Note: See page 8 for a statement on the Company's use of non-GAAP financial measures and a reconciliation of Leasing operating profit to Real Estate Leasing NOI and Real Estate Leasing same store NOI.

Statement on Management's Use of Non-GAAP Financial Measures

Net operating income (NOI) is a non-GAAP measure derived from real estate revenues (determined in accordance with GAAP, less straight-line rental adjustments) minus property operating expenses (determined in accordance with GAAP). NOI does not have any standardized meaning prescribed by GAAP, and therefore, may differ from definitions of NOI used by other companies. NOI should not be considered as an alternative to net income (determined in accordance with GAAP) as an indicator of the Company's financial performance, or as an alternative to cash flow from operating activities as a measure of the Company's liquidity. NOI is commonly used as a measure of operating performance because it is an indicator of the return on property investment, and provides a method of comparing property performance over time. NOI excludes general and administrative expenses, straight-line rental adjustments, interest income, interest expense, depreciation and amortization, and gains on sales of interests in real estate. The Company believes that the Real Estate Leasing segment's operating profit after discontinued operations is the most directly comparable GAAP measurement to NOI. A reconciliation of Real Estate Leasing operating profit to Real Estate Leasing segment NOI and same store NOI is as follows:

TABLE 14

RECONCILIATION OF REAL ESTATE OPERATING PROFIT TO NOI AND SAME STORE NOI (NON-GAAP)
