Statement of Operations: Three Months Ended June 30, 2011

- For the second quarter of 2011, Premium and Service Revenues increased 21.6% to \$1,278.0 million from \$1,050.6 million in the second quarter of 2010. The increase was primarily driven by the addition of our Mississippi contract, membership growth and premium rate increases during the second half of 2010. During the second quarter of 2011, premium revenue from the Mississippi contract of \$100.4 million was recognized for the period January 1, 2011 through June 30, 2011, of which \$52.8 million related to the first quarter of 2011.
- Consolidated HBR of 83.0% for the second quarter of 2011 represents a decrease of 0.8% from the comparable period in 2010. The year over year improvement in HBR is due to lower utilization levels in 2011. Consolidated HBR was consistent with the first quarter of 2011 at 83.0%.
- Consolidated G&A expense ratio for the first and second quarters in 2011 has been impacted by the timing of the recognition of our Mississippi contract. For the three months ended June 30, 2011, our G&A expense ratio was 13.0%, compared to 12.7% in the prior year and 13.8% in the first quarter of 2011. For the six months ended June 30, 2011, our G&A expense ratio was 13.4%, compared to 13.0% in the prior year. The overall increase is due to additional business expansion costs compared to the prior year.
- Earnings from operations increased to \$55.3 million in 2011 from \$41.7 million in 2010, or 32.6% year over year. Net earnings from continuing operations were \$28.4 million, compared to \$23.0 million in the second quarter of 2010.
- Earnings per diluted share increased to \$0.54 in the second quarter of 2011, which included a \$(0.10) per diluted share charge for debt extinguishment costs as well as the benefit of \$0.07 per diluted share from the recognition of Q1 2011 Mississippi earnings, compared to \$0.45 per diluted share in the second quarter of 2010.

Centene's claims reserving process utilizes a consistent actuarial methodology to estimate Centene's ultimate liability. Any reduction in the "Incurred related to: Prior period" amount may be offset as Centene actuarially determines "Incurred related to: Current period." As such, only in the absence of a consistent reserving methodology would favorable development of prior period claims liability estimates reduce medical costs. Centene believes it has consistently applied its claims reserving methodology in each of the periods presented.

The amount of the "Incurred related to: Prior period" above includes the effects of reserving under moderately adverse conditions, new markets where we use a conservative approach in setting reserves during the initial periods of operations, increased receipts from other third party payors related to coordination of benefits and lower medical utilization and cost trends for dates of service prior to June 30, 2010.
