

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended July 30, 2022

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 001-40357

MARVELL TECHNOLOGY, INC.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

85-3971597
(I.R.S. Employer
Identification No.)

1000 N. West Street, Suite 1200
Wilmington, Delaware 19801
(302) 295-4840

(Address of principal executive offices, zip code and registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, par value \$0.002 per share	MRVL	The Nasdaq Global Select Market

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares of common stock of the registrant outstanding as of August 19, 2022 was 852.6 million.

MARVELL TECHNOLOGY, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Basis of Presentation

The unaudited condensed consolidated financial statements of Marvell Technology, Inc. (“MTI”), a Delaware corporation, and its wholly owned subsidiaries (the “Company”), as of and for the three and six months ended July 30, 2022, have been prepared as required by the U.S. Securities and Exchange Commission (the “SEC”). Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles (“U.S. GAAP”) have been condensed or omitted as permitted by the SEC. These unaudited condensed consolidated financial statements and related notes should be read in conjunction with the Company’s fiscal year 2022 audited financial statements included in the Company’s Annual Report on Form 10-K for the fiscal year ended January 29, 2022. In the opinion of management, the financial statements include all adjustments, including normal recurring adjustments and other adjustments, that are considered necessary for fair presentation of the Company’s financial position and results of operations. All inter-company accounts and transactions have been eliminated. Operating results for the periods presented herein are not necessarily indicative of the results that may be expected for the entire year. Certain prior period amounts have been reclassified to conform to current period presentation. These financial statements should also be read in conjunction with the Company’s critical accounting policies included in the Company’s Annual Report on Form 10-K for the year ended January 29, 2022 and those included in this Form 10-Q below. All dollar amounts in the financial statements and tables in these notes, except per share amounts, are stated in millions of U.S. dollars unless otherwise noted.

The Company’s fiscal year is the 52- or 53-week period ending on the Saturday closest to January 31. Accordingly, every fifth or sixth fiscal year will have a 53-week period. The additional week in a 53-week year is added to the fourth quarter, making such quarter consist of 14 weeks. Fiscal 2022 had a 52-week year. Fiscal 2023 is a 52-week year.

Use of Estimates

The preparation of condensed consolidated financial statements in conformity with U.S. GAAP requires management to make estimates, judgments and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent liabilities. On an ongoing basis, the Company evaluates its estimates, including those related to revenue recognition, provisions for sales returns and allowances, inventory excess and obsolescence, goodwill and other intangible assets, assets acquired and liabilities assumed in connection with acquisitions, restructuring, income taxes, litigation and other contingencies. Actual results could differ from these estimates and such differences could affect the results of operations reported in future periods. In the current macroeconomic environment, these estimates require increased judgment and carry a higher degree of variability and volatility. As events continue to evolve and additional information becomes available, these estimates may change materially in future periods.

Note 2. Recent Accounting Pronouncements***Accounting Pronouncements Recently Adopted***

In October 2021, the FASB issued an accounting standards update that requires contract assets and contract liabilities acquired in a business combination to be recognized and measured by the acquirer on the acquisition date in accordance with ASC 606, Revenue from Contracts with Customers. The guidance should be applied prospectively to acquisitions occurring on or after the effective date. The new standard was early adopted by the Company on January 30, 2022 and did not have a material effect on the Company’s condensed consolidated financial statements.

MARVELL TECHNOLOGY, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Note 3. Revenue

The majority of the Company's revenue is generated from sales of the Company's products.

The following table summarizes net revenue disaggregated by end market (in millions, except percentages):

	Three Months Ended				Six Months Ended			
	July 30, 2022	% of Total	July 31, 2021	% of Total	July 30, 2022	% of Total	July 31, 2021	% of Total
Net revenue by end market:								
Data center	\$ 643.4	42 %	\$ 433.7	40 %	\$ 1,283.9	43 %	\$ 710.8	37 %
Carrier infrastructure	285.2	19 %	196.7	18 %	537.2	18 %	364.3	19 %
Enterprise networking	340.3	22 %	222.7	21 %	626.9	21 %	397.5	21 %
Consumer	164.4	11 %	165.4	16 %	342.9	12 %	332.1	18 %
Automotive/industrial	83.6	6 %	57.4	5 %	172.9	6 %	103.5	5 %
	<u>\$ 1,516.9</u>		<u>\$ 1,075.9</u>		<u>\$ 2,963.8</u>		<u>\$ 1,908.2</u>	

The following table summarizes net revenue disaggregated by primary geographical market based on destination of shipment (in millions, except percentages):

	Three Months Ended				Six Months Ended			
	July 30, 2022	% of Total	July 31, 2021	% of Total	July 30, 2022	% of Total	July 31, 2021	% of Total
Net revenue based on destination of shipment:								
China	\$ 693.6	46 %	\$ 488.3	45 %	\$ 1,337.6	45 %	\$ 829.4	43 %
United States	185.0	12 %	123.2	11 %	334.5	11 %	210.6	11 %
Malaysia	113.9	8 %	72.4	7 %	195.1	7 %	131.0	7 %
Thailand	74.9	5 %	83.0	8 %	174.2	6 %	160.8	8 %
Japan	71.1	5 %	56.4	5 %	138.1	5 %	100.2	5 %
Singapore	67.1	4 %	58.4	5 %	117.2	4 %	109.9	6 %
Taiwan	61.3	4 %	29.0	3 %	114.9	4 %	57.6	3 %
Philippines	46.9	3 %	55.7	5 %	98.8	3 %	103.3	5 %
Other	203.1	13 %	109.5	11 %	453.4	15 %	205.4	12 %
	<u>\$ 1,516.9</u>		<u>\$ 1,075.9</u>		<u>\$ 2,963.8</u>		<u>\$ 1,908.2</u>	

These destinations of shipment are not necessarily indicative of the geographic location of the Company's end customers or the country in which the Company's end customers sell devices containing the Company's products. For example, a substantial majority of the shipments made to China relate to sales to non-China based customers that have factories or contract manufacturing operations located within China.

MARVELL TECHNOLOGY, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

The following table summarizes net revenue disaggregated by customer type (in millions, except percentages):

	Three Months Ended				Six Months Ended			
	July 30, 2022	% of Total	July 31, 2021	% of Total	July 30, 2022	% of Total	July 31, 2021	% of Total
Net revenue by customer type:								
Direct customers	\$ 976.0	64 %	\$ 820.8	76 %	\$ 1,969.9	66 %	\$ 1,391.1	73 %
Distributors	540.9	36 %	255.1	24 %	993.9	34 %	517.1	27 %
	<u>\$ 1,516.9</u>		<u>\$ 1,075.9</u>		<u>\$ 2,963.8</u>		<u>\$ 1,908.2</u>	

Contract Liabilities

Contract liabilities consist of the Company's obligation to transfer goods or services to a customer for which the Company has received consideration or the amount is due from the customer. Contract liability balances are comprised of deferred revenue. The amount of revenue recognized during the six months ended July 30, 2022 that was included in deferred revenue balance at January 29, 2022 was not material.

As of the end of a reporting period, some of the performance obligations associated with contracts will have been unsatisfied or only partially satisfied. In accordance with the practical expedients available in the guidance, the Company does not disclose the value of unsatisfied performance obligations for contracts with an original expected duration of one year or less.

Sales Commissions

The Company has elected to apply the practical expedient to expense commissions when incurred as the amortization period is typically one year or less. These costs are recorded in selling, general and administrative expenses in the unaudited condensed consolidated statements of operations.

MARVELL TECHNOLOGY, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Note 4. Debt**Summary of Borrowings and Outstanding Debt**

The following table summarizes the Company's outstanding debt at July 30, 2022 and January 29, 2022 (in millions):

	July 30, 2022	January 29, 2022
Face Value Outstanding:		
2024 Term Loan - 3 Year Tranche	\$ 735.0	\$ 735.0
2026 Term Loan - 5 Year Tranche	831.2	853.1
Term Loan Total	1,566.2	1,588.1
2020 Revolving Credit Facility	70.0	—
Revolving Credit Facility Total	70.0	—
4.200% MTG/MTI 2023 Senior Notes	500.0	500.0
4.875% MTG/MTI 2028 Senior Notes	499.9	499.9
1.650% 2026 Senior Notes	500.0	500.0
2.450% 2028 Senior Notes	750.0	750.0
2.950% 2031 Senior Notes	750.0	750.0
Senior Notes Total	2,999.9	2,999.9
Total borrowings	\$ 4,636.1	\$ 4,588.0
Less: Unamortized debt discount and issuance cost	(35.2)	(40.0)
Net carrying amount of debt	\$ 4,600.9	\$ 4,548.0
Less: Current portion (1)	653.5	63.2
Non-current portion	\$ 3,947.4	\$ 4,484.8

- (1) As of July 30, 2022, the current portion of outstanding debt includes the MTG/MTI 2023 Senior Notes and the portion of the 2026 Term Loan - 5 Year Tranche, which are due within twelve months, and the outstanding balance of the 2020 Revolving Credit Facility. The Company intends to repay the amount with operating cash flow. The weighted average interest rate on short-term debt outstanding at July 30, 2022 and January 29, 2022 was 4.011% and 1.485%, respectively.

On April 20, 2021, the Company completed its acquisition of Inphi. As part of the acquisition, the Company assumed \$15.7 million principal amount of Inphi's 0.75% convertible senior notes due 2021 (the "Inphi 2021 Convertible Notes") and \$506.0 million principal amount of Inphi's 0.75% convertible senior notes due 2025 (the "Inphi 2025 Convertible Notes", and together with the 2021 Notes, the "Inphi Convertible Notes"). As of January 29, 2022, the Inphi Convertible Notes have been settled.

In connection with the acquisition, the Company entered into a series of financing arrangements from December 2020 through April 2021 as summarized below. In April 2021, the Company also terminated a \$2.5 billion bridge loan commitment. This bridge loan commitment was provided by the underwriting bankers at the time of the Inphi merger agreement execution in October 2020. The bridge loan was never drawn upon. The Company recognized a write-off of \$11.4 million in capitalized debt issuance costs related to the termination of the bridge loan commitment during the quarter ended May 1, 2021.

In December 2020, the Company executed a debt agreement to obtain a 3-year \$875.0 million term loan and a 5-year \$875.0 million term loan. The Company also executed a debt agreement to obtain a 5-year \$750.0 million revolving credit facility in December 2020, replacing its previous \$500.0 million revolving credit facility. On April 12, 2021, the Company completed a debt offering and issued (i) \$500.0 million of Senior Notes with a 5-year term due in 2026, (ii) \$750.0 million of Senior Notes with a 7-year term due in 2028, and (iii) \$750.0 million of Senior Notes with a 10-year term due in 2031.

On May 4, 2021, in conjunction with the U.S. domiciliation, the Company exchanged certain existing senior notes due in 2023 and 2028 that were previously issued by the Bermuda-domiciled Marvell Technology Group Ltd. (the "MTG Senior Notes") with like notes that are now issued by the Delaware-domiciled Marvell Technology, Inc. (the "MTI Senior Notes"). Below is further discussion of the terms of the various debt agreements.

MARVELL TECHNOLOGY, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

2024 and 2026 Term Loans

On December 7, 2020, the Company entered into a term loan credit agreement with a lending syndicate led by JP Morgan Chase Bank, N.A (the “2024 and 2026 Term Loan Agreement”) in order to finance the merger with Inphi. The 2024 and 2026 Term Loan Agreement provides for borrowings of \$1.75 billion consisting of: (i) \$875.0 million loan with a three-year term from the funding date (the “3-Year Tranche Loan”) and (ii) \$875.0 million loan with a five-year term from the funding date (the “5-Year Tranche Loan” and, together with the 3-Year Tranche Loan, the “2024 and 2026 Term Loans”).

The 3-Year Tranche Loan has a stated floating interest rate which equates to reserve-adjusted LIBOR + 125 bps. The effective interest rate for the 3-Year Tranche Loan was 2.936% as of July 30, 2022. The 5-Year Tranche Loan has a stated floating interest rate which equates to reserve-adjusted LIBOR + 137.5 bps. The effective interest rate for the 5-Year Tranche Loan was 3.245% as of July 30, 2022. The 3-Year Tranche Loan does not require any scheduled principal payments prior to final maturity but does permit the Company to make early principal payments without premium or penalty. The 5-year Tranche Loan requires scheduled principal payments at the end of each fiscal quarter equal to (i) 1.25% of the aggregate principal amount on the term funding date for the first four full fiscal quarters following the term loan funding date, (ii) 2.50% of the aggregate principal amount on the term funding date for the fifth through twelfth full fiscal quarters following the term loan funding date, and (iii) 3.75% of the aggregate principal amount on the term funding date for each fiscal quarter following the twelfth full fiscal quarter following the term loan funding date. During the six months ended July 30, 2022, the Company repaid \$21.8 million of the principal outstanding of the 5-Year Tranche Loan.

The 2024 and 2026 Term Loan Agreement requires that the Company and its subsidiaries comply with covenants relating to customary matters, including with respect to creating or permitting certain liens, entering into sale and leaseback transactions, and consolidating, merging, liquidating or dissolving. It also prohibits subsidiaries of the Company from incurring additional indebtedness, subject to certain exceptions, and requires that the Company maintain a leverage ratio financial covenant as of the end of any fiscal quarter. As of July 30, 2022, the Company has \$1.6 billion Term Loan borrowings outstanding, and is in compliance with its debt covenants.

2020 Revolving Credit Facility

On December 7, 2020, the Company entered into a revolving line of credit agreement (the “2020 Revolving Credit Facility”) with a lending syndicate led by JP Morgan Chase Bank, N.A for borrowings of up to \$750.0 million. Borrowings from the 2020 Revolving Credit Facility are intended for general corporate use, which may include among other things, the financing of acquisitions, the refinancing of other indebtedness and the payment of transaction expenses related to the foregoing. The 2020 Revolving Credit Facility has a five-year term and a stated floating interest rate which equates to reserve-adjusted LIBOR plus an applicable margin. The Company may prepay any borrowings at any time without premium or penalty. During the quarter ended July 30, 2022, the Company drew down \$200.0 million on the 2020 Revolving Credit Facility of which \$130.0 million was repaid in the same quarter and \$70.0 million of aggregate principal amount of borrowings remained outstanding at July 30, 2022. The Company intends to repay the outstanding amount during the third quarter of fiscal 2023. As of July 30, 2022, \$680.0 million of the \$750.0 million of the 2020 Revolving Credit Facility was undrawn and will be available for draw down through December 7, 2025. An unused commitment fee is payable quarterly based on unused balances at a rate that is based on the ratings of the Company’s senior unsecured long-term indebtedness. This annual rate was 0.175% at July 30, 2022.

The 2020 Revolving Credit Facility requires that the Company and its subsidiaries comply with covenants relating to customary matters. The covenants are consistent with the 2024 and 2026 Term Loan covenants discussed above.

The Company currently carries debt that relies on one-month LIBOR as the benchmark rate. The one-month LIBOR is expected to cease publication after June 30, 2023. To the extent the one-month LIBOR ceases to exist, the 2024 and 2026 Term Loans and 2020 Revolving Credit Facility agreements contemplate an alternative benchmark rate without the need for any amendment thereto.

MARVELL TECHNOLOGY, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

2026, 2028, and 2031 Senior Unsecured Notes

On April 12, 2021, the Company completed an offering of (i) \$500.0 million aggregate principal amount of the Company's 1.650% Senior Notes due 2026 (the "2026 Senior Notes"), (ii) \$750.0 million aggregate principal amount of the Company's 2.450% Senior Notes due 2028 (the "2028 Senior Notes") and (iii) \$750.0 million aggregate principal amount of the Company's 2.950% Senior Notes due 2031 (the "2031 Senior Notes", and, together with the 2026 Senior Notes and the 2028 Senior Notes, the "Senior Notes"). On October 8, 2021, the Senior Notes issued on April 12, 2021 were exchanged for new notes. The terms of the new notes issued in the exchange are substantially identical to the notes issued in April 2021, except that the new notes are registered under the Securities Act of 1933 and the transfer restrictions and registration rights applicable to the Senior Notes issued in April 2021 do not apply to the new notes.

The 2026 Senior Notes mature on April 15, 2026, the 2028 Senior Notes mature on April 15, 2028, and the 2031 Senior Notes mature on April 15, 2031. The stated and effective interest rates for the 2026 Senior Notes are 1.650% and 1.839%, respectively. The stated and effective interest rates for the 2028 Senior Notes are 2.450% and 2.554%, respectively. The stated and effective interest rates for the 2031 Senior Notes are 2.950% and 3.043%, respectively. The Company may redeem the Senior Notes, in whole or in part, at any time prior to their respective maturity at the redemption prices set forth in the indenture governing the Senior Notes. In addition, upon the occurrence of a change of control repurchase event (which involves the occurrence of both a change of control and a ratings event involving the Senior Notes being rated below investment grade), the Company will be required to make an offer to repurchase the Senior Notes at a price equal to 101% of the principal amount of the notes, plus accrued and unpaid interest to, but excluding, the repurchase date. The indenture governing the Senior Notes also contains certain limited covenants restricting the Company's ability to incur certain liens, enter into certain sale and leaseback transactions and merge or consolidate with any other entity or convey, transfer or lease all or substantially all of the Company's properties or assets to another person, which, in each case, are subject to certain qualifications and exceptions. As of July 30, 2022, the Company had \$2.0 billion Senior Notes borrowings outstanding.

2023 and 2028 Senior Unsecured Notes

On June 22, 2018, the Company's Bermuda-based parent company Marvell Technology Group, Ltd. ("MTG") completed a public offering of (i) \$500.0 million aggregate principal amount of 4.200% Senior Notes due 2023 (the "MTG 2023 Notes") and (ii) \$500.0 million aggregate principal amount of 4.875% Senior Notes due 2028 (the "MTG 2028 Notes" and, together with the 2023 Notes, the "MTG Senior Notes").

In April 2021, in conjunction with the Company's U.S. domiciliation, the Company commenced Exchange Offers on April 19, 2021 for the outstanding \$1.0 billion in aggregate principal amount of MTG Senior Notes outstanding in exchange for corresponding senior notes to be issued by the Company's new U.S. domiciled parent Marvell Technology, Inc. ("MTI"). MTI made an offer to (i) exchange any and all of the outstanding MTG 2023 Notes for up to an aggregate principal amount of \$500.0 million of new 4.200% Senior Notes due 2023 issued by MTI (the "MTI 2023 Notes") and to (ii) exchange any and all of the outstanding MTG 2028 Notes for up to an aggregate principal amount of \$500.0 million of new 4.875% Senior Notes due 2028 issued by MTI (the "MTI 2028 Notes" and, together with the MTI 2023 Notes, the "MTI Senior Notes"). Each new series of MTI Senior Notes have the same interest rate, maturity date, redemption terms and interest payment dates and are subject to substantially similar covenants as the corresponding series of the MTG Senior Notes for which they were offered in exchange.

The settlement of the Exchange Offers occurred on May 4, 2021 with \$433.9 million aggregate principal amount of the MTG 2023 Notes and \$479.5 million aggregate principal amount of the MTG 2028 Notes. The exchange was accounted for as a debt modification in accordance with applicable accounting guidance. On December 16, 2021, the MTI Senior Notes issued on May 4, 2021 were exchanged for new notes. The terms of the new notes issued in the exchange are substantially identical to the notes issued in May 2021, except that the new notes are registered under the Securities Act of 1933 and the transfer restrictions and registration rights applicable to the MTI Senior Notes issued in May 2021 do not apply to the new notes.

MARVELL TECHNOLOGY, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

The MTI 2023 Notes mature on June 22, 2023 and the MTI 2028 Notes mature on June 22, 2028. The stated and effective interest rates for the MTI 2023 Notes are 4.200% and 4.502%, respectively. The stated and effective interest rates for the MTI 2028 Notes are 4.875% and 4.988%, respectively. The Company may redeem the MTI Senior Notes, in whole or in part, at any time prior to their maturity at the redemption prices set forth in MTI Senior Notes. In addition, upon the occurrence of a change of control repurchase event (which involves the occurrence of both a change of control and a ratings event involving the MTI Senior Notes being rated below investment grade), the Company will be required to make an offer to repurchase the MTI Senior Notes at a price equal to 101% of the principal amount of the notes, plus accrued and unpaid interest to, but excluding, the repurchase date. The indenture governing the MTI Senior Notes also contains certain limited covenants restricting the Company's ability to incur certain liens, enter into certain sale and leaseback transactions and merge or consolidate with any other entity or convey, transfer or lease all or substantially all of the Company's properties or assets to another person, which, in each case, are subject to certain qualifications and exceptions.

The MTG 2023 Notes mature on June 22, 2023 and the MTG 2028 Notes mature on June 22, 2028. The stated and effective interest rates for the MTG 2023 Notes are 4.200% and 4.360%, respectively. The stated and effective interest rates for the MTG 2028 Notes are 4.875% and 4.940%, respectively. The Company may redeem the MTG Senior Notes, in whole or in part, at any time prior to their maturity at the redemption prices set forth in MTG Senior Notes.

As of July 30, 2022, the Company had \$1.0 billion MTG/MTI Senior Notes borrowings outstanding.

Inphi Convertible Notes

As a result of the Inphi acquisition, the Company assumed all of Inphi's outstanding convertible notes.

Inphi 2021 Convertible Notes

A total of \$9.6 million in aggregate principal of the Inphi 2021 Convertible Notes was settled pursuant to the Exchange Agreements (discussed below). Between April 20 and September 1, 2021, \$6.1 million in aggregate principal of the Inphi 2021 Convertible Notes was converted into 0.2 million shares of the Company's common stock and \$7.1 million in cash pursuant to the contractual terms of the Inphi 2021 convertible notes indenture.

The Inphi 2021 Convertible Notes matured on September 1, 2021 and the Company settled the remaining outstanding balance.

Inphi 2025 Convertible Notes

A total of \$199.5 million in aggregate principal of the Inphi 2025 Convertible Notes was settled pursuant to the Exchange Agreements (discussed below). Between April 20 and May 1, 2021, \$114.0 million in aggregate principal of the Inphi 2025 Convertible Notes was converted pursuant to the contractual terms of the Inphi 2025 convertible notes indenture into 2.3 million shares of the Company's common stock and \$64.7 million in cash. Between May 2, 2021 and June 3, 2021, \$192.5 million in aggregate principal of the Inphi 2025 Convertible Notes was converted pursuant to the contractual terms of the Inphi 2025 convertible notes indenture into 3.8 million shares of the Company's common stock and \$109.2 million in cash. After these conversions, there was no outstanding balance of Inphi 2025 Convertible Notes.

Inphi Capped Calls

In connection with the issuance of each of the Inphi Convertible Notes, Inphi entered into capped call transactions (the "Inphi 2021 Capped Calls" and the "Inphi 2025 Capped Calls," collectively, the "Inphi Capped Calls") in private transactions. In connection with the Inphi acquisition, the Company entered into unwind agreements related to the Inphi Capped Calls. Under the unwind agreements, the Company and the counterparties agreed to settle a portion of Inphi Capped Calls for a fixed payment of \$74.1 million, which were settled on April 23, 2021. The remaining Inphi Capped Calls provided for variable cash settlement based on the Company's stock price. The Company reports cash flows from capped calls in cash flows from financing activities. In connection with the Exchange Agreements (discussed below), a portion of the remaining Inphi Capped Calls were settled for \$35.5 million on April 29, 2021. As of July 30, 2022, there was no outstanding balance of Inphi Capped Calls.

MARVELL TECHNOLOGY, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Exchange Agreements

On April 20, 2021, the Company entered into separate, privately negotiated exchange agreements (the “Exchange Agreements”) with a limited number of holders (“Noteholders”) of the Inphi Convertible Notes. Under the terms of the Exchange Agreements, the Noteholders agreed to exchange approximately \$9.6 million in aggregate principal amount of Inphi 2021 Convertible Notes and \$199.5 million in aggregate principal amount of Inphi 2025 Convertible Notes for a number of shares of the Company’s common stock that was partially based on a trailing daily volume-weighted average of the Company’s stock price.

The Exchange Agreements were settled on April 29, 2021. In exchange for \$9.6 million and \$199.5 million in aggregate principal of the Inphi 2021 Convertible Notes and Inphi 2025 Convertible Notes, respectively, the Company issued a total of 7.1 million shares of its common stock to the Noteholders.

Interest Expense and Future Contractual Maturities

During the three and six months ended July 30, 2022, the Company recognized \$37.4 million and \$70.3 million of interest expense in its unaudited condensed consolidated statements of operations related to interest, amortization of debt issuance costs and accretion of discount associated with the outstanding term loans and senior notes.

During the three and six months ended July 31, 2021, the Company recognized \$30.9 million and \$53.0 million of interest expense in its unaudited condensed consolidated statements of operations related to interest, amortization of debt issuance costs and accretion of discount associated with the outstanding term loans and senior notes.

As of July 30, 2022, the aggregate future contractual maturities of the Company’s outstanding debt, at face value, were as follows (in millions):

Fiscal Year	Amount
Remainder of 2023	\$ 113.7
2024	587.5
2025	844.4
2026	131.2
2027	959.4
Thereafter	1,999.9
Total	\$ 4,636.1

Note 5. Commitments and Contingencies

Warranty Obligations

The Company’s products carry a standard one-year warranty with certain exceptions in which the warranty period can extend to more than one year based on contractual agreements. The Company’s warranty expense has not been material in the periods presented.

Commitments

The Company’s commitments primarily consist of wafer purchase obligations with foundry partners, supply capacity reservation payment commitments with foundries and test & assembly partners, and technology license fee obligations.

MARVELL TECHNOLOGY, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Total future unconditional purchase commitments as of July 30, 2022 are as follows (in millions):

Fiscal Year	Purchase Commitments to Foundries and Test & Assembly Partners		Technology License Fees	
Remainder of 2023	\$	828.4	\$	76.3
2024		445.9		165.0
2025		543.1		109.9
2026		532.7		32.9
2027		374.6		34.9
Thereafter		714.1		193.5
Total unconditional purchase commitments	\$	3,438.8	\$	612.5

Technology license fees include the liabilities under agreements for technology licenses between the Company and various vendors.

Under the Company's manufacturing relationships with its foundry partners, cancellation of outstanding purchase orders is allowed but requires payment of all costs and expenses incurred through the date of cancellation.

The Company entered into manufacturing supply capacity reservation agreements with foundries and test & assembly suppliers during the current and prior fiscal year due to the current global supply shortage environment. Under these arrangements, the Company agreed to pay capacity fees or refundable deposits to the suppliers in exchange for reserved manufacturing production capacity over the term of the agreements, which ranges from four to ten years. In addition, the Company committed to certain purchase levels that were in line with the capacity reserved. If the Company does not meet the purchase level commitments, the agreements either require the Company to pay a fee for the difference between the actual purchases and the purchase commitment or lose priority to reserved capacity for a period of time. The Company currently estimates that it has agreed to purchase level commitments of at least \$2.7 billion of wafers, substrates, and other manufacturing products for the remainder of fiscal 2023 through fiscal 2033 under the capacity reservation agreements. In addition, total fees and refundable deposits payable under these arrangements are \$226.4 million for the remainder of fiscal 2023 through fiscal 2026. Such purchase commitments are summarized in the preceding table.

In September 2021, the Company entered into an IP licensing agreement with a vendor which provides complete access to the vendor's IP portfolio for 10 years. The arrangement provides access to IP over the term of the contract, including existing IP, as well as IP in development, and to be developed in the future. The contract provides support and maintenance over the term of the contract as well. Aggregate fees of \$354.0 million are payable quarterly over the contract term.

MARVELL TECHNOLOGY, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Contingencies and Legal Proceedings

The Company currently is, and may from time to time become, a party to claims, lawsuits, governmental inquiries, inspections or investigations and other legal proceedings (collectively, "Legal Matters") arising in the course of its business. Such Legal Matters, even if not meritorious, could result in the expenditure of significant financial and managerial resources.

In the first quarter of fiscal 2023, the Company reserved \$15.0 million in relation to an on-going contractual dispute with a customer; this dispute remained unresolved as of April 30, 2022, the last day of the Company's first fiscal quarter. After the end of the second quarter of fiscal 2023, but before filing this report on Form 10-Q, the Company reached an agreement in principle to fully resolve this dispute under which the Company will pay \$100.0 million in cash over several quarters, for which an additional \$85.0 million was accrued in the second quarter of fiscal 2023.

The Company is currently unable to predict the final outcome of its other pending Legal Matters and therefore cannot determine the likelihood of loss or estimate a range of possible loss, except with respect to amounts where it has determined a loss is both probable and estimable and has made an accrual. The Company evaluates, at least on a quarterly basis, developments in its Legal Matters that could affect the amount of any accrual, as well as any developments that would result in a loss contingency to become both probable and reasonably estimable. The ultimate outcome of Legal Matters involves judgments, estimates and inherent uncertainties. An unfavorable outcome in a Legal Matter could require the Company to pay damages or could prevent the Company from selling some of its products in certain jurisdictions. While the Company cannot predict with certainty the results of the Legal Matters in which it is currently involved, the Company does not expect that the ultimate costs to resolve these Legal Matters will individually or in the aggregate have a material adverse effect on its financial condition, however, there can be no assurance that the current or any future Legal Matters will be resolved in a manner that is not adverse to the Company's business, financial statements, results of operations or cash flows.

Indemnities, Commitments and Guarantees

During its normal course of business, the Company has made certain indemnities, commitments and guarantees under which it may be required to make payments in relation to certain transactions. These indemnities may include indemnities for general commercial obligations, indemnities to various lessors in connection with facility leases for certain claims arising from such facility or lease, and indemnities to directors and officers of the Company to the maximum extent permitted under the laws of Delaware. In addition, the Company has contractual commitments to various customers, which could require the Company to incur costs to repair an epidemic defect with respect to its products outside of the normal warranty period if such defect were to occur. The duration of these indemnities, commitments and guarantees varies, and in certain cases, is indefinite. Some of these indemnities, commitments and guarantees do not provide for any limitation of the maximum potential future payments that the Company could be obligated to make. In general, the Company does not record any liability for these indemnities, commitments and guarantees in the accompanying unaudited condensed consolidated balance sheets as the amounts cannot be reasonably estimated and are not considered probable. The Company does, however, accrue for losses for any known contingent liability, including those that may arise from indemnification provisions, when future payment is probable and estimable.

Intellectual Property Indemnification

In addition to the above indemnities, the Company has agreed to indemnify certain customers for claims made against the Company's products where such claims allege infringement of third-party intellectual property rights, including, but not limited to, patents, registered trademarks, and/or copyrights. Under the aforementioned indemnification clauses, the Company may be obligated to defend the customer and pay for the damages awarded against the customer as well as the attorneys' fees and costs under an infringement claim. The Company's indemnification obligations generally do not expire after termination or expiration of the agreement containing the indemnification obligation. Generally, but not always, there are limits on and exceptions to the Company's potential liability for indemnification. Historically the Company has not made significant payments under these indemnification obligations and the Company cannot estimate the amount of potential future payments, if any, that it might be required to make as a result of these agreements. The maximum potential amount of any future payments that the Company could be required to make under these indemnification obligations could be significant.

MARVELL TECHNOLOGY, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Note 6. Business Combinations***Innovium***

On October 5, 2021, the Company completed the acquisition of Innovium, Inc. (“Innovium”), a leading provider of networking solutions for cloud and edge data centers, in an all-stock transaction for total purchase consideration of \$1.0 billion attributable to stock consideration of \$994.2 million and the fair value of a previously held equity interest of \$10.0 million. The Innovium acquisition was primarily intended to allow the Company to immediately participate in the fastest growing segment of the switch market with a cloud-optimized solution. In accordance with the terms of the Agreement and Plan of Merger dated August 2, 2021 (the “Innovium merger agreement”), the Company’s common stock was issued in exchange for all outstanding equity of Innovium, including shares of Innovium’s preferred and common stock, employee equity awards and warrants.

The factors contributing to the recognition of goodwill were based upon the Company’s conclusion that there are strategic and synergistic benefits that are expected to be realized from the acquisition. Goodwill recorded for the Innovium acquisition is not expected to be deductible for tax purposes.

The following table summarized the total merger consideration (in millions):

Common stock issued	\$	971.0
Stock consideration for replacement equity awards attributable to pre-combination service		33.2
Total merger consideration	\$	1,004.2

The merger consideration allocation set forth herein is preliminary and may be revised with adjustment to goodwill as additional information becomes available during the measurement period from the closing date of the acquisition to finalize such preliminary estimates. Any such revisions or changes may be material.

In accordance with U.S. GAAP requirements for business combinations, the Company allocated the fair value of the purchase consideration to the tangible assets, liabilities and intangible assets acquired, including in-process research and development (“IPR&D”), generally based on their estimated fair values. The excess purchase price over those fair values is recorded as goodwill. IPR&D is initially capitalized at fair value as an intangible asset with an indefinite life and assessed for impairment thereafter. When an IPR&D project is completed, the IPR&D is reclassified as an amortizable purchased intangible asset and amortized over the asset’s estimated useful life. The Company’s valuation assumptions of acquired assets and assumed liabilities require significant estimates, especially with respect to intangible assets. Acquisition-related costs are expensed in the periods in which such costs are incurred. See “Note 7 – Goodwill and Acquired Intangible Assets, Net” for additional information.

The purchase price allocation is as follows (in millions):

		Previously Reported January 29, 2022 (Provisional)
Cash and cash equivalents	\$	60.4
Inventories		70.0
Goodwill		462.4
Acquired intangible assets, net		433.0
Other, net		(21.6)
Total merger consideration	\$	1,004.2

MARVELL TECHNOLOGY, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

The provisional amounts presented in the table above pertained to the preliminary purchase price allocation reported in the Company's Form 10-K for the year ended January 29, 2022. There have been no measurement period adjustments during the six months ended July 30, 2022.

The Company incurred total acquisition related costs of \$11.9 million which were recorded in selling, general and administrative expense in the unaudited condensed consolidated statements of operations.

Inphi

On April 20, 2021, the Company completed the acquisition of Inphi (the "Inphi acquisition"). Inphi is a global leader in high-speed data movement enabled by optical interconnects. The Inphi acquisition was primarily intended to create an opportunity for the combined company to be uniquely positioned to serve the data-driven world, addressing high growth, attractive end markets such as cloud data center and 5G. In accordance with the terms of the Agreement and Plan of Merger dated as of October 29, 2020, by and among the Company and Inphi (the "Inphi merger agreement"), the Company acquired all outstanding shares of common stock of Inphi for \$66 per share in cash and 2.323 shares of the Company's common stock exchanged for each share of Inphi common stock. The merger consideration paid in cash was funded with a combination of cash on hand and funds from the Company's debt financing. See "Note 4 – Debt" for additional information.

The factors contributing to the recognition of goodwill were based upon the Company's conclusion that there are strategic and synergistic benefits that are expected to be realized from the acquisition. Goodwill recorded for the Inphi acquisition is not expected to be deductible for tax purposes.

The following table summarized the total merger consideration (in millions):

Cash consideration	\$	3,673.2
Common stock issued		5,917.8
Stock consideration for replacement equity awards attributable to pre-combination service		82.3
Equity component of convertible debt		244.2
Total merger consideration	\$	9,917.5

In accordance with U.S. GAAP requirements for business combinations, the Company allocated the fair value of the purchase consideration to the tangible assets, liabilities and intangible assets acquired, including IPR&D, generally based on their estimated fair values. The excess purchase price over those fair values is recorded as goodwill. IPR&D is initially capitalized at fair value as an intangible asset with an indefinite life and assessed for impairment thereafter. When an IPR&D project is completed, the IPR&D is reclassified as an amortizable purchased intangible asset and amortized over the asset's estimated useful life. The Company's valuation assumptions of acquired assets and assumed liabilities require significant estimates, especially with respect to intangible assets. Acquisition-related costs are expensed in the periods in which such costs are incurred. See "Note 7 – Goodwill and Acquired Intangible Assets, Net" for additional information.

Property and equipment, net	98.5	—	98.5
Acquired intangible assets, net	4,420.0	—	4,420.0
Other non-current assets	98.8	(2.2)	96.6
Goodwill	5,686.2	2.2	5,688.4
Accounts payable and accrued liabilities	(189.8)	—	(189.8)
Convertible debt – short-term	(313.7)	—	(313.7)
Convertible debt – long-term	(240.3)	—	(240.3)
Other non-current liabilities	(297.9)	—	(297.9)
Total merger consideration	\$ 9,917.5	\$ —	\$ 9,917.5

The provisional amounts presented in the table above pertained to the preliminary purchase price allocation reported in the Company's Form 10-K for the year ended January 29, 2022. The measurement period adjustments were associated with change in deferred tax assets as a result of changes in estimates related to finalizing Inphi's short period 2021 U.S. tax return. The Company does not believe that the measurement period adjustment had a material impact on its consolidated statements of operations, balance sheets, or cash flows in any periods previously reported.

The Company incurred \$50.8 million in acquisition related costs which were recorded in selling, general and administrative expense. The Company also incurred \$39.8 million of aggregate debt financing costs. As of July 30, 2022, \$3.8 million is included in short-term debt, and \$26.5 million is included in long-term debt on the accompanying unaudited condensed consolidated balance sheets. See "Note 4 – Debt" for additional information. Additionally, the Company incurred \$8.2 million of equity issuance costs, which were recorded in additional paid-in capital in the unaudited condensed consolidated balance sheets.

Unaudited Supplemental Pro Forma Information

The unaudited supplemental pro forma financial information presented below is for illustrative purposes only and is not necessarily indicative of the financial position or results of operations that would have been realized if the acquisitions had been completed on the date indicated, does not reflect synergies that might have been achieved, nor is it indicative of future operating results or financial position. The pro forma adjustments are based upon currently available information and certain assumptions the Company believes are reasonable under the circumstances.

The following unaudited supplemental pro forma information presents the combined results of operations for each of the periods presented, as if Innovium and Inphi had been acquired as of the beginning of fiscal 2021. The unaudited supplemental pro forma information includes adjustments to amortization and depreciation for acquired intangible assets and property and equipment, adjustments to share-based compensation expense, the purchase accounting effect on inventories acquired, interest expense, and transaction costs. The unaudited supplemental pro forma information presented below is for informational purposes only and is not necessarily indicative of our unaudited condensed consolidated results of operations of the combined business had the Innovium and Inphi acquisitions actually occurred at the beginning of fiscal 2021 or of the results of our future operations of the combined business.

MARVELL TECHNOLOGY, INC.

The unaudited supplemental pro forma financial information for the periods presented is as follows (in millions):

	Six Months Ended	
	July 31, 2021	
Pro forma net revenue	\$	2,082.8
Pro forma net loss	\$	(255.3)

Note 7. Goodwill and Acquired Intangible Assets, Net

Goodwill

Goodwill represents the excess of the purchase price over the fair value of net tangible and identifiable intangible assets acquired in a business combination.

In the second quarter of fiscal 2023, the Company purchased IPR&D as well as hired technical staff to expand engineering resources for purchase consideration of \$60.1 million of which \$40.0 million was allocated to goodwill. In the first quarter of fiscal 2023, the Company completed the acquisition of two semiconductor design services companies located in India, for purchase consideration of \$33.7 million, primarily for the purpose of expanding engineering resources to address customer design opportunities, of which \$25.8 million was allocated to goodwill. The carrying value of goodwill as of July 30, 2022 and January 29, 2022 is \$11.6 billion and \$11.5 billion, respectively. See “Note 6 – Business Combinations” for discussion of acquisitions and changes to the carrying value of goodwill.

Acquired Intangible Assets, Net

As of July 30, 2022 and January 29, 2022, net carrying amounts excluding fully amortized intangible assets are as follows (in millions, except for weighted-average remaining amortization period):

	July 30, 2022			
	Gross Carrying Amounts	Accumulated Amortization	Net Carrying Amounts	Weighted-Average Remaining Amortization Period (Years)
Developed technologies	\$ 4,970.0	\$ (1,673.8)	\$ 3,296.2	4.94
Customer contracts and related relationships	2,179.0	(683.9)	1,495.1	4.72
Trade names	66.0	(25.8)	40.2	3.52
Total acquired amortizable intangible assets	\$ 7,215.0	\$ (2,383.5)	\$ 4,831.5	4.86
IPR&D	811.0	—	811.0	n/a
Total acquired intangible assets	\$ 8,026.0	\$ (2,383.5)	\$ 5,642.5	

	January 29, 2022			
	Gross Carrying Amounts	Accumulated Amortization	Net Carrying Amounts	Weighted-Average Remaining Amortization Period (Years)
Developed technologies	\$ 4,744.1	\$ (1,333.7)	\$ 3,410.4	5.17
Customer contracts and related relationships	2,184.0	(519.6)	1,664.4	5.21
Trade names	73.0	(26.2)	46.8	3.95
Order backlog	70.0	(67.2)	2.8	0.03
Total acquired amortizable intangible assets	\$ 7,071.1	\$ (1,946.7)	\$ 5,124.4	5.17
IPR&D	1,029.0	—	1,029.0	n/a
Total acquired intangible assets	\$ 8,100.1	\$ (1,946.7)	\$ 6,153.4	

MARVELL TECHNOLOGY, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

The intangible assets are amortized on a straight-line basis over the estimated useful lives, except for certain Cavium customer contracts and related relationships, which are amortized using an accelerated method of amortization over the expected customer lives, which more closely align with the pattern of realization of economic benefits expected to be obtained. The IPR&D will be accounted for as an indefinite-lived intangible asset and will not be amortized until the underlying projects reach technological feasibility and commercial production at which point the IPR&D will be amortized over the estimated useful life. Useful lives for these IPR&D projects are expected to range between 3 to 10 years. In the event the IPR&D is abandoned, the related assets will be written off.

Amortization expense for acquired intangible assets for the three and six months ended July 30, 2022 was \$271.8 million and \$544.3 million, respectively. Amortization expense for acquired intangible assets for the three and six months ended July 31, 2021 was \$276.7 million and \$405.3 million, respectively.

The following table presents the estimated future amortization expense of acquired amortizable intangible assets as of July 30, 2022 (in millions):

Fiscal Year	Amount
Remainder of 2023	\$ 537.8
2024	1,069.1
2025	1,016.5
2026	968.4
2027	817.4
Thereafter	422.3
	<u>\$ 4,831.5</u>

Note 8. Fair Value Measurements

Fair value is an exit price representing the amount that would be received in the sale of an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or a liability. As a basis for considering such assumptions, the accounting guidance establishes a three-tier value hierarchy, which prioritizes the inputs used in the valuation methodologies in measuring fair value:

Level 1—Observable inputs that reflect quoted prices for identical assets or liabilities in active markets.

Level 2—Other inputs that are directly or indirectly observable in the marketplace.

Level 3—Unobservable inputs that are supported by little or no market activity.

The fair value hierarchy also requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The Company's Level 1 assets include marketable equity investments that are classified as other non-current assets and which are valued primarily using quoted market prices. The Company's Level 2 assets include time deposits, as the market inputs used to value these instruments consist of market yields. In addition, the severance pay fund is classified as a Level 2 asset as the valuation inputs are based on quoted prices and market observable data of similar instruments.

MARVELL TECHNOLOGY, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

The tables below set forth, by level, the Company's assets and liabilities that are measured at fair value on a recurring basis. The tables do not include assets and liabilities that are measured at historical cost or any basis other than fair value (in millions):

	Fair Value Measurements at July 30, 2022			
	Level 1	Level 2	Level 3	Total
Items measured at fair value on a recurring basis:				
Assets				
Cash equivalents:				
Time deposits	\$ —	\$ 176.6	\$ —	\$ 176.6
Other non-current assets:				
Marketable equity investments	2.0	—	—	2.0
Severance pay fund	—	0.7	—	0.7
Total assets	\$ 2.0	\$ 177.3	\$ —	\$ 179.3

The carrying value of investments in non-marketable equity securities recorded to fair value on a non-recurring basis is adjusted for observable transactions for identical or similar investments of the same issuer or for impairment. These securities relate to equity investments in privately-held companies. These items measured at fair value on a non-recurring basis are classified as Level 3 in the fair value hierarchy because the value is estimated based on valuation methods using the observable transaction price at the transaction date and other unobservable inputs such as volatility, rights and obligations of the securities held. As of July 30, 2022, non-marketable equity investments had a carrying value of \$36.0 million and are included in other non-current assets in the Company's unaudited condensed consolidated balance sheets.

	Fair Value Measurements at January 29, 2022			
	Level 1	Level 2	Level 3	Total
Items measured at fair value on a recurring basis:				
Assets				
Cash equivalents:				
Time deposits	\$ —	\$ 177.6	\$ —	\$ 177.6
Other non-current assets:				
Marketable equity investments	1.2	—	—	1.2
Severance pay fund	—	0.7	—	0.7
Total assets	\$ 1.2	\$ 178.3	\$ —	\$ 179.5

Fair Value of Debt

The Company classified the 2024 and 2026 Term Loans, the 2020 Revolving Credit Facility, the 2023 Notes, the 2026 Notes, 2028 Notes, and 2031 Notes as Level 2 in the fair value measurement hierarchy. The carrying value of the 2024 and 2026 Term Loans and the 2020 Revolving Credit Facility approximate their fair value as the 2024 and 2026 Term Loans and the 2020 Revolving Credit Facility are carried at a market observable interest rate that resets periodically. The estimated aggregate fair value of the unsecured senior notes was \$2.8 billion at July 30, 2022 and \$3.0 billion at January 29, 2022, and were classified as Level 2 as there are quoted prices from less active markets for the notes. See "Note 4 - Debt" for additional information.

MARVELL TECHNOLOGY, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Note 9. Restructuring

The Company continuously evaluates its existing operations to increase operational efficiency, decrease costs and increase profitability. Restructuring charges are mainly comprised of severance and other one-time termination benefits, facility closures where sites may be redundant within the same region or no longer suitably sized for the local employee base, and other costs. The Company recorded restructuring and other related charges of \$1.2 million and \$2.5 million for the three and six months ended July 30, 2022, respectively. The Company expects to complete these restructuring actions by the end of fiscal 2024.

In prior years, the Company initiated restructuring plans in order to realign the organization and enable further investment in key priority areas. Restructuring charges were mainly comprised of severance and other one-time termination benefits, facility closures where sites were redundant within the same region or no longer suitably sized for the local employee base, and other costs. These plans are substantially complete. The Company recorded restructuring related charges of \$12.3 million and \$25.2 million for the three and six months ended July 31, 2021, respectively.

Note 10. Income Tax

The Company's tax provision for interim periods is determined using an estimate of its annual effective tax rate, adjusted for discrete items, if any, that arise during the period. Each quarter, the Company updates its estimate of the annual effective tax rate, and if the estimated annual effective tax rate changes, the Company makes a cumulative adjustment in such period. The Company's quarterly tax provision, and estimate of its annual effective tax rate, is subject to variation due to several factors, including variability in accurately predicting our pre-tax income or loss and the mix of jurisdictions to which they relate, intercompany transactions, changes in tax laws, the applicability of special tax regimes, changes in how the Company does business, discrete items, and acquisitions, as well as the integration of such acquisitions.

On April 20, 2021, the Company completed its acquisition of Inphi Corporation. Since closing of this transaction, the parent company has been domiciled in the United States and not Bermuda. Therefore, for periods after closing, the income from all foreign subsidiaries is now subject to the U.S. provisions applicable to Global Intangible Low Taxed Income ("GILTI"), which generally requires for GILTI income to be included in the taxable income of U.S. entities, and which may adversely impact future effective tax rates and tax liabilities.

The Company recorded an income tax benefit of \$0.5 million and a tax expense of \$204.4 million for the three- and six-months ended July 30, 2022, respectively. The Company's estimated effective tax rate for the year differs from the U.S. statutory rate of 21% primarily due to a substantial portion of its earnings, or in some cases, losses being taxed or benefited at rates lower than the U.S. statutory rate, net of the impact of U.S. taxation of foreign operations, benefits from tax credits, and valuation allowance releases, as well as discrete tax benefits for excess deductions on stock-based compensation and the discrete impact of the remeasurement of the Company's Singapore deferred taxes upon extension of the Company's tax incentive in Singapore (see below).

The Company operates under tax incentives in certain countries that may be extended and/or renewed if certain additional requirements are satisfied. The tax incentives are conditional upon meeting certain employment and investment thresholds. No tax incentive benefits have been recorded for the three- and six-months ended July 30, 2022. In the first quarter of our current fiscal year, the Singapore Economic Development Board ("EDB") agreed to extend the Company's Development and Expansion Incentive ("DEI") by five years until June 30, 2029. As a result, the Company expects to continue to enjoy a reduced DEI tax rate on its future qualifying income in Singapore. To retain these DEI tax benefits through June 2029 in Singapore, the Company must meet certain operating conditions, headcount and investment requirements, as well as maintain certain activities in Singapore. As a result of the DEI extension, the Company remeasured its Singapore net deferred tax assets that are scheduled to reverse during these future periods at the new incentive tax rate that the Company expects to apply during these periods, which resulted in a net reduction to our Singapore deferred tax assets of \$213.6 million and a corresponding deferred income tax expense during the first quarter of fiscal 2023.

The amount of unrecognized tax benefits could increase or decrease due to changes in tax law in various jurisdictions, the effects of income tax audits, and changes in the U.S. dollar as compared to foreign currencies within the next 12 months. It is reasonably possible that our uncertain tax positions may be reduced by as much as \$7.9 million within the next 12 months as a result of settlements or the lapses of statutes of limitation. The Company is currently under audit in certain U.S. State and non-U.S. taxing jurisdictions. The Company believes that it has adequately provided for the expected outcomes related to these tax audits and that any settlements with respect to these audits will not have a material effect on its results or financial position at this time.

MARVELL TECHNOLOGY, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

The Company's principal source of liquidity as of July 30, 2022 consisted of approximately \$617.1 million of cash and cash equivalents, of which approximately \$431.3 million was held by subsidiaries outside of the United States. The Company has not recognized a deferred tax liability on \$363.7 million of these assets as those amounts are deemed to be indefinitely reinvested. The Company manages its worldwide cash requirements by, among other things, reviewing available funds held by its foreign subsidiaries and the cost effectiveness by which those funds can be accessed in the United States.

Note 11. Net Income (Loss) Per Share

The Company reports both basic net income (loss) per share, which is based on the weighted-average number of common stock outstanding during the period, and diluted net income (loss) per share, which is based on the weighted-average number of common stock outstanding and potentially dilutive shares outstanding during the period.

The computations of basic and diluted net income (loss) per share are presented in the following table (in millions, except per share amounts):

	Three Months Ended		Six Months Ended	
	July 30, 2022	July 31, 2021	July 30, 2022	July 31, 2021
Numerator:				
Net income (loss)	\$ 4.3	\$ (276.4)	\$ (161.4)	\$ (364.6)
Denominator:				
Weighted-average shares — basic	850.9	821.1	849.4	757.2
Effect of dilutive securities:				
Share-based awards	7.0	—	—	—
Weighted-average shares — diluted	<u>857.9</u>	<u>821.1</u>	<u>849.4</u>	<u>757.2</u>
Net income (loss) per share:				
Basic	\$ 0.01	\$ (0.34)	\$ (0.19)	\$ (0.48)
Diluted	\$ 0.01	\$ (0.34)	\$ (0.19)	\$ (0.48)

Potential dilutive securities include dilutive common stock from share-based awards attributable to the assumed exercise of stock options, restricted stock units and employee stock purchase plan shares using the treasury stock method. Potential dilutive securities include dilutive common stock from share-based awards attributable to the shares that could be issued upon conversion of the Company's convertible debt using the if-converted method. Under the treasury stock method and if-converted method, potential common stock outstanding are not included in the computation of diluted net income per share if their effect is anti-dilutive.

Anti-dilutive potential shares are presented in the following table (in millions):

	Three Months Ended		Six Months Ended	
	July 30, 2022	July 31, 2021	July 30, 2022	July 31, 2021
Weighted-average shares outstanding:				
Share-based awards	11.8	18.7	13.8	17.6
Convertible debt	—	0.6	—	1.1

Anti-dilutive potential shares from share-based awards are excluded from the calculation of diluted earnings per share for all periods reported above because either their exercise price exceeded the average market price during the period or the share-based awards were determined to be anti-dilutive based on applying the treasury stock method. Anti-dilutive potential shares from convertible debt are excluded from the calculation of diluted earnings per share for all periods reported above because the shares that would be issued upon conversion of the Company's convertible debt were determined to be anti-dilutive based on applying the if-converted method. Anti-dilutive potential shares from share-based awards are excluded from the calculation of diluted earnings per share for the three months ended July 31, 2021, and the six months ended July 30, 2022 and July 31, 2021 due to the net losses reported in those periods.

Accumulated Other Comprehensive Income (Loss)

For the three and six months ended July 30, 2022 and July 31, 2021, there were no reconciling differences between net income (loss) and comprehensive income (loss).

Share Repurchase Program

On November 17, 2016, the Company announced that its Board of Directors authorized a \$1.0 billion share repurchase plan with no fixed expiration. The newly authorized stock repurchase program replaced in its entirety the prior \$3.25 billion stock repurchase program. On October 16, 2018, the Company announced that its Board of Directors authorized a \$700.0 million addition to the balance of its existing share repurchase program. As of July 30, 2022, there was \$499.5 million remaining available for future share repurchases. The Company intends to effect share repurchases in accordance with the conditions of Rule 10b-18 under the Exchange Act, but may also make repurchases in the open market outside of Rule 10b-18 or in privately negotiated transactions. The share repurchase program will be subject to market conditions and other factors, and does not obligate the Company to repurchase any dollar amount or number of its common stock and the repurchase program may be extended, modified, suspended or discontinued at any time.

The Company resumed its stock repurchase program in the first quarter of fiscal 2023, which had been temporarily suspended in fiscal 2021 to preserve cash during the COVID-19 pandemic. During the three months ended July 30, 2022, the Company repurchased 0.9 million shares of its common stock for \$50.0 million pursuant to a 10b5-1 trading plan. During the six months ended July 30, 2022, the Company repurchased 1.2 million shares of its common stock for \$65.0 million, including 0.9 million shares of its common stock repurchased for \$50.0 million pursuant to a 10b5-1 trading plan. There were no share repurchases during the three and six months ended July 31, 2021. The Company records all repurchases, as well as investment purchases and sales, based on their trade date. The repurchased shares are retired immediately after repurchases are completed.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), which are subject to the "safe harbor" created by those sections. These statements involve known and unknown risks, uncertainties and other factors, which may cause our actual results to differ materially from those implied by the forward-looking statements. Words such as "anticipates," "expects," "intends," "plans," "projects," "believes," "seeks," "estimates," "forecasts," "targets," "may," "can," "will," "would" and similar expressions identify such forward-looking statements.

Forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those indicated in the forward-looking statements. Factors that could cause actual results to differ materially from those predicted include, but are not limited to:

- risks related to the impact of the COVID-19 pandemic or other future pandemics, on the global economy and on our customers, suppliers, employees and business;
- risks related to our ability to scale our business;
- risks related to the extension of lead time due to supply chain disruptions, component shortages that impact the costs and production of our products and kitting process, and constrained availability from other electronic suppliers impacting our customers' ability to ship their products, which in turn may adversely impact our sales to those customers;
- risks related to changes in general economic conditions such as economic slowdowns, inflation, stagflation, rising interest rates, and recessions or political conditions, such as the tariffs and trade restrictions with China, Russia and other foreign nations, and specific conditions in the end markets we address, including the continuing volatility in the technology sector and semiconductor industry and the U.S. National Science and Technology Council's designation of semiconductors as a critical and emerging technology;
- risks related to the ability of our customers, particularly in jurisdictions such as China that may be subject to trade restrictions (including the need to obtain export licenses) to develop their own solutions or acquire fully developed solutions from third-parties;
- risks related to cancellations, rescheduling or deferrals of significant customer orders or shipments, as well as the ability of our customers to manage inventory;
- risks related to our ability to successfully integrate and to realize anticipated benefits or synergies, on a timely basis or at all, in connection with our past, current, or any future acquisitions, divestitures, significant investments or strategic transactions;
- risks related to our debt obligations;
- risks related to the highly competitive nature of the end markets we serve, particularly within the semiconductor and infrastructure industries;
- risks related to our dependence on a few customers for a significant portion of our revenue;
- risks related to our ability to execute on changes in strategy and realize the expected benefits from restructuring activities;
- risks related to our ability to maintain a competitive cost structure for our manufacturing and assembly and test processes and our reliance on third parties to produce our products;
- risks related to our ability to attract, retain and motivate a highly skilled workforce, especially engineering, managerial, sales and marketing personnel;
- risks related to any current and future litigation, regulatory investigations, and contractual disputes with customers that could result in substantial costs and a diversion of management's attention and resources that are needed to successfully maintain and grow our business;
- risks related to gain or loss of a design win or key customer;
- risks related to seasonality or volatility related to sales into the infrastructure market or other end markets;
- risks related to failures to qualify our products or our suppliers' manufacturing lines;
- risks related to our ability to develop and introduce new and enhanced products, in particular in the 5G and Cloud markets, in a timely and effective manner, as well as our ability to anticipate and adapt to changes in technology;
- risks related to failures to protect our intellectual property, particularly outside the United States;

- risks related to the potential impact of a significant events or natural disasters, or the effects of climate change (such as droughts, flooding, wildfires, increased storm severity, sea level rise, and power outages), particularly in certain regions in which we operate or own buildings, such as Santa Clara, California, and where our third-party manufacturing partners or suppliers operate, such as Taiwan and elsewhere in the Pacific Rim;
- risks related to our Environmental, Social and Governance (ESG) programs;
- risks related to severe financial hardship or bankruptcy or other attrition of one or more of our major customers, particularly as our major customers comprise an increasing percentage of our revenue; and
- risks related to failures of our customers to agree to pay for NRE (non-recurring engineering) costs, failure to pay enough to cover the costs we incur in connection with NREs, or non-payment of previously agreed NRE costs due to us.

Additional factors which could cause actual results to differ materially include those set forth in the following discussion, as well as the risks discussed in Part II, Item 1A, “Risk Factors,” and other sections of this Quarterly Report on Form 10-Q. These forward-looking statements speak only as of the date hereof. We undertake no obligation to update any forward-looking statements.

Overview

We are a leading supplier of infrastructure semiconductor solutions, spanning the data center core to network edge. We are a fabless semiconductor supplier of high-performance standard and semi-custom products with core strengths in developing and scaling complex System-on-a-Chip architectures, integrating analog, mixed-signal and digital signal processing functionality. Leveraging leading intellectual property and deep system-level expertise, as well as highly innovative security firmware, our solutions are empowering the data economy and enabling the data center, carrier infrastructure, enterprise networking, consumer, and automotive/industrial end markets.

Net revenue in the second quarter of fiscal 2023 was \$1.5 billion and was 41% higher than net revenue of \$1.1 billion in the second quarter of fiscal 2022. This was due to an increase in sales from a majority of our end markets. Revenue increased from the data center end market by 48%, from the carrier infrastructure end market by 45%, from the enterprise networking end market by 53%, and from the automotive/industrial end market by 46% compared to the three months ended July 31, 2021. The sales from the consumer end market were relatively flat for the three months ended July 30, 2022 compared to the three months ended July 31, 2021. The overall increase in net revenue of 41% was primarily driven by an increase in demand for our products that led to higher unit shipments. In addition, our average selling prices increased year-over-year driven by relatively higher sales of products which had higher content and more features.

In response to increased demand from customers for our products, our operations team is continuing to ramp production with our global supply chain partners. However, we are continuing to experience a number of industry-wide supply constraints affecting the type of high complexity products we provide for data infrastructure. These supply challenges are currently limiting our ability to fully satisfy the increase in demand for some of our products. To secure additional capacity, we entered into and continue to enter into capacity reservation arrangements with certain foundries and test & assembly partners. See “Note 5 – Commitments and Contingencies” in the Notes to the Unaudited Condensed Consolidated Financial Statements for additional information.

Securing capacity for growth remains a high priority for our operations team, even as this supply expansion comes with an increase in input costs. As we have done throughout this period of supply constraints, we are working with our customers to adjust prices to offset the impact of these cost increases, which lets us jointly benefit from sustained growth.

We continue to monitor the impact of COVID-19 on our business. While our offices around the world generally remained open to enable critical on-site business functions in accordance with local government guidelines, in response to the COVID-19 pandemic we modified our workplace practices globally, which resulted in many of our employees working remotely for extended periods of time. As a result, many of our employees have expressed a preference to continue to work from home two to three days a week post-pandemic. In response, we adopted a hybrid work policy where most employees split their time between home and the office. We expect COVID-19 to continue to impact our business, for a further discussion of the uncertainties and business risks associated with the COVID-19 pandemic, see Part II, Item 1A, “Risk Factors,” including but not limited to the risk detailed under the caption “*We face risks related to the COVID-19 pandemic which currently has, and may continue in the future to, significantly disrupt and adversely impact our manufacturing, research and development, operations, sales and financial results.*”

We expect that the U.S. government's export restrictions on certain Chinese customers will continue to impact our revenue in fiscal 2023. Moreover, concerns that U.S. companies may not be reliable suppliers as a result of these and other actions has caused, and may in the future cause, some of our customers in China to amass large inventories of our products well in advance of need or cause some of our customers to replace our products in favor of products from other suppliers. Customers in China may also choose to develop indigenous solutions, as replacements for products that are subject to U.S. export controls. In addition, there may be indirect impacts to our business that we cannot easily quantify such as the fact that some of our other customers' products which use our solutions may also be impacted by export restrictions.

Capital Return Program. We remain committed to delivering stockholder value through our stock repurchase and dividend programs. Under the program authorized by our Board of Directors, we may repurchase shares of stock in the open-market or through privately negotiated transactions. The extent to which we repurchase our stock and the timing of such repurchases will depend upon market conditions, legal rules and regulations, and other corporate considerations, as determined by our management team. We resumed our stock repurchase program in the first quarter of fiscal 2023, which had been temporarily suspended in fiscal 2021 to preserve cash during the COVID-19 pandemic. During the six months ended July 30, 2022, we repurchased 1.2 million shares of our common stock for \$65.0 million, including 0.9 million shares of our common stock repurchased for \$50.0 million pursuant to a 10b5-1 trading plan during the second quarter of fiscal 2023. As of July 30, 2022, there was \$499.5 million remaining available for future stock repurchases.

As of July 30, 2022, a total of 309.3 million shares have been repurchased to date under our current and previous share repurchase programs for an aggregate total of \$4.3 billion in cash. We returned \$167.0 million to stockholders in the six months ended July 30, 2022, including our repurchases of common stock and \$102.0 million in cash dividends.

Cash and Short-Term Investments. Our cash and cash equivalents were \$617.1 million at July 30, 2022, which was \$3.6 million higher than our balance at our fiscal year ended January 29, 2022 of \$613.5 million.

Sales and Customer Composition. Our accounts receivable was concentrated with four customers at July 30, 2022, who comprise a total of 56% of gross accounts receivable, compared with six customers at July 31, 2021, who represented 51% of gross accounts receivable, respectively. This presentation is at the customer consolidated level. During the three and six months ended July 30, 2022 and July 31, 2021, there was no net revenue attributable to a single customer, other than one distributor, whose revenue as a percentage of net revenue was 10% or greater of total net revenue. Net revenue attributable to a distributor whose revenue as a percentage of net revenue was 10% or greater of total net revenue is presented in the following table:

	Three Months Ended		Six Months Ended	
	July 30, 2022	July 31, 2021	July 30, 2022	July 31, 2021
Distributor:				
Distributor A	24 %	15 %	22 %	17 %

We continuously monitor the creditworthiness of our customers and distributors and believe these distributors' sales to diverse end customers and geographies further serve to mitigate our exposure to credit risk.

Most of our sales are made to customers located outside of the United States, primarily in Asia, and majority of our products are manufactured outside the United States. Sales shipped to customers with operations in Asia represented approximately 76% of our net revenue in the three and six months ended July 30, 2022, and approximately 80% of net revenue in the three and six months ended July 31, 2021. Because many manufacturers and manufacturing subcontractors of our customers are located in Asia, we expect that most of our net revenue will continue to be represented by sales to our customers in that region. For risks related to our global operations, see Part II, Item 1A, "Risk Factors," including but not limited to the risk detailed under the caption "*We face additional risks due to the extent of our global operations since a majority of our products, and those of our customers, are manufactured and sold outside of the United States. The occurrence of any or a combination of the additional risks described below would significantly and negatively impact our business and results of operations.*"

The development process for our products is long, which may cause us to experience a delay between the time we incur expenses and the time revenue is generated from these expenditures. We anticipate that the rate of new orders may vary significantly from quarter to quarter. For risks related to our sales cycle, see Part II, Item 1A, "Risk Factors," including but not limited to the risk detailed under the caption "*We are subject to order and shipment uncertainties. If we are unable to accurately predict customer demand, we may hold excess or obsolete inventory, which would reduce our gross margin. Conversely, we may have insufficient inventory, which would result in lost revenue opportunities and potential loss of market share as well as damaged customer relationships.*"

Critical Accounting Policies and Estimates

There have been no material changes during the three months ended July 30, 2022 to our critical accounting policies and estimates from the information provided in the “Critical Accounting Policies and Estimates” section of our Management’s Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the fiscal year ended January 29, 2022.

In the current macroeconomic environment, our estimates could require increased judgment and carry a higher degree of variability and volatility. We continue to monitor and assess our estimates in light of developments, and as events continue to evolve and additional information becomes available, our estimates may change materially in future periods.

Results of Operations

The following table sets forth information derived from our Unaudited Condensed Consolidated Statements of Operations expressed as a percentage of net revenue:

	Three Months Ended		Six Months Ended	
	July 30, 2022	July 31, 2021	July 30, 2022	July 31, 2021
Net revenue	100.0 %	100.0 %	100.0 %	100.0 %
Cost of goods sold	48.2	65.4	48.1	58.6
Gross profit	51.8	34.6	51.9	41.4
Operating expenses:				
Research and development	29.6	34.1	30.1	34.2
Selling, general and administrative	14.0	24.1	14.6	24.1
Legal settlement	5.6	—	3.4	—
Restructuring related charges	0.1	1.1	0.1	1.3
Total operating expenses	49.3	59.3	48.2	59.6
Operating income (loss)	2.5	(24.7)	3.7	(18.2)
Interest income	0.1	—	—	—
Interest expense	(2.6)	(3.1)	(2.6)	(3.6)
Other income (loss), net	0.2	(0.2)	0.3	—
Income (loss) before income taxes	0.2	(28.0)	1.4	(21.8)
Provision (benefit) for income taxes	—	(2.4)	6.9	(2.8)
Net income (loss)	0.2 %	(25.6)%	(5.5)%	(19.0)%

Three and six months ended July 30, 2022 and July 31, 2021

Net Revenue

	Three Months Ended			Six Months Ended		
	July 30, 2022	July 31, 2021	% Change	July 30, 2022	July 31, 2021	% Change
	(in millions, except percentage)					
Net revenue	\$ 1,516.9	\$ 1,075.9	41.0%	\$ 2,963.8	\$ 1,908.2	55.3%

Our net revenue for the three months ended July 30, 2022 increased by \$441.0 million compared to net revenue for the three months ended July 31, 2021. This was due to an increase in sales from a majority of our end markets. Revenue increased from the data center end market by 48%, from the carrier infrastructure end market by 45%, from the enterprise networking end market by 53%, and from the automotive/industrial end market by 46% compared to the three months ended July 31, 2021. The sales from the consumer end market were relatively flat for the three months ended July 30, 2022 compared to the three months ended July 31, 2021.

Our net revenue for the six months ended July 30, 2022 increased by \$1.1 billion compared to net revenue for the six months ended July 31, 2021. This was due to an increase in sales from all our end markets. Revenue increased from the data center end market by 81%, from the carrier infrastructure end market by 47%, from the enterprise networking end market by 58%, from the consumer end market by 3%, and from the automotive/industrial end market by 67% compared to the six months ended July 31, 2021.

The overall increases in net revenue of 41% for the three months was primarily driven by an increase in demand for our products that led to higher unit shipment. The overall increase in net revenue of 55% for the six months was primarily driven by an increase in demand for our products and the year-over-year impact of acquisitions in fiscal 2022, with both factors contributing to higher unit shipments. In addition, our average selling prices increased year-over-year driven by relatively higher sales of products which had higher content and more features.

Cost of Goods Sold and Gross Profit

	Three Months Ended			Six Months Ended		
	July 30, 2022	July 31, 2021	% Change	July 30, 2022	July 31, 2021	% Change
	(in millions, except percentage)					
Cost of goods sold	\$ 730.9	\$ 704.1	3.8%	\$ 1,426.9	\$ 1,118.2	27.6%
% of net revenue	48.2 %	65.4 %		48.1 %	58.6 %	
Gross profit	\$ 786.0	\$ 371.8	111.4%	\$ 1,536.9	\$ 790.0	94.5%
% of net revenue	51.8 %	34.6 %		51.9 %	41.4 %	

Cost of goods sold as a percentage of net revenue decreased for the three and six months ended July 30, 2022 compared to the three and six months ended July 31, 2021, which is primarily due to lower amortization of inventory fair value adjustment. As a result, gross margin for the three and six months ended July 30, 2022 increased 17.2 and 10.5 percentage points compared to the three and six months ended July 31, 2021.

Research and Development

	Three Months Ended			Six Months Ended		
	July 30, 2022	July 31, 2021	% Change	July 30, 2022	July 31, 2021	% Change
	(in millions, except percentage)					
Research and development	\$ 449.0	\$ 367.0	22.3%	\$ 893.1	\$ 653.1	36.7%
% of net revenue	29.6 %	34.1 %		30.1 %	34.2 %	

Research and development expense increased by \$82.0 million in the three months ended July 30, 2022 compared to the three months ended July 31, 2021. The increase was primarily due to \$76.9 million of higher employee personnel-related costs as a result of headcount increases including new employees from our recent acquisitions.

Research and development expense increased by \$240.0 million in the six months ended July 30, 2022 compared to the six months ended July 31, 2021. The increase was primarily due to additional costs from our acquisitions of Inphi and Innovium in fiscal 2022, including \$202.0 million of higher employee personnel-related costs recognized in the current period.

Selling, general and administrative

	Three Months Ended			Six Months Ended		
	July 30, 2022	July 31, 2021	% Change	July 30, 2022	July 31, 2021	% Change
	(in millions, except percentage)					
Selling, general and administrative	\$ 211.7	\$ 259.2	(18.3)%	\$ 432.4	\$ 460.7	(6.1)%
% of net revenue	14.0 %	24.1 %		14.6 %	24.1 %	

Selling, general and administrative expense decreased by \$47.5 million in the three months ended July 30, 2022 compared to the three months ended July 31, 2021. The decrease was primarily due to \$30.3 million of lower integration costs associated with our acquisition of Inphi in fiscal 2022 and \$21.5 million of lower intangibles amortization expense related to intangibles that were fully amortized during the first quarter of fiscal 2023. The decrease was partially offset by \$2.5 million of higher employee personnel-related costs as a result of headcount increases including new employees from our recent acquisitions.

Selling, general and administrative expense decreased by \$28.3 million in the six months ended July 30, 2022 compared to the six months ended July 31, 2021. The decrease was reflective of \$65.5 million of lower transaction and integration costs associated with our acquisition of Inphi and \$32.1 million of lower stock based compensation expense mainly related to accelerated vesting of Inphi equity awards incurred in the prior year when the deal was closing. The decrease was partially offset by \$41.7 million of higher intangibles amortization expense and \$17.6 million of higher employee personnel-related costs associated with our acquisitions of Inphi and Innovium in fiscal 2022, as well as acquisitions in the current period.

Legal Settlement

	Three Months Ended			Six Months Ended		
	July 30, 2022	July 31, 2021	% Change	July 30, 2022	July 31, 2021	% Change
	(in millions, except percentage)					
Legal settlement	\$ 85.0	\$ —	*	\$ 100.0	\$ —	*
% of net revenue	5.6 %	— %		3.4 %	— %	

*Not meaningful

We recorded a charge of \$85.0 million and \$100.0 million in the three and six months ended July 30, 2022 related to a settlement in principle of a contractual dispute. Refer to “Note 5 - Commitments and Contingencies” for further information.

Restructuring Related Charges

	Three Months Ended			Six Months Ended		
	July 30, 2022	July 31, 2021	% Change	July 30, 2022	July 31, 2021	% Change
	(in millions, except percentage)					
Restructuring related charges	\$ 1.2	\$ 12.3	(90.2)%	\$ 2.5	\$ 25.2	(90.1)%
% of net revenue	0.1 %	1.1 %		0.1 %	1.3 %	

We recognized \$1.2 million and \$2.5 million of total restructuring related charges in the three and six months ended July 30, 2022 as we continue to evaluate our existing operations to increase operational efficiency, decrease costs, and increase profitability. See “Note 9 – Restructuring” in the Notes to the Unaudited Condensed Consolidated Financial Statements for further information.

Interest Income

	Three Months Ended			Six Months Ended		
	July 30, 2022	July 31, 2021	% Change	July 30, 2022	July 31, 2021	% Change
	(in millions, except percentage)					
Interest income	\$ 0.8	\$ 0.2	300.0%	\$ 1.3	\$ 0.4	225.0%
% of net revenue	0.1 %	— %		— %	— %	

Interest income increased by \$0.6 million and \$0.9 million in the three and six months ended July 30, 2022 compared to the three and six months ended July 31, 2021 due to higher interest rates on our invested cash.

Interest Expense

	Three Months Ended			Six Months Ended		
	July 30, 2022	July 31, 2021	% Change	July 30, 2022	July 31, 2021	% Change
	(in millions, except percentage)					
Interest expense	\$ (39.8)	\$ (33.8)	17.8%	\$ (76.1)	\$ (68.9)	10.4%
% of net revenue	(2.6)%	(3.1)%		(2.6)%	(3.6)%	

Interest expense increased by \$6.0 million and \$7.2 million in the three and six months ended July 30, 2022 compared to the three and six months ended July 31, 2021. The increase was primarily due to higher interest expense and amortization of debt issuance costs associated with the 2024 and 2026 Term Loans and 2026, 2028 and 2031 Senior Notes, partially offset by prior period costs associated with the bridge loan termination.

Other Income, Net

	Three Months Ended			Six Months Ended		
	July 30, 2022	July 31, 2021	% Change	July 30, 2022	July 31, 2021	% Change
	(in millions, except percentage)					
Other income, net	\$ 3.7	\$ (1.7)	(317.6)%	\$ 8.9	\$ (0.5)	(1,880.0)%
% of net revenue	0.2 %	(0.2)%		0.3 %	— %	

Other income, net, increased by \$5.4 million and \$9.4 million in the three months and six months ended July 30, 2022 compared to the three and six months ended July 31, 2021. The increase was primarily due to gain from equity investments.

Provision (benefit) for Income Taxes

	Three Months Ended			Six Months Ended		
	July 30, 2022	July 31, 2021	% Change	July 30, 2022	July 31, 2021	% Change
	(in millions, except percentage)					
Provision (benefit) for income taxes	\$ (0.5)	\$ (25.6)	(98.0)%	\$ 204.4	\$ (53.4)	(482.8)%

Our income tax benefit for the three months ended July 30, 2022 was \$0.5 million compared to a tax benefit of \$25.6 million for the three months ended July 31, 2021. Our income tax benefit \$0.5 million for the three months ended July 30, 2022 differed from the 21% federal income tax rate, primarily because of discrete income tax benefits for stock-based compensation. Our income tax benefit for the three months ended July 31, 2021 differed from the U.S. federal tax rate of 21% primarily because of the recognition of a \$10.0 million tax benefit for tax basis on the transfer of certain intellectual property from the Inphi acquisition to a subsidiary in Singapore as well as discrete tax benefits related to stock-based compensation.

Our income tax expense for the six months ended July 30, 2022, was \$204.4 million compared to a tax benefit of \$53.4 million for the six months ended July 31, 2021. Our income tax expense of \$204.4 million for the six months ended July 30, 2022, differs from the federal statutory tax rate of 21% primarily due to the \$213.6 million tax impact of the remeasurement of deferred taxes in Singapore, offset by the recognition of discrete tax benefits related to stock-based compensation. Our income tax benefit of \$53.4 million for the quarter ended July 31, 2021, differed from the 21% federal statutory tax rate primarily because of the recognition of a \$10.0 million tax benefit attributable to Singapore tax basis in intellectual property, tax benefits related to stock-based compensation, and benefits from expirations of the statutes of limitations related to certain previously unrecognized tax benefits that were recorded in prior periods.

Our provision for incomes taxes may be affected by changes in the geographic mix of earnings with different applicable tax rates, acquisitions, changes in the realizability of deferred tax assets, accruals related to contingent tax liabilities and period-to-period changes in such accruals, the results of income tax audits, the expiration of statutes of limitations, the implementation of tax planning strategies, tax rulings, court decisions, settlements with tax authorities and changes in tax laws and regulations.

The ultimate realization of deferred tax assets depends upon the generation of future taxable income during the periods in which those assets become deductible or creditable. We evaluate the recoverability of these assets, weighing all positive and negative evidence, and provide or maintain a valuation allowance for these assets if it is more likely than not that some, or all, of the deferred tax assets will not be realized. If negative evidence exists, sufficient positive evidence is necessary to support a conclusion that a valuation allowance is not needed. We consider all available evidence such as our earnings history including the existence of cumulative income or losses, reversals of taxable temporary differences, projected future taxable income, and tax planning strategies. In future periods, it is possible that significant positive or negative evidence could arise that results in a change in our judgment with respect to the need for a valuation allowance, which could result in a tax benefit, or adversely affect our income tax provision, in the period of such change in judgment.

We also continuously evaluate potential changes to our legal structure in response to guidelines and requirements in various international tax jurisdictions where we conduct business. Additionally, please see the information in “Item 1A: Risk Factors” under the caption “*Changes in existing taxation benefits, rules or practices may adversely affect our financial results.*”

Liquidity and Capital Resources

Our principal source of liquidity as of July 30, 2022 consisted of approximately \$617.1 million of cash and cash equivalents, of which approximately \$431.3 million was held by subsidiaries outside of the United States. We manage our worldwide cash requirements by, among other things, reviewing available funds held by our foreign subsidiaries and the cost effectiveness by which those funds can be accessed in the United States. See “Note 10 – Income Taxes” in the Notes to the Unaudited Condensed Consolidated Financial Statements for further information.

In December 2020, to fund the Inphi acquisition, we executed a debt agreement to obtain a 3-year term loan of \$875.0 million and a 5-year term loan of \$875.0 million. For the six months ended July 30, 2022, we repaid \$21.8 million of the principal outstanding of the 5-year term loan.

In December 2020, we also executed a debt agreement to obtain a \$750.0 million revolving credit facility (“2020 Revolving Credit Facility”). During the quarter ended July 30, 2022, we drew down \$200.0 million on the 2020 Revolving Credit Facility of which \$130.0 million was repaid in the same quarter and \$70.0 million of aggregate principal amount of borrowings remained outstanding at July 30, 2022.

In April 2021, we completed an offering and issued (i) 5-year \$500.0 million senior notes due in 2026, (ii) 7-year \$750.0 million senior notes due in 2028, and (iii) 10-year \$750.0 million senior notes due in 2031 (collectively, the “Senior Notes”). On October 8, 2021, the Senior Notes issued in April 2021 were exchanged for new notes.

See “Note 4 – Debt” in the Notes to the Unaudited Condensed Consolidated Financial Statements for additional information.

We believe that our existing cash, cash equivalents, together with cash generated from operations, and funds from our 2020 Revolving Credit Facility will be sufficient to cover our working capital needs, capital expenditures, investment requirements and any declared dividends, repurchase of our common stock and commitments for at least the next twelve months. Our capital requirements will depend on many factors, including our rate of sales growth, market acceptance of our products, costs of securing access to adequate manufacturing capacity, the timing and extent of research and development projects and increases in operating expenses, all of which are subject to uncertainty.

To the extent that our existing cash and cash equivalents, together with cash generated by operations, and funds available under our 2020 Revolving Credit Facility are insufficient to fund our future activities, we may need to raise additional funds through public or private debt or equity financing. We may also acquire additional businesses, purchase assets or enter into other strategic arrangements in the future, which could also require us to seek debt or equity financing. Additional equity financing or convertible debt financing may be dilutive to our current stockholders. If we elect to raise additional funds, we may not be able to obtain such funds on a timely basis or on acceptable terms, if at all. In addition, the equity or debt securities that we issue may have rights, preferences or privileges senior to our common stock.

Future payment of a regular quarterly cash dividend on our common stock and our planned repurchases of common stock will be subject to, among other things, the best interests of the Company and our stockholders, our results of operations, cash balances and future cash requirements, financial condition, developments in ongoing litigation, statutory requirements under Delaware law, U.S. securities laws and regulations, market conditions and other factors that our Board of Directors may deem relevant. Our dividend payments and repurchases of common stock may change from time to time, and we cannot provide assurance that we will continue to declare dividends or repurchase stock at all or in any particular amounts.

Cash Flows from Operating Activities

Net cash flow provided by operating activities for the six months ended July 30, 2022 was \$526.3 million. We had a net loss of \$161.4 million adjusted for the following non-cash items: amortization of acquired intangible assets of \$544.3 million, stock-based compensation expense of \$275.6 million, deferred income tax expense of \$178.4 million, depreciation and amortization of \$152.6 million, amortization of inventory fair value adjustment associated with the Innovium acquisition of \$15.6 million, and \$24.2 million net loss from other non-cash items. Cash outflow from working capital of \$503.0 million for the six months ended July 30, 2022 was primarily driven by increases in accounts receivable, inventory, and prepaid expenses and other assets and decrease in accrued employee compensation, partially offset by increases in accrued liabilities and other non-current liabilities and accounts payable. The increase in accounts receivable was primarily due to increased sales, as well as the timing of shipments due to ongoing supply chain challenges. The increase in inventory was to better support unfulfilled backlog, future customer demand and new product ramps. The increase in prepaid expenses and other assets was primarily due to prepayments on supply capacity reservation agreements. The decrease in accrued employee compensation was due to bonus payout. The increase in accrued liabilities and other non-current liabilities was mainly due to an accrual related to a settlement in principle of a contractual dispute and an increase in ship and debit claim reserve due to price increase and stock replenishment. The increase in accounts payable was mainly due to timing of payments.

Net cash flow provided by operating activities for the six months ended July 31, 2021 was \$208.4 million. We had a net loss of \$364.6 million adjusted for the following non-cash items: amortization of acquired intangible assets of \$405.3 million, stock-based compensation expense of \$206.8 million, amortization of inventory fair value adjustment associated with the Inphi acquisition of \$169.6 million, depreciation and amortization of \$118.0 million, deferred income tax benefit of \$51.6 million, and \$66.1 million net loss from other non-cash items. Cash outflow from working capital of \$341.2 million for the six months ended July 31, 2021 was primarily driven by an increase in accounts receivable and inventory and a decrease in accrued employee compensation. The increase in accounts receivable was primarily due to increased sales, as well as the timing of shipments due to ongoing supply chain challenges. The increase in inventory was to better support unfulfilled backlog, future customer demand and new product ramps. The decrease in accrued employee compensation was due to our annual bonus payment.

Cash Flows from Investing Activities

For the six months ended July 30, 2022, net cash used in investing activities of \$212.3 million was primarily driven by purchases of property and equipment of \$109.5 million, net cash paid for business acquisitions of \$98.6 million, and purchases of technology licenses of \$4.2 million.

For the six months ended July 31, 2021, net cash used in investing activities of \$3.7 billion was primarily driven by the net cash paid to acquire Inphi of \$3.6 billion, purchases of property and equipment of \$53.6 million and purchases of technology licenses of \$6.6 million.

Cash Flows from Financing Activities

For the six months ended July 30, 2022, net cash used in financing activities of \$310.4 million was primarily attributable to \$171.7 million tax withholding payments on behalf of employees for net share settlements, \$151.9 million repayment of debt, \$102.0 million for payment of our quarterly dividends, \$71.2 million payments for technology license obligations, and \$65.0 million of repurchases of common stock, partially offset by \$200.0 million drawdown from 2020 Revolving Credit Facility and \$51.4 million proceeds from employee stock plans.

For the six months ended July 31, 2021, net cash provided by financing activities of \$3.3 billion was primarily attributable to proceeds from issuance of debt of \$3.8 billion, proceeds from capped calls of \$160.3 million, partially offset by \$275.0 million repayment of debt principal, \$180.9 million of repurchase and settlement of convertible notes, \$116.2 million tax withholding payments on behalf of employees for net share settlements, \$89.9 million for payment of our quarterly dividends and \$67.3 million payments for technology license obligations.

Capital Resources and Material Cash Requirements

A summary of our capital resources and material cash requirements is presented in Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in our Annual Report on Form 10-K for the fiscal year ended January 29, 2022. We also discuss updates of our significant commitments in "Note 5 – Commitments and Contingencies" in the Notes to the Unaudited Condensed Consolidated Financial Statements. Other than as described above, there were no material changes to our capital resources and material cash requirements during the six months ended July 30, 2022.

Indemnification Obligations

See "Note 5 – Commitments and Contingencies" in the Notes to the Unaudited Condensed Consolidated Financial Statements set forth in Part I, Item 1 of this Quarterly Report on Form 10-Q.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk. With our outstanding debt, we are exposed to various forms of market risk, including the potential losses arising from adverse changes in interest rates on our outstanding 2024 and 2026 Term Loans and 2020 Revolving Credit Facility. See “Note 4 – Debt” in the Notes to the Unaudited Condensed Consolidated Financial Statements for further information. A hypothetical increase or decrease in the interest rate by 1 percentage point would result in an increase or decrease in annual interest expense by approximately \$15.3 million.

We currently carry debt that relies on one-month LIBOR as the benchmark rate. The one-month LIBOR is expected to cease publication after June 30, 2023. To the extent the one-month LIBOR ceases to exist, the 2024 and 2026 Term Loans and 2020 Revolving Credit Facility agreements contemplate an alternative benchmark rate without the need for any amendment thereto.

We maintain an investment policy that requires minimum credit ratings, diversification of credit risk and limits the long-term interest rate risk by requiring effective maturities of generally less than five years. We invest our excess cash primarily in highly liquid debt instruments of the U.S. government and its agencies, money market mutual funds, corporate debt securities and municipal debt securities that are classified as available-for-sale and time deposits. These investments are recorded on our condensed consolidated balance sheets at fair market value with their related unrealized gain or loss reflected as a component of accumulated other comprehensive income (loss) in the unaudited condensed consolidated statement of stockholders’ equity. Investments in both fixed rate and floating rate interest earning securities carry a degree of interest rate risk. Fixed rate securities may have their fair market value adversely impacted due to a rise in interest rates, while floating rate securities may produce less income than predicted if interest rates fall. There were no such investments on hand at July 30, 2022, aside from cash and cash equivalents.

Foreign Currency Exchange Risk. All of our sales and the majority of our expenses are denominated in U.S. dollars. Since we operate in many countries, a percentage of our international operational expenses are denominated in foreign currencies and exchange volatility could positively or negatively impact those operating costs. Increases in the value of the U.S. dollar relative to other currencies could make our products more expensive, which could negatively impact our ability to compete. Conversely, decreases in the value of the U.S. dollar relative to other currencies could result in our suppliers raising their prices to continue doing business with us. Additionally, we may hold certain assets and liabilities, including potential tax liabilities, in local currency on our consolidated balance sheet. These tax liabilities would be settled in local currency. Therefore, foreign exchange gains and losses from remeasuring the tax liabilities are recorded to interest and other income, net. We do not believe that foreign exchange volatility has a material impact on our current business or results of operations. However, fluctuations in currency exchange rates could have a greater effect on our business or results of operations in the future to the extent our expenses increasingly become denominated in foreign currencies.

We may enter into foreign currency forward and option contracts with financial institutions to protect against foreign exchange risks associated with certain existing assets and liabilities, certain firmly committed transactions, forecasted future cash flows and net investments in foreign subsidiaries. However, we may choose not to hedge certain foreign exchange exposures for a variety of reasons, including, but not limited to, accounting considerations and the prohibitive economic cost of hedging particular exposures.

To provide an assessment of the foreign currency exchange risk associated with our foreign currency exposures within operating expense, we performed a sensitivity analysis to determine the impact that an adverse change in exchange rates would have on our financial statements. If the U.S. dollar weakened by 10%, our operating expense could increase by approximately 2%.

Item 4. Controls and Procedures

Management’s Evaluation of Disclosure Controls and Procedures

Management, with the participation of our principal executive officer and principal financial officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act). Disclosure controls and procedures are designed to ensure that information required to be disclosed in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and that such information is accumulated and communicated to management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosures. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of July 30, 2022.

Changes in Internal Control Over Financial Reporting

There have been no changes in our internal control over financial reporting during the three months ended July 30, 2022 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. While our offices around the world generally remained open to enable critical on-site business functions in accordance with local government guidelines, in response to the COVID-19 pandemic we modified our workplace practices globally, which resulted in many of our employees working remotely for extended periods of time. As a result, many of our employees have expressed a preference to continue to work from home two to three days a week post-pandemic. In response, we adopted a hybrid work policy where most employees split their time between home and the office. We are continually monitoring and assessing the COVID-19 situation on our internal controls to minimize the impact on their design and operating effectiveness. We believe that our internal controls over financial reporting are being executed effectively and continue to be effective.

Inherent Limitation on Effectiveness of Controls

Our management, including our principal executive officer and our principal financial officer, does not expect that our disclosure controls or our internal control over financial reporting will prevent or detect all error and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system’s objectives will be met. The design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Further, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, have been detected. The design of any system of controls is based in part on certain assumptions about the likelihood of future events and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Projections of any evaluation of the effectiveness of controls to future periods are subject to risks. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The information under the caption “Contingencies and Legal Proceedings” as set forth in “Note 5 – Commitments and Contingencies” of our Notes to Unaudited Condensed Consolidated Financial Statements, included in Part I, Item 1, is incorporated herein by reference. For additional discussion of certain risks associated with legal proceedings, see Part II, Item 1A, “Risk Factors,” immediately below.

Item 1A. Risk Factors

Investing in our common stock involves a high degree of risk. You should carefully consider the material risks and uncertainties described below and all information contained in this report before you decide to purchase our common stock. Many of these risks and uncertainties are beyond our control, including business cycles and seasonal trends of the computing, infrastructure, semiconductor and related industries and end markets. A manifestation of any of the following risks and uncertainties could, in circumstances, we may or may not be able to accurately predict, render us unable to conduct our business as currently planned and materially and adversely affect our reputation, business prospects, financial condition, cash flow, liquidity and operating results. In addition, the trading price of our common stock could decline due to the occurrence of any of these risks, and you could lose all or part of your investment. It is not possible to predict or identify all such risks and uncertainties; our operations could also be affected by risks or uncertainties that are not presently known to us or that we currently do not consider to present significant risks to our operations. Therefore, you should not consider the following discussion to be a complete statement of all the potential risks or uncertainties that we face.

SUMMARY OF FACTORS THAT MAY AFFECT OUR FUTURE RESULTS

The following summarizes the principal factors that make an investment in the Company speculative or risky. This summary should be read in conjunction with the remainder of this “Risk Factors” section and should not be relied upon as an exhaustive summary of the material risks facing our business. The occurrence of any of these risks could harm our business, financial condition, results of operations and/or growth prospects or cause our actual results to differ materially from those contained in forward-looking statements we have made in this report and those we may make from time to time. You should consider all of the risk factors described in our public filings when evaluating our business.

- risks related to the impact of the COVID-19 pandemic or other future pandemics, on the global economy and on our customers, suppliers, employees and business;
- risks related to our ability to scale our business;
- risks related to the extension of lead time due to supply chain disruptions, component shortages that impact the costs and production of our products and kitting process, and constrained availability from other electronic suppliers impacting our customers' ability to ship their products, which in turn may adversely impact our sales to those customers;
- risks related to changes in general economic conditions such as economic slowdowns, inflation, stagflation, rising interest rates, and recessions or political conditions, such as the tariffs and trade restrictions with China, Russia and other foreign nations, and specific conditions in the end markets we address, including the continuing volatility in the technology sector and semiconductor industry and the U.S. National Science and Technology Council's designation of semiconductors as a critical and emerging technology;
- risks related to the ability of our customers, particularly in jurisdictions such as China that may be subject to trade restrictions (including the need to obtain export licenses) to develop their own solutions or acquire fully developed solutions from third-parties;
- risks related to cancellations, rescheduling or deferrals of significant customer orders or shipments, as well as the ability of our customers to manage inventory;
- risks related to our ability to successfully integrate and to realize anticipated benefits or synergies, on a timely basis or at all, in connection with our past, current, or any future acquisitions, divestitures, significant investments or strategic transactions;
- risks related to our debt obligations;
- risks related to the highly competitive nature of the end markets we serve, particularly within the semiconductor and infrastructure industries;
- risks related to our dependence on a few customers for a significant portion of our revenue;

- risks related to our ability to execute on changes in strategy and realize the expected benefits from restructuring activities;
- risks related to our ability to maintain a competitive cost structure for our manufacturing and assembly and test processes and our reliance on third parties to produce our products;
- risks related to our ability to attract, retain and motivate a highly skilled workforce, especially engineering, managerial, sales and marketing personnel;
- risks related to any current and future litigation, regulatory investigations, or contractual disputes with customers contractual disputes with customers that could result in substantial costs and a diversion of management’s attention and resources that are needed to successfully maintain and grow our business;
- risks related to gain or loss of a design win or key customer;
- risks related to seasonality or volatility related to sales into the infrastructure market or other end markets;
- risks related to failures to qualify our products or our suppliers’ manufacturing lines;
- risks related to our ability to develop and introduce new and enhanced products, in particular in the 5G and Cloud markets, in a timely and effective manner, as well as our ability to anticipate and adapt to changes in technology;
- risks related to failures to protect our intellectual property, particularly outside the United States;
- risks related to the potential impact of a significant events or natural disasters, or the effects of climate change (such as droughts, flooding, wildfires, increased storm severity, sea level rise, and power outages), particularly in certain regions in which we operate or own buildings, such as Santa Clara, California, and where our third-party manufacturing partners or suppliers operate, such as Taiwan and elsewhere in the Pacific Rim;
- risks related to our Environmental, Social and Governance (ESG) programs;
- risks related to severe financial hardship or bankruptcy or other attrition of one or more of our major customers, particularly as our major customers comprise an increasing percentage of our revenue; and
- risks related to failures of our customers to agree to pay for NRE (non-recurring engineering) costs, failure to pay enough to cover the costs we incur in connection with NREs, or non-payment of previously agreed NRE costs due to us.

Our quarterly results of operations have fluctuated in the past and could do so in the future. Because our results of operations are difficult to predict, you should not rely on quarterly comparisons of our results of operations as an indication of our future performance. Due to fluctuations in our quarterly results of operations and other factors, the price at which our common stock will trade is likely to continue to be highly volatile. Accordingly, you may not be able to resell your common stock at or above the price you paid. In future periods, our stock price could decline if, amongst other factors, our revenue or operating results are below our estimates or the estimates or expectations of securities analysts and investors. Our stock is traded on the Nasdaq Global Select Market under the ticker symbol “MRVL”. As a result of stock price volatility, we may be subject to securities class action litigation. Any litigation could result in substantial costs and a diversion of management’s attention and resources that are needed to successfully maintain and grow our business.

WE ARE SUBJECT TO RISKS ASSOCIATED WITH THE CORONAVIRUS (COVID-19) PANDEMIC

We face risks related to the COVID-19 pandemic which currently has, and may continue in the future to, significantly disrupt and adversely impact our manufacturing, research and development, operations, sales and financial results.

Although restrictions have eased in many places, the ongoing pandemic, including large outbreaks, resurgences of COVID-19 in various regions (such as the United States, Singapore, China and various other countries throughout Asia and India) and appearances of new variants of the virus, has resulted, and may continue to result, in their full or partial reinstatement. In addition, although many countries have vaccinated large segments of their population, COVID-19 continues to disrupt business activities, trade, and supply chains in many countries. We expect these impacts to continue for the foreseeable future.

Our business has been, and will continue to be, adversely impacted by the effects of the COVID-19 pandemic. In addition to global and domestic macroeconomic effects, the COVID-19 pandemic and related adverse public health measures have caused disruption to our global operations and sales. Our third-party manufacturing partners, suppliers, distributors, sub-contractors and customers have been, and are expected to continue to be, disrupted by worker absenteeism, quarantines and restrictions on their employees’ ability to work; office and factory closures; disruptions to ports and other shipping infrastructure; border closures; and other travel or health-related restrictions. Depending on the magnitude of such effects on our manufacturing, assembling, testing, and packaging activities or the operations of our manufacturing partners, suppliers, distributors, sub-contractors and customers, our supply chain, manufacturing and product shipments will be delayed, which could adversely affect our business, operations and customer relationships. For example, we were impacted by COVID outbreaks in Asia during the first half of fiscal 2023 that resulted in closed factories, clogged ports and a shortage of workers as officials imposed lockdowns and mass testing requirements.

In addition to operational and customer impacts, the COVID-19 pandemic has had, and is expected to continue to have, a significant impact on the economies and financial markets of many countries including an economic downturn, which has affected and may in the future affect demand for our products and impact our operating results in both the near and long term. There can be no assurance that any decreases in sales resulting from the COVID-19 pandemic will be offset by increased sales in subsequent periods.

We have experienced and expect to continue to experience disruptions to our business operations resulting from work from home, quarantines, self-isolations, or other movement and restrictions on the ability of our employees to perform their jobs, innovate, work together in teams and collaborate and such disruptions could impact our ability to develop and design our products in a timely manner or meet required milestones or customer commitments. See the Risk Factor entitled *“If we are unable to develop and introduce new and enhanced products that achieve market acceptance in a timely and cost-effective manner, our results of operations and competitive position will be harmed.”* These disruptions may also impact our ability to win in time sensitive competitive bidding selection processes. See the Risk Factor entitled *“We rely on our customers to design our products into their systems, and the nature of the design process requires us to incur expenses prior to customer commitments to use our products or recognizing revenues associated with those expenses which may adversely affect our financial results.”* In addition, work from home, quarantines, self-isolations, continuing macroeconomic related uncertainty or caring for family members may result in heavy psychological, emotional or financial burdens for some of our employees, which may impact their productivity and morale and may lead to higher employee absences and higher attrition rates. Moreover, many of our employees have expressed a preference to continue to work from home two to three days a week post-pandemic. In response, we adopted a hybrid work policy for our employees, where employees split their time between home and the office. See the Risk Factor entitled *“We depend on highly skilled personnel to support our business operations. If we are unable to retain and motivate our current personnel or attract additional qualified personnel, our ability to develop and successfully market our products could be harmed.”*

We may become subject to claims or lawsuits by employees, customers, suppliers or other parties regarding actions we take in our operations in response to the COVID-19 pandemic including our vaccination policies.

Our ongoing efforts to manage these impacts may be unsuccessful, and the ultimate impact of the COVID-19 pandemic also depends on factors beyond our knowledge or control, including the duration, severity and geographic scope of the COVID-19 pandemic, the availability, widespread distribution, and use of safe and effective vaccines or treatments and the actions taken to contain its spread and mitigate its public health and economic effects. Due to the continued uncertainty regarding the severity and duration of the COVID-19 pandemic and related public health measures and macroeconomic impacts, at this time we are unable to predict the full impact of the COVID-19 pandemic on our business, financial condition, operating results and cash flows. In addition, the impacts of the COVID-19 pandemic will be exacerbated the longer the pandemic continues.

The impact of the COVID-19 pandemic can also exacerbate other risks discussed below in this Item 1A “Risk Factors” section.

WE ARE SUBJECT TO RISKS ASSOCIATED WITH THE RAPID GROWTH OF THE COMPANY AND WITH OUR STRATEGIC TRANSACTIONS

We may not be able to scale our business quickly enough to meet our customers’ needs or in an efficient manner, which could harm our operating results.

Over the last few years, the Company has rapidly increased in size. As a result, we have to appropriately scale our business, internal systems and organization, including our ability to attract and retain personnel, and continue to improve our operational, financial and management controls, reporting systems and procedures, to serve our growing customer base. Any failure of, or delay in, these efforts could negatively impact our performance and financial results. Even if we are able to upgrade our systems and expand our staff, any such expansion will likely be expensive and complex, requiring management’s time and attention. We could also face inefficiencies, reduced productivity or operational failures as a result of our efforts to scale our business. Moreover, there are inherent risks associated with upgrading, improving and expanding our information technology systems. We cannot be sure that the expansion and improvements to our business operations will be fully or effectively implemented on a timely basis, if at all. These efforts may adversely affect our financial results.

Recent, current and potential future acquisitions, strategic investments, divestitures, mergers or joint ventures subject us to significant risks, any of which could harm our business.

Our long-term strategy has included in the past and may continue to include in the future identifying and acquiring, investing in or merging with suitable candidates on acceptable terms, or divesting of certain business lines or activities. In particular, over time, we may acquire, make investments in, or merge with providers of product offerings that complement our business or may terminate such activities.

Mergers, acquisitions and divestitures include a number of risks and present financial, managerial and operational challenges. Given that our resources are limited, any decision to pursue a transaction has opportunity costs; accordingly, if we pursue a particular transaction, we may need to forgo the prospect of entering into other transactions or making other capital allocation decisions that could help us achieve our strategic objectives.

Any acquired business, technology, service or product could significantly underperform relative to our expectations. Our acquisitions may not further our business strategy as we expected, we may not integrate an acquired company or technology as successfully as we expected, we may impose our business practices that adversely impact the acquired business or we may overpay for, or otherwise not realize the expected return on our investments, each or all of which could adversely affect our business or operating results and potentially cause impairment to assets that we recorded as a part of an acquisition including intangible assets and goodwill. In addition, the use of our stock to finance an acquisition, such as our acquisition of Innovium in October 2021, will result in an increase in the number of outstanding shares of stock and reduce the ownership percentage of each of our outstanding stockholders.

When we decide to sell assets or a business, we may have difficulty selling on acceptable terms in a timely manner or at all. These circumstances could delay the achievement of our strategic objectives or cause us to incur additional expense, or we may sell a business at a price or on terms that are less favorable than we had anticipated, resulting in a loss on the transaction.

If we do enter into agreements with respect to acquisitions, divestitures, or other transactions, these transactions, or parts of these transactions, may fail to be completed due to factors such as: failure to obtain regulatory or other approvals; disputes or litigation; or difficulties obtaining financing for the transaction.

If we fail to complete a transaction, we may nonetheless have incurred significant expenses in connection with such transaction. Failure to complete a transaction may result in negative publicity and a negative perception of us among the investment community.

For all these reasons, our pursuit of an acquisition, investment, divestiture, merger or joint venture could cause our actual results to differ materially from those anticipated.

Recent or potential future acquisitions involve a number of risks, including, among others, those associated with our use of a significant portion of our cash and other financial risks.

We used a significant portion of our cash and incurred substantial indebtedness in connection with the financing of our acquisition of Inphi, which was completed in fiscal 2022. Our use of cash to fund our acquisitions has reduced our liquidity and may (i) limit our flexibility in responding to other business opportunities and (ii) increase our vulnerability to adverse economic and industry conditions. Furthermore, the financing agreements in connection with our outstanding indebtedness contain negative covenants, limitations on indebtedness, liens, sale and leaseback transactions and mergers and other fundamental changes. Our ability to comply with these negative covenants can be affected by events beyond our control. Our indebtedness and these negative covenants will also have the effect, among other things, of limiting our ability to obtain additional financing, if needed, limiting our flexibility in the conduct of our business and making us more vulnerable to economic downturns and adverse competitive and industry conditions. In addition, a breach of the negative covenants could result in an event of default with respect to the indebtedness, which, if not cured or waived, could result in the indebtedness becoming immediately due and payable and could have a material adverse effect on our business, financial condition or operating results. See also, “*We are subject to risks related to our debt obligations.*”

WE ARE VULNERABLE TO PRODUCT DEVELOPMENT AND MANUFACTURING-RELATED RISKS

We rely on our manufacturing partners for the manufacture, assembly, testing and packaging of our products, and the failure of any of these third-party vendors to deliver products or otherwise perform as requested or to be able to fulfill our orders could damage our relationships with our customers, decrease our sales and limit our ability to grow our business.

We do not have our own manufacturing, assembly or packaging facilities and have very limited in-house testing facilities. Therefore, we currently rely on several third-party manufacturing partners to produce our products. We also currently rely on several third-party assembly, testing and packaging subcontractors to assemble, package and test our products. This exposes us to a variety of risks, including the following:

Regional Concentration

Most of our products are manufactured by third-party foundries located in Taiwan, and other sources are located in China, Germany, South Korea, Singapore and the United States. In addition, substantially all of our third-party assembly, testing and packaging facilities are located in China, Malaysia, Singapore, Taiwan and Canada. Because of the geographic concentration of these third-party foundries, as well as our assembly, testing and packaging subcontractors, we are exposed to the risk that their operations may be disrupted by regional events including, for example, droughts, earthquakes (particularly in Taiwan and elsewhere in the Pacific Rim close to fault lines), tsunamis or typhoons, severe storms, power outages, or by actual or threatened public health emergencies such as the COVID-19 pandemic, or by political, social or economic instability. For example, we were impacted by COVID outbreaks in Asia in the first half of fiscal 2023 that resulted in closed factories, clogged ports and a shortage of workers as officials imposed lockdowns and mass testing requirements. In the case of such an event, our revenue, cost of goods sold and results of operations may be negatively impacted. In addition, there are very limited numbers of alternative foundries capable of producing advanced technologies and identifying and implementing alternative manufacturing facilities would be time consuming. As a result, if we needed to implement alternate manufacturing facilities, we could experience significant expenses and delays in product shipments, which could harm our results of operations.

No Guarantee of Capacity or Supply

The ability of each of our manufacturing partners to provide us with materials and services is limited by its available capacity and existing obligations. When demand is strong, availability of our partners' capacity may be constrained or not available, and with certain exceptions our vendors are not obligated to perform services or supply products to us for any specific period, in any specific quantities, or at any specific price, except as may be provided in a particular purchase order. We place our orders on the basis of our customers' purchase orders or our forecast of customer demand, and most of our manufacturing partners can allocate capacity to the production of other companies' products and reduce deliveries to us on short notice. It is possible that their customers that are larger and better financed than we are or that have long-term agreements with our main foundries may induce them to reallocate capacity to those customers. Most of our manufacturing partners may reallocate capacity to their customers offering them a better margin or rate of return than provided by the Company. This reallocation could impair our ability to secure the supply of components that we need. Moreover, if any of our third-party manufacturing partners or other suppliers are unable to secure the necessary raw materials from their suppliers, lose benefits under material agreements, experience water shortages, power outages or labor shortages, or, lack sufficient capacity to manufacture our products, encounter financial difficulties or suffer any other disruption or reduction in efficiency, we may encounter supply delays or disruptions, which could harm our business or results of operations.

There are a very limited number of foundries and consolidation of the foundries that provide services to us or to the semiconductor industry due to bankruptcy or through business combinations, including mergers, asset acquisitions and strategic partnerships which may adversely impact us. A foundry, supplier or other manufacturing partner could become unavailable to us if it is acquired by a competitor or a large company that may change the scope of the offerings. For example, Intel Corporation announced in February 2022 of its intent to acquire Tower Semiconductor. Or a foundry may not be suitable for us if it does not invest in, or have the ability to manufacture, advanced technologies. In particular, as we and others in our industry transition to smaller geometries, our manufacturing partners may be supply constrained or may charge premiums for these advanced technologies, which may harm our business or results of operations. See also, "*We may experience increased actual and opportunity costs as a result of our transition to smaller geometry process technologies.*" In addition, a foundry or supplier may become unavailable to us as a result of economic or political instability. Any disruption to our manufacturing partners could result in a material decline in our revenue, net income and cash flow.

For example, in response to increased demand from customers for our products, our operations team is continuing to ramp production with our global supply chain partners. However, we have in the past, and may in the future, experience a number of industry-wide supply constraints affecting the type of high complexity products we provide for data infrastructure. These supply constraints have impacted, and are expected in the future to impact, the kitting process for our products. These supply challenges have in the past, and may in the future, limit our ability to fully satisfy the increase in demand for some of our products.

While we attempt to create multiple sources for our products, most of our products are not manufactured at more than one foundry at any given time, and our products typically are designed to be manufactured in a specific process at only one of these foundries. Accordingly, if one of our foundries is unable to provide us with components as needed, it would be difficult for us to transition the manufacture of our products to other foundries, and we could experience significant delays in securing sufficient supplies of those components. Any disruption to our foundry partners could result in a material decline in our revenue, net income and cash flow. In addition, our assembly, testing and packaging partners may be single sourced and it may be difficult for us to transition to other manufacturing partners for these services.

In order to secure sufficient capacity when demand is high and to mitigate the risks described in the foregoing paragraph, we have entered into, and in the future may enter into, various arrangements with certain manufacturing partners or other suppliers that could be costly and harm our results of operations, such as nonrefundable deposits with, or loans to, such parties in exchange for capacity commitments, or contracts that commit us to purchase specified quantities of components over extended periods. We may not be able to make such arrangements in a timely fashion or at all, and any arrangements may be costly, reduce our financial flexibility, and not be on terms favorable to us. Moreover, if we are able to secure capacity, we may be obligated to use all of that capacity or incur penalties. These penalties may be expensive and could harm our financial results.

Supply shortages in the semiconductor industry of multi-layer complex substrates, IC packaging capacity and specific wafer process node constraints have resulted in increased lead times, inability to meet demand, and increased costs and these supply constraints are currently expected to continue throughout fiscal 2023. Of these shortages, ABF substrates and specific wafer process nodes are the most constrained at this time and most of these suppliers are located in Japan and Taiwan. Because of the geographic concentration of these suppliers, we are exposed to the risk that their operations may be disrupted by regional events including droughts, earthquakes (particularly in Taiwan and elsewhere in the Pacific Rim close to fault lines), tsunamis or typhoons, severe storms, power outages, or by actual or threatened public health emergencies such as the COVID-19 pandemic, or by political, social or economic instability. In addition, while we don't expect Russia's invasion of Ukraine to materially impact us directly, due to our limited sales to Russia and Ukraine we are unable at this time to predict the indirect impact this conflict will have on us due to impacts on the supply chain, global and domestic economies, interest rates and stock markets.

Uncertain Yields and Quality

The fabrication of our products is a complex and technically demanding process. Our technology is transitioning from planar to FINFET transistors. This transition may result in longer qualification cycles and lower yields. Our manufacturing partners have from time to time experienced manufacturing defects and lower manufacturing yields, which are difficult to detect at an early stage of the manufacturing process and may be time consuming and expensive to correct. Changes in manufacturing processes or the inadvertent use of defective or contaminated materials by our foundries could result in lower than anticipated manufacturing yields or unacceptable performance. In addition, we may face lower manufacturing yields and reduced quality in the process of ramping up and diversifying our manufacturing partners. Poor yields from our partners, or defects, integration issues or other performance problems with our products could cause us significant customer relations and business reputation problems, harm our financial performance and result in financial or other damages to our customers. Our customers could also seek damages in connection with product liability claims, which would likely be time consuming and costly to defend. In addition, defects could result in significant costs. See also, "*Costs related to defective products could have a material adverse effect on us.*"

Because we rely on outside manufacturing partners, we have a reduced ability to directly control product delivery schedules and quality assurance, which has in the past and may in the future result in product shortages or quality assurance problems that delay shipments or increase costs.

Commodity Prices

We are also subject to risk from increasing or fluctuating market prices of certain commodity raw materials, including gold and copper, which are incorporated into our end products or used by our suppliers to manufacture our end products. Supplies for such commodities have from time to time become restricted, or general market factors and conditions have in the past affected and may in the future affect pricing of such commodities (such as inflation or supply chain constraints).

We may experience increased actual and opportunity costs as a result of our transition to smaller geometry process technologies.

In order to remain competitive, we have transitioned, and expect to continue to transition, our semiconductor products to increasingly smaller line width geometries. We periodically evaluate the benefits, on a product-by-product basis, of migrating to smaller geometry process technologies. We also evaluate the costs of migrating to smaller geometry process technologies including both actual costs such as increased mask costs and wafer costs and increased costs related to EDA tools and the opportunity costs related to the technologies we choose to forgo. These transitions are imperative for us to be competitive with the rest of the industry and to target some of our product development in high growth areas to these advanced nodes, which has resulted in significant initial design and development costs.

We have been, and may continue to be, dependent on our relationships with our manufacturing partners to transition to smaller geometry processes successfully. We cannot ensure that the partners we use will be able to effectively manage any future transitions. In addition, there are a very limited number of foundries capable of producing advanced technologies, and identifying and implementing alternative manufacturing facilities would be time consuming. If we or any of our partners experience significant delays in a future transition or fail to efficiently implement a transition, we could experience reduced manufacturing yields, delays in product deliveries and increased expenses, all of which could harm our relationships with our customers and our results of operations.

As smaller geometry processes become more prevalent, we expect to continue to integrate greater levels of functionality, as well as customer and third-party intellectual property, into our products. However, we may not be able to achieve higher levels of design integration or deliver new integrated products on a timely basis, if at all. Moreover, even if we are able to achieve higher levels of design integration, such integration may have a short-term adverse impact on our results of operations, as we may reduce our revenue by integrating the functionality of multiple chips into a single chip.

We rely on our customers to design our products into their systems, and the nature of the design process requires us to incur expenses prior to customer commitments to use our products or recognizing revenues associated with those expenses which may adversely affect our financial results.

One of our primary focuses is on winning competitive bid selection processes, known as “design wins,” to develop products for use in our customers’ products. We devote significant time and resources in working with our customers’ system designers to understand their future needs and to provide products that we believe will meet those needs and these bid selection processes can be lengthy. If a customer’s system designer initially chooses a competitor’s product, it becomes significantly more difficult for us to sell our products for use in that system because changing suppliers can involve significant cost, time, effort and risk for our customers. Thus, our failure to win a competitive bid can result in our foregoing revenues from a given customer’s product line for the life of that product. In addition, design opportunities may be infrequent or delayed. Our ability to compete in the future will depend, in large part, on our ability to design products to ensure compliance with our customers’ and potential customers’ specifications. We expect to invest significant time and resources and to incur significant expenses to design our products to ensure compliance with relevant specifications.

We often incur significant expenditures in the development of a new product without any assurance that our customers’ system designers will select our product for use in their applications. We often are required to anticipate which product designs will generate demand in advance of our customers expressly indicating a need for that particular design. Even if our customers’ system designers select our products, a substantial period of time will elapse before we generate revenues related to the significant expenses we have incurred.

The reasons for this delay generally include the following elements of our product sales and development cycle timeline and related influences:

- our customers usually require a comprehensive technical evaluation of our products before they incorporate them into their designs;
- it can take from six months to three years from the time our products are selected to commence commercial shipments; and
- our customers may experience changed market conditions or product development issues.

The resources devoted to product development and sales and marketing may not generate material revenue for us, and from time to time, we may need to write off excess and obsolete inventory if we have produced product in anticipation of expected demand. We may spend resources on the development of products that our customers may not adopt. If we incur significant expenses and investments in inventory in the future that we are not able to recover, and we are not able to compensate for those expenses, our operating results could be adversely affected. In addition, if we sell our products at reduced prices in anticipation of cost reductions but still hold higher cost products in inventory, our operating results would be harmed.

Additionally, even if system designers use our products in their systems, we cannot assure you that these systems will be commercially successful or that we will receive significant revenue from the sales of our products for those systems. As a result, we may be unable to accurately forecast the volume and timing of our orders and revenues associated with any new product introductions.

We have in the past, and may continue to, make custom or semi-custom products on an exclusive basis for some of our customers for a negotiated period of time. The percentage of our sales related to custom or semi-custom products has been increasing over the last few years. Any revenue from sales of our custom or semi-custom products is directly related to sales of the third-party customer's products and reflective of their success in the market. We have no control over the marketing efforts of these third-party customers and can't make any assurances that sales of their products will be successful in current or future years. In addition, if these customers are bought by our competitors or other third parties, they may terminate agreements related to these custom or semi-custom products or otherwise limit our access to technology or IP necessary for the production of these products. As a result, there may be no other customers for these products due to their custom or semi-custom nature. Consequently, we may not fully realize our expectations for custom or semi-custom product revenue and our operating results may be adversely affected.

Additionally, failure of our customers to agree to pay for NRE (non-recurring engineering) costs, failure to pay enough to cover the costs we incur in connection with NREs, or non-payment of previously agreed NRE costs due to us, can harm our financial results. See also, "Research and Development" under Results of Operations.

If we are unable to develop and introduce new and enhanced products that achieve market acceptance in a timely and cost-effective manner, our results of operations and competitive position will be harmed.

Our future success will depend on our ability to develop and introduce new products and enhancements to our existing products that address customer requirements, in a timely and cost-effective manner and are competitive as to a variety of factors. For example, we must successfully identify customer requirements and design, develop and produce products on time that compete effectively as to price, functionality and performance. We sell products in markets that are characterized by rapid technological change, evolving industry standards, frequent new product introductions, and increasing demand for higher levels of integration and smaller process geometries. In addition, the development of new semiconductor solutions is highly complex and, due to supply chain cross-dependencies and other issues, we may experience delays in completing the development, production and introduction of our new products. See also, "*We may be unable to protect our intellectual property, which would negatively affect our ability to compete.*"

Our ability to adapt to changes and to anticipate future standards, and the rate of adoption and acceptance of those standards, will be a significant factor in maintaining or improving our competitive position and prospects for growth. We may also have to incur substantial unanticipated costs to comply with these new standards. Our success will also depend on the ability of our customers to develop new products and enhance existing products for the markets they serve and to introduce and promote those products successfully and in a timely manner. Even if we and our customers introduce new and enhanced products to the market, those products may not achieve market acceptance.

Some of our customers require our products and our third-party manufacturing partners to undergo a lengthy and expensive qualification process which does not assure product sales. If we are unsuccessful or delayed in qualifying these products with a customer, our business and operating results would suffer.

Prior to purchasing our products, some of our customers require that both our products and our third-party manufacturing partners undergo extensive qualification processes, which involve testing of our products in the customers' systems, as well as testing for reliability. This qualification process can take several months and qualification of a product by a customer does not assure any sales of the product to that customer. Even after successful qualification and sales of a product to a customer, a subsequent revision in our third-party manufacturing partners' process or our selection of a new supplier may require a new qualification process with our customers, which may result in delays and in our holding excess or obsolete inventory. After our products are qualified, it can take several months or more before the customer commences volume production of components or systems that incorporate our products. Despite these uncertainties, we devote substantial resources, including design, engineering, sales, marketing and management efforts, to qualify our products with customers in anticipation of sales. If we are unsuccessful or delayed in qualifying these products with a customer, sales of the products to the customer may be precluded or delayed, which may impede our growth and cause our business to suffer.

Costs related to defective products could have a material adverse effect on us.

We make highly complex semiconductor solutions and, accordingly, there is a risk of defects in our products. Such defects can give rise to the significant costs noted below. Moreover, since the cost of replacing defective products is often much higher than the value of the products themselves, we are subject to damage claims from customers in excess of the amounts they pay us for our products, including consequential damages. We also face exposure to potential liability resulting from the fact that our customers typically integrate the semiconductor solutions we sell into numerous consumer products, including automobiles. We are exposed to product liability claims if our semiconductor solutions or the consumer products integrated with our semiconductor solutions (such as automobiles) malfunction and lead to personal injury or death. In addition, our customers may issue recalls on their products if they prove to be defective or make compensatory payments in accordance with industry or business practice or in order to maintain good customer relationships. If such recalls or payments are the result of a defect in one of our products, our customers may seek to recover all or a portion of their losses from us. Recalls of our customers' products in certain end-markets, such as with our automotive and base station customers, may cause us to incur significant costs.

In addition, despite our testing procedures, we cannot ensure that errors will not be found in new products or releases after commencement of commercial shipments in the future. Such errors could result in:

- loss of or delay in market acceptance of our products;
- material recall and replacement costs;
- delay in revenue recognition or loss of revenue;
- writing down the inventory of defective products;
- the diversion of the attention of our engineering personnel from product development efforts;
- our having to defend against litigation related to defective products or related property damage or personal injury; and
- damage to our reputation in the industry that could adversely affect our relationships with our customers.

In addition, the process of identifying a recalled product in devices that have been widely distributed may be lengthy and require significant resources. We may have difficulty identifying the end customers of the defective products in the field, which may cause us to incur significant replacement costs, contract damage claims from our customers and further reputational harm. Any of these problems could materially and adversely affect our results of operations.

Despite our best efforts, security vulnerabilities may exist with respect to our products. Mitigation techniques designed to address such security vulnerabilities, including software and firmware updates or other preventative measures, may not operate as intended or effectively resolve such vulnerabilities. Software and firmware updates and/or other mitigation efforts may result in performance issues, system instability, data loss or corruption, unpredictable system behavior, or the theft of data by third parties, any of which could significantly harm our business and reputation.

We rely on third-party distributors and manufacturers' representatives and the failure of these distributors and manufacturers' representatives to perform as expected could reduce our future sales.

From time to time, we enter into relationships with distributors and manufacturers' representatives to sell our products, and we are unable to predict the extent to which these partners will be successful in marketing and selling our products. Moreover, many of our distributors and manufacturers' representatives also market and sell competing products, and may terminate their relationships with us at any time. Our future performance will also depend, in part, on our ability to attract additional distributors or manufacturers' representatives that will be able to market and support our products effectively, especially in markets in which we have not previously distributed our products. If we cannot retain or attract quality distributors or manufacturers' representatives, our sales and results of operations will be harmed.

WE OPERATE GLOBALLY AND ARE SUBJECT TO SIGNIFICANT RISKS IN MANY JURISDICTIONS

Adverse changes in the political and economic policies of the U.S. government in connection with trade with China and Chinese customers have reduced the demand for our products and damaged our business.

Regulatory activity, such as tariffs, export controls, economic sanctions and vigorous enforcement of U.S. export controls and economic sanctions laws have in the past and may continue to materially limit our ability to make sales to our significant customers in China, which has in the past and may continue to harm our results of operations, reputation and financial condition. For example, addition of companies to the Entity List, which places export restrictions on certain foreign persons or entities by the U.S. Department of Commerce's Bureau of Industry and Security, has dampened demand for our products in China, adding to the already challenging macroeconomic environment. Due to the U.S. government restricting sales to certain customers in China, sales to some of our customers require licenses in order for us to export our products; however, in the past some of these licenses have been denied and there can be no assurances that requests for future licenses will be approved by the U.S. government. Moreover, concerns that U.S. companies may not be reliable suppliers as a result of these and other actions has caused, and may in the future cause, some of our customers in China to amass large inventories of our products well in advance of need or caused some of our customers to replace our products in favor of products from other suppliers. As a result, the Chinese government adopted a law with respect to unreliable suppliers. Being designated as an unreliable supplier would have an adverse impact on our business and operations. In addition, there may be indirect impacts to our business that we cannot easily quantify such as the fact that some of our other customers' products may also be impacted by export restrictions. In addition, any customers in China that are subject to trade restrictions or tariffs, may develop their own products or solutions instead of purchasing from us or they may acquire products or solutions from our competitors or other third-party sources that are not subject to the U.S. tariffs and trade restrictions. If export restrictions related to Chinese customers are sustained for a long period of time, or increased, or if other export restrictions are imposed, it will have an adverse impact on our revenues and results of operations.

In addition, companies in the semiconductor industry, including us, may be impacted by rules and regulations related to business activities in China, or other locations, due to concerns that semiconductors are necessary for U.S. national security, manufacturing and critical infrastructure, and compliance with these rules and regulations may adversely affect our revenues and results of operations. For example, in February 2022, the U.S. National Science and Technology Council published an updated list of critical and emerging technologies, which includes semiconductors, as part of an ongoing effort to identify advanced technologies that are potentially significant to U.S. national security, which could result in more stringent export controls or a greater number of our products requiring a license for export to China.

Most of our products are manufactured by third-party foundries located in Taiwan. As we have a significant amount of sales into China, we may be adversely impacted by export restrictions, labeling requirements or other trade related issues or disputes, or political conflicts between China and Taiwan as these restrictions and requirements could impact or delay the delivery of our products to our customers in China.

We typically sell products to customers in China pursuant to purchase orders rather than long term purchase commitments. Some customers in China may be able to cancel or defer purchase orders on short notice without incurring a penalty and, therefore, they may be more likely to do so while the tariffs and trade restrictions are in effect. See also, the Risk Factor entitled "*We are subject to order and shipment uncertainties. If we are unable to accurately predict customer demand, we may hold excess or obsolete inventory, which would reduce our gross margin. Conversely, we may have insufficient inventory or be unable to obtain the supplies or contract manufacturing capacity to meet that demand which would result in lost revenue opportunities and potential loss of market share as well as damaged customer relationships.*"

Changes to U.S. or foreign tax, trade policy, tariff and import/export regulations may have a material adverse effect on our business, financial condition and results of operations.

Changes in U.S. or foreign international tax, social, political, regulatory and economic conditions or in laws and policies governing foreign trade, manufacturing, development and investment in the territories or countries where we currently sell our products or conduct our business have in the past and could in the future adversely affect our business. For example, while we don't expect Russia's invasion of Ukraine or the related current or future export and other business sanctions on Russia to materially impact us directly due to our limited sales to Russia and Ukraine, we are unable at this time to predict the indirect impact this conflict will have on us through impacts to the supply chain, the global and domestic economies, interest rates or stock markets.

The prior U.S. presidential administration instituted or proposed changes in trade policies that included the negotiation or termination of trade agreements, the imposition of higher tariffs on imports into the U.S., economic sanctions on individuals, corporations or countries, and other government regulations affecting trade between the U.S. and other countries where we conduct our business. Any new tariffs and other changes in U.S. trade policy could trigger retaliatory actions by affected countries, and certain foreign governments have instituted or are considering imposing trade sanctions on certain U.S. goods. The prior U.S. presidential administration also focused on policy reforms that discouraged corporations from outsourcing manufacturing and production activities to foreign jurisdictions, including through tariffs or penalties on goods manufactured outside the U.S., which required us to change the way we conduct business. The current U.S. presidential administration has continued certain import tariffs and export restrictions against certain foreign manufacturers initiated by the prior administration. Political changes and trends such as populism, protectionism, economic nationalism and sentiment toward multinational companies and resulting changes to trade, tax or other laws and policies may be disruptive to our businesses. These changes in U.S. and foreign laws and policies have the potential to adversely impact the U.S. economy or certain sectors thereof, our industry and the global demand for our products, and as a result, could have a material adverse effect on our business, financial condition and results of operations. See also, "*Adverse changes in the political and economic policies of the U.S. government in connection with trade with China have reduced the demand for our products and damaged our business*" and "*Changes in existing taxation benefits, tax rules or tax practices may adversely affect our financial results.*"

We face additional risks due to the extent of our global operations since a majority of our products, and those of many of our customers, are manufactured and sold outside of the United States. The occurrence of any or a combination of the additional risks described below would significantly and negatively impact our business and results of operations.

A substantial portion of our business is conducted outside of the United States and, as a result, we are subject to foreign business, political and economic risks. Most of our products are manufactured by our manufacturing partners outside of the United States. Most of our current qualified integrated circuit foundries are located in the same region within Taiwan. In addition, our primary assembly, testing and packaging subcontractors are located in the Pacific Rim region. For example, a substantial amount of our revenue is derived from products manufactured in Taiwan and as a result, disruptions to business in Taiwan, whether political, military, natural disasters or other events will adversely impact our business. In addition, many of our customers are located outside of the United States, primarily in Asia, which further exposes us to foreign risks. Sales shipped to customers with operations in Asia represented approximately 76% and 80% of our net revenue in the three months ended July 30, 2022 and July 31, 2021, respectively.

We also have substantial operations outside of the United States. We anticipate that our manufacturing, assembly, testing, packaging and sales outside of the United States will continue to account for a substantial portion of our operations and revenue in future periods.

Accordingly, we are subject to risks associated with international operations, including:

- actual or threatened public health emergencies such as the COVID-19 pandemic on our operations, employees, customers and suppliers;
- political, social and economic instability, military hostilities including invasions, wars, terrorism, political unrest, boycotts, curtailment of trade and other business restrictions;
- volatile global economic conditions, including downturns or recessions in which some competitors may become more aggressive in their pricing practices, which would adversely impact our gross margin;
- compliance with domestic and foreign export and import regulations, including pending changes thereto, and difficulties in obtaining and complying with domestic and foreign export, import and other governmental approvals, permits and licenses;

- local laws and practices that favor local companies, including business practices in which we are prohibited from engaging by the Foreign Corrupt Practices Act and other anti-corruption laws and regulations;
- difficulties in staffing and managing foreign operations;
- natural disasters or other events, including droughts or other water shortages, earthquakes, fires, tsunamis and floods, or power outages;
- trade restrictions, higher tariffs, worsening trade relationship between the United States and China, or changes in cross border taxation, particularly in light of the tariffs imposed by the prior U.S. presidential administration;
- transportation and port-related delays;
- difficulties of managing foreign distributors;
- less effective protection of intellectual property than is afforded to us in the United States or other developed countries;
- inadequate local infrastructure; and
- exposure to local banking, currency control and other financial-related risks.

As a result of having global operations, the sudden disruption of the supply chain and/or disruption of the manufacture of our customer's products caused by events outside of our control has in the past and may in the future impact our results of operations by impairing our ability to timely and efficiently deliver our products. See also, *"We rely on our manufacturing partners for the manufacture, assembly, testing and packaging of our products, and the failure of any of these third-party vendors to deliver products or otherwise perform as requested or to be able to fulfill our orders could damage our relationships with our customers, decrease our sales and limit our ability to grow our business."*

Moreover, the international nature of our business subjects us to risks associated with the fluctuation of the U.S. dollar versus foreign currencies. Decreases in the value of the U.S. dollar versus currencies in jurisdictions where we have large fixed costs, or where our third-party manufacturing partners have significant costs, will increase the cost of such operations which could harm our results of operations.

CHANGES IN PRODUCT DEMAND CAN ADVERSELY AFFECT OUR FINANCIAL RESULTS

Unfavorable or uncertain conditions in the 5G and Cloud markets may cause fluctuations in our rate of revenue growth or financial results.

Markets for our 5G and Cloud products may not develop in the manner or in the time periods we anticipate. If domestic and global economic conditions continue to worsen, overall spending on our 5G and Cloud products may be reduced, which would adversely impact demand for our products in these markets. In addition, unfavorable developments with evolving laws and regulations worldwide related to these products and suppliers may limit global adoption, impede our strategy, and negatively impact our long-term expectations in this area. Even if the 5G and Cloud markets develop in the manner or in the time periods we anticipate, if we do not have timely, competitively priced, market-accepted products available to meet our customers' planned roll-out of 5G wireless communication systems or Cloud systems, we may miss a significant opportunity and our business, financial condition, results of operations and cash flows could be materially and adversely affected. In addition, as a result of the fact that the markets for 5G and Cloud are not yet fully developed, demand for these products may be unpredictable and may vary significantly from one period to another. See also, *"Our sales are concentrated in a few large customers. If we lose or experience a significant reduction in sales to any of these key customers, if any of these key customers experience a significant decline in market share, or if any of these customers experience significant financial difficulties, our revenue may decrease substantially and our results of operations and financial condition may be harmed."* See also, *"Adverse changes in the political and economic policies of the U.S. government in connection with trade with China have reduced the demand for our products and damaged our business"* for additional risks related to export restrictions that may impact certain customers in the 5G and Cloud markets.

Our sales are concentrated in a few large customers. If we lose or experience a significant reduction in sales to any of these key customers, if any of these key customers experience a significant decline in market share, or if any of these customers experience significant financial difficulties, our revenue may decrease substantially and our results of operations and financial condition may be harmed.

We receive a significant amount of our revenue from a limited number of customers. For example, during fiscal 2022, there was one distributor, whose revenue as a percentage of our net revenue was 10% or greater of total net revenues. In addition, net revenue from our ten (10) largest customers, including this distributor, represented 56% of our net revenue for the fiscal year ended January 29, 2022. Sales to our largest customers have fluctuated significantly from period to period and year to year and will likely continue to fluctuate in the future, primarily due to the timing and number of design wins with each customer, the continued diversification of our customer base as we expand into new markets, and natural disasters or other issues that may divert a customer's operations. The loss of any of our large customers or a significant reduction in sales we make to them would likely harm our financial condition and results of operations. To the extent one or more of our large customers experience significant financial difficulty, bankruptcy or insolvency, this could have a material adverse effect on our sales and our ability to collect on receivables, which could harm our financial condition and results of operations.

If we are unable to increase the number of large customers in key markets, then our operating results in the foreseeable future will continue to depend on sales to a relatively small number of customers, as well as the ability of these customers to sell products that incorporate our products. In the future, these customers may decide not to purchase our products at all, purchase fewer products than they did in the past, or alter their purchasing patterns in some other way, particularly because:

- a significant portion of our sales are made on a purchase order basis, which allows our customers to cancel, change or delay product purchase commitments with relatively short notice to us;
- customers may purchase similar products from our competitors;
- customers may discontinue sales or lose market share in the markets for which they purchase our products;
- customers, particularly in jurisdictions such as China that may be subject to trade restrictions or tariffs, may develop their own solutions or acquire fully developed solutions from third-parties; or
- customers may be subject to severe business disruptions, including, but not limited to, those driven by recessions, financial instability, actual or threatened public health emergencies, such as the COVID-19 pandemic, other global or regional macroeconomic developments, or natural disasters.

In addition, there has been a trend toward customer consolidation in the semiconductor industry through business combinations, including mergers, asset acquisitions and strategic partnerships (for example, Western Digital acquired SanDisk in 2017 and Toshiba Corporation sold control of a portion of its semiconductor business in 2018). Mergers or restructuring among our customers, or their end customers, could increase our customer concentration with a particular customer or reduce total demand as the combined entities reevaluate their business and consolidate their suppliers. Such future developments, particularly in those end markets that account for more significant portions of our revenues, could harm our business and our results of operations.

In addition, we may be less likely to negotiate as favorable terms with larger customers whether those customers resulted from customer consolidation, merger integrations or other reasons, and any such less favorable terms could harm our business and our results of operations.

We are subject to order and shipment uncertainties. If we are unable to accurately predict customer demand, we may hold excess or obsolete inventory, which would reduce our gross margin. Conversely, we may have insufficient inventory or be unable to obtain the supplies or contract manufacturing capacity to meet that demand which would result in lost revenue opportunities and potential loss of market share as well as damaged customer relationships.

We typically sell products pursuant to purchase orders rather than long-term purchase commitments. Some of our customers may cancel or defer purchase orders on short notice without incurring a significant penalty. Due to their inability to predict demand or other reasons, some of our customers may accumulate excess inventories and, as a consequence, defer purchase of our products. We cannot accurately predict what or how many products our customers will need in the future. Anticipating demand is difficult because our customers face unpredictable demand for their own products and are increasingly focused more on cash preservation and tighter inventory management. In addition, as an increasing number of our semiconductor solutions are being incorporated into consumer products, we anticipate greater fluctuations in demand for our products, which makes it more difficult to forecast customer demand.

We place orders with our suppliers based on forecasts of customer demand and, in some instances, may establish buffer inventories to accommodate anticipated demand. Our forecasts are based on multiple assumptions, each of which may introduce error into our estimates. For example, our ability to accurately forecast customer demand may be impaired by the delays inherent in our customer's product development processes, which may include extensive qualification and testing of components included in their products, including ours. In many cases, they design their products to use components from multiple suppliers. This creates the risk that our customers may decide to cancel or change product plans for products incorporating our semiconductor solutions prior to completion, which makes it even more difficult to forecast customer demand. In addition, while many of our customers are subject to purchase orders or other agreements that do not allow for cancellation, there can be no assurance that these customers will honor these contract terms and cancellation of these orders may adversely affect our business operations and demand forecast which is the basis for us to have products made.

Our products are incorporated into complex devices and systems, which creates supply chain cross-dependencies. Due to cross dependencies, any supply chain disruptions could negatively impact the demand for our products in the short term. We have a limited ability to predict the timing of a supply chain correction. As we have a broad product portfolio and diversified products with many different SKUs, significant supply chain disruptions may cause us to have more work-in-process inventories we hold to ensure we have flexibility to support our customers. If we cannot predict future customer demand or supply chain disruptions, then we may hold excess or obsolete inventory. Moreover, significant supply chain disruption may negatively impact the timing of our product shipments and revenue shipment linearity which may impact and extend our cash conversion cycle. In addition, the market share of our customers could be adversely impacted on a long-term basis due to any continued supply chain disruption, which could negatively affect our results of operations. See also, *"We rely on our manufacturing partners for the manufacture, assembly, testing and packaging of our products, and the failure of any of these third-party vendors to deliver products or otherwise perform as requested could damage our relationships with our customers, decrease our sales and limit our ability to grow our business"* for additional information on the impacts of supply chain cross-dependencies on our business.

If we overestimate customer demand, our excess or obsolete inventory may increase significantly, which would reduce our gross margin and adversely affect our financial results. The risk of obsolescence and/or excess inventory is heightened for semiconductor solutions designed for consumer electronics due to the rapidly changing market for these types of products. Conversely, if we underestimate customer demand or if insufficient manufacturing capacity is available, we would miss revenue opportunities and potentially lose market share and damage our customer relationships. In addition, any future significant cancellations or deferrals of product orders or the return of previously sold products could materially and adversely affect our profit margins, increase product obsolescence and restrict our ability to fund our operations.

We operate in intensely competitive markets. Our failure to compete effectively would harm our results of operations.

The semiconductor industry, and specifically the storage, networking and infrastructure markets, is extremely competitive. We currently compete with a number of large domestic and international companies in the business of designing semiconductor solutions and related applications, some of which have greater financial, technical and management resources than us. Our efforts to introduce new products into markets with entrenched competitors will expose us to additional competitive pressures. For example, we are facing, and expect we will continue to face, significant competition in the infrastructure, networking and SSD storage markets. Additionally, customer expectations and requirements have been evolving rapidly. For example, customers now expect us to provide turnkey solutions and commit to future roadmaps that have technical risks.

Some of our competitors may be better situated to meet changing customer needs and secure design wins. Increasing competition in the markets in which we operate may negatively impact our revenue and gross margins. For example, competitors with greater financial resources may be able to offer lower prices than us, or they may offer additional products, services or other incentives that we may not be able to match.

We also may experience discriminatory or anti-competitive practices by our competitors that could impede our growth, cause us to incur additional expense or otherwise negatively affect our business. In addition, some of these competitors may use their market power to dissuade our customers from purchasing from us.

In addition, many of our competitors operate and maintain their own fabrication facilities and have longer operating histories, greater name recognition, larger customer bases, and greater sales, marketing and distribution resources than we do. Moreover, the semiconductor industry has experienced increased consolidation over the past several years. For example, NVIDIA Corporation acquired Mellanox Technologies in April 2020, Infineon acquired Cypress Semiconductors in April 2020, Analog Devices Inc. acquired Maxim Integrated Products Inc. in August 2021, Renesas Electronics Corporation acquired Dialog Semiconductor in August 2021, AMD acquired Xilinx, Inc. in February 2022 and Pensando Systems in May 2022. In addition, MaxLinear, Inc. announced plans to acquire Silicon Motion in May 2022 and Broadcom announced plans to acquire VMware in May 2022. In addition, we license technology from Arm Limited that is included in a majority of our products and would be adversely impacted if the pricing for, or availability of, the relevant technology is changed in an adverse manner as a result of similar future transactions. Consolidation among our competitors has led, and in the future could lead, to a changing competitive landscape, capabilities and market share, which could put us at a competitive disadvantage and harm our results of operations.

Our gross margin and results of operations may be adversely affected in the future by a number of factors, including decreases in average selling prices of products over time, shifts in our product mix, or price increases of certain components or third-party services due to inflation, supply chain constraints, or for other reasons.

The products we develop and sell are primarily used for high-volume applications. While prices of our products have increased recently due to inflation and additional costs resulting from securing an increase in supply in the current constrained environment, the prices of our products have historically decreased. We expect that the average unit selling prices of our products will continue to be subject to significant pricing pressures. In addition, our more recently introduced products tend to have higher associated costs because of initial overall development and production expenses. Therefore, over time, we may not be able to maintain or improve our gross margins. Our financial results could suffer if we are unable to offset any reductions in our average selling prices by other cost reductions through efficiencies, introduction of higher margin products and other means.

To attract new customers or retain existing customers, we may offer certain price concessions to certain customers, which could cause our average selling prices and gross margins to decline. In the past, we have reduced the average selling prices of our products in anticipation of future competitive pricing pressures, new product introductions by us or by our competitors and other factors. We expect to continue to have to reduce prices of existing products in the future. Moreover, because of the wide price differences across the markets we serve, the mix and types of performance capabilities of our products sold may affect the average selling prices of our products and have a substantial impact on our revenue and gross margin. We may enter new markets in which a significant amount of competition exists, and this may require us to sell our products with lower gross margins than we earn in our established businesses. If we are successful in growing revenue in these markets, our overall gross margin may decline. Fluctuations in the mix and types of our products may also affect the extent to which we are able to recover the fixed costs and investments associated with a particular product, and as a result may harm our financial results.

Additionally, because we do not operate our own manufacturing, assembly, testing or packaging facilities, we may not be able to reduce our costs as rapidly as companies that operate their own facilities and our costs may even increase, which could also reduce our gross margins. Our gross margin could also be impacted by increased cost (including those caused by tariffs, inflation or supply chain constraints), loss of cost savings or dilution of savings due to changes in charges incurred due to inventory holding periods if parts ordering does not correctly anticipate product demand or if the financial health of either our manufacturers partners or our suppliers deteriorates as well as excess inventory and inventory holding and obsolescence charges. In addition, we are subject to risks from fluctuating market prices of certain components, which are incorporated into our products or used by our suppliers to manufacture our products. Supplies of these components may from time to time become restricted, or general market factors and conditions such as inflation or supply chain constraints have in the past affected and may in the future affect pricing of such commodities. For example, supply shortages in the semiconductor industry of multi-layer complex substrates, IC packaging capacity and fab constraints have resulted in increased lead times, inability to meet demand, and increased costs. Any increase in the price of components used in our products will adversely affect our gross margins.

Entry into new markets, such as markets with different business models, as a result of our acquisitions may reduce our gross margin and operating margin. For example, for certain products we use an ASIC model to offer end-to-end solutions for intellectual property, design team, fab and packaging to deliver a tested, yielded product to customers. This business model tends to have a lower gross margin. In addition, the costs related to this type of business model typically include significant NRE (non-recurring engineering) costs that customers pay based on the completion of milestones. Our operating margin may decline if our customers do not agree to pay for NREs, if they do not pay enough to cover the costs we incur in connection with NREs, or non-payment of previously agreed NRE costs. In addition, our operating margin may decline if we are unable to sell products in sufficient volumes to cover the development costs that we have incurred. In addition, the ASIC business model requires us to use third-party intellectual property and we may lose business or experience reputational harm if third parties, including customers, lose confidence in our ability to protect their intellectual property rights.

CHANGES IN OUR EFFECTIVE TAX RATE MAY REDUCE OUR NET INCOME

Changes in existing taxation benefits, tax rules or tax practices may adversely affect our financial results.

As a result of the closing of our transaction with Inphi in fiscal 2022, the Company is now domiciled in the United States and not Bermuda. Therefore, the income from all foreign subsidiaries is now subject to the U.S. provisions applicable to Global Intangible Low Taxed Income (“GILTI”), which generally requires GILTI income to be included in the taxable income of U.S. entities. The U.S. currently has a federal corporate tax rate of 21%. President Biden signed into law the Inflation Reduction Act of 2022 (“IRA”) on 16 August 2022 and the CHIPS and Science Act of 2022 on 9 August 2022. These laws implement new tax provisions and provide for various incentives and tax credits. The IRA applies to tax years beginning after December 31, 2022 and introduces a 15% corporate alternative minimum tax (CAMT) for corporations whose average annual adjusted financial statement income for any consecutive three-tax-year period preceding the tax year exceeds \$1 billion and a 1% excise tax on certain stock repurchases made by publicly traded US corporations after December 31, 2022. If we are subject to these new taxes under the IRA, it could materially affect our financial results, including our earnings and cash flow.

The Organization for Economic Cooperation and Development (the “OECD”) has been working on a Base Erosion and Profit Shifting Project, and since 2015 has been issuing guidelines and proposals with respect to various aspects of the existing framework under which our tax obligations are determined in the countries in which we do business. In 2021, the OECD announced that more than 140 member jurisdictions (including the United States, Singapore, and Bermuda) have politically committed to potential changes to the international corporate tax system, including enacting a minimum tax rate of at least 15%. Such proposed changes have not generally been enacted into law in the primary jurisdictions in which we operate. We calculate our income taxes based on currently enacted laws. Because of increasing focus by government taxing authorities on multinational companies, the tax laws of certain countries in which we do business could change on a prospective or retroactive basis, and any such changes could increase our liabilities for taxes, interest and penalties, and could materially adversely impact our financial results, including our earnings and cash flow.

In addition, in prior years, we entered into incentive agreements in certain foreign jurisdictions that provide for reduced tax rates in such jurisdictions if certain criteria are met. During the three months ended April 30, 2022, the Singapore Economic Development Board (“EDB”) agreed to extend the Company’s Development and Expansion Incentive (“DEI”) by five years until June 30, 2029. In addition, under the Israeli Encouragement law of “approved or benefited enterprise,” our subsidiary in Israel, Marvell Israel (M.I.S.L) Ltd., is entitled to reduced tax rates and exemption of certain income from taxation through fiscal 2027. Receipt of past and future benefits under tax agreements and incentives may depend on several factors, including but not limited to, our ability to fulfill commitments regarding employment of personnel, investment, or performance of specified activities in the applicable jurisdictions as well as changes in foreign laws. Changes in our business plans, including divestitures, could result in termination of an agreement or loss of tax benefits thereunder. If any of our tax agreements in any of these foreign jurisdictions were terminated, our results of operations and our financial position could be harmed.

In addition, in prior periods, the Company transferred certain intellectual property to a related entity in Singapore. The impact to the Company was based on our determination of the fair value of this property, which required management to make significant estimates and to apply complex tax regulations in multiple jurisdictions. In future periods, local tax authorities may challenge the Company’s valuations of these assets, which could reduce our expected tax benefits from these transactions.

Our profitability and effective tax rate could be impacted by unexpected changes to our statutory income tax rates or income tax liabilities. Such changes could result from various items, including changes in tax laws or regulations, changes to court or administrative interpretations of tax laws, changes to our geographic mix of earnings, changes in the valuation of our deferred tax assets and liabilities, changes in valuation allowances on our deferred tax assets, discrete items, changes in our supply chain, and changes due to audit assessments. In particular, the tax benefits associated with our transfer of intellectual property to Singapore are sensitive to our future profitability and taxable income in Singapore, audit assessments, and changes in applicable tax law. Our current corporate effective tax rate fluctuates significantly from period to period, and is based on the application of currently applicable income tax laws, regulations and treaties, as well as current judicial and administrative interpretations of these income tax laws, regulations and treaties, in various jurisdictions.

WE ARE SUBJECT TO RISKS RELATED TO OUR ASSETS

We are exposed to potential impairment charges on certain assets.

We had approximately \$11.6 billion of goodwill and \$5.6 billion of acquired intangible assets on our unaudited condensed consolidated balance sheet as of July 30, 2022. Under generally accepted accounting principles in the United States, we are required to review our intangible assets including goodwill for impairment whenever events or changes in circumstances indicate that the carrying value of these assets may not be recoverable. We perform an assessment of goodwill for impairment annually on the last business day of our fiscal fourth quarter and whenever events or changes in circumstances indicate the carrying amount of goodwill may not be recoverable. When testing goodwill for impairment, we first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value or we may determine to proceed directly to the quantitative impairment test.

Factors we consider important in the qualitative assessment which could trigger a goodwill impairment review include: significant underperformance relative to historical or projected future operating results; significant changes in the manner of our use of the acquired assets or the strategy for our overall business; significant negative industry or economic trends; a significant decline in our stock price for a sustained period; and a significant change in our market capitalization relative to our net book value.

We assess the impairment of intangible assets whenever events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. Circumstances which could trigger a review include, but are not limited to the following: significant decreases in the market price of the asset; significant adverse changes in the business climate or legal factors; accumulation of costs significantly in excess of the amount originally expected for the acquisition or construction of the asset; current period cash flow or operating losses combined with a history of losses or a forecast of continuing losses associated with the use of the asset; and current expectation that the asset will more likely than not be sold or disposed of significantly before the end of its estimated useful life.

For example, during the second quarter of fiscal 2021, we made changes to the scope of our server processor product line in response to changes in the associated market. We are transitioning our product offering from standard server processors to the broad server market to focus only on customized server processors for a few targeted customers. This change in strategy required the Company to assess whether the carrying value of the associated assets would be recoverable. As a result of the assessment, we determined the carrying amount of certain impacted assets are not recoverable, which resulted in recognition of \$119.0 million of restructuring related charges associated with the server processor product line during the second quarter of fiscal 2021. See “Note 9 – Restructuring” in the Notes to the Unaudited Condensed Consolidated Financial Statements for further information.

We have determined that our business operates as a single operating segment and has a single reporting unit for the purpose of goodwill impairment testing. The fair value of the reporting unit is determined by taking our market capitalization as determined through quoted market prices and as adjusted for a control premium and other relevant factors. If our fair value declines to below our carrying value, we could incur significant goodwill impairment charges, which could negatively impact our financial results. If in the future a change in our organizational structure results in more than one reporting unit, we will be required to allocate our goodwill and perform an assessment of goodwill for impairment in each reporting unit. As a result, we could have an impairment of goodwill in one or more of such future reporting units.

In addition, from time to time, we have made investments in private companies. If the companies that we invest in are unable to execute their plans and succeed in their respective markets, we may not benefit from such investments, and we could potentially lose the amounts we invest. We evaluate our investment portfolio on a regular basis to determine if impairments have occurred. If the operations of any businesses that we have acquired declines significantly, we could incur significant intangible asset impairment charges. Impairment charges could have a material impact on our results of operations in any period.

We are subject to the risks of owning real property.

Our buildings in Santa Clara, California and Shanghai, China subject us to the risks of owning real property, which include, but are not limited to:

- the possibility of environmental contamination and the costs associated with remediating any environmental problems;
- adverse changes in the value of these properties due to interest rate changes, changes in the neighborhood in which the property is located, or other factors;
- the possible need for structural improvements in order to comply with zoning, seismic and other legal or regulatory requirements;
- the potential disruption of our business and operations arising from or connected with a relocation due to moving to or renovating the facility;
- increased cash commitments for improvements to the buildings or the property, or both;
- increased operating expenses for the buildings or the property, or both;
- possible disputes with third parties related to the buildings or the property, or both;
- failure to achieve expected cost savings due to extended non-occupancy of a vacated property intended to be leased; and
- the risk of financial loss in excess of amounts covered by insurance, or uninsured risks, such as the loss caused by damage to the buildings as a result of earthquakes, floods and/or other natural disasters.

WE ARE SUBJECT TO IP RISKS AND RISKS ASSOCIATED WITH LITIGATION AND REGULATORY PROCEEDINGS

We may be unable to protect our intellectual property, which would negatively affect our ability to compete.

We believe one of our key competitive advantages results from the collection of proprietary technologies we have developed and acquired since our inception, and the protection of our intellectual property rights is, and will continue to be, important to the success of our business. If we fail to protect these intellectual property rights, competitors could sell products based on technology that we have developed, which could harm our competitive position and decrease our revenue.

We rely on a combination of patents, copyrights, trademarks, trade secrets, contractual provisions, confidentiality agreements, licenses and other methods, to protect our proprietary technologies. We also enter into confidentiality or license agreements with our employees, consultants, manufacturing or other business partners, and control access to and distribution of our documentation and other proprietary information. Notwithstanding these agreements, we have experienced disputes with employees regarding ownership of intellectual property in the past. To the extent that any third-party has a claim to ownership of any relevant technologies used in our products, we may not be able to recognize the full revenue stream from such relevant technologies.

We have been issued a significant number of U.S. and foreign patents and have a significant number of pending U.S. and foreign patent applications. However, a patent may not be issued as a result of any applications or, if issued, claims allowed may not be sufficiently broad to protect our technology. In addition, it is possible that existing or future patents may be challenged, invalidated or circumvented. We may also be required to license some of our patents to others including competitors as a result of our participation in and contribution to development of industry standards. Despite our efforts, unauthorized parties may attempt to copy or otherwise obtain and use our products or proprietary technology. Monitoring unauthorized use of our technology is difficult, and the steps that we have taken may not prevent unauthorized use of our technology, particularly in jurisdictions where the laws may not protect our proprietary rights as fully as in the United States or other developed countries. If our patents do not adequately protect our technology, our competitors may be able to offer products similar to ours, which would adversely impact our business and results of operations. In addition, we have implemented security systems with the intent of maintaining the physical security of our facilities and protecting our confidential information including our intellectual property. Despite our efforts, we may be subject to breach of these security systems and controls which may result in unauthorized access to our facilities and labs and/or unauthorized use or theft of the confidential information and intellectual property we are trying to protect. See also, *“Cybersecurity risks could adversely affect our business and disrupt our operations.”* If we fail to protect these intellectual property rights, competitors could sell products based on technology that we have developed, which could harm our competitive position and decrease our revenue.

Certain of our software, as well as that of our customers, may be derived from so-called “open source” software that is generally made available to the public by its authors and/or other third parties. Open source software is made available under licenses that impose certain obligations on us in the event we were to distribute derivative works of the open source software. These obligations may require us to make source code for the derivative works available to the public and/or license such derivative works under a particular type of license, rather than the forms of license we customarily use to protect our intellectual property. While we believe we have complied with our obligations under the various applicable licenses for open source software, in the event that the copyright holder of any open source software were to successfully establish in court that we had not complied with the terms of a license for a particular work, we could be required to release the source code of that work to the public and/or stop distribution of that work if the license is terminated which could adversely impact our business and results of operations.

We must comply with a variety of existing and future laws and regulations, as well as Environmental, Social and Governance (ESG) initiatives, that could impose substantial costs on us and may adversely affect our business.

We are subject to laws and regulations worldwide, which may differ among jurisdictions, affecting our operations in areas including, but not limited to: intellectual property ownership and infringement; tax; import and export requirements; anti-corruption; foreign exchange controls and cash repatriation restrictions; conflict minerals; data privacy requirements; competition; advertising; employment; product regulations; environment, health and safety requirements; and consumer laws. For example, government export regulations apply to the encryption or other features contained in some of our products. If we fail to continue to receive licenses or otherwise comply with these regulations, we may be unable to manufacture the affected products at foreign foundries or ship these products to certain customers, or we may incur penalties or fines. In addition, we are subject to various industry requirements restricting the presence of certain substances in electronic products. Although our management systems are designed to maintain compliance, we cannot assure you that we have been or will be at all times in compliance with such laws and regulations. Our compliance programs rely in part on compliance by our manufacturing partners, suppliers, vendors and distributors. To the extent such third parties don’t comply with these obligations our business, operations and reputation may be adversely impacted. If we violate or fail to comply with any of the above requirements, a range of consequences could result, including fines, import/export restrictions, sales limitations, criminal and civil liabilities or other sanctions. The costs of complying with these laws (including the costs of any investigations, auditing and monitoring) could adversely affect our current or future business.

Our product or manufacturing standards could also be impacted by new or revised environmental rules and regulations or other social initiatives. For example, a significant portion of our revenues come from international sales. Environmental legislation, such as the EU Directive on Restriction of Hazardous Substances (RoHS), the EU Waste Electrical and Electronic Equipment Directive (WEEE Directive) and China’s regulation on Management Methods for Controlling Pollution Caused by Electronic Information Products, may increase our cost of doing business internationally and impact our revenues from the EU, China and other countries with similar environmental legislation as we endeavor to comply with and implement these requirements.

Increasingly regulators (including the U.S. Securities and Exchange Commission), customers, investors, employees and other stakeholders are focusing on Environmental, Social and Governance (ESG) matters. While we have certain ESG initiatives at the Company there can be no assurance that regulators, customers, investors, and employees will determine that these programs are sufficiently robust. In addition, there can be no assurance that we will be able to accomplish our announced goals related to our ESG program, as statements regarding our ESG goals reflect our current plans and aspirations and are not guarantees that we will be able to achieve them within the timelines we announce or at all. Actual or perceived shortcomings with respect to our ESG initiatives and reporting can impact our ability to hire and retain employees, increase our customer base, or attract and retain certain types of investors. In addition, these parties are increasingly focused on specific disclosures and frameworks related to ESG matters. Collecting, measuring, and reporting ESG information and metrics can be costly, difficult and time consuming, is subject to evolving reporting standards, and can present numerous operational, reputational, financial, legal and other risks, any of which could have a material impact, including on our reputation and stock price. Inadequate processes to collect and review this information prior to disclosure could be subject to potential liability related to such information.

A portion of the business we acquired in fiscal 2021 requires facility security clearances under the National Industrial Security Program. The National Industrial Security Program requires that a corporation maintaining a facility security clearance be effectively insulated from foreign ownership, control or influence (“FOCI”). Because we were organized in Bermuda at the time of this acquisition, we entered into agreements with the U.S. Department of Defense with respect to FOCI mitigation arrangements that relate to our operation of the portion of the business involving facility clearances. These measures and arrangements may materially and adversely affect our operating results due to the increased cost of compliance with these measures. If we fail to comply with our obligations under these agreements, our ability to operate our business may be adversely affected. Now that we are domiciled in the United States, we have requested to be released from some of the above FOCI-related obligations. We can offer no assurance that such a request will be granted in a timely manner or at all.

We are a party to certain contracts with the U.S. government or its subcontractors. Our contracts with government entities are subject to various procurement regulations and other requirements relating to their formation, administration and performance. We may be subject to audits and investigations relating to our government contracts, and any violations could result in various civil and criminal penalties and administrative sanctions, including termination of contracts, refunding or suspending of payments, forfeiture of profits, payment of fines, and suspension or debarment from future government business. In addition, such contracts may provide for termination by the government at any time, without cause. Any of these risks related to contracting with governmental entities could adversely impact our future sales and operating results.

We have been named as a party to several legal proceedings and may be named in additional ones in the future, including litigation involving our patents and other intellectual property, which could subject us to liability, require us to indemnify our customers, require us to obtain or renew licenses, require us to stop selling our products or force us to redesign our products.

We are currently, and have been in the past, named as a party to several lawsuits, government inquiries or investigations and other legal proceedings (referred to as “litigation”), and we may be named in additional ones in the future. Please see “Note 5 – Commitments and Contingencies” of our Notes to the Unaudited Condensed Consolidated Financial Statements set forth in Part I, Item 1 of this Quarterly Report on Form 10-Q for a more detailed description of material litigation matters in which we may be currently engaged.

In particular, litigation involving patents and other intellectual property is widespread in the high-technology industry and is particularly prevalent in the semiconductor industry, where a number of companies and other entities aggressively bring numerous infringement claims to assert their patent portfolios. The amount of damages alleged in intellectual property infringement claims can often be very significant. See also, “*We may be unable to protect our intellectual property, which would negatively affect our ability to compete.*”

From time to time, we receive and our customers receive, and we and our customers may continue to receive in the future, standards-based or other types of infringement claims, as well as claims against us and our proprietary technologies. These claims could result in litigation and/or claims for indemnification, which, in turn, could subject us to significant liability for damages, attorneys’ fees and costs. Any potential intellectual property litigation also could force us to do one or more of the following:

- stop selling, offering for sale, making, having made or exporting products or using technology that contains the allegedly infringing intellectual property;
- limit or restrict the type of work that employees involved in such litigation may perform for us;
- pay substantial damages and/or license fees and/or royalties to the party claiming infringement or other license violations that could adversely impact our liquidity or operating results;
- attempt to obtain or renew licenses to the relevant intellectual property, which licenses may not be available on reasonable terms or at all; and
- attempt to redesign those products that contain the allegedly infringing intellectual property.

Under certain circumstances, we have contractual and other legal obligations to indemnify and to incur legal expenses for current and former directors and officers. See also, “*Our indemnification obligations and limitations of our director and officer liability insurance may have a material adverse effect on our financial condition, results of operations and cash flows.*” Additionally, from time to time, we have agreed to indemnify select customers for claims alleging infringement of third-party intellectual property rights, including, but not limited to, patents, registered trademarks and/or copyrights. If we are required to make a significant payment under any of our indemnification obligations, our results of operations may be harmed.

The ultimate outcome of litigation could have a material adverse effect on our business and the trading price for our securities. Litigation may be time consuming, expensive, and disruptive to normal business operations, and the outcome of litigation is difficult to predict. Litigation, regardless of the outcome, may result in significant expenditures, diversion of our management's time and attention from the operation of our business and damage to our reputation or relationship with third parties, which could materially and adversely affect our business, financial condition, results of operations, cash flows and stock price.

WE ARE SUBJECT TO RISKS RELATED TO OUR DEBT OBLIGATIONS

Our indebtedness could adversely affect our financial condition and our ability to raise additional capital to fund our operations and limit our ability to react to changes in the economy or our industry.

We paid the cash portion of the consideration for the Inphi acquisition and other fees and expenses required to be paid in connection with the transaction from cash on hand and borrowings. On the closing date of the Inphi acquisition, the entire principal amount was funded and incurred in respect of the \$1.75 billion senior unsecured term loan facility, comprised of a \$875.0 million 3-year term loan tranche (the "3-Year Tranche Loan") and a \$875.0 million 5-year term loan tranche (the "5-Year Tranche Loan," and collectively with the 3-Year Tranche Loan, the "2024 and 2026 Term Loans"). The 2024 and 2026 Term Loans are evidenced by a credit agreement, dated December 7, 2020 (the "2024 and 2026 Term Loan Agreement") with JPMorgan Chase Bank, N.A., as administrative agent and a lender, and the other lenders from time to time party thereto. As of July 30, 2022, the Company had a balance of \$1.6 billion on the term loan facility. In addition to the 2024 and 2026 Term Loan Agreement, on December 7, 2020, we entered into a revolving credit agreement with JPMorgan Chase Bank, N.A., as administrative agent and a lender, and the other lenders from time to time party thereto ("2020 Revolving Credit Facility" and together with the 2024 and 2026 Term Loan Agreement, the "Credit Agreements"), which provides for a \$750.0 million revolving credit facility. As of July 30, 2022, the 2020 Revolving Credit Facility had an outstanding balance of \$70.0 million. We intend to repay this amount during the third quarter of fiscal 2023.

On April 12, 2021, the Company completed a private offering of (i) \$500.0 million aggregate principal amount of 2026 Senior Notes, (ii) \$750.0 million aggregate principal amount of 2028 Senior Notes and (iii) \$750.0 million aggregate principal amount of 2031 Senior Notes (collectively, the "Senior Notes"). In addition, on May 4, 2021, the Company completed a private exchange offer where we exchanged notes issued by Marvell Technology Group Ltd. (collectively, the "MTG Senior Notes") for \$433.9 million aggregate principal amount of 2023 Senior Notes and \$479.5 million aggregate principal amount of 2028 Senior Notes issued by the Company (the "MTI Senior Notes") (together with the Senior Notes, the "Notes"). As of July 30, 2022, the Company had \$2.0 billion aggregate principal amount of Senior Notes outstanding and \$913.2 million in aggregate principal amount of the MTI Senior Notes outstanding and \$86.7 million aggregate principal amount of the MTG Senior Notes outstanding. On October 8, 2021 and December 16, 2021, the Company completed registered exchange offers for each series of Notes. The terms of the new notes issued in the exchange offers are substantially identical to the Notes, except that the new notes are registered under the Securities Act of 1933 and the transfer restrictions and registration rights applicable to the Notes do not apply to the new notes.

Our indebtedness could have important consequences to us including:

- increasing our vulnerability to adverse general economic and industry conditions;
- requiring us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures, research and development efforts, execution of our business strategy, acquisitions and other general corporate purposes;
- limiting our flexibility in planning for, or reacting to, changes in the economy and the semiconductor industry;
- placing us at a competitive disadvantage compared to our competitors with less indebtedness;
- exposing us to interest rate risk to the extent of our variable rate indebtedness, particularly in the current environment of rising interest rates; and
- making it more difficult to borrow additional funds in the future to fund growth, acquisitions, working capital, capital expenditures and other purposes.

Although the Credit Agreements contain restrictions on our ability to incur additional indebtedness and the indentures governing the Notes (together, the "Notes Indentures") contain restrictions on creating liens and entering into certain sale-leaseback transactions, these restrictions are subject to a number of qualifications and exceptions, and the additional indebtedness, liens or sale-leaseback transactions incurred in compliance with these restrictions could be substantial.

The Credit Agreements, the Notes Indentures and the indenture governing the MTI Senior Notes contain customary events of default upon the occurrence of which, after any applicable grace period, the lenders would have the ability to immediately declare the loans due and payable in whole or in part. In such event, we may not have sufficient available cash to repay such debt at the time it becomes due, or be able to refinance such debt on acceptable terms or at all. Any of the foregoing could materially and adversely affect our financial condition and results of operations.

Adverse changes to our debt ratings could negatively affect our ability to raise additional capital.

We receive debt ratings from the major credit rating agencies in the United States. Factors that may impact our credit ratings include debt levels, planned asset purchases or sales and near-term and long-term production growth opportunities. Liquidity, asset quality, cost structure, reserve mix and commodity pricing levels could also be considered by the rating agencies. The applicable margins with respect to the loans incurred under the Credit Agreements will vary based on the applicable public ratings assigned to the senior unsecured long-term indebtedness by Moody's Investors Service, Inc., Standard & Poor's Financial Services LLC, Fitch's and any successor to each such rating agency business. A ratings downgrade could adversely impact our ability to access debt markets in the future and increase the cost of current or future debt and may adversely affect our share price.

The Credit Agreements and the Notes Indentures impose restrictions on our business.

The Credit Agreements and the Notes Indentures each contains a number of covenants imposing restrictions on our business. These restrictions may affect our ability to operate our business and may limit our ability to take advantage of potential business opportunities as they arise. The restrictions, among other things, restrict our ability and our subsidiaries' ability to create or incur certain liens, incur or guarantee additional indebtedness, merge or consolidate with other companies, pay dividends, transfer or sell assets and make restricted payments. These restrictions are subject to a number of limitations and exceptions set forth in the Credit Agreements and the Notes Indentures. Our ability to meet the leverage ratio set forth in the Credit Agreements may be affected by events beyond our control.

The foregoing restrictions could limit our ability to plan for, or react to, changes in market conditions or our capital needs. We do not know whether we will be granted waivers under, or amendments to, our Credit Agreements or to the Notes Indentures if for any reason we are unable to meet these requirements, or whether we will be able to refinance our indebtedness on terms acceptable to us, or at all.

We may be unable to generate the cash flow to service our debt obligations.

We may not be able to generate sufficient cash flow to enable us to service our indebtedness, including the Notes, or to make anticipated capital expenditures. Our ability to pay our expenses and satisfy our debt obligations, refinance our debt obligations and fund planned capital expenditures will depend on our future performance, which will be affected by general economic, financial competitive, legislative, regulatory and other factors beyond our control. If we are unable to generate sufficient cash flow from operations or to borrow sufficient funds in the future to service our debt, we may be required to sell assets, reduce capital expenditures, refinance all or a portion of our existing debt (including the Notes) or obtain additional financing. We cannot assure you that we will be able to refinance our debt, sell assets or borrow more money on terms acceptable to us, if at all. If we cannot make scheduled payments on our debt, we will be in default and holders of our debt could declare all outstanding principal and interest to be due and payable, and we could be forced into bankruptcy or liquidation. In addition, a material default on our indebtedness could suspend our eligibility to register securities using certain registration statement forms under SEC guidelines that permit incorporation by reference of substantial information regarding us, potentially hindering our ability to raise capital through the issuance of our securities and increasing our costs of registration.

We may, under certain circumstances, be required to repurchase the Notes at the option of the holder.

We will be required to repurchase the Notes at the option of each holder upon the occurrence of a change of control repurchase event as defined in the Notes Indentures. However, we may not have sufficient funds to repurchase the Notes in cash at the time of any change of control repurchase event. Our failure to repurchase the Notes upon a change of control repurchase event would be an event of default under the Notes Indentures and could cause a cross-default or acceleration under the Credit Agreements and certain future agreements governing our other indebtedness. The repayment obligations under the Notes may have the effect of discouraging, delaying or preventing a takeover of our company. If we were required to repurchase the Notes prior to their scheduled maturity, it could have a significant negative impact on our cash and liquidity and could impact our ability to invest financial resources in other strategic initiatives.

WE ARE SUBJECT TO CYBERSECURITY RISKS

Cybersecurity risks could adversely affect our business and disrupt our operations.

We depend heavily on our technology infrastructure and maintain and rely upon certain critical information systems for the effective operation of our business. We routinely collect and store sensitive data in our information systems, including intellectual property and other proprietary information about our business and that of our customers, suppliers and manufacturing and other business partners. These information technology systems are subject to damage or interruption from a number of potential sources, including, but not limited to, natural disasters, destructive or inadequate code, malware, power failures, cyber-attacks, internal malfeasance or other events. Cyber-attacks on us may include viruses and worms, ransomware attacks, and denial-of-service attacks. In addition, we have in the past and may in the future be the target of email phishing attacks that attempt to acquire personal information or company assets.

We have implemented processes for systems under our control intended to mitigate risks; however, we cannot guarantee that those risk mitigation measures will be effective. The Company has not experienced a material information security breach in the last three years, and as a result, we have not incurred any net expenses from such a breach. We have not been penalized or paid any amount under an information security breach settlement over the last three years. Further, the Company annually assesses its insurance policy and has determined not to purchase cyber related insurance. While we have historically been successful in defending against the cyber-attacks and breaches mentioned above, given the frequency of cyber-attacks and resulting breaches reported by other businesses and governments, it is likely we will experience one or more material breaches of some extent in the future. We have incurred and may in the future incur significant costs in order to implement, maintain and/or update security systems we feel are necessary to protect our information systems, or we may miscalculate the level of investment necessary to protect our systems adequately. Since the techniques used to obtain unauthorized access or to sabotage systems change frequently and are often not recognized until launched against a target, we may be unable to anticipate these techniques or to implement adequate preventive measures.

The Company's business also requires it to share confidential information with manufacturing partners, suppliers and other third parties. Although the Company takes steps to secure confidential information that is provided to third parties, such measures may not always be effective. Immaterial data breaches, losses or other unauthorized access to or releases of confidential information have in the past occurred with third parties and material data breaches, losses or other unauthorized access to or releases of confidential information may in the future occur in connection with third parties and could materially adversely affect the Company's reputation, financial condition and operating results and could result in liability or penalties under data privacy laws.

To the extent that any system failure, accident or security breach results in material disruptions or interruptions to our operations or the theft, loss or disclosure of, or damage to our data or confidential information, including our intellectual property, our reputation, business, results of operations and/or financial condition could be materially adversely affected.

GENERAL RISK FACTORS

We depend on highly skilled personnel to support our business operations. If we are unable to retain and motivate our current personnel or attract additional qualified personnel, our ability to develop and successfully market our products could be harmed.

We believe our future success will depend in large part upon our ability to attract and retain highly skilled, engineering, managerial, sales and marketing personnel. We typically do not enter into employment agreements with any of our key personnel and the loss of such personnel could harm our business, as their knowledge of our business and industry would be extremely difficult to replace. The competition for qualified personnel with significant experience in the design, development, manufacturing, marketing and sales of semiconductor solutions is intense, both in the Silicon Valley where our U.S. operations are based and in global markets in which we operate. Our inability to attract and retain qualified personnel, including hardware and software engineers and sales and marketing personnel, could delay the development and introduction of, impact our ability to fulfill commitments to customers for, and harm our ability to sell, our products. In addition, if we are unable to fulfill our customer commitments in a timely manner we may also lose future business relationships or otherwise experience negative consequences. Competitors for talent increasingly seek to hire our employees, and the increased availability of work-from-home arrangements has both intensified and expanded competition. As a result, we have intensified our efforts to recruit and retain talent. These efforts have increased our expenses, resulted in a higher volume of equity issuances, and may not be successful in attracting, retaining, and motivating the workforce necessary to deliver on our strategy. We believe equity compensation is a valuable component of our compensation program which helps us to attract, retain, and motivate employees and as a result we issue stock-based awards, such as RSUs, to a significant portion of our employees. A significant change in our stock price, or lower stock price performance relative to competitors, may reduce the retention value of our stock-based awards. Our employee hiring and retention also depends on our ability to build and maintain a diverse and inclusive workplace culture and be viewed as an employer of choice. To the extent our compensation programs and workplace culture are not viewed as competitive, our ability to attract, retain, and motivate employees may be weakened, which could harm our results of operations.

Changes to U.S. immigration policies that restrict our ability to attract and retain technical personnel may negatively affect our research and development efforts. In addition, changes in employment-related laws applicable to our workforce practices may also result in increased expenses and less flexibility in how we meet our changing workforce needs. In addition, as a result of our acquisitions and related integration activities, our current and prospective employees may experience uncertainty about their futures that may impair our ability to retain, recruit or motivate key management, engineering, technical and other personnel.

In response to the COVID-19 pandemic, we modified our workplace practices globally, which resulted in many of our employees working remotely for extended periods of time. As a result, many of our employees have expressed a preference to continue to work from home two to three days a week post-pandemic. In response, we adopted a hybrid work policy for our employees, where employees split their time between home and the office. However, certain types of activities such as new product innovation, critical business decision making, brainstorming sessions, providing sensitive employee feedback, and onboarding new employees may be less effective in a hybrid work environment. Our hybrid work environment may also negatively impact social interactions between employees that build camaraderie and may, therefore, negatively impact our office culture. Many companies, including companies that we compete with for talent, have announced plans to adopt full time remote work arrangements or hybrid work arrangements more flexible than ours, which may impact our ability to attract and retain qualified personnel if potential or current employees prefer these policies. In addition, as a result of the pandemic and our recent move to a hybrid work environment, we expect to face challenges in retention of personnel who prefer to only work from home.

We face risks related to recession, inflation, stagflation and other economic conditions

Customer demand for our products may be impacted by weak economic conditions, inflation, stagflation, recession, rising interest rates, equity market volatility or other negative economic factors in the U.S. or other nations. For example, under these conditions, our customers may cancel orders, delay purchasing decisions or reduce their use of our services. Further, in the event of a recession or threat of a recession our manufacturing partners, suppliers, distributors, and other third-party partners may suffer their own financial and economic challenges and as a result they may demand pricing accommodations, delay payment, or become insolvent, which could harm our ability to meet our customer demands or collect revenue or otherwise could harm our business. Similarly, disruptions in financial and/or credit markets may impact our ability to manage normal commercial relationships with our manufacturing partners, customers, suppliers and creditors and might cause us to not be able to continue to access preferred sources of liquidity when we would like, and our borrowing costs could increase. Thus, if general macroeconomic conditions continue to deteriorate, our business and financial results could be materially and adversely affected.

In addition, we are also subject to risk from inflation and increasing market prices of certain components, supplies, and commodity raw materials, which are incorporated into our end products or used by our manufacturing partners or suppliers to manufacture our end products. These components, supplies and commodities have from time to time become restricted, or general market factors and conditions have in the past and may in the future affect pricing of such components, supplies and commodities (such as inflation or supply chain constraints). See also, *“Our gross margin and results of operations may be adversely affected in the future by a number of factors, including decreases in average selling prices of products over time, shifts in our product mix, or price increases of certain components or third-party services due to inflation, supply chain constraints, or for other reasons.”*

There can be no assurance that we will continue to declare cash dividends or effect stock repurchases in any particular amount or at all, and statutory requirements may require us to defer payment of declared dividends or suspend stock repurchases.

In May 2012, we declared our first quarterly cash dividend and in October 2018, we announced that our Board of Directors had authorized a \$700.0 million addition to our previously existing \$1.0 billion stock repurchase program. An aggregate of \$1.2 billion of shares of stock have been repurchased under that program as of July 30, 2022, including 0.9 million shares of our common stock repurchased for \$50.0 million pursuant to a 10b5-1 trading plan. Future payment of a regular quarterly cash dividend on our common stock and future stock repurchases will be subject to, among other things: the best interests of our Company and our stockholders; our results of operations, cash balances and future cash requirements; financial condition; developments in ongoing litigation; statutory requirements under Delaware law; securities laws and regulations; market conditions; and other factors that our Board of Directors may deem relevant. Our dividend payments or stock repurchases may change from time to time, and we cannot provide assurance that we will continue to declare dividends or repurchase stock in any particular amounts or at all. A reduction in, a delay of, or elimination of our dividend payments or stock repurchases could have a negative effect on our stock price. As of July 30, 2022, there was \$499.5 million remaining available for future stock repurchases of the authorization.

Our indemnification obligations and limitations of our director and officer liability insurance may have a material adverse effect on our financial condition, results of operations and cash flows.

Under Delaware law, our certificate of incorporation and bylaws and certain indemnification agreements to which we are a party, we have an obligation to indemnify, or we have otherwise agreed to indemnify, certain of our current and former directors and officers with respect to past, current and future investigations and litigation. Further, in the event such directors and officers are ultimately determined not to be entitled to indemnification, we may not be able to recover any amounts we previously advanced to them.

We cannot provide any assurances that any future indemnification claims, including the cost of fees, penalties or other expenses, will not exceed the limits of our insurance policies, that such claims are covered by the terms of our insurance policies or that our insurance carrier will be able to cover our claims. Additionally, to the extent there is coverage of these claims, the insurers also may seek to deny or limit coverage in some or all of these matters.

Furthermore, the insurers could become insolvent and unable to fulfill their obligation to defend, pay or reimburse us for insured claims. Accordingly, we cannot be sure that claims will not arise that are in excess of the limits of our insurance or that are not covered by the terms of our insurance policy. Due to these coverage limitations, we may incur significant unreimbursed costs to satisfy our indemnification obligations, which may have a material adverse effect on our financial condition, results of operations or cash flows.

As we carry only limited insurance coverage, any incurred liability resulting from uncovered claims could adversely affect our financial condition and results of operations.

Our insurance policies may not be adequate to fully offset losses from covered incidents, and we do not have coverage for certain losses. For example, there is very limited coverage available with respect to the services provided by our third-party manufacturing partners and assembly, testing and packaging subcontractors. In the event of a natural disaster (such as an drought, earthquake or tsunami), political or military turmoil, widespread public health emergencies including pandemics, including the COVID-19 pandemic, power outages or other significant disruptions to their operations, insurance may not adequately protect us from this exposure. We believe our existing insurance coverage is consistent with common practice, economic considerations and availability considerations. If our insurance coverage is insufficient to protect us against unforeseen catastrophic losses, any uncovered losses could adversely affect our financial condition and results of operations.

If any of our non-U.S. based subsidiaries were classified as a passive foreign investment company, there would be adverse tax consequences.

If any of our non-U.S. based subsidiaries were classified as a “passive foreign investment company” or “PFIC” under section 1297 of the Internal Revenue Code, of 1986, as amended, for any taxable year during which a U.S. holder holds common stock, such U.S. holder generally would be taxed at ordinary income tax rates on any gain realized on the sale or exchange of the stock and on any “excess distributions” (including constructive distributions) received on the shares. Such U.S. holder could also be subject to a special interest charge with respect to any such gain or excess distribution.

A non-U.S. entity would be classified as a PFIC for U.S. federal income tax purposes in any taxable year in which either (i) at least 75% of its gross income is passive income or (ii) on average, the percentage of its assets that produce passive income or are held for the production of passive income is at least 50% (determined on an average gross value basis). Whether an entity will, in fact, be classified as a PFIC for any taxable year depends on its assets and income over the course of the relevant taxable year and, as a result, cannot be predicted with certainty. There can be no assurance that any of our foreign based subsidiaries will not be classified as a PFIC in the future or the Internal Revenue Service will not challenge our determination concerning PFIC status for any prior period.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There were no sales of unregistered equity securities during the three months ended July 30, 2022.

Issuer Purchases of Equity Securities

We resumed our stock repurchase program in the first quarter of fiscal 2023, which had been temporarily suspended in fiscal 2021 to preserve cash during the COVID-19 pandemic.

The following table presents details of our share repurchases during the three months ended July 30, 2022 (in millions, except per share data):

Period (1)	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet be Purchased Under the Plan or Programs (2)
May 1, 2022 to May 28, 2022	0.9	\$ 55.09	0.9	\$ 499.5
May 29, 2022 to June 25, 2022	—	\$ —	—	\$ 499.5
June 26, 2022 to July 30, 2022	—	\$ —	—	\$ 499.5
Total	0.9	\$ 55.09	0.9	

- (1) The monthly periods presented above for the three months ended July 30, 2022, are based on our fiscal accounting periods which follow a quarterly 4-4-5 week fiscal accounting period.
- (2) On November 17, 2016, we announced that our Board of Directors had authorized a \$1.0 billion share repurchase plan with no fixed expiration. On October 16, 2018, we announced that our Board of Directors authorized a \$700.0 million addition to the balance of our existing share repurchase plan. Our existing share repurchase program had approximately \$304.0 million of repurchase authority remaining as of October 16, 2018 prior to the approval addition. We intend to effect share repurchases in accordance with the conditions of Rule 10b-18 under the Exchange Act, but may also make repurchases in the open market outside of Rule 10b-18 or in privately negotiated transactions. The share repurchase program will be subject to market conditions and other factors and does not obligate us to repurchase any dollar amount or number of our common shares and the repurchase program may be extended, modified, suspended or discontinued at any time.

Item 6. Exhibits

Exhibit No.	Item	Form	File Number	Incorporated by Reference from Exhibit Number	Filed with SEC
2.1**	Agreement and Plan of Merger and Reorganization, dated as of October 29, 2020, by and among Marvell Technology Group Ltd., Inphi Corporation, Maui HoldCo, Inc., Maui Acquisition Company Ltd and Indigo Acquisition Corp.	8-K	000-30877	2.1	10/30/2020

CERTIFICATION

I, Matthew J. Murphy, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Marvell Technology, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - e) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - f) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION

I, Jean Hu, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Marvell Technology, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - e) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
