fluctuations. We employ production management systems to manage their procurement and manufacturing processes in an efficient and cost-effective manner so that, where possible, components arrive on a just-in-time, as-and-when-needed basis. We are a significant purchaser of electronic components and other raw materials, and can capitalize on the economies of scale associated with our relationships with suppliers to negotiate price discounts, obtain components and other raw materials that are in short supply, and return excess components. Our expertise in supply chain management and our relationships with suppliers across the supply chain enables us to reduce our customers' cost of goods sold and inventory exposure.

We recognize revenue from the sale of manufactured products built to customer specifications and excess inventory when title and risk of ownership have passed, the price to the buyer is fixed or determinable and collectibility is reasonably assured, which generally is when the goods are shipped. Revenue from design, development and engineering services is recognized when the services are performed and collectibility is reasonably certain. Such services provided under fixed price contracts are accounted for using the percentage of completion method. We generally assume no significant obligations after product shipment as we typically warrant workmanship only. Therefore, our warranty provisions are generally not significant.

Our cost of sales includes the cost of materials, electronic components and other items that comprise the products we manufacture, the cost of labor and manufacturing overhead and adjustments for excess and obsolete inventory. Our procurement of materials for production requires us to commit significant working capital to our operations and to manage the purchasing, receiving, inspection and stocking of materials. Although we bear the risk of fluctuations in the cost of materials and excess scrap, we periodically negotiate cost of materials adjustments with our customers. Our gross margin for any product depends on the sales price, the proportionate mix of the cost of materials in the product and the cost of labor and manufacturing overhead allocated to the product. We typically have the potential to realize higher gross margins on products where the proportionate level of labor and manufacturing overhead is greater than that of materials. As we gain experience in manufacturing a product, we usually achieve increased efficiencies, which result in lower labor and manufacturing overhead costs for that product and higher gross margins. Our operating results are impacted by the level of capacity utilization of manufacturing facilities. Operating income margins have generally improved during periods of high production volume and high capacity utilization. During periods of low production volume, we generally have idle capacity and reduced operating income margins.

Acquisitions

On June 3, 2013, we acquired all of the outstanding common stock of Suntron Corporation (Suntron), an electronics manufacturing services (EMS) company headquartered in Phoenix, Arizona (the Acquisition) for \$19.3 million in cash subject to a final purchase adjustment in accordance with the acquisition agreement. The Acquisition added two manufacturing facilities: Tijuana, Mexico and Phoenix, Arizona. The Acquisition strengthened our capabilities and global reach to better serve our customers in the aerospace and defense industries.

On October 2, 2013, we acquired the full-service EMS segment of CTS Corporation (CTS) for \$75 million. The acquired business has five locations (4 in North America and 1 in Asia) and approximately 1,000 employees. The CTS acquisition expands our portfolio of customers in non-traditional and highly regulated markets and strengthens the depth and scope of our new product express capabilities on the West Coast.

Severe Flooding in Thailand and Suspension of Thailand Operations

Our facilities in Ayudhaya, Thailand were flooded and remained closed from October 13, 2011 to December 20, 2011. As a result of the flooding and temporary closing of our facilities, we incurred property losses and flood related costs during 2012 and 2011 which were partially offset by insurance recoveries. During the nine months ended September 30, 2013, we received \$9.8 million of insurance proceeds and incurred \$0.1 million of flood related costs. We will record additional insurance recoveries when the appropriate recognition criteria have been met. Although we are in ongoing negotiations with insurance companies and expect to finalize all insurance recoveries within the next few quarters, we cannot estimate the timing of the receipt of insurance proceeds we will ultimately realize.

As a result of the flooding, we have been unable to renew or otherwise obtain adequate cost-effective flood insurance to cover assets at our facilities in Thailand. We continue to investigate all flood risk-mitigation alternatives in Thailand. We maintain insurance on all our properties and operations—including our assets in Thailand—for risks and in amounts customary in the

industry. Such insurance includes general liability, property & casualty, and directors & officers liability coverage. Not all losses are insured, and we retain certain risks of loss through deductibles, limits and self-retentions. In the event we were to experience a significant uninsured loss in Thailand or elsewhere, it could have a material adverse effect on our business, financial condition and results of operations.

Summary of 2013 Results

Sales for the three months ended September 30, 2013, decreased 2% to \$599.7 million compared to \$610.8 million for the same period of 2012. During the three months ended September 30, 2013, sales to customers in the computers and related products for business enterprises industry and telecommunication equipment industry, decreased 1%, and 29% respectively, from 2012. In the third quarter of 2013, these decreases were partially offset by 12%, 40% and 11% increases in sales to customers in industrial control equipment industry, testing and instrumentation products industry, and medical devices industry, respectively. The decrease in sales is primarily due to the timing of new program ramps and market uncertainty in the global economy which has led to lower demand from our existing customers, most notably in the telecommunication equipment industry.

Our future sales are dependent on the success of our customers, some of which operate in businesses associated with rapid technological change and consequent product obsolescence. Developments adverse to our major customers or their products, or the failure of a major customer to pay for components or services, could have an adverse effect on us. A substantial percentage of our sales have been made to a small number of customers, and the loss of a major customer, if not replaced, would adversely affect us. Sales to our ten largest customers represented 52% and 55% of our sales in the three months ended September 30, 2013, and 2012, respectively. Our largest customer represented 15% and 20% of our sales during the three months ended September 30, 2013 and 2012, respectively.

Our gross profit as a percentage of sales increased to 7.6% for the three months ended September 30, 2013 from 7.3% in the same period of 2012, primarily due to changes in the mix of programs and the impact of the Suntron acquisition. We experience fluctuations in gross profit from period to period. Different programs contribute different gross profits depending on factors such as the types of services involved, location of production, size of the program, complexity of the product, and level of material costs associated with the various products. Moreover, new programs can contribute relatively less to our gross profit in their early stages when manufacturing volumes are usually lower, resulting in inefficiencies and unabsorbed manufacturing overhead costs. In addition, a number of our new and higher volume programs remain subject to competitive constraints that could exert downward pressure on our margins. During periods of low production volume, we generally have idle capacity and reduced gross profit.

We have undertaken initiatives to restructure our business operations with the intention of improving utilization and realizing cost savings in the future. During the nine months ended September 30, 2013, we recognized \$7.3 million of restructuring charges and integration and acquisition-related costs, primarily related to capacity reduction and reductions in workforce in certain facilities across various regions, primarily in the Americas and Asia in connection with the closure of our Brazil and Singapore facilities. We expect these 2013 restructuring activities to result in annualized cost savings of approximately \$4 million. The majority of these annual cost

savings is expected to be reflected as a reduction in cost of revenue as well as a reduction in selling, general and administrative expenses. We expect to begin realizing a portion of these savings in the fourth quarter of 2013.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Management's discussion and analysis of financial condition and results of operations is based upon our condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. Our significant accounting policies are summarized in Note 1 to the Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 31, 2012. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates, including those related to accounts receivable, inventories, income taxes, long-lived assets and goodwill, stock-based compensation and contingencies and litigation. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ materially from these estimates. We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements.

Allowance for Doubtful Accounts

Our accounts receivable balance is recorded net of allowances for amounts not expected to be collected from our customers. Because our accounts receivable are typically unsecured, we periodically evaluate the collectibility of our accounts based on a combination of factors, including a particular customer's ability to pay as well as the age of the receivables. To evaluate a specific customer's ability to pay, we analyze financial statements, payment history and various information or disclosures by the customer or other publicly available information. In cases where the evidence suggests a customer may not be able to satisfy its obligation to us, we establish a specific allowance in an amount we determine appropriate for the perceived risk. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

Inventory Obsolescence Reserve

We purchase inventory based on forecasted demand and record inventory at the lower of cost or market. We reserve for estimated obsolescence as necessary in an amount equal to the difference between the cost of inventory and estimated market value based on assumptions of future demands and market conditions. We evaluate our inventory valuation on a quarterly basis based on current and forecasted usage and the latest forecasts of product demand and production requirements from our customers. Customers frequently make changes to their forecasts, requiring us to make changes to our inventory purchases, commitments, and production scheduling and may require us to cancel open purchase commitments with our vendors. This process may lead to on-hand inventory quantities and on-order purchase commitments that are in excess of our customers' revised needs, or parts that become obsolete before use in production. We record inventory reserves on excess and obsolete inventory. These reserves are established on inventory which we have determined our customers are not responsible for or on inventory which

we believe our customers will be unable to fulfill their obligation to ultimately purchase. If actual market conditions are less favorable than those we projected, additional inventory write-downs may be required.

Income Taxes

We estimate our income tax provision in each of the jurisdictions in which we operate, including estimating exposures related to uncertain tax positions. We must also make judgments regarding the ability to realize the deferred tax assets. We record a valuation allowance to reduce our deferred tax assets to the amount that is more likely than not to be realized. Our valuation allowance against deferred tax assets relates primarily to our United States net operating loss tax carryforwards and United States tax credit carryforwards. Differences in our future operating results as compared to the estimates utilized in the determination of the valuation allowances could result in adjustments in valuation allowances in future periods. For example, a significant increase in our U.S. operations, future accretive acquisitions in the United States and any movement in profits from our international operations to the United States could result in a reduction in the valuation allowance and would increase income in the period such determination was made. Alternatively, significant economic downturns in the United States generating additional operating loss carryforwards and potential movements in profits to international locations could result in an increase in the valuation allowance and would decrease income in the period such determination was made.

We are subject to examination by tax authorities for varying periods in various U.S. and foreign tax jurisdictions. During the course of such examinations, disputes may occur as to matters of fact and/or law. In most tax jurisdictions the passage of time without examination will result in the expiration of applicable statutes of limitations, thereby precluding the taxing authority from conducting an examination of the tax period(s) for which such statute of limitations has expired. We believe that we have adequately provided for our tax liabilities.

Our subsidiary in Thailand has filed for a refund of \$8.4 million of previously paid income taxes for years 2004 and 2005, which is included in other assets. We have a reserve for uncertain tax benefits of \$7.1 million against this refund claim. The Thai tax authorities conducted an initial examination of the applicable refund filings. During the fourth quarter of 2012, we received official notice that the tax authorities have rejected our refund claim. We have filed an appeal of the rejected refund claim.

Impairment of Long-Lived Assets and Goodwill

Long-lived assets, such as property, plant, and equipment, and purchased intangibles subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated undiscounted future cash flows, an impairment charge would be recognized by the amount that the carrying amount of the asset exceeds the fair value of the asset.

Goodwill is assessed annually for impairment, and is assessed for impairment more frequently if events and circumstances indicate that the asset might be impaired. An impairment loss would be recognized to the extent that the carrying amount exceeds the asset's fair value. For purposes of

performing our goodwill impairment assessment, our reporting units are the same as our operating segments as defined in Note 8 to the Condensed Consolidated Financial Statements in Item 1 of this report. As of September 30, 2013, we had goodwill, all of which is associated with our Asia business segment, of approximately \$37.9 million. Beginning in 2012, we elected to perform a qualitative assessment for our annual goodwill impairment test. If the qualitative assessment indicates that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, or if we elect to not perform a qualitative assessment, then we would be required to perform a quantitative impairment test for goodwill. This two-step process involves determining the fair values of the reporting units and comparing those fair values to the carrying values, including goodwill, of the reporting unit.

Based on our qualitative assessment of goodwill as of December 31, 2012, we concluded that it was more likely than not that the fair value of our Asia business segment was greater than its carrying amount, and therefore no further testing was required.

Changes in economic and operating conditions that occur after the annual impairment analysis or an interim impairment analysis, and that impact these assumptions, may result in a future goodwill impairment charge.

Stock-Based Compensation

We recognize stock-based compensation expense in our consolidated statements of income. The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model. Option-pricing models require the input of subjective assumptions, including the expected life of the option and the expected stock price volatility. Judgment is also required in estimating the number of stock-based awards that are expected to vest as a result of satisfaction of time-based vesting schedules. If actual results or future changes in estimates differ significantly from our current estimates, stock-based compensation could increase or decrease. For restricted stock unit awards with performance conditions, compensation expense is based on the probability that the performance goals will be achieved, which is monitored by management throughout the requisite service period. If it becomes probable, based on our expectation of performance during the measurement period, that more or less than the previous estimate of the awarded shares will vest, an adjustment to stock-based compensation expense will be recognized as a change in accounting estimate. See Note 2 to the Condensed Consolidated Financial Statements in Item 1 of this report.

Recently Enacted Accounting Principles

See Note 11 to the Condensed Consolidated Financial Statements for a discussion of recently enacted accounting principles.

RESULTS OF OPERATIONS

The following table presents the percentage relationship that certain items in our Condensed Consolidated Statements of Income bear to sales for the periods indicated. The financial information and the discussion below should be read in conjunction with the Condensed Consolidated Financial Statements and Notes thereto in Item 1 of this report.

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
Sales	100.0 %	100.0 %	100.0 %	100.0 %
Cost of sales	<u>92.4</u>	<u>92.7</u>	<u>92.8</u>	<u>92.8</u>
Gross profit	7.6	7.3	7.2	7.2
Selling, general and administrative expenses	4.1	3.7	4.0	3.7
Restructuring charges and integration and acquisition-related costs	0.2	0.0	0.4	0.0
Asset impairment charge and other	0.0	0.0	0.1	0.0
Thailand flood related items	<u>(1.6)</u>	<u>(0.5)</u>	<u>(0.6)</u>	<u>0.6</u>
Income from operations	4.9	4.1	3.2	2.8
Other income, net	<u>0.1</u>	<u>0.0</u>	<u>0.0</u>	<u>(0.0)</u>
Income before income taxes	5.0	4.1	3.2	2.8
Income tax expense	<u>1.1</u>	<u>0.9</u>	<u>0.7</u>	<u>0.7</u>
Net income	<u>4.0 %</u>	<u>3.2 %</u>	<u>2.5 %</u>	<u>2.1 %</u>

Sales

Sales for the third quarter of 2013 were \$599.7 million, a 2% decrease from sales of \$610.8 million for the same quarter in 2012. Sales for the first nine months of 2013 were \$1.7 billion, a 5% decrease from sales of \$1.8 billion for the same period in 2012. The decrease in sales is primarily due to the timing of new program ramps and market uncertainty in the global economy which has led to lower demand from our existing customers, most notably in the computers and related products for business enterprises and telecommunication equipment industries. The following table sets forth, for the periods indicated, the percentages of our sales by industry sector.

	Three Months Ended		Nine Months Ended	
	September 30, 2013	2012	September 30, 2013	2012
Computers and related products for business enterprises	30 %	30 %	28 %	31 %
Industrial control equipment	31	27	30	27
Telecommunication equipment	20	28	23	26
Medical devices	12	10	12	9
Testing and instrumentation products	7	5	7	7
	<u>100 %</u>	<u>100 %</u>	<u>100 %</u>	<u>100 %</u>

Computers and Related Products for Business Enterprises Sales to customers in the computers and related products for business enterprises industry for the third quarter of 2013 decreased 1% to \$182.0 million from \$183.1 million for the same quarter of 2012, and decreased 12% to \$ 496.5 million during the first nine months of 2013 from \$563.3 million in the same period of 2012. The decrease in sales is primarily due to the timing of program ramps and transitions as well as lower demand from our customers.

Industrial Control Equipment Sales to customers in the industrial control equipment industry (which includes equipment for the aerospace and defense industry) for the third quarter of 2013 increased 12% to \$186.6 million from \$167.2 million for the same quarter of 2012, and increased 8% to \$ 528.0 million during the first nine months of 2013 from \$491.1 million in the same period of 2012 primarily as a result of new customers, new program wins and the impact of the Suntron acquisition.

Telecommunication Equipment Sales to customers in the telecommunication equipment industry for the third quarter of 2013 decreased 29% to \$120.5 million from \$169.1 million for the same quarter of 2012, and decreased 17% to \$ 397.1 million during the first nine months of 2013 from \$477.5 million in the same period of 2012. The decrease in sales is primarily due to lower demand from our customers and timing of program ramps and transitions. In addition, in the first nine months of 2012, our telecommunication sector had a strong rebound as a result of the recovery from the Thailand flooding and the timing of new program ramps.

Medical Devices Sales to customers in the medical devices industry for the third quarter of 2013 increased 11% to \$67.6 million from \$60.7 million for the same quarter of 2012, and increased 18% to \$ 208.9 million during the first nine months of 2013 from \$177.3 million in the same period of 2012 as a result of new program wins.

Testing and Instrumentation Products Sales to customers in the testing and instrumentation products industry for the third quarter of 2013 increased 40% to \$43.0 million from \$30.7 million for the same quarter of 2012 as a result of improvement in the semiconductor industry, and decreased 5% to \$ 119.1 million during the first nine months of 2013 from \$125.0 million in the same period of 2012 as a result of a slowdown in the semiconductor industry and market uncertainty in the global economy.

Our future sales are dependent on the success of our customers, some of which operate in businesses associated with rapid technological change and consequent product obsolescence. Developments adverse to our major customers or their products, or the failure of a major customer to pay for components or services, could have an adverse effect on us. A substantial percentage of our sales have been made to a small number of customers, and the loss of a major customer, if not replaced, would adversely affect us. Sales to our ten largest customers represented 52% and 57% of our sales in the nine months ended September 30, 2013 and 2012, respectively. Our largest customer represented 16% and 20% of our sales during the nine months ended September 30, 2013 and 2012, respectively.

Our international operations are subject to the risks of doing business abroad. See Part II, Item 1A of this report for factors pertaining to our international sales and fluctuations in the exchange rates of foreign currency and for further discussion of potential adverse effects in operating results associated with the risks of doing business abroad. During the first nine months of 2013 and 2012, 52% and 50%, respectively, of our sales were from our international operations.

Gross Profit

Gross profit increased 1% to \$45.4 million for the three months ended September 30, 2013 from \$44.8 million in the same period of 2012 primarily due to changes in the mix of programs and the impact of the Suntron acquisition. Gross profit decreased 4% to \$126.6 million for the nine months ended September 30, 2013 from \$131.3 million in the same period of 2012 primarily due to a decrease in sales. Gross profit as a percentage of sales increased to 7.6% for the three months ended September 30, 2013 from 7.3% in the same period of 2012, primarily due to changes in the mix of programs. Gross profit as a percentage of sales was 7.2% during the first nine months of both 2013 and 2012. We experience fluctuations in gross profit from period to period. Different programs contribute different gross profits depending on factors such as the types of services involved, location of production, size of the program, complexity of the product and level of material costs associated with the various products. Moreover, new programs can contribute relatively less to our gross profit in their early stages when manufacturing volumes are usually lower, resulting in inefficiencies and under-absorbed manufacturing overhead costs. In addition, a number of our new and higher volume programs remain subject to competitive constraints that could exert downward pressure on our margins. During periods of low production volume, we generally have idle capacity and reduced gross profit.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased by 9% to \$24.5 million in the third quarter of 2013 compared to \$22.5 million in the third quarter of 2012, and increased by 4% to \$70.2 million in the first nine months of 2013 compared to \$67.7 million in the first nine months of 2012 primarily as a result of the Suntron acquisition. Selling, general and administrative

expenses, as a percentage of sales, were 4.1% and 3.7%, respectively, for the third quarters of 2013 and 2012, and 4.0% and 3.7%, respectively, for the first nine months of 2013 and 2012. The increase in selling, general and administrative expenses as a percentage of sales is primarily associated with the impact of the Suntron acquisition and lower sales volumes in 2013.

Restructuring Charges

We recognized restructuring charges during the first nine months of 2013 primarily related to the closure of our Brazil and Singapore facilities, and we expect to incur approximately \$2 million in additional restructuring charges during the fourth quarter of 2013. We expect these 2013 restructuring activities to result in annualized cost savings of approximately \$4 million. The majority of these annual cost savings is expected to be reflected as a reduction in cost of revenue as well as a reduction in selling, general and administrative expenses. We expect to begin realizing a portion of these savings in the fourth quarter of 2013. The recognition of these restructuring charges requires that we make certain judgments and estimates regarding the nature, timing and amount of costs associated with planned exit activities. To the extent our actual results in exiting these facilities differ from our estimates and assumptions, we may be required to revise the estimates of future liabilities, recognize additional restructuring charges or reduce already recognized liabilities. At the end of each reporting period, we evaluate the remaining accrued balances to ensure that no excess accruals are retained and that the utilization of the provisions are for their intended purpose in accordance with developed exit plans. See Note 12 to the Condensed Consolidated Financial Statements in Item 1 of this report.

Asset Impairment Charge and Other

During the nine months ended September 30, 2013, we recognized a non-cash asset impairment charge of \$3.8 million related to our facility in Tianjin, China that is being held for sale based on recent market activity. Also during the nine months ended September 30, 2013, we disposed of a non-manufacturing facility in Thailand for \$1.6 million resulting in a gain of \$1.2 million.

Thailand Flood Related Items

During the nine months ended September 30, 2013, we received \$9.8 million of insurance proceeds and incurred \$0.1 million of Thailand flood related costs. During the nine months ended September 30, 2012, we recognized additional flood related charges totaling \$16.0 million offset by insurance recoveries totaling \$4.2 million. We will record additional insurance recoveries when the appropriate recognition criteria have been met. See Note 14 to the Condensed Consolidated Financial Statements in Item 1 of this report.

Income Tax Expense

Income tax expense of \$12.7 million represented an effective tax rate of 22.6% for the nine months ended September 30, 2013, compared with \$12.4 million that represented an effective tax rate of 24.4% for the same period in 2012. In the first quarter of 2013, we recorded a discrete tax benefit of approximately \$0.8 million related to the American Taxpayer Relief Act of 2012 (ATRA) consisting of research and experimentation credits and decreases in U.S. taxable income related to previously taxed foreign transactions. The ATRA retroactively restored the research and experimentation credit and other U.S. income tax benefits for 2012 and extends these provisions through the end of 2013. In 2012, we recorded a \$0.6 million discrete tax expense related to changes in tax rates in foreign jurisdictions. Excluding these tax items, the effective tax rate would have been 24.1% in 2013 compared to 23.1% in 2012. The increase in the effective tax rate is a result of losses in certain foreign jurisdictions for which no tax benefit has been provided

and the expiration of the China tax incentive. We have been granted certain tax incentives, including tax holidays, for our subsidiaries in Malaysia and Thailand that will expire at various dates, unless extended or otherwise renegotiated through 2015 and 2026, respectively. Our Chinese subsidiary had a tax incentive that expired in 2012 and we have filed for a new tax incentive in 2013. See Note 7 to the Condensed Consolidated Financial Statements in Item 1 of this report.

Net Income

We reported net income of \$43.7 million, or diluted earnings per share of \$0.80 for the first nine months of 2013, compared with net income of \$38.5 million, or diluted earnings per share of \$0.67 for the same period of 2012. The net increase of \$5.2 million from 2012 was primarily due to the factors discussed above.

LIQUIDITY AND CAPITAL RESOURCES

We have historically financed our growth and operations through funds generated from operations and proceeds from the sale and maturity of our investments. Cash and cash equivalents totaled \$426.6 million at September 30, 2013 and \$384.6 million at December 31, 2012, of which \$319.7 million at September 30, 2013 and \$261.2 million at December 31, 2012 was held outside the U.S. in various foreign subsidiaries. Substantially all of the amounts held outside of the U.S. are intended to be permanently reinvested in foreign operations. Under current tax laws and regulations, if cash and cash equivalents held outside the U.S. were to be distributed to the U.S. in the form of dividends or otherwise, we would be subject to additional U.S. income taxes and foreign withholding taxes.

Cash provided by operating activities was \$99.9 million for the nine months ended September 30, 2013, which included \$9.8 million of Thailand flood insurance recoveries. The cash provided by operations during 2013 consisted primarily of \$43.7 million of net income adjusted for \$29.6 million of depreciation and amortization, and a \$24.5 million increase in accounts payable. Working capital was \$924.7 million at September 30, 2013 and \$883.7 million at December 31, 2012.

We are continuing the practice of purchasing components only after customer orders or forecasts are received, which mitigates, but does not eliminate, the risk of loss on inventories. Supplies of electronic components and other materials used in operations are subject to industry-wide shortages. In certain instances, suppliers may allocate available quantities to us. If shortages of these components and other material supplies used in operations occur, vendors may not ship the quantities we need for production and we may be forced to delay shipments, which would increase backorders and therefore impact cash flows.

Cash used in investing activities was \$37.6 million for the nine months ended September 30, 2013 primarily due to the purchase of Suntron, net of cash acquired totaling \$19.3 million and the purchases of additional property, plant and equipment totaling \$18.3 million. Purchases of additional property, plant and equipment were primarily of machinery and equipment in the Americas and Asia.

Cash used in financing activities was \$20.4 million for the nine months ended September 30, 2013. Share repurchases totaled \$30.7 million, and we received \$10.4 million from the exercise of

stock options.

Under the terms of a credit agreement (the U.S. Credit Agreement), we have a \$200.0 million five-year revolving credit facility to be used for general corporate purposes with a maturity date of July 30, 2017. The U.S. Credit Agreement includes an accordion feature under which total commitments under the facility may be increased by an additional \$100 million, subject to satisfaction of certain conditions and lender approval. Interest on outstanding borrowings under the U.S. Credit Agreement is payable quarterly, at our option, at LIBOR plus 1.75% to 2.75% or a prime rate plus 0.75% to 1.75%, based upon our leverage ratio as specified in the U.S. Credit Agreement. A commitment fee of 0.30% to 0.40% per annum (based upon our liquidity ratio) on the unused portion of the revolving credit line is payable quarterly in arrears. As of September 30, 2013 and December 31, 2012, we had no borrowings outstanding under the U.S. Credit Agreement, \$0.8 million in outstanding letters of credit and \$199.2 million was available for future borrowings.

The U.S. Credit Agreement is secured by our domestic inventory and accounts receivable, 100% of the stock of our domestic subsidiaries and 65% of the voting capital stock of each direct foreign subsidiary and substantially all of our and our domestic subsidiaries' other tangible and intangible assets. The U.S. Credit Agreement contains customary financial covenants as to debt leverage and fixed charges, and restricts our ability to incur additional debt, pay dividends, repurchase shares, sell assets and merge or consolidate with other persons. As of both September 30, 2013 and December 31, 2012, we were in compliance with all such covenants and restrictions.

Our Thailand subsidiary has a multi-purpose credit facility with Kasikornbank Public Company Limited (the Thai Credit Facility) that provides for approximately \$11.1 million (350 million Thai baht) in working capital availability. The Thai Credit Facility is secured by land and buildings in Thailand owned by the Company. The availability of funds under the Thai Credit Facility is reviewed annually and is currently accessible through October 2014. As of both September 30, 2013 and December 31, 2012, our Thailand subsidiary had no working capital borrowings outstanding.

Our operations, and the operations of businesses we acquire, are subject to certain foreign, federal, state and local regulatory requirements relating to environmental, waste management, health and safety matters. We believe we operate in substantial compliance with all applicable requirements and we seek to ensure that newly acquired businesses comply or will comply substantially with applicable requirements. To date, the costs of compliance and workplace and environmental remediation have not been material to us. However, material costs and liabilities may arise from these requirements or from new, modified or more stringent requirements in the future. In addition, our past, current and future operations, and the operations of businesses we have or may acquire, may give rise to claims of exposure by employees or the public, or to other claims or liabilities relating to environmental, waste management or health and safety concerns.

As of September 30, 2013, we had cash and cash equivalents totaling \$426.6 million and \$199.2 million available for borrowings under the U.S. Credit Agreement. During the next twelve months, we believe our capital expenditures will be approximately \$35 million to \$45 million, principally for machinery and equipment to support our ongoing business around the globe.

On June 13, 2012, our Board of Directors approved the additional repurchase of up to \$100 million of our outstanding common shares (the 2012 Repurchase Program). As of September 30, 2013, we have \$57.4 million remaining under the 2012 Repurchase Program to repurchase additional shares. We are under no commitment or obligation to repurchase any particular amount of common shares. Management believes that our existing cash balances and funds generated from operations will be sufficient to permit us to meet our liquidity requirements over the next twelve months. Management further believes that our ongoing cash flows from operations and any borrowings we may incur under our credit facilities will enable us to meet operating cash requirements in future years. Should we desire to consummate significant acquisition opportunities, our capital needs would increase and could possibly result in our need to increase available borrowings under our revolving credit facility or access public or private debt and equity markets. There can be no assurance, however, that we would be successful in raising additional debt or equity on terms that we would consider acceptable.

CONTRACTUAL OBLIGATIONS

We have certain contractual obligations for operating leases that were summarized in a table of Contractual Obligations in our Annual Report on Form 10-K for the year ended December 31, 2012. There have been no material changes to our contractual obligations, outside of the ordinary course of our business, since December 31, 2012.

OFF-BALANCE SHEET ARRANGEMENTS

As of September 30, 2013, we did not have any significant off-balance sheet arrangements.

Item 3 – Quantitative and Qualitative Disclosures About Market Risk

Our international sales are a significant portion of our net sales; we are exposed to risks associated with operating internationally, including the following:

- Foreign currency exchange risk
- Import and export duties, taxes and regulatory changes;
- Inflationary economies or currencies; and
- Economic and political instability.

Additionally, some of our operations are in developing countries. Certain events, including natural disasters, can impact the infrastructure of a developing country more severely than they would impact the infrastructure of a developed country. A developing country can also take longer to recover from such events, which could lead to delays in our ability to resume full operations.

We do not use derivative financial instruments for speculative purposes. As of September 30, 2013, we did not have any foreign currency hedges. In the future, significant transactions involving our international operations may cause us to consider engaging in hedging transactions to attempt to mitigate our exposure to fluctuations in foreign exchange rates. These exposures are primarily, but not limited to, vendor payments and intercompany balances in currencies other than the currency in which our foreign operations primarily generate and expend cash. Our international operations in some instances operate in a natural hedge because both operating expenses and a portion of sales are denominated in local currency. Our sales are substantially denominated in U.S. dollars. Our foreign currency cash flows are generated in certain Asian and European countries, Mexico and Brazil.

We are also exposed to market risk for changes in interest rates, a portion of which relates to our invested cash balances. We do not use derivative financial instruments in our investing activities. We place cash and cash equivalents and investments with various major financial institutions. We protect our invested principal funds by limiting default risk, market risk and reinvestment risk. We mitigate default risk by generally investing in investment grade securities. As of September 30, 2013, the outstanding amount in the long-term investment portfolio included \$12.2 million (par value) of auction rate securities with an average annual return of approximately 0.12%.

Item 4 – Controls and Procedures

Our management has evaluated, with the participation of our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this Quarterly Report on Form 10-Q. Based upon such evaluation, our CEO and CFO have concluded that, as of such date, our disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by us in the reports filed or submitted by us under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms, and include controls and procedures designed to ensure that information required to be disclosed by us in such reports is accumulated and communicated to management, including our CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

There have been no changes in our internal control over financial reporting that occurred during the fiscal period covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Our management, including our CEO and CFO, does not expect that our disclosure controls and internal controls will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within our company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple errors or mistakes. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, a control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Exhibits 31.1 and 31.2 are the Certifications of the CEO and the CFO, respectively. The Certifications are required in accordance with Section 302 of the Sarbanes-Oxley Act of 2002 (the “Section 302 Certifications”). This Item is the information concerning the Evaluation referred to in the Section 302 Certifications, and this information should be read in conjunction with the Section 302 Certifications for a more complete understanding of the topics presented.

PART II—OTHER INFORMATION

Item 1. Legal Proceedings

We are involved in various legal actions arising in the ordinary course of business. In the opinion of management, the ultimate disposition of these matters will not have a material adverse effect on our consolidated financial position or results of operations.

Item 1A. Risk Factors

The risk factor set forth below is in addition to the risk factors set forth in Part I, Item 1A in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

Item 2. Unregistered Sales Of Equity Securities And Use Of Proceeds

(c) The following table provides information about the Company repurchases of its equity securities that are registered pursuant to Section 12 of the Exchange Act during the quarter ended September 30, 2013, at a total cost of \$9.4 million:

ISSUER PURCHASES OF EQUITY SECURITIES

Period	(a) Total Number of Shares Purchased ⁽¹⁾	(b) Average Price Paid per Share ⁽²⁾	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs ⁽³⁾
July 1 to 31, 2013	181,150	\$ 20.70	181,150	\$ 63.0 million
August 1 to 31, 2013	90,000	\$ 22.63	90,000	\$ 61.0 million
September 1 to 30, 2013	160,000	\$ 22.70	160,000	\$ 57.4 million
Total	431,150	\$ 21.84	431,150	

⁽¹⁾ All share repurchases were made on the open market.

⁽²⁾ Average price paid per share is calculated on a settlement basis and excludes commission.

⁽³⁾ On June 13, 2012, the Board of Directors approved the additional repurchase of up to \$100 million of our outstanding common shares (the 2012 Repurchase Program). Share purchases may be made in the open market, in privately negotiated transactions or block transactions, at the discretion of the Company's management and as market conditions warrant. Purchases will be funded from available cash and may be commenced, suspended or discontinued at any time without prior notice. Shares repurchased under the program will be retired.

During the nine months ended September 30, 2013, the Company repurchased a total of 1.6 million common shares for \$30.7 million at an average price of \$18.78 per share. All share purchases were made in the open market and the shares repurchased through September 30, 2013 were retired.
