(in thousands of Canadian dollars, unless otherwise noted)

Classification of Liabilities as Current or Non-current (Amendments to IAS 1)

In January 2020, the IASB issued amendments to IAS 1 – Presentation of Financial Statements, to clarify that the classification of liabilities as current or non-current should be based on rights that are in existence at the end of the reporting period and specifies that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability. The amendments are effective for annual reporting periods beginning on or after January 1, 2023 and are to be applied retrospectively.

Disclosure of Accounting Policies (Amendments to IAS 1)

In February 2021, the IASB issued amendments to IAS 1 – Presentation of Financial Statements, requiring an entity to disclose its material accounting policies, rather than its significant accounting policies. Additional amendments were made to explain how an entity can identify a material accounting policy. The amendments are effective for annual reporting periods beginning on or after January 1, 2023.

Definition of Accounting Estimates (Amendments to IAS 8)

In February 2021, the IASB issued amendments to IAS 8 – Accounting Policies, Changes to Accounting Estimates and Errors, to replace the definition of accounting estimates and help entities distinguish changes in accounting estimates from changes in accounting policies. The amendments are effective for annual reporting periods beginning on or after January 1, 2023.

Deferred Tax Related to Assets and Liabilities Arising from a Single Transaction (Amendments to IAS 12)

In May 2021, the IASB issued amendments to IAS 12 – Income Taxes, to clarify how companies should account for deferred tax on certain transactions that on initial recognition give rise to equal taxable and deductible temporary differences, such as leases and decommissioning obligations. The amendments are effective for annual reporting periods beginning on or after January 1, 2023 and are to be applied retrospectively.

4 Prepaid expenses and deposits

On February 1, 2018, the Canada Revenue Agency (“**CRA**”) issued a notice of proposed adjustments for the 2014 taxation year, which also results in consequential income adjustments for the 2015 and 2016 taxation years. The proposed adjustments relate to restructuring transactions in the Company’s pre-initial public offering (“**IPO**”) structure and certain related transactions.

In June 2018, CRA issued Notices of Reassessments related to certain of these items with an exposure of \$3,480 which includes interest. On September 5, 2018, the Company filed Notices of Objection with CRA. Subsequently, the Company received an acknowledgement of receipt from CRA to the Notices of Objection. The Company is currently awaiting a response to these Notices.

The Company was required to pay a minimum of 50% of the amount issued in the Notices of Reassessment within 30 days of the date of these Notices. Accordingly, payments of \$2,988 were made and included in prepaid expenses and deposits on the Statement of Financial Position.

Sleep Country Canada Holdings Inc.

Notes to Condensed Interim Consolidated Financial Statements

(Unaudited)

June 30, 2022

(in thousands of Canadian dollars, unless otherwise noted)

The Company expects to receive a Notice of Reassessment under Part III Tax, pursuant to subsection 184(2) of the Income Tax Act (Canada) on the basis that it paid an excess capital dividend on July 15, 2015. The maximum exposure, including tax, penalty and interest, in this matter is approximately \$5,818. In the event the Notice of Reassessment under Part III Tax is received, the Company, with the concurrence of Birch Hill Equity Partners Management Inc. ("**Birch Hill**") and its co-investors, has the ability to file an election under subsection 184(3) to treat the excess amount as a taxable dividend, which is expected to resolve this exposure.

Pursuant to the indemnification provisions of the pre-IPO share purchase agreement dated July 10, 2015, the Company has a contractual arrangement for all of the above matters with Birch Hill and its co-investors, which include some current members of the Company's Board and the Company's management. The Company believes it will be able to sustain its tax positions, and consequently no reserve has been made.

Stock options granted prior to 2020 typically vest on the grant date's fourth anniversary, and may have a term of up to 10 years. Stock options granted in 2020 onwards will vest in equal installments over a period of three years from the grant date and may have a term of up to 10 years.

The stock options plan allows for the cashless exercise of options at the Board's discretion, if the common shares issuable upon the exercise of the options are to be immediately sold. This amount may, at the discretion of the Board, be settled in cash, by the issuance of common shares from treasury or in common shares acquired on the market. b) PSU plan

A PSU represents the right to receive a common share settled by the issuance of treasury shares or purchased on the open market or the cash equivalent at the market value of a share at the vesting date at the discretion of the Board. The Company has no intention to settle in cash. PSUs generally vest 100% on the third anniversary of the grant date.

The number of units that will vest is calculated based on a performance adjustment factor of between 0.0 and 2.0 which is determined based on the Company's revenue (weighted at 25%) and basic EPS (weighted at 75%) performance relative to the Board established targets that have been set for the three-year performance period between the grant date and the vesting date of the PSUs.

For PSUs granted prior to 2020, the number of units that will vest is calculated based on a performance adjustment factor of between 0.5 and 1.5 which is determined based on the Company's performance relative to the Board established target on profitability that has been set for the three-year performance period between the grant date and the vesting date of the PSUs.

11 Financial instruments

Fair value of financial instruments

The different levels used to determine fair values have been defined as follows:

- Level 1 – inputs use quoted prices (unadjusted) in active markets for identical financial assets or financial liabilities that the Company has the ability to access.
- Level 2 – inputs other than quoted prices included in Level 1 that are observable for the financial asset or financial liability, either directly or indirectly. Level 2 inputs include quoted prices for similar financial assets and financial liabilities in active markets, and inputs other than quoted prices that are observable for the financial liabilities.
- Level 3 – inputs are unobservable inputs for the financial asset or financial liability and include situations where there is little, if any, market activity for the financial asset or financial liabilities.

The following describes the fair value determinations of financial instruments:

- The carrying values of cash, trade and other receivables, trade and other payables, customer deposits and the share repurchase commitment under ASPP approximate their fair values due to the relatively short periods to maturity of these financial instruments.
- The carrying value of the senior secured credit facility approximates its fair value as the terms and conditions of the borrowing arrangements are comparable to market terms and conditions as at June 30, 2022 and December 31, 2021.

(in thousands of Canadian dollars, unless otherwise noted)

- The interest rate swap obtained effective April 1, 2021 is recorded at fair value based on observable quoted market prices for identical financial instruments in active markets as at June 30, 2022 and December 31, 2021. The interest rate swap is included in trade and other receivables in the condensed interim consolidated statements of financial position.
- The redemption liabilities related to the acquisition of Hush were initially recognized at fair value on acquisition date and subsequently measured at amortized cost. The inputs to the measurement of the fair value of the redemption liabilities related to acquisitions are Level 3 inputs. The fair value measurements were made using a discounted cash flow model; significant model inputs were expected future pre-tax earnings over the measurement period (determined with reference to the specific acquired business) and a pre-tax discount rate of 14%. The discount rate is attributable to the level of risk related to economic growth factors combined with the length of the contingent payment periods; and the dispersion was driven by unique characteristics of the businesses acquired and the respective terms for these future payments. A 1% increase in the weighted average discount rate would decrease the fair value of redemption liabilities by \$353.
