

# VistraZero Moss Landing Energy Storage Facility

## HOW IT WORKS

**Renewable Solar  
and Wind Energy**

### ENERGY IN

Excess green energy comes in and charges utility-scale batteries

**Moss Landing  
Energy Storage Facility**

Batteries store excess renewable energy until it is needed

### ENERGY OUT

Batteries release the stored renewable energy when demand is highest, increasing grid reliability and maximizing the use of zero-carbon energy

**About 300,000  
Homes Powered**
