Non-GAAP Reconciliations & Definitions

This document contains non-GAAP financial information. Management uses this information in its internal analysis of results and believes this information may be informative to investors in gauging the quality of our financial performance, identifying trends in our results, and providing meaningful period-to-period comparisons. These measures should be used in conjunction with, rather than instead of, their comparable GAAP measures. A reconciliation of non-GAAP measures to the comparable GAAP measures presented in this document also is contained in the company’s most recent earnings press release.

To calculate organic revenue growth, the Company compares current year revenue, less revenue from acquisitions, to prior year revenue. Revenue growth for the three months ended September 30, 2019 was 67%; organic growth for such period was 6%.
