

W0. Introduction

W0.1

(W0.1) Give a general description of and introduction to your organization.

Danaher is a global science and technology innovator committed to helping customers solve complex challenges and improving quality of life around the world. Sustainability is deeply ingrained in Danaher’s culture and work and has been for decades. Our innovation improves quality of life in a meaningful way. Our businesses advance lifesaving research, improve health and safety, and promote environmental stewardship by protecting our water supply and defending fragile ecosystems.

Danaher operates in three business segments:

1) The Life Sciences segment offers a broad range of research tools that scientists use to study the basic building blocks of life, including genes, proteins, metabolites and cells to understand the causes of disease, identify new therapies and test new drugs and vaccines. We are also a leading provider of filtration, separation and purification technologies to the biopharmaceutical, food and beverage, medical, aerospace, microelectronics and general industrial sectors.

2) The Diagnostics segment offers analytical instruments, reagents, consumables, software and services that hospitals, physicians’ offices, reference laboratories and other critical care settings use to diagnose disease and make treatment decisions. Our clinical lab business is a leading manufacturer and marketer of biomedical testing instruments, systems and related consumables that are used to evaluate and analyse samples made up of body fluids, cells and other substances. Our molecular diagnostics business is a leading manufacturer and marketer of biomedical testing instruments, systems and related consumables that enable DNA-based testing for organisms and genetic-based diseases in both clinical and non-clinical markets. Our critical care diagnostics business is a leading worldwide provider of instruments, software and related consumables and services that are used in both laboratory and point-of-care environments to rapidly measure critical parameters.

3) The Environmental & Applied Solutions segment products and services help protect important resources and keep global food and water supplies safe. Our water quality business provides instrumentation, services and disinfection systems to help analyze, treat and manage the quality of ultra-pure, potable, waste, ground, source and ocean water in residential, commercial, industrial and natural resource applications. Our product identification business provides equipment, consumables, software and services for various printing, marking, coding, traceability, packaging, design and color management applications on consumer, pharmaceutical and industrial products.

W0.2

(W0.2) State the start and end date of the year for which you are reporting data.

| | Start date | End date |
|----------------|----------------|------------------|
| Reporting year | January 1 2020 | December 31 2020 |

W0.4

(W0.4) Select the currency used for all financial information disclosed throughout your response.

USD

W0.5

(W0.5) Select the option that best describes the reporting boundary for companies, entities, or groups for which water impacts on your business are being reported.

Companies, entities or groups over which operational control is exercised

W0.6

(W0.6) Within this boundary, are there any geographies, facilities, water aspects, or other exclusions from your disclosure?

No

W1. Current state

W1.1

(W1.1) Rate the importance (current and future) of water quality and water quantity to the success of your business.

| | Direct use importance rating | Indirect use importance rating | Please explain |
|--|------------------------------|--------------------------------|--|
| Sufficient amounts of good quality freshwater available for use | Neutral | Have not evaluated | The significance of the availability of quality fresh water differs depending on the Operating Company. For example, good quality, freshwater is significant to Danaher's Pall Corporation subsidiary for their media operations (entire value chain). |
| Sufficient amounts of recycled, brackish and/or produced water available for use | Neutral | Have not evaluated | |

W1.2

(W1.2) Across all your operations, what proportion of the following water aspects are regularly measured and monitored?

| | % of sites/facilities/operations | Please explain |
|--|----------------------------------|--|
| Water withdrawals – total volumes | 76-99 | In 2020, Danaher collected data from facilities owned or leased for the full reporting year that in aggregate account for over 85% of our total corporate-wide floor space. We extrapolated the data collected to account for any facilities owned or leased for the full reporting year for which data was not collected to account for 100% of our facilities. |
| Water withdrawals – volumes by source | 76-99 | Our facilities report water withdrawals in two categories: purchased water from municipal or other public utilities; and direct withdrawals from surface or ground water. |
| Entrained water associated with your metals & mining sector activities - total volumes [only metals and mining sector] | <Not Applicable> | <Not Applicable> |
| Produced water associated with your oil & gas sector activities - total volumes [only oil and gas sector] | <Not Applicable> | <Not Applicable> |
| Water withdrawals quality | Please select | |
| Water discharges – total volumes | Please select | |
| Water discharges – volumes by destination | Please select | |
| Water discharges – volumes by treatment method | Please select | |
| Water discharge quality – by standard effluent parameters | Please select | |
| Water discharge quality – temperature | Please select | |
| Water consumption – total volume | Please select | |
| Water recycled/reused | Please select | |
| The provision of fully-functioning, safely managed WASH services to all workers | Please select | |

W1.2b

(W1.2b) What are the total volumes of water withdrawn, discharged, and consumed across all your operations, and how do these volumes compare to the previous reporting year?

| | Volume (megaliters/year) | Comparison with previous reporting year | Please explain |
|-------------------|--------------------------|---|--|
| Total withdrawals | 4005 | Higher | Compared to 2019, our total water withdrawals in 2020 was approximately 7.5% higher. |
| Total discharges | | Please select | |
| Total consumption | | Please select | |

W1.2d

(W1.2d) Indicate whether water is withdrawn from areas with water stress and provide the proportion.

| | Withdrawals are from areas with water stress | % withdrawn from areas with water stress | Comparison with previous reporting year | Identification tool | Please explain |
|-------|--|--|---|---------------------|----------------|
| Row 1 | Please select | <Not Applicable> | <Not Applicable> | <Not Applicable> | |

W1.2h

(W1.2h) Provide total water withdrawal data by source.

| | Relevance | Volume (megaliters/year) | Comparison with previous reporting year | Please explain |
|--|---------------|--------------------------|---|--|
| Fresh surface water, including rainwater, water from wetlands, rivers, and lakes | Relevant | 1229 | Higher | Surface and ground water withdrawals are combined in our facilities' data reporting, so we do not have separate totals for these sources. The volume represented here includes both surface and groundwater. |
| Brackish surface water/Seawater | Please select | <Not Applicable> | <Not Applicable> | |
| Groundwater – renewable | Relevant | 1229 | Higher | Surface and ground water withdrawals are combined in our facilities' data reporting, so we do not have separate totals for these sources. The volume represented here includes both surface and groundwater. |
| Groundwater – non-renewable | Relevant | 1229 | Higher | Surface and ground water withdrawals are combined in our facilities' data reporting, so we do not have separate totals for these sources. The volume represented here includes both surface and groundwater. |
| Produced/Entrained water | Not relevant | <Not Applicable> | <Not Applicable> | |
| Third party sources | Relevant | 2776 | Higher | |

W2. Business impacts

W2.1

(W2.1) Has your organization experienced any detrimental water-related impacts?

No

W2.2

(W2.2) In the reporting year, was your organization subject to any fines, enforcement orders, and/or other penalties for water-related regulatory violations?

No

W3. Procedures

W3.3

(W3.3) Does your organization undertake a water-related risk assessment?

Yes, water-related risks are assessed

W3.3a

W3.3a) Select the options that best describe your procedures for identifying and assessing water-related risks.

Direct operations

| Customers | Please select | |
| Employees | Please select | |
| Investors | Please select | |
| Local communities | Please select | |
| NGOs | Please select | |
| Other water users at a basin/catchment level | Please select | |
| Regulators | Please select | |
| River basin management authorities | Please select | |
| Statutory special interest groups at a local level | Please select | |
| Suppliers | Please select | |
| Water utilities at a local level | Please select | |
| Other stakeholder, please specify | Please select | |

W3.3d

(W3.3d) Describe your organization's process for identifying, assessing, and responding to water-related risks within your direct operations and other stages of your value chain.

At the Board level, Danaher's Nominating and Governance Committee oversees the Company's sustainability program as set forth in the Committee's charter.

At the management level, Danaher's Senior Vice President and General Counsel, who reports directly to our President and CEO, has general oversight responsibility with respect to matters of sustainability, and is responsible for reviewing and approving Danaher's sustainability reports. Danaher's Sustainability Committee comprises representatives from each of the Company's business platforms and from the human resources, EHS, DBS, procurement, communications, investor relations and legal functions. The Committee is responsible for developing, and overseeing the execution of, the Company's sustainability strategy, and reports to Danaher's Senior Vice President and General Counsel. Each of the Board of Directors and the Nominating and Governance Committee reviews our sustainability program on at least an annual basis.

Any material water-related risks would be identified pursuant to Danaher's multi-disciplinary, company-wide risk management process. Danaher's ERM program specifically prompts consideration of potential risks related to climate change, including acute or chronic physical facility risks attributable to climate change, such as increased severity of extreme weather events (e.g., flooding, hurricane) and longer-term shifts in climate patterns (e.g., prolonged drought). Danaher's businesses are increasingly focusing on improving efficiency across our production and distribution processes, production assets, buildings and transport/mobility, particular in relation to energy efficiency but also including broader water and waste management.

The following is an example of a process that exists at one of our Operating Companies, Pall Corporation:

Pall uses WRI Aqueduct to assess water risk and strategy. The risk assessment begins with reviewing the sites within their scope boundary, water withdrawals, and water costs (including effluent costs). These factors are ranked by highest water withdrawals and largest costs. Using the WRI Aqueduct, the risk assessment then considers the baseline water stress score and the 2030 Business As Usual projected water stress score to determine an overall risk score. Pall's 2021 water strategy goal is to ensure that sites that score in the top 40% of risk are measuring and reporting effluent discharge. There are three Pall locations that score within this top level of water risk. These sites are expected to reduce water use (normalized to revenue) by 15% by December 31st 2024. At the site level, Pall sites with ISO 14001 certification must identify water related risks as part of the aspects and impacts procedure; in addition, all sites must identify water risks as part of their business continuity plans. Pall EHS and facility personnel assess risks based on regulations and water availability. If a local assessment identifies a high risk, a risk mitigation plan is required to be established with action items established and agreed upon by site leadership. As changes occur at the site level, management of change programs assess water risks (increase/decrease in water/wastewater). If risks are considered medium or high, the risks are documented in the project and resources are assigned to mitigate/manage.

W4. Risks and opportunities

W4.1

(W4.1) Have you identified any inherent water-related risks with the potential to have a substantive financial or strategic impact on your business?

No

W4.1a

(W4.1a) How does your organization define substantive financial or strategic impact on your business?

W4.2b

(W4.2b) Why does your organization not consider itself exposed to water risks in its direct operations with the potential to have a substantive financial or strategic impact?

| | Primary reason | Please explain |
|-------|-----------------------|---|
| Row 1 | Other, please specify | In lieu of not being able to provide a comment to W4.1, we have added the following comment here: Danaher's water quality business is a leading provider of instrumentation, consumables, software, services and disinfection systems to help analyze, treat and manage the quality of ultra-pure, potable, industrial, waste, ground, source and ocean water in residential, commercial, municipal, industrial and natural resource applications. As a result, water-related risks and strategic opportunities are relevant to us. |

W4.2c

(W4.2c) Why does your organization not consider itself exposed to water risks in its value chain (beyond direct operations) with the potential to have a substantive financial or strategic impact?

| | Primary reason | Please explain |
|-------|----------------|----------------|
| Row 1 | Please select | |

W4.3

(W4.3) Have you identified any water-related opportunities with the potential to have a substantive financial or strategic impact on your business?

Yes, we have identified opportunities, and some/all are being realized

W4.3a

(W4.3a) Provide details of opportunities currently being realized that could have a substantive financial or strategic impact on your business.

Type of opportunity

Products and services

Primary water-related opportunity

Increased sales of existing products/services

Company-specific description & strategy to realize opportunity

Danaher's Water Quality businesses provides instrumentation, consumables, software, services and disinfection systems to help analyze, treat and manage the quality of ultra-pure, potable, industrial, waste, ground, source and ocean water in residential, commercial, municipal, industrial and natural resource applications. The following are examples opportunities being realized by our Water Quality Operating Companies: ChemTreat offers water intensive production facilities custom sustainability programs that identify opportunities to reduce water use, improve the operational performance of capital assets and implement water-efficient solutions. For example, partnership with ChemTreat helped a North American brewer save over 40 million gallons of water in 2019 and over 566 million gallons of water in the past seven years. Trojan Technologies' products and services play vital roles in making the various stages of the water treatment process more effective, efficient, and sustainable. Over 11,000 Trojan ultraviolet (UV) treatment systems are installed in municipalities across the globe and over 150,000 systems are installed worldwide in industrial applications. Collectively, these systems treat over 70 billion gallons of water and wastewater every day. Sea-Bird Scientific's solutions are used in numerous, critical applications for ocean and environmental water quality research and monitoring efforts. The United States National Oceanic & Atmospheric Administration and large international agencies use Sea-Bird Scientific's instruments to help track, understand, and predict how the impact of climate change on the world's oceans is impacting ecosystems, communities, and economies.

W6. Governance

W6.1

(W6.1) Does your organization have a water policy?

No

W6.2

(W6.2) Is there board level oversight of water-related issues within your organization?

Yes

W6.2a

(W6.2a) Identify the position(s) (do not include any names) of the individual(s) on the board with responsibility for water-related issues.

| Position of individual | Please explain |
|------------------------|--|
| Board-level committee | At the Board level, Danaher's Nominating and Governance Committee oversees the Company's sustainability program as set forth in the Committee's charter. At the management level, Danaher's Senior Vice President and General Counsel, who reports directly to our President and CEO, has general oversight responsibility with respect to matters of sustainability, and is responsible for reviewing and approving Danaher's sustainability reports. Danaher's Sustainability Committee comprises representatives from each of the Company's business platforms and from the human resources, EHS, DBS, procurement, communications, investor relations and legal functions. The Committee is responsible for developing, and overseeing the execution of, the Company's sustainability strategy, and reports to Danaher's Senior Vice President and General Counsel. Each of the Board of Directors and the Nominating and Governance Committee reviews our sustainability program on at least an annual basis. |

W6.2b

(W6.2b) Provide further details on the board's oversight of water-related issues.

| | Frequency that water-related issues are a scheduled agenda item | Governance mechanisms into which water-related issues are integrated | Please explain |
|-------|---|--|--|
| Row 1 | Scheduled - some meetings | Reviewing and guiding risk management policies Reviewing and guiding strategy | At the Board level, Danaher's Nominating and Governance Committee oversees the Company's sustainability program as set forth in the Committee's charter. At the management level, Danaher's Senior Vice President and General Counsel, who reports directly to our President and CEO, has general oversight responsibility with respect to matters of sustainability, and is responsible for reviewing and approving Danaher's sustainability reports. Danaher's Sustainability Committee comprises representatives from each of the Company's business platforms and from the human resources, EHS, DBS, procurement, communications, investor relations and legal functions. The Committee is responsible for developing, and overseeing the execution of, the Company's sustainability strategy, and reports to Danaher's Senior Vice President and General Counsel. Each of the Board of Directors and the Nominating and Governance Committee reviews our sustainability program on at least an annual basis. |

W6.3

(W6.3) Provide the highest management-level position(s) or committee(s) with responsibility for water-related issues (do not include the names of individuals).

Name of the position(s) and/or committee(s)

Other, please specify (Senior Vice President, Legal and General Counsel)

Responsibility

Please select

Frequency of reporting to the board on water-related issues

Annually

Please explain

At the Board level, Danaher's Nominating and Governance Committee oversees the Company's sustainability program as set forth in the Committee's charter. Each of the Board of Directors and the Nominating and Governance Committee reviews our sustainability program on at least an annual basis.

W6.4

(W6.4) Do you provide incentives to C-suite employees or board members for the management of water-related issues?

| | Provide incentives for management of water-related issues | Comment |
|-------|--|---------|
| Row 1 | No, and we do not plan to introduce them in the next two years | |

W6.5

(W6.5) Do you engage in activities that could either directly or indirectly influence public policy on water through any of the following?

No

W6.6

(W6.6) Did your organization include information about its response to water-related risks in its most recent mainstream financial report?

Please select

W7. Business strategy

W7.1

(W7.1) Are water-related issues integrated into any aspects of your long-term strategic business plan, and if so how?

| | Are water-related issues integrated? | Long-term time horizon (years) | Please explain |
|---|--|--------------------------------|---|
| Long-term business objectives | Yes, water-related issues are integrated | Please select | Danaher's portfolio of business includes a multi-billion dollar water quality business. The Company's water quality business provides instrumentation, consumables, software, services and disinfection systems to help analyze, treat and manage the quality of ultra-pure, potable, industrial, waste, ground, source and ocean water in residential, commercial, municipal, industrial and natural resource applications. |
| Strategy for achieving long-term objectives | Yes, water-related issues are integrated | Please select | Danaher's portfolio of business includes a multi-billion dollar water quality business. The Company's water quality business provides instrumentation, consumables, software, services and disinfection systems to help analyze, treat and manage the quality of ultra-pure, potable, industrial, waste, ground, source and ocean water in residential, commercial, municipal, industrial and natural resource applications. Inorganic investments are a key component of our growth strategy. Aquatic Informatics - a leading water-focused software provider - joined our Water Quality platform in 2020, bringing data analytics solutions to improve customer workflow and cost efficiencies. |
| Financial planning | Yes, water-related issues are integrated | Please select | Danaher's portfolio of business includes a multi-billion dollar water quality business. The Company's water quality business provides instrumentation, consumables, software, services and disinfection systems to help analyze, treat and manage the quality of ultra-pure, potable, industrial, waste, ground, source and ocean water in residential, commercial, municipal, industrial and natural resource applications. |

W7.2

(W7.2) What is the trend in your organization's water-related capital expenditure (CAPEX) and operating expenditure (OPEX) for the reporting year, and the anticipated trend for the next reporting year?

Row 1

Water-related CAPEX (+/- % change)

Anticipated forward trend for CAPEX (+/- % change)

Water-related OPEX (+/- % change)

Anticipated forward trend for OPEX (+/- % change)

Please explain

W7.3

(W7.3) Does your organization use climate-related scenario analysis to inform its business strategy?

| | Use of climate-related scenario analysis | Comment |
|-------|--|---------|
| Row 1 | Please select | |

W7.4

(W7.4) Does your company use an internal price on water?

Row 1

Does your company use an internal price on water?

No, and we do not anticipate doing so within the next two years

Please explain

W8. Targets

W8.1

(W8.1) Describe your approach to setting and monitoring water-related targets and/or goals.

| | Levels for targets and/or goals | Monitoring at corporate level | Approach to setting and monitoring targets and/or goals |
|-------|---|---------------------------------------|---|
| Row 1 | Business level specific targets and/or goals Site/facility specific targets and/or goals | None are monitored at corporate level | Danaher Corporation does not set or monitor a company-wide, water-related target or goal. Certain of Danaher's Operating Companies have set water-related goals. For example, Pall Corporation, a Danaher Operating Company, has set a goal to reduce water consumption by 15% (normalized to revenue) at the three Pall sites that fall within the top 40% of water risk. This water reduction goal has a baseline year of 2020 and an end year of 2024. Other Pall sites that have begun to measure discharge must identify efficiencies in water consumption or water reduction opportunities. Pall sites without effluent metering must begin to measure water discharge, so that Pall can begin to understand total water consumption. |

W9. Verification

W9.1

(W9.1) Do you verify any other water information reported in your CDP disclosure (not already covered by W5.1a)?

No, we do not currently verify any other water information reported in our CDP disclosure

W10. Sign off

W-FI

(W-FI) Use this field to provide any additional information or context that you feel is relevant to your organization's response. Please note that this field is optional and is not scored.

W10.1

(W10.1) Provide details for the person that has signed off (approved) your CDP water response.

| | Job title | Corresponding job category |
|-------|--|--|
| Row 1 | Vice President, Deputy General Counsel and Corporate Secretary | Other, please specify (The Vice President, Deputy General Counsel and Secretary is also the Chair of the Sustainability Steering Committee.) |

Motivation

Industry Collaboration

Estimated timeframe for achieving project

4 to 5 years

Details of project

This project is an example from one of our Operating Companies, Pall Corporation: Pall is undergoing large scale R&D testing to recycle water in our filtration media operations. We expect water recycling technology to be proven by late 2021. Upon proof of concept, Pall would like to work with our customers to use the recycled water to create filtration media. If J&J are amenable to this relationship, we can identify the products that J&J currently purchases and create a pilot project that creates Pall filters for J&J that only use recycled water.

Projected outcome

Zero Water Impact Filters/Net Positive Impact

SW2.2

(SW2.2) Have any water projects been implemented due to CDP supply chain member engagement?
