PORTFOLIO RECOVERY ASSOCIATES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

1. Organization and Business:

Portfolio Recovery Associates, Inc., a Delaware corporation, and its subsidiaries (collectively, the “Company”) is a financial and business service company operating principally in the United States and the United Kingdom. One call center in the Philippines operates under contract with the Company. The Company’s primary business is the purchase, collection and management of portfolios of defaulted consumer receivables. The Company also services receivables on behalf of clients and provides class action claims settlement recovery services and related payment processing to corporate clients.

On June 10, 2013, the Company’s board of directors declared a three-for-one stock split by means of a stock dividend. The new shares were distributed on August 1, 2013, and the shares began trading on a split-adjusted basis beginning August 2, 2013. As a result of this action, approximately 33.8 million shares were issued to stockholders. The par value of the common stock remains at \$0.01 per share and, accordingly, approximately \$0.3 million was retroactively transferred from additional paid in capital to common stock for all periods presented. Earnings per share and weighted average shares outstanding are presented in this Form 10-Q after the effect of the stock split. The three-for-one stock split is reflected in the share and per share amounts in all periods presented in this Form 10-Q including Note 8 “Share-Based Compensation,” Note 10 “Earnings per Share,” and Note 13 “Stockholders Equity.”

The consolidated financial statements of the Company are prepared in accordance with U.S. generally accepted accounting principles and include the accounts of all of its subsidiaries. All significant intercompany accounts and transactions have been eliminated. Under the guidance of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 280 “Segment Reporting” (“ASC 280”), the Company has determined that it has several operating segments that meet the aggregation criteria of ASC 280, and therefore, it has one reportable segment, accounts receivable management, based on similarities among the operating units including homogeneity of services, service delivery methods and use of technology.

The following table shows the amount of revenue generated for the three and six months ended June 30, 2013 and 2012 and long-lived assets held at June 30, 2013 and 2012 by geographical location (amounts in thousands):

	As Of And For The		As Of And For The	
	Three Months Ended June 30, 2013		Three Months Ended June 30, 2012	
	Revenues	Long-Lived Assets	Revenues	Long-Lived Assets
United States	\$ 180,350	\$ 25,685	\$ 143,342	\$ 24,333
United Kingdom	2,611	1,593	4,543	1,683
Total	\$ 182,961	\$ 27,278	\$ 147,885	\$ 26,016

	As Of And For The		As Of And For The	
	Six Months Ended June 30, 2013		Six Months Ended June 30, 2012	
	Revenues	Long-Lived Assets	Revenues	Long-Lived Assets
United States	\$ 347,279	\$ 25,685	\$ 278,849	\$ 24,333
United Kingdom	5,241	1,593	9,181	1,683
Total	\$ 352,520	\$ 27,278	\$ 288,030	\$ 26,016

Revenues are attributed to countries based on the location of the related operations. Long-lived assets consist of net property and equipment.

The accompanying unaudited consolidated financial statements of the Company have been prepared in accordance with Rule 10-01 of Regulation S-X promulgated by the Securities and Exchange Commission (“SEC”) and, therefore, do not include all information and disclosures required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of the Company, however, the accompanying unaudited consolidated financial statements contain all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of the Company’s consolidated balance sheet as of June 30, 2013, its consolidated income statements and statements of comprehensive income for the three and six months ended June 30, 2013 and 2012, its consolidated statement of changes in stockholders’ equity for the six months ended June 30, 2013, and its consolidated statements of cash flows for the six months ended June 30, 2013 and 2012. The consolidated income statements of the Company for the three and six months ended June 30, 2013 may not be indicative of future results. Certain

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

reclassifications have been made to prior year amounts to conform to the current year presentation. These unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's 2012 Annual Report on Form 10-K, filed on February 28, 2013.

2. Finance Receivables, net:

The Company accounts for its investment in finance receivables under the guidance of ASC Topic 310-30, "Loans and Debt Securities Acquired with Deteriorated Credit Quality" ("ASC 310-30"). The Company acquires portfolios of accounts that have experienced deterioration of credit quality between origination and the Company's acquisition of the accounts. The amount paid for a portfolio reflects the Company's determination that it is probable the Company will be unable to collect all amounts due according to an account's contractual terms. At acquisition, the Company reviews the accounts to determine whether there is evidence of deterioration of credit quality since origination, and if it is probable that the Company will be unable to collect all amounts due according to the account's contractual terms. If both conditions exist, the Company then determines whether each such account is to be accounted for individually or whether such accounts will be assembled into pools based on common risk characteristics. The Company considers expected prepayments and estimates the amount and timing of undiscounted expected principal, interest and other cash flows (expected at acquisition) for each acquired portfolio based on the Company's proprietary models, and the Company subsequently aggregates portfolios of accounts into pools. The Company determines the excess of the pool's scheduled contractual principal and contractual interest payments over all cash flows expected at acquisition as an amount that should not be accreted (nonaccretable difference). The remaining amount, representing the excess of the pool's cash flows expected to be collected over the amount paid, is accreted into income recognized on finance receivables over the remaining estimated life of the pool (accretable yield). ASC 310-30 requires that the excess of the contractual cash flows over expected cash flows, based on the Company's estimates derived from its proprietary collection models, not be recognized as an adjustment of revenue or expense or on the balance sheet.

Under ASC 310-30 static pools of accounts may be established. These pools are aggregated based on certain common risk criteria. Each static pool is recorded at cost, which may include certain direct costs of acquisition paid to third parties, and is accounted for as a single unit for the recognition of income, payments applied to principal and loss provision. Once a static pool is established for a calendar quarter, individual receivable accounts are not added to the pool (unless replaced by the seller) or removed from the pool (unless sold or returned to the seller). ASC 310-30, utilizing the interest method, initially freezes the yield, estimated when the accounts are purchased, as the basis for subsequent impairment testing. The yield is estimated and periodically recalculated based on the timing and amount of anticipated cash flows using the Company's proprietary collection models. Income on finance receivables is accrued quarterly based on each static pool's effective yield. Significant increases in expected future cash flows may be recognized prospectively, through an upward adjustment of the yield, over a pool's remaining life. Any increase to the yield then becomes the new benchmark for impairment testing. Under ASC 310-30, rather than lowering the estimated yield if the collection estimates are not received or projected to be received, the carrying value of a pool would be written down to maintain the then current yield and is shown as a reduction in revenue in the consolidated income statements with a corresponding valuation allowance offsetting finance receivables, net, on the consolidated balance sheets. Cash flows greater than the interest accrual will reduce the carrying value of the static pool. This reduction in carrying value is defined as payments applied to principal (also referred to as principal amortization). Likewise, cash flows that are less than the interest accrual will accrete the carrying balance. Generally, the Company does not record accretion in the first six to twelve months of the life of the pool; accordingly, the Company utilizes either the cost recovery method or cash method when necessary to prevent accretion as permitted by ASC 310-30. Under the cash method, revenue is recognized as it would be under the interest method up to the amount of cash collections. Under the cost recovery method, no revenue is recognized until the Company has fully collected the cost of the pool, or until such time that the Company considers the collections to be probable and estimable and begins to recognize income based on the interest method as described above. The Company also uses the cost recovery method when collections on a particular pool of accounts cannot be reasonably estimated. At June 30, 2013, the Company had unamortized purchased principal (purchase price) in pools accounted for under the cost recovery method of \$16.3 million; at December 31, 2012, the amount was \$4.2 million.

A pool can become fully amortized (zero carrying balance on the balance sheet) while still generating cash collections. In this case, all cash collections are recognized as revenue when received.

The Company establishes valuation allowances, if necessary, for acquired accounts subject to ASC 310-10. Valuation allowances are established only subsequent to acquisition of the accounts. At June 30, 2013 and 2012, the Company had a valuation allowance against its finance receivables of \$94.1 million and \$89.3 million, respectively; at December 31, 2012, the valuation allowance was \$93.1 million.

PORTFOLIO RECOVERY ASSOCIATES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

The Company implements the accounting for income recognized on finance receivables under ASC 310-30 as follows. The Company creates each accounting pool using its projections of estimated cash flows and expected economic life. The Company then computes the effective yield that fully amortizes the pool over a reasonable expectation of its economic life based on the current projections of estimated cash flows. As actual cash flow results are recorded, the Company balances those results to the data contained in its proprietary models to ensure accuracy, then reviews each pool watching for trends, actual performance versus projections and curve shape (a graphical depiction of the timing of cash flows), regularly re-forecasting future cash flows utilizing the Company's statistical models. The review process is primarily performed by the Company's finance staff; however, the Company's operational and statistical staffs are also involved, providing updated statistical input and cash projections to the finance staff. If there is a significant increase in expected cash flows, the Company will recognize the effect of the increase prospectively through an increase in yield. If a valuation allowance had been previously recognized for that pool, the allowance is reversed before recording any prospective yield adjustments. If the over performance is considered more of an acceleration of cash flows (a timing difference), the Company will: a) adjust estimated future cash flows downward which effectively extends the amortization period to fall within a reasonable expectation of the pool's economic life, b) adjust future cash flow projections as noted previously coupled with an increase in yield in order for the amortization period to fall within a reasonable expectation of the pool's economic life, or c) take no action at all if the amortization period falls within a reasonable expectation of the pool's expected economic life. To the extent there is underperformance, the Company will record an allowance if the underperformance is significant and will also consider revising estimated future cash flows based on current period information, or take no action if the pool's amortization period is reasonable and falls within the currently projected economic life.

Changes in finance receivables, net for the three and six months ended June 30, 2013 and 2012 were as follows (amounts in thousands):

	Three Months Ended June 30, 2013	Three Months Ended June 30, 2012
Balance at beginning of period	\$ 1,169,747	\$ 945,242
Acquisitions of finance receivables, net of buybacks	194,958	121,246
Foreign currency translation adjustment	(19)	(142)
Cash collections	(296,397)	(232,425)
Income recognized on finance receivables, net	168,570	132,587
Cash collections applied to principal	(127,827)	(99,838)
Balance at end of period	<u>\$ 1,236,859</u>	<u>\$ 966,508</u>
	Six Months Ended June 30, 2013	Six Months Ended June 30, 2012
Balance at beginning of period	\$ 1,078,951	\$ 926,734
Acquisitions of finance receivables, net of buybacks	407,347	233,339
Foreign currency translation adjustment	(941)	43
Cash collections	(571,860)	(450,420)
Income recognized on finance receivables, net	323,362	256,812
Cash collections applied to principal	(248,498)	(193,608)
Balance at end of period	<u>\$ 1,236,859</u>	<u>\$ 966,508</u>

At the time of acquisition, the life of each pool is generally estimated to be between 60 to 96 months based on projected amounts and timing of future cash collections using the proprietary models of the Company. Based upon current projections, cash collections applied to principal on finance receivables as of June 30, 2013 are estimated to be as follows for the twelve months in the periods ending (amounts in thousands):

June 30, 2014	\$ 416,728
June 30, 2015	338,726
June 30, 2016	262,131
June 30, 2017	150,841
June 30, 2018	62,083
June 30, 2019	6,350
	\$ 1,236,859

During the three and six months ended June 30, 2013, the Company purchased approximately \$3.19 billion and \$5.04 billion, respectively, in face value of charged-off consumer receivables. During the three and six months ended June 30, 2012, the Company purchased approximately \$1.53 billion and \$2.98 billion, respectively, in face value of charged-off consumer receivables. At June 30, 2013, the estimated remaining collections (“ERC”) on the receivables purchased in the three and six months ended June 30, 2013, were \$343.7 million and \$692.4 million, respectively. At June 30, 2013, the ERC on the receivables purchased in the three and six months ended June 30, 2012, were \$181.5 million and \$322.5 million, respectively.

Accretable yield represents the amount of income recognized on finance receivables the Company can expect to generate over the remaining life of its existing portfolios based on estimated future cash flows as of the balance sheet date. Additions represent the original expected accretable yield, on portfolios purchased during the period, to be earned by the Company based on its proprietary buying models. Net reclassifications from nonaccretable difference to accretable yield primarily result from the Company’s increase in its estimate of future cash flows. When applicable, net reclassifications to nonaccretable difference from accretable yield result from the Company’s decrease in its estimates of future cash flows and allowance charges that exceed the Company’s increase in its estimate of future cash flows. Changes in accretable yield for the three and six months ended June 30, 2013 and 2012 were as follows (amounts in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Balance at beginning of period	\$ 1,317,144	\$ 1,088,752	\$ 1,239,674	\$ 1,026,614

Foreign currency translation adjustment	119	(1,319)	(3,888)	(1,132)
Balance at end of period	\$ 1,400,906	\$ 1,151,653	\$ 1,400,906	\$ 1,151,653

A valuation allowance is recorded for significant decreases in expected cash flows or a change in the expected timing of cash flows which would otherwise require a reduction in the stated yield on a pool of accounts. In any given period, the Company may be required to record valuation allowances due to pools of receivables underperforming expectations. Factors that may contribute to the recording of valuation allowances may include both internal as well as external factors. External factors which may have an impact on the collectability, and subsequently on the overall profitability of purchased pools of defaulted consumer receivables would include: new laws or regulations relating to collections, new interpretations of existing laws or regulations, and the overall condition of the economy. Internal factors which may have an impact on the collectability, and subsequently the overall profitability of purchased pools of defaulted consumer receivables would include: necessary revisions to initial and post-acquisition scoring and modeling estimates, non-optimal operational activities (which relate to the collection and movement of accounts on both the collection floor of the Company and external channels), as well as decreases in productivity related to turnover and tenure of the Company’s collection staff. The following is a summary of activity within the Company’s valuation allowance account, all of which relates to loans acquired with deteriorated credit quality, for the three and six months ended June 30, 2013 and 2012 (amounts in thousands):

- (1) “Core” accounts or portfolios refer to accounts or portfolios that are defaulted consumer receivables and are not in a bankrupt status upon purchase. These accounts are aggregated separately from purchased bankruptcy accounts.
- (2) “Purchased bankruptcy” accounts or portfolios refer to accounts or portfolios that are in bankruptcy status when purchased, and as such, are purchased as a pool of bankrupt accounts.
- (3) At June 30, 2013, the MHH finance receivables balance was \$13.7 million against which there was no valuation allowance recorded; therefore it is not included in this roll-forward.

3. Line of Credit:

On December 19, 2012, the Company entered into a credit agreement with Bank of America, N.A., as administrative agent, and a syndicate of lenders named therein (the “Credit Agreement”). Under the terms of the Credit Agreement, the credit facility includes an aggregate principal amount available of \$600.0 million (subject to the borrowing base and applicable debt covenants) which consists of a \$200.0 million floating rate term loan that matures on December 19, 2017 and a \$400.0 million revolving credit facility that matures on December 19, 2017. The term and revolving loans accrue interest, at the option of the Company, at either the base rate or the Eurodollar rate (as defined in the Credit Agreement) for the applicable term plus 2.50% per annum in the case of the Eurodollar rate loans and 1.50% in the case of the base rate loans. The base rate is the highest of (a) the Federal Funds Rate (as defined in the Credit Agreement) plus 0.50%, (b) Bank of America’s prime rate, and (c) the Eurodollar rate plus 1.00%. The Company’s revolving credit facility includes a \$20 million swingline loan sublimit, a \$20 million letter of credit sublimit and a \$20 million alternative currency equivalent sublimit. It also contains an accordion loan feature that allows the Company to request an increase of up to \$250.0 million in the amount available for borrowing under the revolving credit facility, whether from existing or new lenders, subject to terms of the Credit Agreement. No existing lender is obligated to increase its commitment. The Credit Agreement is secured by a first priority lien on substantially all of the Company’s assets. The Credit Agreement contains restrictive covenants and events of default including the following:

- borrowings may not exceed 30% of the ERC of all its eligible asset pools plus 75% of its eligible accounts receivable;
- the consolidated leverage ratio (as defined in the Credit Agreement) cannot exceed 2.0 to 1.0 as of the end of any fiscal quarter;

PORTFOLIO RECOVERY ASSOCIATES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

- consolidated tangible net worth (as defined in the Credit Agreement) must equal or exceed \$455,091,200 plus 50% of positive cumulative consolidated net income for each fiscal quarter beginning with the quarter ended December 31, 2012, plus 50% of the cumulative net proceeds of any equity offering;
- capital expenditures during any fiscal year cannot exceed \$30 million;
- cash dividends and distributions during any fiscal year cannot exceed \$20 million;
- stock repurchases during the term of the agreement cannot exceed \$250 million and cannot exceed \$100 million in a single fiscal year;
- permitted acquisitions (as defined in the Credit Agreement) during any fiscal year cannot exceed \$250 million;
- the Company must maintain positive consolidated income from operations (as defined in the Credit Agreement) during any fiscal quarter; and
- restrictions on changes in control.

The revolving credit facility also bears an unused line fee of 0.375% per annum, payable quarterly in arrears.

The Company's borrowings at June 30, 2013 consisted of \$195.0 million in 30-day Eurodollar rate loans and \$21.0 million in base rate loans with a weighted average interest rate of 2.89%. In addition, the Company had \$197.5 million outstanding on the term loan at June 30, 2013 with an annual interest rate as of June 30, 2013 of 2.70%. At December 31, 2012, the Company's borrowings consisted of \$122.0 million in 30-day Eurodollar rate loans and \$5.0 million in base rate loans with a weighted average interest rate of 2.74%. In addition, the Company had \$200.0 million outstanding on the term loan at December 31, 2012 with an annual interest rate as of December 31, 2012 of 2.71%. Refer to Note 4 "Long-Term Debt" for payment details related to the term loan.

The Company had \$413.5 million and \$327.0 million of borrowings outstanding on its credit facility as of June 30, 2013 and December 31, 2012, respectively. These total borrowings include long-term debt as discussed in Note 4 "Long-Term Debt."

The Company was in compliance with all covenants of its credit facilities as of June 30, 2013 and December 31, 2012.

4. Long-Term Debt:

On December 19, 2012, the Company entered into the Credit Agreement. Under the terms of the Credit Agreement, the credit facility includes a \$200 million floating rate term loan that matures on December 19, 2017. The balance of this term loan was \$197.5 million and \$200.0 million at June 30, 2013 and December 31, 2012, respectively. The term loan accrues interest, at the option of the Company, at either the base rate or the Eurodollar rate (as defined in the Credit Agreement) for the applicable term plus 2.50% per annum. See Note 3 "Line of Credit" for additional details regarding interest rates and restrictive covenants. The term loan includes quarterly principal payments on the last day of each calendar quarter beginning June 30, 2013 and ending on the maturity date of December 19, 2017.

On December 15, 2010, the Company entered into a commercial loan agreement to finance computer software and equipment purchases in the amount of approximately \$1.6 million. The loan is collateralized by the related computer software and equipment. The loan term is 3 years with a fixed rate of 3.69% with monthly installments, including interest, of \$46,108 beginning on January 15, 2011, and it matures on December 15, 2013.

The following principal payments are due on the Company's long-term debt as of June 30, 2013 for the twelve month periods ending (amounts in thousands):

June 30, 2014	\$ 7,774
June 30, 2015	12,500
June 30, 2016	17,500
June 30, 2017	30,000
June 30, 2018	130,000
Total	<u>\$ 197,774</u>

5. Property and Equipment, net:

Property and equipment, at cost, consisted of the following as of the dates indicated (amounts in thousands):

	June 30, 2013	December 31, 2012
Software	\$ 31,703	\$ 29,467
Computer equipment	15,115	14,129
Furniture and fixtures	7,772	7,220
Equipment	9,535	8,674
Leasehold improvements	8,100	7,231
Building and improvements	7,012	7,014
Land	1,269	1,269
Accumulated depreciation and amortization	(53,228)	(49,692)
Property and equipment, net	<u>\$ 27,278</u>	<u>\$ 25,312</u>

Depreciation and amortization expense relating to property and equipment for the three and six months ended June 30, 2013, was \$2.4 million and \$4.6 million, respectively. Depreciation and amortization expense relating to property and equipment for the three and six months ended June 30, 2012, was \$2.1 million and \$4.3 million, respectively.

The Company, in accordance with the guidance of FASB ASC Topic 350-40 “Internal-Use Software” (“ASC 350-40”), capitalizes qualifying computer software costs incurred during the application development stage and amortizes them over their estimated useful life of three to seven years on a straight-line basis beginning when the project is completed. Costs associated with preliminary project stage activities, training, maintenance and all other post implementation stage activities are expensed as incurred. The Company’s policy provides for the capitalization of certain direct payroll costs for employees who are directly associated with internal use computer software projects, as well as external direct costs of services associated with developing or obtaining internal use software. Capitalizable personnel costs are limited to the time directly spent on such projects. As of June 30, 2013 and December 31, 2012, the Company incurred and capitalized approximately \$9.1 million and \$7.8 million, respectively, of these direct payroll costs and external direct costs related to software developed for internal use. Of these costs, at June 30, 2013 and December 31, 2012, approximately \$1.8 million and \$1.3 million, respectively, was for projects that were in the development stage and, therefore are a component of “Other Assets.” Once the projects are completed, the costs are transferred to Software and amortized over their estimated useful life. Amortization expense for the three and six months ended June 30, 2013, was approximately \$0.3 million and \$0.7 million, respectively. Amortization expense for the three and six months ended June 30, 2012, was approximately \$0.3 million and \$0.5 million, respectively. The remaining unamortized costs relating to internally developed software at June 30, 2013 and December 31, 2012 were approximately \$3.9 million for both periods.

6. Redeemable Noncontrolling Interest:

In accordance with ASC 810, the Company has consolidated all financial statement accounts of Claims Compensation Bureau, LLC (“CCB”) in its consolidated balance sheets and its consolidated income statements. The redeemable noncontrolling interest amount is separately stated on the consolidated balance sheets and represents the 19% and 38% interest in CCB not owned by the Company at June 30, 2013 and December 31, 2012, respectively. In addition, net income/loss attributable to the noncontrolling interest is stated separately in the consolidated income statements.

The Company has the right through February 28, 2015 to purchase the remaining 19% of CCB at certain pre-determined multiples of earnings before interest, taxes, depreciation and amortization (“EBITDA”). In addition, through February 28, 2015, the noncontrolling interest can require the Company to purchase up to one-third of its membership units in CCB per annual period at pre-defined multiples of EBITDA, subject to achievement of a minimum amount of trailing EBITDA. Beginning March 1, 2015 and ending February 28, 2018, the noncontrolling interest can require the Company to purchase all or any portion of its remaining membership units in CCB at pre-defined multiples of EBITDA, with no restrictions.

Effective as of January 31, 2013, the Company purchased one-half of the then remaining interest in CCB for a purchase price of \$1.1 million. The purchase price was derived from the formula stipulated in the contractual agreement and was based on prior levels of EBITDA.

PORTFOLIO RECOVERY ASSOCIATES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

The maximum redemption value of the noncontrolling interest, as if it were currently redeemable by the holder of the put option under the terms of the put arrangement, was \$11.4 million at June 30, 2013.

The following table represents the changes in the redeemable noncontrolling interest for the three and six months ended June 30, 2013 and 2012 (amounts in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Balance at beginning of period	\$ 10,336	\$ 18,783	\$ 20,673	\$ 17,831
Net (loss)/income attributable to redeemable noncontrolling interest	(185)	36	(268)	(237)
Distributions payable	—	(261)	(2)	(261)
Purchase of portion of noncontrolling interest	—	—	(10,312)	—
Adjustment of the noncontrolling interest measurement amount	185	823	245	2,048
Balance at end of period	\$ 10,336	\$ 19,381	\$ 10,336	\$ 19,381

In accordance with the limited liability company agreement of CCB, distributions due to the members of CCB are accrued each quarter and are payable as soon as reasonably possible subsequent to each quarter end.

7. Goodwill and Intangible Assets, net:

In connection with the Company's previous business acquisitions, the Company acquired certain tangible and intangible assets. Intangible assets purchased included client and customer relationships, non-compete agreements, trademarks and goodwill. Pursuant to ASC 350, goodwill is not amortized but rather is reviewed at least annually for impairment. During the fourth quarter of 2012, the Company underwent its annual review of goodwill. Based upon the results of this review, which was conducted as of October 1, 2012, no impairment charges to goodwill or the other intangible assets were necessary as of the date of that review. During the three months ended June 30, 2013, the Company further evaluated the goodwill associated with one of its reporting units, which has experienced a revenue and profitability decline and recent net losses. Based on this evaluation, management believes that the estimated fair value of the reporting unit exceeded its carrying value at June 30, 2013. The amount of goodwill attributed to this reporting unit was \$6.4 million at June 30, 2013. All other intangible assets related to this reporting unit were fully amortized as of June 30, 2013. There were no impairment losses during the three or six months ended June 30, 2013 and 2012. The Company expects to perform its next annual goodwill review during the fourth quarter of 2013. At June 30, 2013 and December 31, 2012, the carrying value of goodwill was \$107.0 million and \$109.5 million, respectively. The following table represents the changes in goodwill for the three and six months ended June 30, 2013 and 2012 (amounts in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Balance at beginning of period	\$ 106,912	\$ 97,480	\$ 109,488	\$ 61,678
Acquisition of MHH	—	—	—	34,270
Adjustment to provisional amount	—	3,060	—	3,060

Trademarks	3,412	1,848	3,477	1,594
Total	\$ 47,306	\$ 29,910	\$ 48,055	\$ 27,691

PORTFOLIO RECOVERY ASSOCIATES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

Total intangible asset amortization expense for the three and six months ended June 30, 2013 was \$1.2 million and \$2.4 million, respectively. Total intangible asset amortization expense for the three and six months ended June 30, 2012 was \$1.4 million and \$2.9 million, respectively. The Company reviews these intangible assets for possible impairment upon the occurrence of a triggering event.

8. Share-Based Compensation:

The Company has an Omnibus Incentive Plan to assist the Company in attracting and retaining selected individuals to serve as employees and directors, who are expected to contribute to the Company's success and to achieve long-term objectives that will benefit stockholders of the Company. The 2013 Omnibus Incentive Plan (the "Plan") was approved by the Company's stockholders at the 2013 Annual Meeting. The Plan enables the Company to award shares of the Company's common stock to select employees and directors, as described in the Plan, not to exceed 5,400,000 shares as authorized by the Plan. The Plan replaced the 2010 Stock Plan.

As of June 30, 2013, total future compensation costs related to nonvested awards of nonvested shares (not including nonvested shares granted under the Long-Term Incentive ("LTI") Program) is estimated to be \$5.6 million with a weighted average remaining life for all nonvested shares of 1.9 years (not including nonvested shares granted under the LTI program). As of June 30, 2013, there are no future compensation costs related to stock options and there are no remaining vested stock options to be exercised.

Total share-based compensation expense was \$3.6 million and \$6.7 million for the three and six months ended June 30, 2013, respectively. Total share-based compensation expense was \$3.3 million and \$5.6 million for the three and six months ended June 30, 2012, respectively. Tax benefits resulting from tax deductions in excess of share-based compensation expense (windfall tax benefits) recognized under the provisions of ASC Topic 718 "Compensation-Stock Compensation" ("ASC 718") are credited to additional paid-in capital in the Company's Consolidated Balance Sheets. Realized tax shortfalls, if any, are first offset against the cumulative balance of windfall tax benefits, if any, and then charged directly to income tax expense. The total tax benefit realized from share-based compensation was approximately \$0.9 million and \$4.9 million for the three and six months ended June 30, 2013, respectively. The total tax benefit realized from share-based compensation was approximately \$0.1 million and \$2.8 million for the three and six months ended June 30, 2012, respectively.

All share amounts presented in this Note 8 have been adjusted to reflect the three-for-one stock split by means of a stock dividend declared by the Company's board of directors on June 10, 2013.

Nonvested Shares

With the exception of the awards made pursuant to the LTI program and a few employee and director grants, the nonvested shares vest ratably over three to five years and are expensed over their vesting period.

The following summarizes all nonvested share transactions, excluding those related to the LTI program, from December 31, 2011 through June 30, 2013 (share amounts in thousands):

	Nonvested Shares Outstanding	Weighted-Average Price at Grant Date
December 31, 2011	243	\$ 19.77
Granted	159	22.00
Vested	(102)	19.79
Cancelled	(12)	23.31
December 31, 2012	288	20.84
Granted	105	36.77
Vested	(129)	19.55
Cancelled	(24)	20.31
June 30, 2013	240	\$ 28.55

The total grant date fair value of shares vested during the three and six months ended June 30, 2013, was \$0.4 million and \$2.5 million, respectively. The total grant date fair value of shares vested during the three and six months ended June 30, 2012, was \$0.4 million and \$1.6 million, respectively.

PORTFOLIO RECOVERY ASSOCIATES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

Long-Term Incentive Program

Pursuant to the Plan, the Compensation Committee may grant time-vested and performance based nonvested shares. All shares granted under the LTI program were granted to key employees of the Company. The following summarizes all LTI share transactions from December 31, 2011 through June 30, 2013 (share amounts in thousands):

	Nonvested LTI Shares Outstanding	Weighted-Average Price at Grant Date
December 31, 2011	548	\$ 17.01
Granted at target level	197	20.73
Adjustments for actual performance	121	18.00
Vested	(354)	12.58
Cancelled	(15)	22.55
December 31, 2012	497	21.71
Granted at target level	124	34.59
Adjustments for actual performance	106	17.87
Vested	(160)	16.24
Cancelled	(4)	25.17
June 30, 2013	563	\$ 25.18

The total grant date fair value of shares vested during the three and six months ended June 30, 2013, was \$0.0 million and \$2.6 million, respectively. The total grant date fair value of shares vested during the three and six months ended June 30, 2012, was \$0.0 million and \$2.0 million, respectively.

At June 30, 2013, total future compensation costs, assuming the current estimated performance levels are achieved, related to nonvested share awards granted under the LTI program are estimated to be approximately \$9.5 million. The Company assumed a 7.5% forfeiture rate for these grants and the remaining shares have a weighted average life of 1.3 years at June 30, 2013.

9. Income Taxes:

The Company follows the guidance of FASB ASC Topic 740 "Income Taxes" ("ASC 740") as it relates to the provision for income taxes and uncertainty in income taxes. The guidance prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. There were no unrecognized tax benefits at June 30, 2013 and 2012.

The Company was notified on June 21, 2007 that it was being examined by the Internal Revenue Service ("IRS") for the 2005 calendar year. The IRS concluded the audit and on March 19, 2009 issued Form 4549-A, Income Tax Examination Changes, for tax years ended December 31, 2007, 2006 and 2005. The IRS has asserted that tax revenue recognition using the cost recovery method does not clearly reflect taxable income, and that unused line fees paid on credit facilities should be capitalized and amortized rather than taken as a current deduction. The Company believes it has sufficient support for the technical merits of its positions and that it is more likely than not they will ultimately be sustained; therefore, a reserve for uncertain tax positions is not required. For domestic income tax purposes, the Company recognizes revenue using the cost recovery method with respect to its debt purchasing business. The Company believes cost recovery to be an appropriate tax revenue recognition method for companies in the bad debt purchasing industry. Under this method, for tax purposes, collections on finance receivables are applied first to principal to reduce the finance receivables to zero before any taxable income is recognized. On April 22, 2009, the Company filed a formal protest of the findings contained in the examination report prepared by the IRS. On August 26, 2011, the IRS issued a Notice of Deficiency for the tax years ended December 31, 2007, 2006, and 2005. On November 2, 2011, the Company filed a petition in the United States Tax Court. If the Company is unsuccessful in the United States Tax Court, it can appeal to the federal Circuit Court of Appeals. Payment of the assessed taxes and possibly interest and penalties, could have an adverse affect on the Company's financial condition, be material to the Company's results of operations, and may require additional financing from other sources. In accordance with the Internal Revenue Code, underpayments of federal tax accrue interest, compounded daily, at the applicable federal short term rate plus three percentage points. An additional two percentage points applies to large corporate underpayments of \$100,000 or more to periods after the applicable date as defined in the Internal Revenue Code. The Company files taxes in multiple state jurisdictions; therefore, any underpayment of state tax will accrue interest in accordance with the

PORTFOLIO RECOVERY ASSOCIATES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

respective state statute. On June 30, 2011, the Company was notified by the IRS that the audit period will be expanded to include the tax years ended December 31, 2009 and 2008.

At June 30, 2013, the tax years subject to examination by the major taxing jurisdictions, including the IRS, are 2003, 2005 and subsequent years. The 2003 tax year remains open to examination because of a net operating loss that originated in that year but was not fully utilized until the 2005 tax year. The examination periods for the 2007, 2006 and 2005 tax years were extended through December 31, 2011; however, because the IRS issued the Notice of Deficiency prior to December 31, 2011, the period for assessment is suspended until a decision of the Tax Court becomes final. The statute of limitations for the 2008, 2009 and 2010 tax years has been extended to September 26, 2014.

ASC 740 requires the recognition of interest if the tax law would require interest to be paid on the underpayment of taxes, and recognition of penalties if a tax position does not meet the minimum statutory threshold to avoid payment of penalties. No interest or penalties were accrued or reversed in the three or six month periods ended June 30, 2013 or 2012.

10. Earnings per Share:

Basic earnings per share (“EPS”) are computed by dividing net income available to common stockholders of Portfolio Recovery Associates, Inc. by weighted average common shares outstanding. Diluted EPS are computed using the same components as basic EPS with the denominator adjusted for the dilutive effect of nonvested share awards. Share-based awards that are contingent upon the attainment of performance goals are not included in the computation of diluted EPS until the performance goals have been attained. The dilutive effect of nonvested shares is computed using the treasury stock method, which assumes any proceeds that could be obtained upon the vesting of nonvested shares would be used to purchase common shares at the average market price for the period. The assumed proceeds include the windfall tax benefit that would be received upon assumed exercise. The following tables provide reconciliation between the computation of basic EPS and diluted EPS for the three and six months ended June 30, 2013 and 2012 (amounts in thousands, except per share amounts):

	For the Three Months Ended June 30,					
	2013			2012		
	Net Income attributable to Portfolio Recovery Associates, Inc.	Weighted Average Common Shares	EPS	Net Income attributable to Portfolio Recovery Associates, Inc.	Weighted Average Common Shares	EPS
Basic EPS	\$ 43,599	50,751	\$ 0.86	\$ 32,015	51,081	\$ 0.63
Dilutive effect of nonvested share awards		432			318	
Diluted EPS	\$ 43,599	51,183	\$ 0.85	\$ 32,015	51,399	\$ 0.62

	For the Six Months Ended June 30,					
	2013			2012		
	Net Income attributable to Portfolio Recovery Associates, Inc.	Weighted Average Common Shares	EPS	Net Income attributable to Portfolio Recovery Associates, Inc.	Weighted Average Common Shares	EPS
Basic EPS	\$ 82,199	50,781	\$ 1.62	\$ 57,477	51,333	\$ 1.12
Dilutive effect of nonvested share awards		447			267	
Diluted EPS	\$ 82,199	51,228	\$ 1.60	\$ 57,477	51,600	\$ 1.11

All share amounts presented in this Note 10 have been adjusted to reflect the three-for-one stock split by means of a stock dividend declared by the Company's board of directors on June 10, 2013.

There were no antidilutive options outstanding for the three or six months ended June 30, 2013 and 2012.

PORTFOLIO RECOVERY ASSOCIATES, INC.

11. Commitments and Contingencies:

Employment Agreements:

The Company has employment agreements, most of which expire on December 31, 2014, with all of its executive officers and with several members of its senior management group. Such agreements provide for base salary payments as well as bonuses which are based on the attainment of specific management goals. At June 30, 2013, the estimated future compensation under these agreements is approximately \$10.3 million. The agreements also contain confidentiality and non-compete provisions.

Leases:

The Company is party to various operating leases with respect to its facilities and equipment. The future minimum lease payments at June 30, 2013 total approximately \$26.9 million.

Forward Flow Agreements:

The Company is party to several forward flow agreements that allow for the purchase of defaulted consumer receivables at pre-established prices. The maximum remaining amount to be purchased under forward flow agreements at June 30, 2013 is approximately \$119.4 million.

Redeemable Noncontrolling Interest:

In connection with the Company's acquisition of 62% of the membership units of CCB on March 15, 2010, the Company acquired the right through February 28, 2015 to purchase, at a predetermined price, the remaining 38% of the membership units of CCB not held by the Company. Effective as of January 31, 2013, the Company exercised its right to acquire one-half of the then outstanding noncontrolling interest resulting in ownership of 81% of the membership units as of June 30, 2013. Also, the owners of the remaining noncontrolling interest can require the Company to purchase their respective interest through February 28, 2015 at pre-defined multiples of EBITDA, subject to achievement of a minimum amount of trailing EBITDA. Beginning March 1, 2015 and ending February 28, 2018, the remaining noncontrolling interest can require the Company to purchase all or any portion of its remaining membership units in CCB at pre-defined multiples of EBITDA, with no restrictions.

While the actual amount or timing of any future payment related to the remaining 19% of outstanding interest is unknown at this time, the maximum amount of consideration to be paid for that interest is \$11.4 million.

Contingent Purchase Price:

With the acquisition of certain finance receivables and certain operating assets of National Capital Management, LLC ("NCM") in 2012, the asset purchase agreement also includes an earn-out provision whereby the sellers are able to earn additional cash consideration for achieving certain cash collection thresholds over a five year period. The maximum amount of earn-out during the period is \$15.0 million. As of June 30, 2013, the Company has recorded a present fair value amount for this liability of \$8.3 million.

Finance Receivables:

Certain agreements for the purchase of finance receivables portfolios contain provisions that may, in limited circumstances, require the Company to refund a portion or all of the collections subsequently received by the Company on particular accounts. The potential refunds as of the balance sheet date are not considered to be significant.

Litigation:

The Company is from time to time subject to routine legal claims and proceedings, most of which are incidental to the ordinary course of its business. The Company initiates lawsuits against customers and is occasionally countersued by them in such actions. Also, customers, either individually, as members of a class action, or through a governmental entity on behalf of customers, may initiate litigation against the Company in which they allege that the Company has violated a state or federal law in the process of collecting on an account. From time to time, other types of lawsuits are brought against the Company. Additionally, the Company receives subpoenas and other requests for information from regulators or governmental authorities who are investigating the Company's debt collection activities. The Company makes every effort to respond appropriately to such requests.

The Company accrues for potential liability arising from legal proceedings when it is probable that such liability has been incurred and the amount of the loss can be reasonably estimated. This determination is based upon currently available information

PORTFOLIO RECOVERY ASSOCIATES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

for those proceedings in which the Company is involved, taking into account the Company's best estimate of such losses for those cases for which such estimates can be made. The Company's estimate involves significant judgment, given the varying stages of the proceedings (including the fact that many of them are currently in preliminary stages), the number of unresolved issues in many of the proceedings (including issues regarding class certification and the scope of many of the claims), and the related uncertainty of the potential outcomes of these proceedings. In making determinations of the likely outcome of pending litigation, the Company considers many factors, including, but not limited to, the nature of the claims, the Company's experience with similar types of claims, the jurisdiction in which the matter is filed, input from outside legal counsel, the likelihood of resolving the matter through alternative mechanisms, the matter's current status and the damages sought or demands made. Accordingly, the Company's estimate will change from time to time, and actual losses could be more than the current estimate.

Subject to the inherent uncertainties involved in such proceedings, the Company believes, based upon its current knowledge and after consultation with counsel, that the legal proceedings currently pending against it, including those that fall outside of the Company's routine legal proceedings, should not, either individually or in the aggregate, have a material adverse impact on the Company's financial condition. However, it is possible in light of the uncertainties involved in such proceedings or due to unexpected future developments, that an unfavorable resolution of a legal proceeding or claim could occur which may be material to the Company's financial condition, results of operations, or cash flows for a particular period.

Excluding the matters described below and other putative class action suits which the Company believes are not material, the high end of the range of potential litigation losses in excess of the amount accrued is estimated by management to be less than \$1,000,000 as of June 30, 2013. Notwithstanding our attempt to estimate a range of possible losses in excess of the amount accrued based on current information, actual future losses may exceed both the Company's accrual and the range of potential litigation losses disclosed above.

In certain legal proceedings, the Company may have recourse to insurance or third party contractual indemnities to cover all or portions of its litigation expenses, judgments, or settlements. Loss estimates and accruals for potential liability related to legal proceedings are exclusive of potential recoveries, if any, under the Company's insurance policies or third party indemnities. The Company has not recorded any potential recoveries under the Company's insurance policies or third party indemnities.

The matters described below fall outside of the normal parameters of the Company's routine legal proceedings.

Telephone Consumer Protection Act Litigation

The Company has been named as defendant in a number of putative class action cases, each alleging that the Company violated the Telephone Consumer Protection Act by calling consumers' cellular telephones without their prior express consent. On December 21, 2011, the United States Judicial Panel on Multi-District Litigation entered an order transferring these matters into one consolidated proceeding in the United States District Court for the Southern District of California. On November 14, 2012, the putative class plaintiffs filed their amended consolidated complaint in the matter, now styled as *In re Portfolio Recovery Associates, LLC Telephone Consumer Protection Act Litigation*, case No. 11-md-02295 (the "MDL action"). The Company has filed a motion to dismiss the amended consolidated complaint.

On October 12, 2012, the United States Court of Appeals for the Ninth Circuit, affirmed the decision of the United States District Court for the Southern District of California in the matter of *Meyer v. Portfolio Recovery Associates, LLC*, Case No. 11-cv-01008 ("Meyer"), which imposed a preliminary injunction prohibiting the Company from using its Avaya Proactive Contact Dialer to place calls to cellular telephones with California area codes that were obtained through skip-tracing. On December 28, 2012, the United States Court of Appeals for the Ninth Circuit denied the Company's petition seeking a rehearing en banc. Thereafter, the Company filed a Petition for Writ of Certiorari with the United States Supreme Court on March 28, 2013. On May 13, 2013 the United States Supreme Court denied the Company's petition. Meyer is one of the cases included in the MDL action listed above. Both Meyer and the MDL action are ongoing and no final determination on the merits in either has been made.

Internal Revenue Service Audit

The IRS examined the Company's tax returns for the 2005 calendar year. The IRS concluded the audit and on March 19, 2009 issued Form 4549-A, Income Tax Examination Changes, for tax years ended December 31, 2007, 2006 and 2005. The IRS has asserted that tax revenue recognition using the cost recovery method does not clearly reflect taxable income, and that unused line fees paid on credit facilities should be capitalized and amortized rather than taken as a current deduction. The Company believes it has sufficient support for the technical merits of its positions and that it is more likely than not these positions will ultimately be sustained; therefore, a reserve for uncertain tax positions is not required. On April 22, 2009, the Company filed a formal protest of the findings contained in the examination report prepared by the IRS. On August 26, 2011, the IRS issued a Notice of Deficiency for the tax years ended December 31, 2007, 2006, and 2005. The Company subsequently filed a petition in

PORTFOLIO RECOVERY ASSOCIATES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

the United States Tax Court to which the IRS responded on January 12, 2012. If the Company is unsuccessful in the United States Tax Court, it can appeal to the federal Circuit Court of Appeals. Refer to Note 9 “Income Taxes” for additional information.

12. Fair Value Measurements and Disclosures:

In accordance with the disclosure requirements of FASB ASC Topic 825, “Financial Instruments” (“ASC 825”), the table below summarizes fair value estimates for the Company’s financial instruments. The total of the fair value calculations presented does not represent, and should not be construed to represent, the underlying value of the Company. The carrying amounts in the table are recorded in the consolidated balance sheet at June 30, 2013 and December 31, 2012, under the indicated captions (amounts in thousands):

	June 30, 2013		December 31, 2012	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Financial assets:				
Cash and cash equivalents	\$ 43,459	\$ 43,459	\$ 32,687	\$ 32,687
Finance receivables, net	1,236,859	1,761,908	1,078,951	1,776,049
Financial liabilities:				
Line of credit	216,000	216,000	127,000	127,000
Long-term debt	197,774	197,774	200,542	200,542

As of June 30, 2013, and December 31, 2012, the Company did not account for any financial assets or financial liabilities at fair value. As defined by FASB ASC Topic 820, “Fair Value Measurements and Disclosures” (“ASC 820”), fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 also requires the consideration of differing levels of inputs in the determination of fair values. Those levels of input are summarized as follows:

- Level 1 - Quoted prices in active markets for identical assets and liabilities.
- Level 2 - Observable inputs other than level 1 quoted prices, such as quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.
- Level 3 - Unobservable inputs that are supported by little or no market activity. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The level in the fair value hierarchy within which a fair value measurement in its entirety falls is based on the lowest level input that is significant to the fair value measurement in its entirety.

Disclosure of the estimated fair values of financial instruments often requires the use of estimates. The Company uses the following methods and assumptions to estimate the fair value of financial instruments:

Cash and cash equivalents: The carrying amount approximates fair value and quoted prices for identical assets can be found in active markets. Accordingly, the Company estimates the fair value of cash and cash equivalents using level 1 inputs.

Finance receivables, net: The Company records purchased receivables at cost, which represents a significant discount from the contractual receivable balances due. The Company computed the estimated fair value of these receivables using proprietary pricing models that the Company utilizes to make portfolio purchase decisions. Accordingly, the Company's fair value estimates use level 3 inputs as there is little observable market data available and management is required to use significant judgment in its estimates.

Line of credit: The carrying amount approximates fair value due to the short-term nature of the interest rate periods and the observable quoted prices for similar instruments in active markets. Accordingly, the Company uses level 2 inputs for its fair value estimates.

PORTFOLIO RECOVERY ASSOCIATES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

Long-term debt: The carrying amount approximates fair value due to the short-term nature of the interest rate periods and the observable quoted prices for similar instruments in active markets. Accordingly, the Company uses level 2 inputs for its fair value estimates.

13. Stockholders' Equity:

On February 2, 2012, the Board of Directors of the Company authorized a share repurchase program of up to \$100 million of the Company's outstanding shares of common stock on the open market. During the three and six months ended June 30, 2013, the Company repurchased and retired 165,612 and 214,212 shares at an average price of \$39.82 and \$39.71 (including acquisition costs), respectively. At June 30, 2013, the maximum remaining purchase price for share repurchases under the plan is approximately \$68.8 million.

All share amounts presented in this Note 13 have been adjusted to reflect the three-for-one stock split by means of a stock dividend declared by the Company's board of directors on June 10, 2013.

14. Recent Accounting Pronouncements:

In July 2012, the FASB issued ASU 2012-02, "Intangibles-Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment" to amend the accounting guidance on intangible asset impairment testing. The ASU permits entities to perform an optional qualitative assessment for determining whether it is more likely than not that an indefinite-lived intangible asset is impaired. The guidance is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. Early adoption is permitted. The Company adopted ASU 2012-02 in the first quarter of 2013 which had no material impact on its consolidated financial statements.

In February 2013, the FASB issued ASU 2013-02, "Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income," which requires entities to provide information about the amounts reclassified out of accumulated other comprehensive income, by component. In addition, entities are required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income, entities are required to cross-reference to other disclosures required under U.S. GAAP that provide additional detail on these amounts. The Company adopted ASU 2013-02 in the first quarter of 2013 which had no material impact on its consolidated financial statements.

In March 2013, the FASB issued ASU 2013-05, "Foreign Currency Matters (Topic 830): Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity," which defines the treatment of the release of cumulative translation adjustments upon derecognition of certain subsidiaries or groups of assets within a foreign entity or of an investment in a foreign entity. This ASU is effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. Early adoption is permitted and prior periods should not be adjusted. The Company does not expect the adoption of this guidance to have a material impact on its consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Statements Pursuant to Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995:

This report contains forward-looking statements within the meaning of the federal securities laws. These forward-looking statements involve risks, uncertainties and assumptions that, if they never materialize or prove incorrect, could cause our results to differ materially from those expressed or implied by such forward-looking statements. All statements, other than statements of historical fact, are forward-looking statements, including statements regarding overall trends, gross margin trends, operating cost trends, liquidity and capital needs and other statements of expectations, beliefs, future plans and strategies, anticipated events or trends, and similar expressions concerning matters that are not historical facts. The risks, uncertainties and assumptions referred to above may include the following:

- a prolonged economic recovery or a deterioration in the economic or inflationary environment in the United States or the European Union, particularly the United Kingdom, including the interest rate environment, may have an adverse effect on our collections, results of operations, revenue and stock price or on the stability of the financial system as a whole;
- changes in the credit or capital markets, which affect our ability to borrow money or raise capital;
- our ability to purchase defaulted consumer receivables at appropriate prices;
- our ability to replace our defaulted consumer receivables with additional receivables portfolios;
- our ability to obtain accurate and authentic account documents relating to accounts that we acquire and the possibility that documents that we provide could contain errors;
- our ability to successfully acquire receivables of new asset types;
- our ability to collect sufficient amounts on our defaulted consumer receivables;
- changes in tax laws regarding earnings of our subsidiaries located outside of the United States;
- changes in bankruptcy or collection laws that could negatively affect our business, including by causing an increase in certain types of bankruptcy filings involving liquidations, which may cause our collections to decrease;
- changes in state or federal laws or the administrative practices of various bankruptcy courts, which may impact our ability to collect on our defaulted receivables;
- our ability to collect and enforce our finance receivables may be limited under federal and state laws;
- our ability to employ and retain qualified employees, especially collection personnel, and our senior management team;
- our work force could become unionized in the future, which could adversely affect the stability of our production and increase our costs;
- the degree, nature, and resources of our competition;
- the possibility that we could incur goodwill or other intangible asset impairment charges;
- our ability to retain existing clients and obtain new clients for our fee-for-service businesses;
- our ability to comply with existing and new regulations of the collection industry, the failure of which could result in penalties, fines, litigation, damage to our reputation or the suspension or termination of our ability to conduct our business;
- changes in governmental laws and regulations which could increase our costs and liabilities or impact our operations;
- the possibility that new business acquisitions prove unsuccessful or strain or divert our resources;
- our ability to maintain, renegotiate or replace our credit facility;
- our ability to satisfy the restrictive covenants in our debt agreements;
- our ability to manage risks associated with our international operations;
- the possibility that compliance with foreign and U.S. laws and regulations that apply to our international operations could increase our cost of doing business in international jurisdictions;
- the imposition of additional taxes on us;
- changes in interest or exchange rates, which could reduce our net income, and the possibility that future hedging strategies may not be successful, which could adversely affect our results of operations and financial condition, as could our failure to comply with hedge accounting principles and interpretations;
- the possibility that we could incur significant allowance charges on our finance receivables;
- our loss contingency accruals may not be adequate to cover actual losses;
- our ability to manage growth successfully;
- the possibility that we could incur business or technology disruptions or cyber incidents, or not adapt to technological advances;
- the possibility that we or our industry could experience negative publicity or reputational attacks; and
- the risk factors listed from time to time in our filings with the Securities and Exchange Commission (the "SEC").

You should assume that the information appearing in this quarterly report is accurate only as of the date it was issued. Our business, financial condition, results of operations and prospects may have changed since that date.

For a discussion of the risks, uncertainties and assumptions that could affect our future events, developments or results, you should carefully review the following “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” as well as the discussion of “Business” and “Risk Factors” described in our 2012 Annual Report on Form 10-K, filed on February 28, 2013.

Our forward-looking statements could be wrong in light of these and other risks, uncertainties and assumptions. The future events, developments or results described in this report could turn out to be materially different. Except as required by law, we assume no obligation to publicly update or revise our forward-looking statements after the date of this report and you should not expect us to do so.

Investors should also be aware that while we do, from time to time, communicate with securities analysts and others, we do not, by policy, selectively disclose to them any material nonpublic information or other confidential commercial information. Accordingly, stockholders should not assume that we agree with any statement or report issued by any analyst regardless of the content of the statement or report. We do not, by policy, confirm forecasts or projections issued by others. Thus, to the extent that reports issued by securities analysts contain any projections, forecasts or opinions, such reports are not our responsibility.

Definitions

We use the following terminology throughout this document:

- “Allowance charges” refers to a reduction in income recognized on finance receivables on pools of finance receivables whose cash collection estimates are not received or projected to not be received.
- “Amortization rate” refers to cash collections applied to principal on finance receivables as a percentage of total cash collections.
- “Buybacks” refers to purchase price refunded by the seller due to the return of non-compliant accounts.
- “Cash collections” refers to collections on our owned portfolios.
- “Cash receipts” refers to collections on our owned portfolios plus fee income.
- “Core” accounts or portfolios refer to accounts or portfolios that are defaulted consumer receivables and are not in a bankrupt status upon purchase. These accounts are aggregated separately from purchased bankruptcy accounts. Unless otherwise noted, Core accounts do not include the accounts we purchase in the United Kingdom.
- “EBITDA” refers to earnings before interest, taxes, depreciation and amortization.
- “Estimated remaining collections” or “ERC” refers to the sum of all future projected cash collections on our owned portfolios.
- “Fee income” refers to revenues generated from our fee-for-service businesses.
- “Income recognized on finance receivables” refers to income derived from our owned debt portfolios.
- “Income recognized on finance receivables, net” refers to income derived from our owned debt portfolios and is shown net of allowance charges.
- “Net finance receivable balance” is recorded on our balance sheet and refers to the purchase price less principal amortization and net allowance charges.
- “Principal amortization” refers to cash collections applied to principal on finance receivables.
- “Purchase price” refers to the cash paid to a seller to acquire defaulted consumer receivables, plus certain capitalized costs, less buybacks.
- “Purchase price multiple” refers to the total estimated collections on owned debt portfolios divided by purchase price.
- “Purchased bankruptcy” accounts or portfolios refer to accounts or portfolios that are in bankruptcy when we purchase them and as such are purchased as a pool of bankrupt accounts.
- “Total estimated collections” refers to the actual cash collections, including cash sales, plus estimated remaining collections.

Overview

The Company is a financial and business services company. Our primary business is the purchase, collection and management of portfolios of defaulted consumer receivables. We also service receivables on behalf of clients on either a commission or transaction-fee basis and provide class action claims settlement recovery services and related payment processing to corporate clients.

The Company is headquartered in Norfolk, Virginia, and employs approximately 3,362 team members. The Company's shares of common stock are traded on the NASDAQ Global Select Market under the symbol “PRAA.”

Earnings Summary

During the second quarter of 2013, net income attributable to the Company was \$43.6 million, or \$0.85 per diluted share, compared with \$32.0 million, or \$0.62 per diluted share, in the second quarter of 2012. Total revenue was \$183.0 million in the second quarter of 2013, up 23.7% from the second quarter of 2012. Revenues in the recently completed quarter consisted of \$168.6 million in income recognized on finance receivables, net of allowance charges, and \$14.4 million in fee income. Income

recognized on finance receivables, net of allowance charges, in the second quarter of 2013 increased \$36.0 million, or 27.1%, over the second quarter of 2012, primarily as a result of a significant increase in cash collections. Cash collections were \$296.4 million in the second quarter of 2013, up 27.5%, or \$64.0 million, as compared to the second quarter of 2012. During the second quarter of 2013, \$1.2 million in net allowance charge reversals were incurred, compared with \$2.2 million of net allowance charges in the second quarter of 2012. Our performance has been positively impacted by operational efficiencies surrounding the cash collections process, including the continued refinement of account scoring analytics as it relates to both legal and non-legal collection channels. Additionally, we have continued to develop our internal legal collection staff resources, which enables us to place accounts into that channel that otherwise would have been prohibitively expensive for legal action and to collect these accounts more efficiently and profitably.

Fee income decreased to \$14.4 million in the second quarter of 2013 from \$15.3 million in the second quarter of 2012, primarily due to lower fee income generated by Claims Compensation Bureau, LLC ("CCB"), Mackenzie Hall Holdings, Limited, ("MHH") and PRA Location Services ("PLS") in the second quarter of 2013. This was partially offset by higher fee income generated in the second quarter of 2013 by PRA Government Services ("PRA GS") and our Bankruptcy Services business when compared to the prior year period.

A summary of how our income was generated during the three months ended June 30, 2013 and 2012 is as follows:

(\$ in thousands)	For the Three Months Ended June 30,	
	2013	2012
Cash collections	\$ 296,397	\$ 232,425
Amortization of finance receivables	(129,012)	(97,634)
Net allowance reversals/(charges)	1,185	(2,204)
Finance receivable income	168,570	132,587
Fee income	14,391	15,298
Total revenue	\$ 182,961	\$ 147,885

Operating expenses were \$109.1 million in the second quarter of 2013, up 17.0% over the second quarter of 2012, due primarily to increases in compensation expense, legal collection fees and costs, and outside fees and services. Compensation expense increased primarily as a result of larger staff sizes in addition to increases in incentive and share based compensation. Compensation and employee services expenses increased as total employees grew 10.9% to 3,362 as of June 30, 2013, from 3,032 as of June 30, 2012. Legal collection costs increased from \$18.2 million in the second quarter of 2012 to \$22.7 million in the second quarter of 2013, an increase of \$4.5 million, or 24.7%. This increase was the result of our continued expansion of the accounts brought into the legal collection process. Legal collection fees increased from \$9.0 million in the second quarter of 2012 to \$10.6 million in the second quarter of 2013, an increase of \$1.6 million, or 17.8%. This increase was the result of an increase in cash collections from outside attorneys from \$41.5 million in the three months ended June 30, 2012 to \$50.1 million for the three months ended June 30, 2013, an increase of \$8.6 million, or 20.7%. Outside fees and services increased primarily as a result of corporate legal related expenses as well as increases in other outside fees and services.

Results of Operations

The results of operations include the financial results of the Company and all of our subsidiaries, all of which are in the receivables management business. Under the guidance of the FASB ASC Topic 280 "Segment Reporting" ("ASC 280"), we have determined that we have several operating segments that meet the aggregation criteria of ASC 280, and therefore, we have one reportable segment, accounts receivables management, based on similarities among the operating units including homogeneity of services, service delivery methods and use of technology.

The following table sets forth certain operating data as a percentage of total revenues for the periods indicated:

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2013	2012	2013	2012
Revenues:				
Income recognized on finance receivables, net	92.1 %	89.7 %	91.7 %	89.2 %
Fee income	7.9 %	10.3 %	8.3 %	10.8 %

Three Months Ended June 30, 2013 Compared To Three Months Ended June 30, 2012

Revenues

Total revenues were \$183.0 million for the three months ended June 30, 2013, an increase of \$35.1 million, or 23.7%, compared to total revenues of \$147.9 million for the three months ended June 30, 2012.

Income Recognized on Finance Receivables, net

Income recognized on finance receivables, net was \$168.6 million for the three months ended June 30, 2013, an increase of \$36.0 million, or 27.1%, compared to income recognized on finance receivables, net of \$132.6 million for the three months ended June 30, 2012. The increase was primarily due to an increase in cash collections on our finance receivables to \$296.4 million for the three months ended June 30, 2013, from \$232.4 million for the three months ended June 30, 2012, an increase of \$64.0 million, or 27.5%. Our finance receivables amortization rate, including net allowance charges, was 43.1% for the three months ended June 30, 2013 compared to 43.0% for the three months ended June 30, 2012. During the three months ended June 30, 2013, we acquired defaulted consumer receivables portfolios with an aggregate face value amount of \$3.19 billion at a cost of \$200.5 million. During the three months ended June 30, 2012, excluding the initial investment in the MHH portfolio, we acquired defaulted consumer receivable portfolios with an aggregate face value of \$1.53 billion at a cost of \$125.1 million. In any period, we acquire defaulted consumer receivables that can vary dramatically in their age, type and ultimate collectability. We may pay significantly different purchase rates for purchased receivables within any period as a result of this quality fluctuation. In addition, market forces can drive pricing rates up or down in any period, irrespective of other quality fluctuations. As a result, the average purchase rate paid for any given period can fluctuate dramatically based on our particular buying activity in that period. Regardless of the average purchase price and for similar time frames, however, we intend to target a similar internal rate of return, after direct

expenses, in pricing our portfolio acquisitions; therefore, the absolute rate paid is not necessarily relevant to the estimated profitability of a period's buying.

Income recognized on finance receivables, net, is shown net of changes in valuation allowances recognized under FASB ASC Topic 310-30 "Loans and Debt Securities Acquired with Deteriorated Credit Quality" ("ASC 310-30"), which requires that a valuation allowance be recorded for significant decreases in expected cash flows or a change in timing of cash flows which would otherwise require a reduction in the stated yield on a pool of accounts. For the three months ended June 30, 2013, we recorded net allowance charge reversals of \$1.2 million, of which a charge of \$0.6 million related to purchased bankruptcy portfolios primarily purchased in 2008, offset by reversals of \$1.8 million related to Core portfolios purchased between 2005 and 2008. In any given period, we may be required to record valuation allowances due to pools of receivables underperforming our expectations. Factors that may contribute to the recording of valuation allowances may include both internal as well as external factors. External factors which may have an impact on the collectability, and subsequently to the overall profitability, of purchased pools of defaulted consumer receivables include: new laws or regulations relating to collections, new interpretations of existing laws or regulations, and the overall condition of the economy. Internal factors which may have an impact on the collectability, and subsequently the overall profitability, of purchased pools of defaulted consumer receivables would include: necessary revisions to initial and post-acquisition scoring and modeling estimates, non-optimal operational activities (relating to the collection and movement of accounts on both our collection floor and external channels), and decreases in productivity related to turnover of our collection staff.

Fee Income

Fee income decreased to \$14.4 million in the second quarter of 2013 from \$15.3 million in the second quarter of 2012 primarily due to lower fee income generated by CCB, MHH and PLS in the second quarter of 2013. This was partially offset by higher fee income generated in the second quarter of 2013 by PRA GS and our Bankruptcy Services business when compared to the prior year period.

Income from Operations

Income from operations was \$73.8 million for the three months ended June 30, 2013, an increase of \$19.2 million or 35.2% compared to income from operations of \$54.6 million for the three months ended June 30, 2012. Income from operations was 40.4% of total revenue for the three months ended June 30, 2013 compared to 36.9% for the same period in 2012, largely due to improved efficiencies in our Core operations.

Operating Expenses

Total operating expenses were \$109.1 million for the three months ended June 30, 2013, an increase of \$15.8 million or 16.9% compared to total operating expenses of \$93.3 million for the three months ended June 30, 2012. Total operating expenses were 35.1% of cash receipts for the three months ended June 30, 2013 compared to 37.7% for the same period in 2012, largely due to improved efficiencies in our Core operations.

Compensation and Employee Services

Compensation and employee services expenses were \$48.2 million for the three months ended June 30, 2013, an increase of \$5.7 million, or 13.4%, compared to compensation and employee services expenses of \$42.5 million for the three months ended June 30, 2012. Compensation expense increased primarily as a result of larger staff sizes in addition to increases in incentive and share based compensation. Compensation and employee services expenses increased as total employees grew 10.9% to 3,362 as of June 30, 2013, from 3,032 as of June 30, 2012. Compensation and employee services expenses as a percentage of cash receipts decreased to 15.5% for the three months ended June 30, 2013, from 17.1% of cash receipts for the same period in 2012.

Legal Collection Fees

Legal collection fees represent contingent fees incurred for the cash collections generated by our independent third party attorney network. Legal collection fees were \$10.6 million for the three months ended June 30, 2013, an increase of \$1.6 million, or 17.8%, compared to legal collection fees of \$9.0 million for the three months ended June 30, 2012. This increase was the result of an increase in cash collections from outside attorneys from \$41.5 million in the three months ended June 30, 2012 to \$50.1 million for the three months ended June 30, 2013, an increase of \$8.6 million or 20.7%. Legal collection fees for the three months ended June 30, 2013 were 3.4% of cash receipts, compared to 3.6% for the three months ended June 30, 2012.

Legal Collection Costs

Legal collection costs consist of costs paid to courts where a lawsuit is filed and the cost of documents received from sellers of defaulted consumer receivables. Legal collection costs were \$22.7 million for the three months ended June 30, 2013, an increase of \$4.5 million, or 24.7%, compared to legal collection costs of \$18.2 million for the three months ended June 30, 2012. Beginning

in early 2012 and continuing into 2013, as a result of the refinement of our internal scoring methodology that expanded our account selections for legal action, we expanded the accounts brought into the legal collection process which resulted in significant initial expenses, which may continue to drive additional future cash collections and revenue. These legal collection costs represent 7.3% of cash receipts for both the three month periods ended June 30, 2013 and 2012.

Agent Fees

Agent fees primarily represent costs paid to repossession agents to repossess vehicles. Agent fees were \$1.3 million for both the three months ended June 30, 2013 and 2012.

Outside Fees and Services

Outside fees and services expenses were \$8.6 million for the three months ended June 30, 2013, an increase of \$3.0 million, or 53.6%, compared to outside fees and services expenses of \$5.6 million for the three months ended June 30, 2012. Of the \$3.0 million increase, \$2.8 million was attributable to an increase in legal reserve accruals and corporate legal expenses and the remaining \$0.2 million increase was mainly attributable to other outside fees and services.

Communication Expenses

Communication expenses were \$7.6 million for the three months ended June 30, 2013, an increase of \$0.6 million, or 8.6%, compared to communications expenses of \$7.0 million for the three months ended June 30, 2012. The increase was primarily due to additional postage expense resulting from an increase in special collection letter campaigns. The remaining increase was attributable to higher telephone expenses. Expenses related to customer mailings were responsible for 83.3%, or \$0.5 million, of this increase, while the remaining 16.7%, or \$0.1 million, was attributable to increases in telephone related charges.

Rent and Occupancy

Rent and occupancy expenses were \$1.8 million for the three months ended June 30, 2013, an increase of \$0.1 million, or 5.9%, compared to rent and occupancy expenses of \$1.7 million for the three months ended June 30, 2012.

Depreciation and Amortization

Depreciation and amortization expenses were \$3.5 million for the three months ended June 30, 2013, a decrease of \$0.1 million, or 2.8%, compared to depreciation and amortization expenses of \$3.6 million for the three months ended June 30, 2012. The decrease was primarily due to decreased amortization expense relating to our intangible assets.

Other Operating Expenses

Other operating expenses were \$4.8 million for the three months ended June 30, 2013, an increase of \$0.3 million, or 6.7%, compared to other operating expenses of \$4.5 million for the three months ended June 30, 2012. Of the \$0.3 million increase, \$1.0 million was due to an increase in estimated contingent payments related to a previous acquisition offset by \$0.9 million of reversals in the provision for doubtful accounts. None of the remaining \$0.2 million increase was attributable to any significant identifiable items.

Interest Income

Interest income was \$0 and \$7,000 for the three months ended June 30, 2013 and 2012, respectively.

Interest Expense

Interest expense was \$2.9 million and \$2.4 million for the three months ended June 30, 2013 and 2012, respectively. The increase was primarily due to an increase in average borrowings under our credit facility for the three months ended June 30, 2013 compared to the same prior year period. The average borrowings on our credit facility were \$398.7 million and \$263.1 million for the three months ended June 30, 2013 and 2012, respectively.

Provision for Income Taxes

Provision for income taxes was \$27.5 million for the three months ended June 30, 2013, an increase of \$7.3 million, or 36.1%, compared to provision for income taxes of \$20.2 million for the three months ended June 30, 2012. The increase is primarily due to an increase of 35.8% in income before taxes for the three months ended June 30, 2013, compared to the three months ended June 30, 2012, in addition to an increase in the effective tax rate to 38.8% for the three months ended June 30, 2013, compared to an effective tax rate of 38.6% for the same period in 2012.

Six Months Ended June 30, 2013 Compared To Six Months Ended June 30, 2012

Revenues

Total revenues were \$352.5 million for the six months ended June 30, 2013, an increase of \$64.5 million, or 22.4%, compared to total revenues of \$288.0 million for the six months ended June 30, 2012.

Income Recognized on Finance Receivables, net

Income recognized on finance receivables, net was \$323.4 million for the six months ended June 30, 2013, an increase of \$66.6 million, or 25.9%, compared to income recognized on finance receivables, net of \$256.8 million for the six months ended June 30, 2012. The increase was primarily due to an increase in cash collections on our finance receivables to \$571.9 million for the six months ended June 30, 2013, from \$450.4 million for the six months ended June 30, 2012, an increase of \$121.5 million or 27.0%. Our finance receivables amortization rate, including net allowance charges, was 43.5% for the six months ended June 30, 2013 compared to 43.0% for the six months ended June 30, 2012. During the six months ended June 30, 2013, we acquired defaulted consumer receivables portfolios with an aggregate face value amount of \$5.04 billion at a cost of \$415.4 million. During the six months ended June 30, 2012, excluding the initial investment in the MHH portfolio, we acquired defaulted consumer receivable portfolios with an aggregate face value of \$2.98 billion at a cost of \$236.5 million. In any period, we acquire defaulted consumer receivables that can vary dramatically in their age, type and ultimate collectability. We may pay significantly different purchase rates for purchased receivables within any period as a result of this quality fluctuation. In addition, market forces can drive pricing rates up or down in any period, irrespective of other quality fluctuations. As a result, the average purchase rate paid for any given period can fluctuate dramatically based on our particular buying activity in that period. Regardless of the average purchase price and for similar time frames, however, we intend to target a similar internal rate of return, after direct expenses, in pricing our portfolio acquisitions; therefore, the absolute rate paid is not necessarily relevant to the estimated profitability of a period's buying.

Income recognized on finance receivables, net, is shown net of changes in valuation allowances recognized under FASB ASC Topic 310-30 "Loans and Debt Securities Acquired with Deteriorated Credit Quality" ("ASC 310-30"), which requires that a valuation allowance be recorded for significant decreases in expected cash flows or a change in timing of cash flows which would otherwise require a reduction in the stated yield on a pool of accounts. For the six months ended June 30, 2013, we recorded net allowance charges of \$1.0 million, of which \$5.1 million related to purchased bankruptcy portfolios primarily purchased in 2007 and 2008, offset by reversals of \$4.1 million related to Core portfolios primarily purchased in 2005 and 2008. In any given period, we may be required to record valuation allowances due to pools of receivables underperforming our expectations. Factors that may contribute to the recording of valuation allowances may include both internal as well as external factors. External factors which may have an impact on the collectability, and subsequently to the overall profitability, of purchased pools of defaulted consumer receivables include: new laws or regulations relating to collections, new interpretations of existing laws or regulations, and the overall condition of the economy. Internal factors which may have an impact on the collectability, and subsequently the overall profitability, of purchased pools of defaulted consumer receivables would include: necessary revisions to initial and post-acquisition scoring and modeling estimates, non-optimal operational activities (relating to the collection and movement of accounts on both our collection floor and external channels), and decreases in productivity related to turnover of our collection staff.

Fee Income

Fee income was \$29.2 million for the six months ended June 30, 2013, a decrease of \$2.0 million, or 6.4%, compared to fee income of \$31.2 million for the six months ended June 30, 2012. The decrease was primarily due to lower fee income generated by MHH, CCB and PLS during the six months ended June 30, 2013 when compared to six months ended June 30, 2012. This was partially offset by higher fee income generated in the first half of 2013 by PRAGS and our Bankruptcy Services business when compared to the first half of 2012.

Income from Operations

Income from operations was \$139.7 million for the six months ended June 30, 2013, an increase of \$40.7 million or 41.1% compared to income from operations of \$99.0 million for the six months ended June 30, 2012. Income from operations was 39.6% of total revenue for the six months ended June 30, 2013 compared to 34.4% for the same period in 2012, largely due to improved efficiencies in our Core operations.

Operating Expenses

Total operating expenses were \$212.8 million for the six months ended June 30, 2013, an increase of \$23.8 million, or 12.6%, compared to total operating expenses of \$189.0 million for the six months ended June 30, 2012. Total operating expenses were

35.4% of cash receipts for the six months ended June 30, 2013 compared to 39.2% for the six months ended June 30, 2012, largely due to improved efficiencies in our Core operations.

Compensation and Employee Services

Compensation and employee services expenses were \$93.2 million for the six months ended June 30, 2013, an increase of \$11.0 million, or 13.4%, compared to compensation and employee services expenses of \$82.2 million for the six months ended June 30, 2012. Compensation expense increased primarily as a result of larger staff sizes in addition to increases in incentive and share based compensation. Compensation and employee services expenses increased as total employees grew 10.9% to 3,362 as of June 30, 2013, from 3,032 as of June 30, 2012. Compensation and employee services expenses as a percentage of cash receipts decreased to 15.5% for the six months ended June 30, 2013, from 17.1% of cash receipts for the six months ended June 30, 2012.

Legal Collection Fees

Legal collection fees represent contingent fees incurred for the cash collections generated by our independent third party attorney network. Legal collection fees were \$21.1 million for the six months ended June 30, 2013, an increase of \$4.5 million, or 27.1%, compared to legal collection fees of \$16.6 million for the six months ended June 30, 2012. This increase was the result of an increase in cash collections from outside attorneys from \$76.3 million in the six months ended June 30, 2012 to \$98.0 million for the six months ended June 30, 2013, an increase of \$21.7 million, or 28.4%. Legal collection fees for the six months ended June 30, 2013 were 3.5% of cash receipts, compared to 3.4% for the six months ended June 30, 2012.

Legal Collection Costs

Legal collection costs consist of costs paid to courts where a lawsuit is filed and the cost of documents received from sellers of defaulted consumer receivables. Legal collection costs were \$43.2 million for the six months ended June 30, 2013, an increase of \$1.3 million, or 3.1%, compared to legal collection costs of \$41.9 million for the six months ended June 30, 2012. Beginning in early 2012 and continuing into 2013, as a result of the refinement of our internal scoring methodology that expanded our account selections for legal action, we expanded the accounts brought into the legal collection process which resulted in significant initial expenses, which may continue to drive additional future cash collections and revenue. These legal collection costs represent 7.2% and 8.7% of cash receipts for the six month periods ended June 30, 2013 and 2012, respectively.

Agent Fees

Agent fees primarily represent costs paid to repossession agents to repossess vehicles. Agent fees were \$2.9 million and \$3.0 million for the six months ended June 30, 2013 and 2012, respectively.

Outside Fees and Services

Outside fees and services expenses were \$16.1 million for the six months ended June 30, 2013, an increase of \$4.7 million, or 41.2%, compared to outside fees and services expenses of \$11.4 million for the six months ended June 30, 2012. Of the \$4.7 million increase, \$3.7 million was attributable to an increase in legal reserve accruals and corporate legal expenses and \$1.3 million was mainly attributable to an increase in other outside fees and services. None of the remaining \$0.3 million decrease was attributable to any significant identifiable items.

Communication Expenses

Communication expenses were \$16.5 million for the six months ended June 30, 2013, an increase of \$1.2 million, or 7.8%, compared to communications expenses of \$15.3 million for the six months ended June 30, 2012. The increase was primarily due to additional postage expense resulting from an increase in special collection letter campaigns. The remaining increase was attributable to higher telephone expenses. Expenses related to customer mailings were responsible for 75.0%, or \$0.9 million, of this increase, while the remaining 25.0%, or \$0.3 million, was attributable to increases in telephone related charges.

Rent and Occupancy

Rent and occupancy expenses were \$3.5 million for the six months ended June 30, 2013, an increase of \$0.2 million, or 6.1%, compared to rent and occupancy expenses of \$3.3 million for the six months ended June 30, 2012.

Depreciation and Amortization

Depreciation and amortization expenses were \$6.9 million for the six months ended June 30, 2013, a decrease of \$0.3 million, or 4.2%, compared to depreciation and amortization expenses of \$7.2 million for the six months ended June 30, 2012. The decrease was primarily due to decreased amortization expense relating to our intangible assets.

Other Operating Expenses

Other operating expenses were \$9.4 million for the six months ended June 30, 2013, an increase of \$1.2 million, or 14.6%, compared to other operating expenses of \$8.2 million for the six months ended June 30, 2012. Of the \$1.2 million increase, \$1.0 million was due to an increase in estimated contingent payments related to a previous acquisition and \$0.3 million was due to an increase in insurance costs. This was offset by a \$0.6 million decrease in our provision for doubtful accounts during the first half of 2013 when compared to the first half of 2012. None of the remaining \$0.5 million increase was attributable to any significant identifiable items.

Interest Income

Interest income was \$0 and \$8,000 for the six months ended June 30, 2013 and 2012, respectively.

Interest Expense

Interest expense was \$5.6 million and \$5.0 million for the six months ended June 30, 2013 and 2012, respectively. The increase was primarily due to an increase in average borrowings under our credit facility for the six months ended June 30, 2013 compared to the six months ended June 30, 2012. The average borrowings on our credit facility were \$379.3 million and \$263.8 million for the six months ended June 30, 2013 and 2012, respectively.

Provision for Income Taxes

Provision for income taxes was \$52.2 million for the six months ended June 30, 2013, an increase of \$15.4 million, or 41.8%, compared to provision for income taxes of \$36.8 million for the six months ended June 30, 2012. The increase is primarily due to an increase of 42.7% in income before taxes for the six months ended June 30, 2013, compared to the same period in 2012, offset by a decrease in the effective tax rate to 38.9% for the six months ended June 30, 2013, compared to an effective tax rate of 39.1% for the same period in 2012. The decrease in the effective tax rate is primarily attributable to federal and state tax credits.

Supplemental Performance Data

Domestic Finance Receivables Portfolio Performance:

The following tables show certain data related to our domestic finance receivables portfolio. These tables describe the purchase price, actual cash collections and future estimates of cash collections, income recognized on finance receivables (gross and net of allowance charges), principal amortization, allowance charges, net finance receivable balances, and the ratio of total estimated collections to purchase price (which we refer to as purchase price multiple).

Further, these tables disclose our entire domestic portfolio, as well as its subsets: the portfolio of purchased bankrupt accounts and our Core portfolio. The accounts represented in the purchased bankruptcy tables are those portfolios of accounts that were bankrupt at the time of purchase. This contrasts with accounts that file for bankruptcy after we purchase them, which continue to be tracked in their corresponding Core portfolio. Core customers sometimes file for bankruptcy protection subsequent to our purchase of the related Core portfolio. When this occurs, we adjust our collection practices accordingly to comply with bankruptcy procedures; however, for accounting purposes, these accounts remain in the related Core portfolio. Conversely, bankrupt accounts may be dismissed voluntarily or involuntarily subsequent to our purchase of the related bankrupt portfolio. Dismissal occurs when the terms of the bankruptcy are not met by the petitioner. When this occurs, we are typically free to pursue collection outside of bankruptcy procedures; however, for accounting purposes, these accounts remain in the related bankruptcy pool.

Our United Kingdom portfolio is not significant and is therefore not included in these tables.

Purchase price multiples can vary over time due to a variety of factors including pricing competition, supply levels, age of the receivables purchased, and changes in our operational efficiency. For example, increased pricing competition during the 2005 to 2008 period negatively impacted purchase price multiples of our Core portfolio compared to prior years. During the 2009 to 2010 period, for example, pricing disruptions occurred as a result of the economic downturn. This created unique and advantageous purchasing opportunities, particularly within the bankruptcy receivables market, relative to the prior four years.

When competition increases and/or supply decreases, pricing often becomes negatively impacted relative to expected collections, and yields tend to trend lower. The opposite tends to occur when competition decreases and/or supply increases.

Purchase price multiples can also vary among types of finance receivables. For example, we incur lower collection costs, on our bankruptcy portfolio compared with our Core portfolio. This allows us in general to pay more for a bankruptcy portfolio, experience lower purchase price multiples, and yet generate similar internal rates of return when compared with a Core portfolio.

Within a given portfolio type, to the extent that lower purchase price multiples are the result of more competitive pricing and lower yields, this will generally lead to higher amortization rates (payments applied to principal as a percentage of cash collections) and lower profitability. As portfolio pricing becomes more favorable on a relative basis, our profitability will tend to increase. However the numbers presented in these tables represent gross cash collections and do not reflect any costs to collect; therefore, to the extent we can improve our collection operations by collecting additional cash from a discrete quantity and quality of accounts, and/or by collecting cash at a lower cost structure, we can positively impact profitability. We continue to make enhancements to our analytical abilities, with the intent to collect more cash at a lower cost.

Additionally, purchase price multiples can vary among periods due to our implementation of required accounting standards. Revenue recognition under ASC 310-30 is driven by estimates of total collections as well as the timing of those collections. We record new portfolio purchases using a higher confidence level for both estimated collection amounts and timing. Subsequent to the initial booking, as we gain collection experience and confidence with a pool of accounts, we continuously update ERC. These processes, along with the aforementioned operational enhancements, have tended to cause the ratio of ERC to purchase price for any given year of buying to gradually increase over time. As a result, our estimate of total collections to purchase price has generally, but not always, increased as pools have aged. Thus, all factors being equal in terms of pricing, one would typically tend to see a higher collection to purchase price ratio from a pool of accounts that was six years from purchase than say a pool that was just two years from purchase.

Due to all the factors described above, readers should be cautious when making comparisons of purchase price multiples among periods and between types of receivables.

The following graph shows the purchase price of our domestic portfolios by year for the last ten years. The purchase price number represents the cash paid to the seller, plus certain capitalized costs, less buybacks.

As shown in the above chart, the composition of our domestic purchased portfolios has shifted in favor of bankrupt accounts in recent years. We began buying bankrupt accounts during 2004 and slowly increased the volume of accounts we acquired through 2006 as we tested our models, refined our processes and validated our operating assumptions. After observing a high level of modeling confidence in our early purchases, we began increasing our level of purchases more dramatically commencing in 2007.

Our ability to profitably purchase and liquidate pools of bankrupt accounts provides diversity to our distressed asset acquisition business. Although we generally buy bankrupt portfolios from many of the same consumer lenders from whom we acquire Core customer portfolios, the volumes and pricing characteristics as well as the competitors are different. Based upon market dynamics, the profitability of portfolios purchased in the bankrupt and Core markets may differ over time. We have found periods when bankrupt accounts were more profitable and other times when Core accounts were more profitable. From 2004 through 2008, our bankruptcy buying fluctuated between 13% and 39% of our total portfolio purchasing in those years. In 2009, for the first time in our history, bankruptcy purchasing exceeded that of our Core buying, finishing at 55% of total portfolio purchasing for the year and during 2010 this percentage increased to 59%. This occurred as severe dislocations in the financial markets, coupled with legislative uncertainty, caused pricing in the bankruptcy market to decline substantially, thereby driving our strategy to make advantageous bankruptcy portfolio acquisitions during this period. For 2011 and 2012, bankruptcy buying represented 48% and 50%, respectively, of our total domestic portfolio purchasing. During the first half of 2013, bankruptcy buying represented 41% of our total domestic portfolio purchasing.

In order to collect our Core portfolios, we generally need to employ relatively higher amounts of labor and incur additional collection costs to generate each dollar of cash collections as compared with bankruptcy portfolios. In order to achieve acceptable levels of net return on investment (after direct expenses), we are generally targeting a total cash collections to purchase price multiple in the 2.0-3.0x range. On the other hand, bankrupt accounts generate the majority of cash collections through the efforts of the U.S. bankruptcy courts. In this process, cash is remitted to our Company with no corresponding cost other than the cost of filing claims at the time of purchase and general administrative costs for monitoring the progress of each account through the bankruptcy process. As a result, overall collection costs are much lower for us when liquidating a pool of bankrupt accounts as compared to a pool of Core accounts, but conversely the price we pay for bankrupt accounts is generally higher than Core accounts. We generally target similar returns on investment (measured after direct expenses) for bankrupt and Core portfolios at any given point in the market cycles. However, because of the lower related collection costs, we can pay more for bankrupt portfolios, which causes the estimated total cash collections to purchase price multiples of bankrupt pools generally to be in the 1.2-2.0x range. In summary, compared to a pool of Core accounts, to the extent both pools had identical targeted returns on investment (measured after direct expenses), the bankrupt pool would be expected to generate less revenue, a lower yield, less direct expenses, similar operating income, and a higher operating margin.

In addition, collections on younger, newly filed bankrupt accounts tend to be of a lower magnitude in the earlier months when compared to Core charge-off accounts. This lower level of early period collections is due to the fact that we primarily purchase portfolios of accounts that represent unsecured claims in bankruptcy, and these unsecured claims are scheduled to begin paying out after payment of the secured and priority claims. As a result of the administrative processes regarding payout priorities within the court-administered bankruptcy plans, unsecured creditors do not generally begin receiving meaningful collections on unsecured claims until 12 to 18 months after the bankruptcy filing date. Therefore, to the extent that we purchase portfolios with more recent bankruptcy filing dates, as we did to a significant extent commencing in 2009, we would expect to experience a delay in cash collections compared with Core charged-off portfolios.

We utilize a long-term approach to collecting our owned portfolios of receivables. This approach has historically caused us to realize significant cash collections and revenues from purchased portfolios of finance receivables years after they are originally acquired. As a result, we have in the past been able to temporarily reduce our level of current period acquisitions without a corresponding negative current period impact on cash collections and revenue.

The following tables, which exclude any proceeds from cash sales of finance receivables, demonstrate our ability to realize significant multi-year cash collection streams on our domestic portfolios.

Cash Collections By Year, By Year of Purchase – Entire Domestic Portfolio

(in thousands)

When we acquire a new pool of finance receivables, our estimates typically result in a 60-96 month projection of cash collections, depending on the type of finance receivables acquired. The following chart shows our historical cash collections (including cash sales of finance receivables) in relation to the aggregate of the total estimated collection projections made at the time of each respective pool purchase, adjusted for buybacks, for the last ten years.

Primarily as a result of the downturn in the economy, the decline in the availability of consumer credit, our efforts to help customers establish reasonable payment plans, and improvements in our collections capabilities which have allowed us to profitably collect on accounts with lower balances or lower quality, the average payment size has decreased over the past several years. However, due to improved scoring and segmentation, together with enhanced productivity, we have been able to realize increased amounts of cash collections by generating enough incremental payments to overcome the decrease in payment size. The decreasing average payment size trend moderated during 2012, and the average payment size was stable during the first six months of 2013.

The following chart illustrates the excess of our cash collections on our owned portfolios over income recognized on finance receivables on a quarterly basis. The difference between cash collections and income recognized on finance receivables is referred to as payments applied to principal. It is also referred to as amortization of purchase price. This amortization is the portion of cash collections that is used to recover the cost of the portfolio investment represented on the balance sheet.

(1) Includes cash collections on finance receivables only and excludes cash proceeds from sales of defaulted consumer receivables.

Seasonality

Cash collections tend to be higher in the first and second quarters of the year and lower in the third and fourth quarters of the year, due to customer payment patterns in connection with seasonal employment trends, income tax refunds and holiday spending habits. Historically, our growth has partially offset the impact of this seasonality.

The following table displays our quarterly cash collections by source, for the periods indicated.

Cash Collection Source (\$ in thousands)	Q22013	Q12013	Q42012	Q32012	Q22012	Q12012	Q42011	Q32011

Total Cash Collections	\$ 296,397	\$ 275,463	\$ 229,211	\$ 229,052	\$ 232,425	\$ 217,996	\$ 180,324	\$ 182,168

Rollforward of Net Finance Receivables

The following table shows the changes in finance receivables, net, including the amounts paid to acquire new portfolios (amounts in thousands).

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Balance at beginning of year	\$ 1,169,747	\$ 945,242	\$ 1,078,951	\$ 926,734
Acquisitions of finance receivables ⁽¹⁾	194,958	121,246	407,347	233,339
Foreign currency translation adjustment	(19)	(142)	(941)	43
Cash collections applied to principal on finance receivables ⁽²⁾	(127,827)	(99,838)	(248,498)	(193,608)
Balance at end of period	\$ 1,236,859	\$ 966,508	\$ 1,236,859	\$ 966,508
Estimated Remaining Collections	\$ 2,636,229	\$ 2,118,162	\$ 2,636,229	\$ 2,118,162

(1) Acquisitions of finance receivables is net of buybacks and includes certain capitalized acquisition related costs.

(2) Cash collections applied to principal (also referred to as amortization) on finance receivables consists of cash collections less income recognized on finance receivables, net of allowance charges.

Portfolios by Type and Geography (Domestic Portfolio Only)

The following table categorizes our life to date portfolio purchases as of June 30, 2013, into the major asset types represented (amounts in thousands):

Account Type	No. of Accounts	%	Life to Date Purchased Face Value ⁽¹⁾		Original Purchase Price ⁽²⁾	
			\$	%	\$	%
Major Credit Cards	18,316	55%	\$ 51,824,729	69%	\$ 2,144,459	70%
Consumer Finance	6,698	20	8,593,762	11	140,107	4
Private Label Credit Cards	7,471	23	10,241,788	14	697,093	23
Auto Deficiency	651	2	4,594,236	6	86,600	3
Total:	33,136	100%	\$ 75,254,515	100%	\$ 3,068,259	100%

(1) Life to Date Purchased Face Value represents the original face amount purchased from sellers and has not been reduced by any adjustments including payments and buybacks.

(2) Original Purchase Price represents the cash paid to sellers to acquire portfolios of defaulted consumer receivables.

The following table summarizes our life to date portfolio purchases as of June 30, 2013, into the delinquency categories represented (amounts in thousands).

Account Type	No. of Accounts	%	Life to Date Purchased Face Value ⁽¹⁾		Original Purchase Price ⁽²⁾	
			\$	%	\$	%
Fresh	2,893	9%	\$ 7,030,699	9%	\$ 724,413	23%

Other	10,261	31	22,733,161	30	148,458	5
Total:	33,136	100%	\$ 75,254,515	100%	\$ 3,068,259	100%

(1) Life to Date Purchased Face Value represents the original face amount purchased from sellers and has not been reduced by any adjustments including payments and buybacks.

(2) Original Purchase Price represents the cash paid to sellers to acquire portfolios of defaulted consumer receivables.

We review the geographic distribution of accounts within a portfolio because we have found that state specific laws and rules can have an effect on the collectability of accounts located there. In addition, economic factors and bankruptcy trends vary regionally and are factored into our maximum purchase price equation.

The following table summarizes our life to date portfolio purchases as of June 30, 2013, by geographic location (amounts in thousands):

Geographic Distribution	No. of Accounts	%	Life to Date Purchased		Original Purchase	
			Face Value (1)	%	Price (2)	%
California	3,546	11%	\$ 9,940,584	13%	\$ 392,659	13%

(1) Life to Date Purchased Face Value represents the original face amount purchased from sellers and has not been reduced by any adjustments, including payments and buybacks.

(2) Original Purchase Price represents the cash paid to sellers to acquire portfolios of defaulted consumer receivables.

(3) Each state included in "Other" represents less than 2% of the face value of total defaulted consumer receivables.

Collections Productivity

The following tables display various collections productivity measures that we track. The tables below contain our collector productivity metrics as defined by calendar quarter.

Quarterly Cash Collections per Collector Hour Paid (Domestic Portfolio Only)

	Core cash collections (1)				
	2009	2010	2011	2012	2013
Q1	\$ 120	\$ 135	\$ 162	\$ 166	\$ 186
Q2	114	127	154	169	184
Q3	111	127	152	171	—
Q4	109	129	137	150	—

	Total cash collections (2)				
	2009	2010	2011	2012	2013
Q1	\$ 147	\$ 182	\$ 241	\$ 258	\$ 298
Q2	143	188	243	275	308
Q3	144	200	249	279	—
Q4	148	204	228	245	—

	Non-legal cash collections (3)				
	2009	2010	2011	2012	2013
Q1	\$ 118	\$ 154	\$ 204	\$ 216	\$ 244
Q2	116	160	205	225	255
Q3	119	170	212	230	—
Q4	123	174	194	200	—

	Non-legal/non-bankruptcy cash collections (4)				
	2009	2010	2011	2012	2013
Q1	\$ 90	\$ 106	\$ 125	\$ 125	\$ 133
Q2	87	100	116	120	130
Q3	87	97	115	122	—
Q4	84	98	103	105	—

- (1) Represents total cash collections less purchased bankruptcy cash collections from trustee-administered accounts. This metric includes cash collections from purchased bankruptcy accounts administered by the Core call center collection floor as well as cash collections generated by our internal staff of legal collectors. This calculation does not include hours paid to our internal staff of legal collectors or to employees processing the bankruptcy-required notifications to trustees.
- (2) Represents total cash collections (assigned and unassigned) divided by total hours paid (including holiday, vacation and sick time) to collectors (including those in training).
- (3) Represents total cash collections less external legal cash collections. This metric includes internal legal collections and all bankruptcy collections and excludes any hours associated with either of those functions.
- (4) Represents total cash collections less external legal cash collections and less purchased bankruptcy cash collections from trustee-administered accounts. This metric does not include any labor hours associated with the bankruptcy or legal (internal or external) functions but does include internally-driven cash collections from the internal legal channel.

Goodwill

Goodwill was \$107.0 million at June 30, 2013 and \$109.5 million at December 31, 2012. The decrease was entirely attributable to a foreign currency translation adjustment of \$2.5 million. Goodwill at June 30, 2013 consisted of amounts recorded in various acquisitions. One of those acquired subsidiaries has experienced a revenue and profitability decline and recent net losses, due largely to economic conditions. The subsidiary now reports organizationally to the President of Business and Government Services, who joined the Company in November 2012. Under his leadership, new business plans designed to increase sales and operating income are being developed, systems are being enhanced and integrated, manual processes are being automated, and operational managers have been replaced. Based on an analysis of these factors and financial projections, the estimated fair value of this reporting unit exceeded its carrying value at June 30, 2013. However, there is a risk of future goodwill impairment charges if the revenue declines and net losses were to continue. The amount of goodwill attributed to this reporting unit was \$6.4 million at June 30, 2013. All other intangible assets related to this reporting unit were fully amortized as of June 30, 2013.

Liquidity and Capital Resources

Historically, our primary sources of cash have been cash flows from operations, bank borrowings and equity offerings. Cash has been used for acquisitions of finance receivables, corporate acquisitions, repurchase of our common stock, payment of cash dividends, repayments of bank borrowings, operating expenses, purchases of property and equipment and working capital to support our growth.

As of June 30, 2013, cash and cash equivalents totaled \$43.5 million, compared to \$32.7 million at December 31, 2012. Total debt outstanding on the \$400 million revolving portion of our credit facility was \$216.0 million as of June 30, 2013, which represents availability of \$184.0 million (subject to the borrowing base and applicable debt covenants). In addition, at June 30, 2013 we had \$197.5 million outstanding on the floating rate term loan portion of our credit facility.

We have in place forward flow commitments for the purchase of defaulted consumer receivables over the next 12 months of approximately \$119.4 million as of June 30, 2013. Additionally we may enter into new or renewed flow commitments in the next twelve months and close on spot transactions in addition to the aforementioned flow agreements. We believe that funds generated from operations and from cash collections on finance receivables, together with existing cash and available borrowings under our credit agreement will be sufficient to finance our operations, planned capital expenditures, the aforementioned forward flow commitments, and additional, normal-course portfolio purchasing during the next twelve months. Business acquisitions or higher than normal levels of portfolio purchasing could require additional financing from other sources.

We entered into the \$600.0 million secured credit facility referred to above, on December 19, 2012. Refer to the “Borrowings” section below for additional information on this credit facility.

With the acquisition of a controlling interest in CCB, we have the right to call (purchase) the noncontrolling interest through February 2015. In addition, the noncontrolling interest has the right to put (require us to purchase) the remainder of the shares to us beginning in March 2012 and ending February 2018. From March 2012 to February 2015, the put option is subject to a minimum amount of trailing EBITDA. Effective as of January 31, 2013, we exercised our right to purchase half of the remaining noncontrolling interest for a purchase price of \$1.1 million. As of June 30, 2013, the total maximum amount we would have to pay for the remaining noncontrolling interest in CCB under any circumstances is \$11.4 million.

For domestic income tax purposes, we recognize revenue using the cost recovery method with respect to our debt purchasing business. The Internal Revenue Service (“IRS”) has audited and issued a Notice of Deficiency for the tax years ended December 31, 2007, 2006 and 2005. It has asserted that tax revenue recognition using the cost recovery method does not clearly reflect taxable income, and that unused line fees paid on credit facilities should be capitalized and amortized rather than taken as a current deduction. We have filed a petition in the United States Tax Court and believe we have sufficient support for the technical merits of our positions and that it is more-likely-than-not that they will ultimately be sustained; therefore, a reserve for uncertain tax positions is not required. If we are unsuccessful in the United States Tax Court, we can appeal to the federal Circuit Court of Appeals. If judicial appeals prove unsuccessful, we may ultimately be required to pay the related deferred taxes, and possibly interest and penalties, which may require additional financing from other sources. In accordance with the Internal Revenue Code, underpayments of federal tax accrue interest, compounded daily, at the applicable federal short term rate plus three percentage points. An additional two percentage points applies to large corporate underpayments of \$100,000 or more to periods after the applicable date as defined in the Internal Revenue Code. Deferred taxes related to this item were \$194.0 million at June 30, 2013.

Cash generated from operations is dependent upon our ability to collect on our finance receivables. Many factors, including the economy and our ability to hire and retain qualified collectors and managers, are essential to our ability to generate cash flows. Fluctuations in these factors that cause a negative impact on our business could have a material impact on our future cash flows.

Our operating activities provided cash of \$97.3 million and \$54.2 million for the six months ended June 30, 2013 and 2012, respectively. In these periods, cash from operations was generated primarily from net income earned through cash collections and fee income received for the period. The increase was due in part to an increase in net income to \$81.9 million for the six months ended June 30, 2013, from \$57.2 million for the six months ended June 30, 2012. The remaining increase was due to net changes in other accounts related to our operating activities.

Our investing activities used cash of \$165.5 million and \$87.4 million during the six months ended June 30, 2013 and 2012, respectively. Cash provided by investing activities is primarily driven by cash collections applied to principal on finance receivables. Cash used in investing activities is primarily driven by acquisitions of defaulted consumer receivables, purchases of property and equipment and business acquisitions. The majority of the increase was due to an increase in acquisitions of finance receivables, which increased from \$229.4 million for the six months ended June 30, 2012 to \$407.3 million for the six months ended June 30, 2013, partially offset by an increase in collections applied to principal on finance receivables from \$193.6 million for the six months ended June 30, 2012 to \$248.5 million for the six months ended June 30, 2013. In addition, cash of \$48.7 million was used on business acquisitions during the six months ended June 30, 2012 compared to \$0 in the six months ended June 30, 2013.

Our financing activities provided cash of \$79.2 million and \$50.3 million during the six months ended June 30, 2013 and 2012, respectively. Cash is primarily provided by draws on our line of credit. Cash used in financing activities is primarily driven by principal payments on our line of credit, principal payments on long-term debt and repurchases of our common stock. The change was due in large part to changes in the net borrowings on our credit facility. We had net borrowings on our credit facility of \$89.0 million during the six months ended June 30, 2013 compared to net borrowings of \$72.0 million during the six months ended June 30, 2012.

Cash paid for interest was \$5.6 million and \$5.3 million for the six months ended June 30, 2013 and 2012, respectively. Interest was paid on our line of credit and long-term debt. Cash paid for income taxes was \$52.8 million and \$44.5 million for the six months ended June 30, 2013 and 2012, respectively. The increase in the taxes paid for the six months ended June 30, 2013 as compared to the six months ended June 30, 2012, is primarily due to an increase in taxable income.

Borrowings

On December 19, 2012, we entered into a credit agreement with Bank of America, N.A., as administrative agent, and a syndicate of lenders named therein (the "Credit Agreement"). Under the terms of the Credit Agreement, the credit facility includes an aggregate principal amount available of \$600.0 million (subject to the borrowing base and applicable debt covenants) which consists of a \$200.0 million floating rate term loan that matures on December 19, 2017 and a \$400.0 million revolving credit facility that matures on December 19, 2017. The term and revolving loans accrue interest, at our option, at either the base rate or the Eurodollar rate (as defined in the Credit Agreement) for the applicable term plus 2.50% per annum in the case of the Eurodollar rate loans and 1.50% in the case of the base rate loans. The base rate is the highest of (a) the Federal Funds Rate (as defined in the Credit Agreement) plus 0.50%, (b) Bank of America's prime rate, and (c) the Eurodollar rate plus 1.00%. Interest is payable on base rate loans quarterly in arrears and on Eurodollar loans in arrears on the last day of each interest period or, if such interest period exceeds three months, every three months. Our revolving credit facility includes a \$20.0 million swingline loan sublimit, a \$20.0 million letter of credit sublimit and a \$20.0 million alternative currency equivalent sublimit. It also contains an accordion loan feature that allows us to request an increase of up to \$250.0 million in the amount available for borrowing under the revolving credit facility, whether from existing or new lenders, subject to terms of the Credit Agreement. No existing lender is obligated to increase its commitment. The Credit Agreement is secured by a first priority lien on substantially all of our assets. The Credit Agreement contains restrictive covenants and events of default including the following:

- borrowings may not exceed 30% of the ERC of all our eligible asset pools plus 75% of our eligible accounts receivable;
- the consolidated leverage ratio (as defined in the Credit Agreement) cannot exceed 2.0 to 1.0 as of the end of any fiscal quarter;
- consolidated tangible net worth (as defined in the Credit Agreement) must equal or exceed \$455,091,200 plus 50% of positive cumulative consolidated net income for each fiscal quarter beginning with the quarter ended December 31, 2012, plus 50% of the cumulative net proceeds of any equity offering;
- capital expenditures during any fiscal year cannot exceed \$30 million;
- cash dividends and distributions during any fiscal year cannot exceed \$20 million;
- stock repurchases during the term of the agreement cannot exceed \$250 million and cannot exceed \$100 million in a single fiscal year;
- permitted acquisitions (as defined in the Credit Agreement) during any fiscal year cannot exceed \$250 million;
- we must maintain positive consolidated income from operations (as defined in the Credit Agreement) during any fiscal quarter; and
- restrictions on changes in control.

The revolving credit facility also bears an unused line fee of 0.375% per annum, payable quarterly in arrears.

Our borrowings at June 30, 2013 consisted of \$195.0 million in 30-day Eurodollar rate loans and \$21.0 million in base rate loans with a weighted average interest rate of 2.89%. In addition, we had \$197.5 million outstanding on the term loan at June 30, 2013 with an annual interest rate of 2.70%.

We had \$413.5 million and \$327.0 million of borrowings outstanding on our credit facility as of June 30, 2013 and December 31, 2012, respectively.

We were in compliance with all covenants of our credit facilities as of June 30, 2013 and December 31, 2012.

Undistributed Earnings of Foreign Subsidiaries

We intend to use remaining accumulated and future undistributed earnings of foreign subsidiaries to expand operations outside the United States; therefore, such undistributed earnings of foreign subsidiaries are considered to be indefinitely reinvested outside the United States. Accordingly, no provision for U.S. federal and state income tax has been provided thereon. If management intentions change and eligible undistributed earnings of foreign subsidiaries are repatriated, taxes would be accrued and paid on such earnings.

Stockholders' Equity

Stockholders' equity was \$791.9 million at June 30, 2013 and \$708.4 million at December 31, 2012. The increase was primarily attributable to \$82.2 million in net income attributable to PRA during the first half of 2013.

Contractual Obligations

Our contractual obligations as of June 30, 2013 were as follows (amounts in thousands):

Contractual Obligations	Total	Payments due by period			
		Less than 1 year	1 - 3 years	3 - 5 years	More than 5 years
Operating Leases	\$ 26,944	\$ 6,068	\$ 10,955	\$ 6,432	\$ 3,489
Line of Credit ⁽¹⁾	250,862	6,890	14,413	229,559	—
Long-term Debt ⁽²⁾	223,344	13,263	41,441	168,640	—
Purchase Commitments ^{(3) (4)}	157,256	150,482	6,157	617	—
Employment Agreements	10,273	8,096	2,177	—	—
Total	\$ 668,679	\$ 184,799	\$ 75,143	\$ 405,248	\$ 3,489

(1) This amount includes principal, estimated interest and unused line fees due on the line of credit and assumes that the balance on the line of credit remains constant from the June 30, 2013 balance of \$216.0 million and the balance is paid in full at its respective maturity in December 2017.

(2) This amount also includes estimated interest on our long-term borrowings under our credit facility.

(3) This amount includes the maximum remaining amount to be purchased under forward flow contracts for the purchase of charged-off consumer debt in the amount of approximately \$119.4 million.

(4) This amount includes the maximum remaining purchase price of \$11.4 million which is the maximum amount that could be paid to acquire the noncontrolling interest of CCB.

Off-Balance Sheet Arrangements

We do not have any off balance sheet arrangements as defined by Regulation S-K 303(a)(4) promulgated under the Securities Exchange Act of 1934, as amended (the "Exchange Act").

Recent Accounting Pronouncements

In July 2012, the FASB issued ASU 2012-02, "Intangibles-Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment" to amend the accounting guidance on intangible asset impairment testing. The ASU permits entities to perform an optional qualitative assessment for determining whether it is more likely than not that an indefinite-lived intangible asset is impaired. The guidance is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. Early adoption is permitted. We adopted ASU 2012-02 in the first quarter of 2013 which had no material impact on our consolidated financial statements.

In February 2013, the FASB issued ASU 2013-02, "Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income," which requires entities to provide information about the amounts reclassified out of accumulated other comprehensive income, by component. In addition, entities are required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income, entities are required to cross-reference to other disclosures required under U.S. GAAP that provide additional detail on these amounts. We adopted ASU 2013-02 in the first quarter of 2013 which had no material impact on our consolidated financial statements.

In March 2013, the FASB issued ASU 2013-05, "Foreign Currency Matters (Topic 830): Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity," which defines the treatment of the release of cumulative translation adjustments upon derecognition of certain subsidiaries or groups of assets within a foreign entity or of an investment in a foreign entity. This ASU is effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. Early adoption is permitted and prior periods should not be adjusted. We do not expect the adoption of this guidance to have a material impact on our consolidated financial statements.

Critical Accounting Policies

Our consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles. Our significant accounting policies are discussed in Note 1 of the Notes to the Consolidated Financial Statements. Our significant accounting policies are fundamental to understanding our results of operations and financial condition because they require that we use estimates, assumptions and judgments that affect the reported amounts of revenues, expenses, assets, and liabilities.

Three of these policies are considered to be critical because they are important to the portrayal of our financial condition and results, and because they require management to make judgments and estimates that are difficult, subjective, and complex regarding matters that are inherently uncertain.

We base our estimates on historical experience, current trends and on various other assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. If these estimates differ significantly from actual results, the impact on our consolidated financial statements may be material.

Management has reviewed these critical accounting policies with the Company's Audit Committee.

Revenue Recognition

Finance Receivables:

We account for our investment in finance receivables under the guidance of ASC 310-30. We acquire portfolios of accounts that have experienced deterioration of credit quality between origination and our acquisition of the accounts. The amount paid for a portfolio reflects our determination that it is probable we will be unable to collect all amounts due according to an account's contractual terms. At acquisition, we review the accounts to determine whether there is evidence of deterioration of credit quality since origination, and if it is probable that we will be unable to collect all amounts due according to the loan's contractual terms. If both conditions exist, we then determine whether each such account is to be accounted for individually or whether such accounts will be assembled into pools based on common risk characteristics. We consider expected prepayments and estimate the amount and timing of undiscounted expected principal, interest and other cash flows (expected at acquisition) for each acquired portfolio based on our proprietary models, and then subsequently aggregate portfolios of accounts into pools. We determine the excess of the pool's scheduled contractual principal and contractual interest payments over all cash flows expected at acquisition as an amount that should not be accreted (nonaccretable difference). The remaining amount, representing the excess of the pool's cash flows expected to be collected over the amount paid, is accreted into income recognized on finance receivables over the remaining estimated life of the pool (accretable yield). ASC 310-30 requires that the excess of the contractual cash flows over expected cash flows, based on our estimates derived from our proprietary collection models, not be recognized as an adjustment of revenue or expense or on the balance sheet.

Under ASC 310-30 static pools of accounts may be established. These pools are aggregated based on certain common risk criteria. Each static pool is recorded at cost, which may include certain direct costs of acquisition paid to third parties, and is accounted for as a single unit for the recognition of income, payments applied to principal and loss provision. Once a static pool is established for a calendar quarter, individual receivable accounts are not added to the pool (unless replaced by the seller) or removed from the pool (unless sold or returned to the seller). ASC 310-30, utilizing the interest method, initially freezes the yield, estimated when the accounts are purchased, as the basis for subsequent impairment testing. The yield is estimated and periodically recalculated based on the timing and amount of anticipated cash flows using our proprietary collection models. Income on finance receivables is accrued quarterly based on each static pool's effective yield. Significant increases in expected future cash flows may be recognized prospectively, through an upward adjustment of the yield, over a pool's remaining life. Any increase to the yield then becomes the new benchmark for impairment testing. Under ASC 310-30, rather than lowering the estimated yield if the collection estimates are not received or projected to be received, the carrying value of a pool would be written down to maintain the then current yield and is shown as a reduction in revenue in the consolidated income statements with a corresponding valuation allowance offsetting finance receivables, net, on the consolidated balance sheets. Cash flows greater than the interest accrual will reduce the carrying value of the static pool. This reduction in carrying value is defined as payments applied to principal (also referred to as principal amortization). Likewise, cash flows that are less than the interest accrual will accrete the carrying balance. Generally, we do not record accretion in the first six to twelve months of the estimated life of the pool; accordingly, we utilize either the cost recovery method or cash method when necessary to prevent accretion as permitted by ASC 310-30. Under the cash method, revenue is recognized as it would be under the interest method up to the amount of cash collections. Under the cost recovery method, no revenue is recognized until we have fully collected the cost of the pool, or until such time that we consider the collections to be probable and estimable and begin to recognize income based on the interest method as described above. We also use the cost recovery method when collections on a particular pool of accounts cannot be reasonably estimated.

A pool can become fully amortized (zero carrying balance on the balance sheet) while still generating cash collections. In this case, all cash collections are recognized as revenue when received.

We establish valuation allowances, if necessary, for acquired accounts subject to ASC 310-10. Valuation allowances are established only subsequent to acquisition of the accounts.

We implement the accounting for income recognized on finance receivables under ASC 310-30 as follows. We create each accounting pool using our projections of estimated cash flows and expected economic life. We then compute the effective yield that fully amortizes the pool over a reasonable expectation of its economic life based on the current projections of estimated cash flows. As actual cash flow results are recorded, we balance those results to the data contained in our proprietary models to ensure accuracy, then review each pool watching for trends, actual performance versus projections and curve shape (a graphical depiction of the timing of cash flows), regularly re-forecasting future cash flows utilizing our statistical models. The review process is primarily performed by our finance staff; however, our operational and statistical staff is also involved, providing updated statistical input and cash projections to the finance staff. If there is a significant increase in expected cash flows, we will recognize the effect of the increase prospectively through an increase in yield. If a valuation allowance had been previously recognized for that pool, the allowance is reversed before recording any prospective yield adjustments. If the over performance is considered more of an acceleration of cash flows (a timing difference), we will: a) adjust estimated future cash flows downward which effectively extends the amortization period to fall within a reasonable expectation of the pool's economic life, b) adjust future cash flow projections as noted previously coupled with an increase in yield in order for the amortization period to fall within a reasonable expectation of the pool's economic life, or c) take no action at all if the amortization period falls within a reasonable expectation of the pool's expected economic life. To the extent there is underperformance, we will record an allowance if the underperformance is significant and will also consider revising estimated future cash flows based on current period information, or take no action if the pool's amortization period is reasonable and falls within the currently projected economic life.

Fee Income:

We utilize the provisions of ASC Topic 605-45, "Principal Agent Considerations" ("ASC 605-45") to account for fee income revenue. ASC 605-45 requires an analysis to be completed to determine if certain revenues should be reported gross or reported net of their related operating expense. This analysis includes an assessment of who retains inventory/credit risk, controls vendor selection, establishes pricing and remains the primary obligor on the transaction. Each of these factors was considered to determine the correct method of recognizing revenue.

Our skip tracing subsidiary utilizes gross reporting under ASC 605-45. We generate revenue by working an account and successfully locating a customer for our client. A fee is charged for these services. In addition, we incur expenses when we hire a third-party to effectuate repossession. We have determined the fees to be gross revenue based on the criteria in ASC 605-45 and they are recorded as such in the line item "Fee income," because we are primarily liable to the third party for the repossession costs. There is a corresponding expense in "Agent fees" for the 3rd party repossession expenses. We also incur fees to release liens on the repossessed collateral. Like the repossession expenses, these lien-releases are charged to expense and recorded in the line item "Agent fees."

Our government processing and collection business' primary source of income is derived from servicing taxing authorities in several different ways: processing all of their tax payments and tax forms, collecting delinquent taxes, identifying taxes that are not being paid and auditing tax payments. The processing and collection pieces are standard commission based billings or fee-for-service transactions. When an audit is conducted, there are two components. The first component is a billing for the hours incurred to conduct the audit. This billing is marked up from the actual costs incurred. The gross billing is a component of the line item "Fee income" and the expense is included in the line item "Compensation and employee services." The second component is expenses incurred while conducting the audit. Most jurisdictions will reimburse us for direct expenses incurred for the audit including such items as travel and meals. The billed amounts are included in the line item "Fee income" and the expense component is included in its appropriate expense category, generally, "Other operating expenses."

Our claims administration and payment processing business utilizes net reporting under ASC 605-45. We generate revenue by filing claims with the class action claims administrator on behalf of our clients and receiving the related settlement payment. Under SEC Staff Accounting Bulletin 104, we have determined that our fee is not earned until we have received the settlement funds. When a payment is received from the claims administrator for settlement of a lawsuit, the fee is recorded on a net basis as revenue and included in the line item "Fee income." The balance of the received amounts is recorded as a liability and included in the line item "Accounts payable."

Our United Kingdom subsidiary generates revenue from both purchased finance receivables which is accounted for as described above and finance receivables serviced on a contingent fee basis. These serviced portfolios are owned by our clients and placed under a contingent fee commission arrangement. Our subsidiary is paid to collect funds from the client's debtors and

earns a commission generally expressed as a percentage of the gross collections amount. The "Fee income" line of our income statement reflects the contingent fee amount earned, and not the gross collection amount.

Valuation of Acquired Intangibles and Goodwill

In accordance with ASC Topic 350, "Intangibles-Goodwill and Other" ("ASC 350"), we amortize intangible assets over their estimated useful lives. Goodwill, pursuant to ASC 350, is not amortized but rather is reviewed for impairment annually or earlier if indicators of potential impairment exist. The review of goodwill for potential impairment is highly subjective and requires that: (1) goodwill is allocated to various reporting units of our business to which it relates; and (2) we estimate the fair value of those reporting units to which the goodwill relates and then determine the book value of those reporting units. During the review, we also consider qualitative factors that may have an impact on the final assessment regarding potential impairment. If the estimated fair value of reporting units with allocated goodwill is determined to be less than their book value, we are required to estimate the fair value of all identifiable assets and liabilities of those reporting units in a manner similar to a purchase price allocation for an acquired business. This requires independent valuation of certain unrecognized assets. Once this process is complete, the amount of goodwill impairment, if any, can be determined.

Income Taxes

We follow the guidance of FASB ASC Topic 740 "Income Taxes" ("ASC 740") as it relates to the provision for income taxes and uncertainty in income taxes. Accordingly, we record a tax provision for the anticipated tax consequences of the reported results of operations. In accordance with ASC 740, the provision for income taxes is computed using the asset and liability method, under which deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax basis of assets and liabilities, and for operating losses and tax credit carry-forwards. Deferred tax assets and liabilities are measured using the currently enacted tax rates that apply to taxable income in effect for the years in which those tax assets are expected to be realized or settled. The evaluation of a tax position in accordance with the guidance is a two-step process. The first step is recognition: the enterprise determines whether it is more-likely-than-not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. In evaluating whether a tax position has met the more-likely-than-not recognition threshold, the enterprise should presume that the position will be examined by the appropriate taxing authority that would have full knowledge of all relevant information. The second step is measurement: a tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. The tax position is measured as the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. Tax positions that previously failed to meet the more-likely-than-not recognition threshold should be recognized in the first subsequent financial reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not recognition threshold should be derecognized in the first subsequent financial reporting period in which that threshold is no longer met. We record interest and penalties related to unrecognized tax benefits as a component of income tax expense.

For domestic income tax purposes, we recognize revenue using the cost recovery method with respect to our debt purchasing business. We believe cost recovery to be an appropriate method for companies in the bad debt purchasing industry. Under the cost recovery method, collections on finance receivables are applied first to principal to reduce the finance receivables to zero before any income is recognized.

In the event that all or part of the deferred tax assets are determined not to be realizable in the future, a valuation allowance would be established and charged to earnings in the period such determination is made. If we subsequently realize deferred tax assets that were previously determined to be unrealizable, the respective valuation allowance would be reversed, resulting in a positive adjustment to earnings or a decrease in goodwill in the period such determination is made. The calculation of tax liabilities involves significant judgment in estimating the impact of uncertainties in the application of complex tax laws. Resolution of these uncertainties in a manner inconsistent with our expectations could have a material impact on our results of operations and financial position.

Item 3. Quantitative and Qualitative Disclosure About Market Risk

Interest Rate Risk

We are subject to interest rate risk from outstanding borrowings on our variable rate credit facility. We assess this interest rate risk by estimating the increase in interest expense that would occur due to an increase in short-term interest rates. The average borrowings on our variable rate credit facility were \$398.7 million and \$245.0 million for the three months ended June 30, 2013 and 2012, respectively. Assuming a 200 basis point increase in interest rates, for example, interest expense would have increased by \$2.0 million and \$1.2 million for the three months ended June 30, 2013 and 2012, respectively, resulting in a decrease in income before income taxes of 2.8% and 2.3%, respectively. As of June 30, 2013 and December 31, 2012, we had \$413.5 million and \$327.0 million, respectively, of variable rate debt outstanding on our credit facility. We did not have any other variable rate debt outstanding as of June 30, 2013. We had no interest rate hedging programs in place for the three or six months ended June 30, 2013 and 2012. Significant increases in future interest rates on our variable rate credit facility could lead to a material decrease in future earnings assuming all other factors remained constant.

Currency Exchange Risk

We are subject to currency exchange risk from our UK subsidiary. It conducts business in the Pound Sterling, but we report our financial results in U.S. dollars. Significant fluctuations in exchange rates between the U.S. dollar and the Pound Sterling may adversely affect our net income. We may or may not implement a hedging program related to currency exchange rate fluctuation. In the three months ended June 30, 2013 and 2012, MHH revenues were 1.4% and 3.1% of consolidated revenues, respectively. We had no currency exchange risk hedging programs in place for the three or six months ended June 30, 2013 or 2012.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. We maintain disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial and Administrative Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Also, controls may become inadequate because of changes in conditions and the degree of compliance with the policies or procedures may deteriorate. We conducted an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial and Administrative Officer, of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based on this evaluation, the Chief Executive Officer and Chief Financial and Administrative Officer have concluded that, as of June 30, 2013, our disclosure controls and procedures were effective.

Changes in Internal Control Over Financial Reporting. There was no change in our internal control over financial reporting that occurred during the quarter ended June 30, 2013 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

We are from time to time subject to routine legal claims and proceedings, most of which are incidental to the ordinary course of our business. We initiate lawsuits against customers and are occasionally countersued by them in such actions. Also, customers, either individually, as members of a class action, or through a governmental entity on behalf of customers, may initiate litigation against us in which they allege that we have violated a state or federal law in the process of collecting on an account. From time to time, other types of lawsuits are brought against us.

No legal proceedings were commenced during the period covered by this report that the Company believes could reasonably be expected to have a material adverse effect on its financial condition, results of operations and cash flows. Refer to Note 11 "Commitments and Contingencies" of our Consolidated Financial Statements for material developments with respect to legal proceedings previously disclosed with respect to prior periods.

Item 1A. Risk Factors

An investment in our common stock involves a high degree of risk. You should carefully consider the specific risk factors listed under Part I, Item 1A of our 2012 Annual Report on Form 10-K filed on February 28, 2013, together with all other information included or incorporated in our reports filed with the SEC. Any such risks may materialize, and additional risks not known to us, or that we now deem immaterial, may arise. In such event, our business, financial condition, results of operations or prospects could be materially adversely affected. If that occurs, the market price of our common stock could fall, and you could lose all or part of your investment.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds*Share Repurchase Program*

On February 2, 2012, the Company's board of directors authorized a share repurchase program to purchase up to \$100,000,000 of the Company's outstanding shares of common stock on the open market. The following table provides information about the Company's common stock purchased during the second quarter of 2013.

Month Ended	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share ⁽¹⁾	Maximum Remaining Purchase Price for Share Repurchases Under the Plan
April 30, 2013	165,612	\$ 39.82	\$ 68,758,503
Total	165,612	\$ 39.82	\$ 68,758,503

(1) Adjusted to reflect the three-for-one stock split by means of a stock dividend which was declared on June 10, 2013 and paid August 1, 2013 to holders of record as of July 1, 2013.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None.
