Non-GAAP Financial Measures

This presentation includes the following financial measures defined as “Non-GAAP Financial Measures” by the Securities and Exchange Commission: Net revenue, Non-GAAP EBITDA, Non-GAAP fully diluted EPS and Free Cash Flow. Net revenue is calculated as revenue less transportation costs. Non-GAAP EBITDA is defined as net (loss) income excluding the effects of changes in contingent consideration, depreciation, amortization, stock compensation expense, cash and non-cash interest expense, and income taxes. Non-GAAP fully diluted EPS is defined as fully diluted (loss) earnings per share excluding changes in contingent consideration, amortization, non-cash interest expense, stock compensation expense and the tax effect of these adjustments. Free Cash Flow is defined as net cash provided by operating activities reduced by capital expenditures. A reconciliation of Net revenue, Non-GAAP EBITDA and Non-GAAP fully diluted EPS to the most comparable GAAP measure is included on the next slide. A reconciliation of Free Cash Flow to the most comparable GAAP measure is included on Slide 8. We believe such measures provide useful information to investors because they provide information about the financial performance of the Company's ongoing business.

Net revenue, Non-GAAP EBITDA, Non-GAAP fully diluted EPS and Free Cash Flow are used by management in its financial and operational decision-making and evaluation of overall operating performance. These measures may be different from similar measures used by other companies. The presentation of this financial information, which is not prepared under any comprehensive set of accounting rules or principles, is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with generally accepted accounting principles. Please refer to the slides that follow for a reconciliation of each non-GAAP financial measure to the nearest comparable GAAP financial measure.
