MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS OVERVIEW

MGM MACAU opened in December 2007 and has a casino floor area of approximately 25,459 square meters, with 1,249 slot machines, 427 gaming tables and multiple VIP and private gaming areas. The hotel comprises a 35-storey tower with 582 deluxe rooms, including 468 standard guest rooms, 99 luxury suites, 15 private luxury villas. In addition, the resort offers luxurious amenities, including 8 diverse restaurants and bars, world-class pool and spa facilities, and approximately 1,600 square meters of convertible convention space. The resort's focal point is the signature Grande Praça and features Portuguese-inspired architecture, dramatic landscapes and a glass ceiling rising 25 meters above the floor of the resort. Our property is directly connected to the One Central complex, which features many of the world's leading luxury retailers and includes Mandarin Oriental Hotel and serviced apartments.

We achieved a good financial performance for the six months ended June 30, 2014. Our revenue, adjusted EBITDA and profit attributable to owners of the Company increased by 11.8%, 16.8% and 22.7% to HK\$13,723.9 million, HK\$3,525.3 million and HK\$3,035.2 million, respectively, for the six months ended June 30, 2014 over the comparable period in 2013. Our operating results were positively impacted by our operating strategy and the market growth, but at the same time inhibited by competition, and general economic condition and political issues particularly in China.

Throughout the period, we have demonstrated our operating resilience and expertise in an increasingly competitive market. We continued to grow our business, defended our market share, and improved our operating efficiency and our margins through managing our customer segments, yielding our gaming floor and containing our cost, as a result, we exceeded our financial target.

Our Development in Cotai

We are now constructing MGM COTAI, an integrated casino, hotel and entertainment complex on the Cotai Land, which providing a truly unique MGM experience with up to 1,600 hotel rooms, 500 gaming tables and 2,500 slot machines, and a budget of approximately HK\$23 billion, excluding land costs and capitalized interest. MGM COTAI is well underway. We are excited to see the substantial completion on our basement and are now focusing our full energies on the commencement of the podium and tower construction, along with ongoing development of our interior designs. We remain on track for the opening in 2016.

Macau's Gaming and Tourism Markets

Propelled by the solid economic development in China, the Macau gaming market continues to grow in the last few years. Additional capacity has been added in recent years with several new hotels and casinos opened in Cotai resulting in the market share migration from Macau Peninsula to Cotai. In addition, the overall table yield in the gaming market continues to improve which contributed to the market growth during the current period. For the six months ended June 30, 2014, total casino gross win in Macau market was approximately HK\$187.5 billion, up 12.6% over the same period in 2013. It is worthwhile to note that the growth of casino gross win for VIP gaming operations was up 3.2% to approximately HK\$115.9 billion, a much lower rate of increase, as compared to the growth of casino gross win for the mass gaming operations, which achieved a much higher growth rate of 36.7% to approximately HK\$64.2 billion in the first half of 2014.

According to statistics published by the Statistics and Census Service of the Macau Government, visitor arrivals reached 15.3 million in first half of 2014 compared to 14.1 million in first half of 2013. Gaming customers travelling to Macau typically come from nearby regions in Asia including mainland China, Hong Kong, Taiwan, South Korea and Japan, with approximately 91% of visitors to Macau in first half of 2014 coming from mainland China, Hong Kong and Taiwan. Visitors coming from mainland China increased 14.7% over the same period in prior year and reached 10.2 million in first half of 2014. We are optimistic that visitation levels and gross gaming revenue in Macau will continue to grow due to a combination of factors. These factors include the economic growth of China, which continues to create a large and growing middle class with rising disposable income; infrastructure improvements, such as the expanded Gongbei border gate capacity, completion of the inter-city train from Guangzhou all the way to the Gongbei border gate, and others that are expected to facilitate more convenient travel to and within Macau; the efforts and investments made by gaming concessionaires to solidify Macau as a destination market with superior and diverse integrated resort products; and the continuous focus on table yield management across the markets; but at the same time the growth will be inhibited by the transit visa restriction implemented on July 1, 2014, specifically targets high frequency and long-stay visitors, which we will monitor and assess its impact on the gaming revenue. MGM China will be an active participant contributing to as well as benefitting from the Macau market growth. We are confident that we will continue to grow and create value for our Shareholders and other stakeholders.

Competition

Currently, there are six gaming concessionaires in Macau, each of whom has commenced casino operating activities and several of which have expansion plans announced or underway. As at June 30, 2014, there were 35 casinos in Macau. Those properties located in Cotai have continued to achieve a higher growth rate than those located in Macau Peninsula in the first half of 2014. Despite market share migration from Macau Peninsula to Cotai, we were able to maintain our overall market share. Our market share in Macau Peninsula reached 18.6% in the first half of 2014 compared to 18.0% in the first half of 2013. We expect competition in the Macau market to continue to increase in the future as more capacity is brought on line in the near future.

Our competition is not just limited to the Macau market. We compete with similar business establishments in other parts of Asia as well as elsewhere in the world, including, but not limited to integrated resorts in Singapore, Philippines and Las Vegas.

Our Competitive Strength and Operating Strategies

Our competitive strength lies principally in our high-end product and service offerings; our ability to segment and conduct targeted marketing to various customer groups through our Golden Lion Club customer relationship program; our strong partnership with gaming promoters; and our very effective strategy execution by the operation team.

Our strategy is to leverage our competitive strength and to grow our business and earnings by continuously improving customer experience, employee engagement and operation efficiency. We continue to expand and refurbish key gaming areas in our property to provide our high value customers and gaming operators with a first-class facility that embodies luxury, intimacy and inspiration, introduce new innovative gaming products to enhance customer experience, and develop technologies to enhance our analytical capability for operations and marketing to help us deliver much more personal and precision marketing efforts. We manage our gaming mix by

continuously evaluating our table yield, focusing on measuring the number of table open hours in relation to business volume, evaluating the table limits, reallocation of tables while also complying with the Macau Government requirement such as the smoking and non-smoking regulation, to maximize our table utilization and profitability. We also improve our customer experiences by enhancing our hotel, foods and beverages offerings. In addition, we provide regular professional and service training to our employees with the goal of building a culture of execution excellence. The investment we made in our products and our employees was an indispensable factor that allowed us to achieve the continuous growth and financial results during the current period. In the coming years, we will introduce our market leading resort life-style curator program, M life, as a vehicle to expand the reach of our current player club, Golden Lion Club, and increase our brand awareness and customer loyalty from our key feeder markets.

Gaming Operations

We have taken full advantage of our strength and executed our strategies throughout our business units, particularly in casino operations, which contribute to the vast majority of our financial results.

VIP Gaming Operations

A significant amount of our VIP casino play is brought to us by gaming promoters, who have historically played an important role in the Macau gaming market and are important to the revenue of our casino business. Gaming promoters introduce high-spending VIP players to us and often assist those customers with their travel and entertainment arrangements. In addition, gaming promoters often extend credit to their players. Gaming promoters also rely upon sub-promoters or collaborators to bring in the VIP gaming customers.

In exchange for their services, we compensate the gaming promoters in two ways. Some gaming promoters are paid a percentage of the actual win, plus a monthly allowance based on a percentage of the rolling chip turnover their customers generate, which can be applied to hotel rooms, food and beverages and other discretionary customers-related expenses. Other gaming promoters are paid a percentage of the rolling chip turnover, plus discounted offering on our non-gaming amenities.

The Company has established good business relationships with our gaming promoters. While some have partnered with us since opening, we have been able to add new promoters over the years who have contributed significantly to our growth and we continuously add more throughout the period partly also to replace the departing ones due to under-performance to maximize our table utilization and profit. Our commission percentages have remained stable throughout our operating history and consistent with the overall market practice.

In addition to VIP players introduced to us by gaming promoters, we also have in-house VIP players sourced through the Company's own marketing channels. These in-house VIP players typically receive a commission and an allowance for hotel rooms, food and beverages all based on a percentage of the rolling chip turnover.

For the six months ended June 30, 2014, our VIP gaming operations remained relatively flat. We generated HK\$420.0 billion in rolling chip turnover, a very slight increase of 0.5% over the same period in the prior year. Our VIP table games win percentage increased from 2.8% to 2.9% over the comparable periods in 2013 and 2014. This operation remained flat due to a combination of factors, including the World Cup soccer event which decreased the gaming revenue in overall, and political and macroeconomic factors in China during the period.

Operationally, we continue to improve VIP business volume by maximizing productivity from existing capacity and by making capital improvements to enhance our facilities and to increase capacity for our VIP customers. We continuously work with our current gaming promoters to fully utilize existing space and bring in more gaming promoters, when appropriate, to fill in available space or to reallocate tables to mass floor, to maximize our yield and profit. As a result, our average daily gross win per VIP gaming table increased by 2.3% from HK\$284.4 thousands to HK\$291.0 thousands over the comparable periods in 2013 and 2014. In addition, we constantly review our service processes to meet or exceed our customer expectations. Our efforts to grow the VIP business will continue to center around maintaining a close partnership with gaming promoters, enhancing the gaming experience of our customers, and yielding all VIP gaming rooms to maximize table utilization and profit.

Main Floor Gaming Operations

The main floor gaming operations in the Macau market is also referred to as the “mass gaming operation”. Unlike VIP players, main floor players do not receive commissions from us. The profit contribution from the main floor business is higher than the VIP operation. The main floor business represents the most profitable operations for us as well as for the Macau market as a whole. We also believe that this operation represents the most potential for sustainable growth in the future. In the first half of 2014, this operation achieved a higher growth rate than the VIP operation in the Macau market and our property as well.

In spite of increased competition, for the six months ended June 30, 2014, revenue from this operation significantly increased year-over-year by 42.7% to HK\$4,866.8 million. The growth was in part attributable to the overall market growth, but more importantly due to our successful customer segmentation approach with a product and service focus on the mid to premium main floor business. We have continued to invest capital to improve the gaming experience of our high-end main floor customers by creating dedicated exclusive gaming space for their use and reallocating tables from VIP gaming to our main floor gaming areas to maximize our yield and profit. We also leveraged our Golden Lion Club as a vehicle to attract and retain those high value main floor players through exclusive customer service and promotions. As a result, our average daily gross win per main floor table gaming table significant increased by 40.8% from HK\$97.9 thousands to HK\$137.8 thousands over the comparable periods in 2013 and 2014.

In addition, we are currently re-examining and investing our capital on our main floor gaming areas to cope with the new main floor smoking ban rule from the Macau Government which will be effective in this October. Going forward, we will continue to re-examine our main floor gaming areas to maximize table utilization, to expand or refurbish our gaming areas, to innovate our gaming products and to invest in technologies and analytical capability to enhance table productivity and customer retention.

Slot Machine Gaming Operations

Our slot handle was HK\$24,835.2 million, an increase of 12.2% over the same period in the prior year and our average daily win per slot increased by 6.4% from HK\$4.7 thousands to HK\$5.0 thousands over the comparable periods in 2013 and 2014 as well. The increase in handle and daily win per slot were due primarily to our improvement on slot machine product mix, our successful customer and product segmentation strategies, coupled with our focus on superior slot hosts services and building brand awareness and loyalty. Following the success of the electronic betting terminals of Live Table Games (“LT Games”) gaming area launched in August 2012 on the main floor, we expanded our LT Games as well in April 2014, which were tailored for the high-end segment of the market, and benefitted our handle. The positive impact was offset by the decrease in our slot machine win percentage from 5.2% to 4.5% over the comparable periods in 2013 and 2014 which made our slot revenue decreased by 2.5% to HK\$1,128.9 million for the six months ended June 30, 2014.

Going forward, we will continue to re-examine the mix of our games in operation to maximize our casino profitability, and we will expand our Supreme Lounge to increase slot capacity and introduce M life to increase our brand awareness and customer loyalty simultaneously. In conjunction with the M life rollout, we are also developing technologies to enhance our analytical capability to help us deliver much more personal and precision marketing efforts.

Non-gaming Attractions and Branding Activities

We also recognize the importance of brand awareness in growing the gaming operation. As a result, we have enhanced our marketing activities to take advantage of our internationally recognized brand. Brand-building initiatives are driven through promotions, events, strategic alliances and public relation activities. In the first half of 2014, we have organized events such as the Art Exhibition in L2 Gallery featuring themed artworks by local artists, and the “MGM Art Space” with a spectacular exhibition featuring Florentine Renaissance artist Sandro Botticelli’s life, legend, legacy and his enduring masterpiece, Venus, starting from December 2013 till May 2014, the Art Exhibition in L2 Showcase featuring themed artworks by artists from China, Macau and France, and the “MGM • Biennial of the Lions — Beyond the Roar” unique lion sculptures dressed elaborately by 50 French and Chinese artists which displayed all around the landmarks of Macau, the Macau Museum of Art and MGM MACAU, starting from May 2014 and June 2014, respectively, and our MGM Water Aurora featuring an eight-meter-tall water-sky aquarium with fish darting among multi-hued corals located in our Grande Praça throughout the period since May 2013. These exhibits and events successfully drew traffic to our property for visit and have created a sense of anticipation among our customers, local communities and tourists alike, on what is going on at MGM MACAU.

Operation Efficiency

In face of increased competition in the market, we have adopted strategies to protect and grow our earnings by focusing on customer experience, employee engagement and operating efficiency. We have introduced key performance indicators (“KPI”) implementation on various operations of our business. Decisions on hiring, scheduling and staffing are made in accordance to our KPI which are linked to our business volume and target productivity. As a result, our table yield on the gaming floor and labor productivity in the first half of 2014 continue to improve. We will continue to provide professional and service training to our employees to implement continuous improvement processes and to seek more efficiency opportunities. We are also investing in technologies to enhance our analytical capability for operations and marketing in order to further enhance our overall efficiency.

Segment Information

The Group currently operates in one operating segment which is the management of its casino, hotel and food and beverage operations. A single management team reports to the Group's Chief Executive Officer (being the chief operating decision-maker) who allocates resources and assesses performance based on the consolidated revenue, result, assets and liabilities for the period prepared under IFRSs for the entire business comprehensively. Accordingly, the Group does not present separately segment information.

Total operating revenue increased by 11.8% to HK\$13,723.9 million for the six months ended June 30, 2014. We believe this increase was due to a combination of factors, including overall Macau market growth, enhanced marketing efforts and the continuous property improvements to cater for gaming operators and players.

Casino Revenue

Casino revenue increased by 12.0% to HK\$13,576.8 million for the six months ended June 30, 2014. The components and reasons for this increase were:

VIP Gaming Operations

Revenue from VIP gaming operations remained relatively flat at HK\$7,581.1 million and HK\$7,559.2 million for the six months ended June 30, 2014 and 2013, respectively. VIP table games turnover increased slightly by 0.5% to HK\$419,984.1 million in the first half of 2014 and our VIP table games win percentage increased from 2.8% to 2.9% over the comparable periods in 2013 and 2014. For the six months ended June 30, 2014, MGM MACAU had 229 VIP gaming tables in operation, as compared with 231 VIP gaming tables for the six months ended June 30, 2013.

Approximately 80% of the commissions are netted against casino revenue, which corresponds to the approximate amount of the commission returned to the VIP players by the gaming promoters, and approximately 20% of the commissions are included in operating expenses, which corresponds to the approximate amount ultimately retained by gaming promoters for their compensation. The total amount of commissions netted against casino revenue was HK\$4,497.2 million and HK\$4,346.0 million for the six months ended June 30, 2014 and 2013, respectively.

Main Floor Gaming Operations

Revenue from main floor gaming operations significantly increased by 42.7% to HK\$4,866.8 million for the six months ended June 30, 2014. Main floor table games drop increased by 31.9% to HK\$19,199.5 million for the six months ended June 30, 2014. The increase primarily resulted from continued success of the tiered-customer relationship program and improvement on our yield on the gaming floor. Further, we benefited from our marketing, branding and promotional activities including lucky draws and various tailored entertainment functions and non-gaming attractions and branding events as mentioned above. In the first half of 2014, MGM MACAU had 194 main floor gaming tables in operation, as compared with 192 main floor gaming tables in the first half of 2013. The adjusted main floor table games win percentage increased from 23.3% to 25.2% over the comparable periods in 2013 and 2014.

Slot Machine Gaming Operations

Revenue from slot machine gaming operations decreased by 2.5% to HK\$1,128.9 million for the six months ended June 30, 2014. Slot machine handle increased by 12.2% to HK\$24,835.2 million for the six months ended June 30, 2014. The increase in handle primarily resulted from improvement on slot machine product mix, continued success of the tiered-customer relationship program, superior customer service from our slot hosts, and driving performance of the multi denomination slot machines and LT Games. The positive impact was offset by the decrease in our slot machine win percentage from 5.2% to 4.5% over the comparable periods in 2013 and 2014. For the six months ended June 30, 2014, MGM MACAU had 1,249 slot machines in operation, as compared with 1,367 slot machines for the six months ended June 30, 2013.

Other Revenue

Other revenue, which includes hotel rooms, foods and beverages and retail and other services, remained flat at HK\$147.0 million and HK\$150.8 million for the six months ended June 30, 2014 and 2013 respectively. The non-gaming facilities and services are critical for MGM MACAU to establish its brand and maintain its popularity in Macau and the region, in order to encourage visitations and extend the length of customers' stay within MGM MACAU.

Taxation

QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Market risk is the risk of loss arising from adverse changes in market rates and conditions, such as inflation, interest rates, and foreign currency exchange rates.

Foreign Exchange Risk

The cash received from gaming activities is primarily in HK\$. The Group reports gross gaming win to the Macau Government in Patacas and the gaming taxes are paid in HK\$. Our costs and expenses are primarily denominated in Patacas and HK\$. The value of a Pataca is directly linked to the value of a HK\$, and accordingly, we do not expect fluctuations in the values of these currencies to have a material impact on our operations. The majority of its foreign currency exposures comprises assets denominated in US\$, Taiwan Dollars and Singapore Dollars. The exchange rate of the HK\$ is pegged to the US\$ and has remained relatively stable.

Interest Rate Risk

One of our primary exposures to market risk is interest rate risk associated with our credit facilities that bear interest based on floating rates. We manage our interest rate risk by maintaining a level of cash and cash equivalents which management considers adequate to finance our operations and mitigate the effects of fluctuations in cash flows. We cannot assure you that these risk management strategies will have the desired effect, and interest rate fluctuations could have a negative impact on our results of operations. We do not hedge our interest rate risk.

Credit Risk

The Group's maximum exposure to credit risk which will cause a financial loss to the Group due to failure to discharge an obligation by the counterparties and financial guarantees provided by the Group is arising from:

- the carrying amount of the respective recognized financial assets as stated in the consolidated statement of financial position; and
- the amount of contingent liabilities in relation to a financial guarantee issued by the Group

The Group has a concentration of credit risk with the gaming promoters as the Group's trade receivables from gaming promoters were mainly due from a few counterparties, all of which are domiciled in Macau. Any adverse changes in the business environment and financial performance of those gaming promoters may impact the recoverability of the trade receivables. Should there be any change in circumstances pertaining to one of these gaming promoters, it would have a material effect to the carrying amount of trade receivables.

In order to minimize the credit risk, the management of the Group has delegated a team responsible for determination of credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual debt at the end of the reporting period to ensure that adequate impairment losses are made for irrecoverable amounts. In this regard, the Group believes that no significant credit risk is inherent in the Group's trade receivables which are not provided for.

The liquid funds which are deposited with several banks with high credit standing in Hong Kong and Macau. The credit risk on liquid funds is limited because the counterparties are banks with high credit standing in Hong Kong and Macau.

OFF BALANCE SHEET ARRANGEMENTS

OTHER LIQUIDITY MATTERS

We expect that we will fund our operations and capital expenditure requirements from operating cash flows, cash on hand and standby credit facilities. However, we cannot be sure that operating cash flows will be sufficient for this purpose. We may raise additional debt or refinance all or a portion of our indebtedness on or before maturity, but there can be no assurance that we will be able to do so on acceptable terms or at all.

New business developments or other unforeseen events may occur, resulting in the need to raise additional funds. There can be no assurances regarding the business prospects with respect to any other opportunity. Any other development would require us to obtain additional financing.

In the ordinary course of business, in response to market demands and client preferences and in order to increase revenue, we have made and will continue to make enhancements and refinements to MGM MACAU. We have incurred and will continue to incur capital expenditures related to these enhancements and refinements. In addition, we are focusing on the commencement of the COTAI project and will continue to incur capital expenditures for constructing MGM COTAI.

Taking into consideration our financial resources, including our cash and cash equivalents, standby credit facilities and internally generated funds, we believe that we have sufficient liquid assets to meet our working capital and operating requirements for the following 12 months.
