Forward-Looking Statements

This presentation contains forward-looking statements, such as projected net sales, operating results, earnings, and cash flows that are subject to risks and uncertainties that could cause actual results to differ materially from future results expressed or implied by those forward-looking statements. The risks, uncertainties, important factors, and assumptions listed and discussed in this presentation, which could cause actual results to differ materially from those expressed, include: the ability to achieve synergies and cost savings related to the Big Heart Pet Brands acquisition in the amounts and within the time frames currently anticipated and to effectively manage the related integration costs; the ability to generate sufficient cash flow to meet the Company's deleveraging objectives; volatility of commodity, energy, and other input costs; risks associated with derivative and purchasing strategies employed to manage commodity pricing risks; the availability of reliable transportation on acceptable terms; the ability to implement and realize the full benefit of price changes, and the impact of the timing of the price changes to profits and cash flow in a particular period; the success and cost of marketing and sales programs and strategies intended to promote growth in the businesses, including the introduction of new products; general competitive activity in the market, including competitors' pricing practices and promotional spending levels; the impact of food security concerns involving either the Company's or its competitors' products; the impact of accidents, extreme weather, and natural disasters; the concentration of certain of the Company's businesses with key customers and suppliers, including single-source suppliers of certain key raw materials and finished goods, and the ability to manage and maintain key relationships; the timing and amount of capital expenditures and share repurchases; impairments in the carrying value of goodwill, other intangible assets, or other long-lived assets or changes in useful lives of other intangible assets; the impact of new or changes to existing governmental laws and regulations and their application; the outcome of tax examinations, changes in tax laws, and other tax matters; foreign currency and interest rate fluctuations; and risks related to other factors described under "Risk Factors" in other reports and statements filed with the Securities and Exchange Commission, including the Company's most recent Annual Report on Form 10-K. The Company undertakes no obligation to update or revise these forward-looking statements, which speak only as of the date made, to reflect new events or circumstances.

Non-GAAP Measures

The Company uses non-GAAP financial measures, including: net sales excluding the noncomparable impact of the divestiture and foreign currency exchange; adjusted gross profit, operating income, income, and earnings per share; earnings before interest, taxes, depreciation, and amortization ("EBITDA"); and free cash flow, as key measures for purposes of evaluating performance internally. The Company believes that these measures provide useful information to investors because they are the measures used to evaluate performance on a comparable year-over-year basis. Non-GAAP profit measures exclude certain items affecting comparability which include merger and integration and restructuring costs ("special project costs") and unallocated gains and losses on commodity and foreign currency exchange derivatives ("unallocated derivative gains and losses"). The special project costs relate to specific merger and integration and restructuring projects, and the unallocated derivative gains and losses reflect the changes in fair value of the Company's commodity and foreign currency exchange contracts. Beginning May 1, 2016, the Company redefined the non-GAAP measures to also exclude amortization expense and impairment charges related to intangible assets, and has modified prior year results to conform to the new definition. The Company believes that excluding amortization expense and impairment charges related to intangible assets in its non-GAAP measures is more reflective of the Company's operating performance and the way in which the Company manages its business, as amortization and impairment charges are noncash expenses and can be significantly affected by the timing and size of acquisitions. These non-GAAP financial measures are not intended to replace the presentation of financial results in accordance with U.S. generally accepted accounting principles ("GAAP"). Rather, the presentation of these non-GAAP financial measures supplements other metrics used by management to internally evaluate its businesses and facilitates the comparison of past and present operations and liquidity. These non-GAAP financial measures may not be comparable to similar measures used by other companies and may exclude certain nondiscretionary expenses and cash payments. A reconciliation of certain non-GAAP financial measures to the comparable GAAP financial measure for the current and prior year periods is included in the "Non-GAAP Reconciliation" tables. The Company has also provided a reconciliation of non-GAAP financial measures for its fiscal 2017 outlook. As the amount of unallocated derivative gains and losses varies depending on market conditions and levels of derivative transactions with respect to a particular fiscal year, it is not determinable on a forward-looking basis and no guidance has been provided.
