VITAMIN SHOPPE First Quarter 2019 GAAP Reconciliation

Non-GAAP Financial Measures

Adjusted information is non-GAAP financial information. These supplemental non-GAAP measures should not be considered superior to, or a substitute for, and should be considered in conjunction with the GAAP financial measures presented. The Company believes such non-GAAP financial information facilitates analysis and comparisons of our ongoing business operations because it excludes items that may not be indicative of, or are unrelated to the Company's core operating performance, and may assist investors with comparisons to prior periods and assessing trends in our underlying business. These adjustments are consistent with how management views our business. Management uses such non-GAAP financial information in making financial, operating and planning decisions and evaluating the Company's ongoing performance. A reconciliation of adjusted financial information to the most directly comparable financial measures calculated and presented in accordance with GAAP are shown in Tables 1 and 2.

The Company defines Adjusted EBITDA as EBITDA (net income before interest expense, net, provision for income taxes, depreciation and amortization), as further adjusted to exclude the effects of certain income and expense items that management believes make it more difficult to assess the Company's actual operating performance including certain items which are generally non-recurring. The Company has excluded the impact of such items from internal performance assessments. The Company believes that excluding such items helps investors compare operating performance with the results in prior periods. The Company believes it is appropriate to exclude these items as they are not related to ongoing operating performance and, therefore, limit comparability between periods. (See Table 2 for a reconciliation of 1Q19 and 1Q18 Adjusted EBITDA.)

A reconciliation of the projected Adjusted EBITDA which is a forward-looking non-GAAP financial measure, to projected net income is not provided because the company is unable to provide such reconciliation without unreasonable effort. The inability to provide a reconciliation is due to the uncertainty and inherent difficulty predicting the individual items that are added to, or subtracted from, net income in order to derive Adjusted EBITDA.
