DUBLIN - February 2, 2024 - Aon plc (NYSE: AON) today reported results for the three and twelve months ended December 31, 2023.

Net income per share attributable to Aon shareholders in the fourth quarter decreased 24%, or $2.47 per share on a diluted basis, compared to $3.14 per share on a diluted basis, in the prior year period. Net income per share attributable to Aon shareholders, adjusted for certain items, was flat at $3.89 on a diluted basis for the quarter, including a favorable impact of $0.03 per share if prior year period results were translated at current period foreign exchange rates ("foreign currency translation"). Certain items that impacted fourth quarter results and comparisons with the prior year period are detailed in "Reconciliation of Non-GAAP Measures - Operating Income and Diluted Earnings Per Share" on page 10 of this press release.

"In the fourth quarter and full year, our colleagues delivered 7% organic revenue growth, highlighted by double-digit growth in Reinsurance Solutions and Health Solutions. This top line growth contributed to full year adjusted margin expansion of 80 basis points, adjusted operating income growth of 10%, and $3.2 billion of free cash flow.” said Greg Case, Chief Executive Officer. "This strong performance demonstrates how we are going further, faster with our 3x3 plan, which is an acceleration of our proven Aon United strategy. Our Risk Capital and Human Capital structure has unlocked new opportunities to grow, and Aon Business Services is a catalyst for innovation delivering new products and tools at scale across client segments and geographies.”
FOURTH QUARTER 2023 FINANCIAL SUMMARY

**Total revenue** in the fourth quarter increased 8% to $3.4 billion compared to the prior year period reflecting 7% organic revenue growth, a 2% favorable impact from foreign currency translation, and a 1% favorable impact from fiduciary investment income, partially offset by a 2% unfavorable impact from acquisitions, divestitures and other.

**Total operating expenses** in the fourth quarter increased 23% to $2.6 billion compared to the prior year period due primarily to an increase in expense associated with 7% organic revenue growth, investments in long-term growth, a $197 million charge in connection with certain accrued actual or anticipated legal settlement expenses, and a $40 million unfavorable impact from foreign currency translation.

**Foreign currency** translation in the fourth quarter had a $6 million, or $0.03 per share, favorable impact on U.S. GAAP net income and a $7 million, or $0.03 per share, favorable impact on adjusted net income. If currency were to remain stable at today’s rates, the Company would expect a favorable impact of approximately $0.03 per share, or an approximately $9 million increase in adjusted operating income, in the first quarter of 2024, and a favorable impact of approximately $0.02 per share, or an approximately $6 million increase in adjusted operating income, for full year 2024.

**Effective tax rate** for the fourth quarter was 16.7%, compared to 6.1% in the prior year period, primarily driven by changes in the geographical distribution of income and a lower net favorable impact from discrete items than in the prior year period. After adjusting to exclude the applicable tax impact associated with certain non-GAAP adjustments, the adjusted effective tax rate for the fourth quarter of 2023 was 18.2% compared to 9.0% in the prior year period. The primary drivers of the change in the adjusted tax rate were the geographical distribution of income and a lower net favorable impact from discrete items than in the prior year period. These adjustments are discussed in "Reconciliation of Non-GAAP Measures - Operating Income and Diluted Earnings Per Share" on page 10 of this press release.

**Weighted average diluted shares outstanding** decreased to 202.0 million in the fourth quarter compared to 209.3 million in the prior year period. The Company repurchased 2.3 million class A ordinary shares for approximately $0.8 billion in the fourth quarter. As of December 31, 2023, the Company had approximately $3.3 billion of remaining authorization under its share repurchase program.

FULL YEAR 2023 CASH FLOW SUMMARY

The full year 2023 cash flow summary provided below includes supplemental information related to free cash flow, which is a non-GAAP measure that is described in detail in "Reconciliation of Non-GAAP Measures - Organic Revenue Growth and Free Cash Flow" on page 9 of this press release.

**Cash flows provided by operations** for 2023 increased $216 million, or 7%, to $3,435 million compared to the prior year period, reflecting strong operating income growth and overall working capital optimization, partially offset by a negative impact to working capital due to temporary invoicing delays associated with the implementation of a new system, and higher cash tax payments.

**Free cash flow**, defined as cash flow from operations less capital expenditures, increased 5%, to $3,183 million in 2023 compared to the prior year, reflecting an increase in cash flows from operations, partially offset by a $56 million increase in capital expenditures, due primarily to ongoing investments in Aon Business Services-enabled technology platforms and technology to drive long-term-growth.

Total revenue increased $245 million, or 8%, to $3,375 million, compared to the prior year period, including organic revenue growth of 7% driven by ongoing strong retention, net new business generation, and management of the renewal book, a 2% favorable impact from foreign currency translation, and a 1% favorable impact from fiduciary investment income, partially offset by a 2% unfavorable impact from acquisitions, divestitures and other.

Commercial Risk Solutions organic revenue growth of 4% reflects solid growth across most major geographies driven by strong retention, management of the renewal book, and net new business generation. Growth in retail brokerage was highlighted by double-digit growth in Asia and the Pacific, driven by continued strength in core P&C. The U.S. grew modestly driven by strength in property, casualty, and construction, partially offset by the impact of external M&A and IPO markets. On average globally, exposures and pricing were positive, resulting in modestly positive market impact.

Reinsurance Solutions organic revenue growth of 14% reflects strong growth in treaty, driven by strong retention and continued net new business generation, as well as strong growth in facultative placements and investment banking. Market impact was modestly positive on results in the quarter. The majority of revenue in our treaty portfolio is recurring in nature and is recorded in connection with the major renewal periods that take place throughout the first half of the year, while the second half of the year is typically driven by facultative placements, capital markets activity, and advisory work that is more transactional in nature.

Health Solutions organic revenue growth of 11% reflects strong growth globally in core health and benefits brokerage primarily from net new business generation and management of the renewal book. Strength in the core was highlighted by double-digit growth in most major geographies. Results also reflect double-digit growth in Consumer Benefit Solutions and modest growth in Talent.

Wealth Solutions organic revenue growth of 5% reflects strong growth in Retirement, driven by advisory demand and project-related work related to pension de-risking and ongoing impact of regulatory changes. In Investments, a modest increase in AUM-based delegated investment revenue was offset by a decline in advisory.

Any or all of Aon’s forward-looking statements may turn out to be inaccurate, and there are no guarantees about Aon’s performance. The factors identified above are not exhaustive. Aon and its subsidiaries operate in a dynamic business environment in which new risks may emerge frequently. Further information concerning Aon and its businesses, including factors that potentially could materially affect Aon’s financial results, is contained in Aon’s filings with the SEC. See Aon’s Annual Report on Form 10-K for the year ended December 31, 2022 for a further discussion of these and other risks and uncertainties applicable to Aon and its businesses. Explanation of Non-GAAP Measures
This communication includes supplemental information not calculated in accordance with generally accepted accounting principles in the United States (“U.S. GAAP”), including organic revenue growth, free cash flow, adjusted operating income, adjusted operating margin, adjusted earnings per share, adjusted net income attributable to Aon shareholders, adjusted diluted net income per share, adjusted effective tax rate, adjusted other income (expense) – pensions, adjusted other income (expense), and adjusted income before income taxes that exclude the effects of intangible asset amortization and impairment, pension settlements, Accelerating Aon United Program expenses, NFP transaction costs, certain legal settlements, capital expenditures, and certain other noteworthy items that affected results for the comparable periods. Organic revenue growth includes the impact of intercompany activity and excludes foreign exchange rate changes, acquisitions, divestitures (including held for sale businesses), transfers between revenue lines, fiduciary investment income, and gains or losses on derivatives accounted for as hedges. Currency impact represents the effect on prior year period results if they were translated at current period foreign exchange rates. Reconciliations to the closest U.S. GAAP measure for each non-GAAP measure presented in this communication are provided in the attached appendices. Supplemental organic revenue growth information and additional measures that exclude the effects of certain items noted above do not affect net income or any other U.S. GAAP reported amounts. Free cash flow is cash flows from operating activity less capital expenditures. The adjusted effective tax rate excludes the applicable tax impact associated with expenses for estimated intangible asset amortization and impairment, and certain other noteworthy items. Management believes that these measures are important to make meaningful period-to-period comparisons and that this supplemental information is helpful to investors. Management also uses these measures to assess operating performance and performance for compensation. Non-GAAP measures should be viewed in addition to, not in lieu of, Aon’s Consolidated Financial Statements. Industry peers provide similar supplemental information regarding their performance, although they may not make identical adjustments.

(1) Certain noteworthy items impacting operating income in 2023 and 2022 are described in this schedule. The items shown with the caption “as adjusted” are non-GAAP measures.

(2) Total charges related to the Accelerating Aon United Program (“AAU Program”) are expected to include technology-related costs to facilitate streamlining and simplifying operations; headcount reduction costs, and costs associated with asset impairments, including real estate consolidation costs.

(3) In the fourth quarter of 2023, Aon recognized actual or anticipated legal settlement expenses in connection with transactions for which capital was arranged by a third party, Vesttoo Ltd., primarily in the form of letters of credit from third party banks that are alleged to have been fraudulent. Certain actual or anticipated legal settlement expenses totaling $197 million have been recognized in the current period, where certain potentially meaningful amounts may be recoverable in future periods. Additionally, a $58 million charge was recognized in the second quarter of 2022 with certain other legal settlements reached in matters unrelated to Vesttoo.

(4) In the fourth quarter of 2023, Aon entered into a definitive agreement to acquire NFP. As part of the definitive agreement, certain transaction costs were incurred including advisory, legal, accounting, and other professional or consulting fees required to complete the acquisition.

(5) To further its pension de-risking strategy, the Company settled certain pension obligations in the Netherlands through the purchase of annuities, where certain pension assets were liquidated to purchase the annuities. A non-cash settlement charge totaling $27 million was recognized in the second quarter of 2023, which is excluded from Other income (expense) - as adjusted. Additionally, the Company purchased an annuity for portions of its U.S. pension plans that will settle certain obligations. A non-cash settlement charge totaling $170 million was recognized in the fourth quarter of 2022, which is excluded from Other income (expense) - as adjusted.

(6) Adjusted items are generally taxed at the estimated annual effective tax rate, except for the applicable tax impact associated with the anticipated sale of certain assets and liabilities classified as held for sale, certain pension and legal settlements, AAU Program expenses, and certain transaction costs and other charges related to the definitive agreement to acquire NFP, which are adjusted at the related jurisdictional rate.
