*Adjusted EBITDA is a non-GAAP measure that management uses to evaluate the performance of the company. Adjusted EBITDA, as we define it, is operating income from continuing operations adjusted for depreciation, depletion, amortization, basis of real estate sold, unallocated pension service costs and special items. Adjusted EBITDA excludes results from joint ventures. Our definition of Adjusted EBITDA may be different from similarly titled measures reported by other companies. Adjusted EBITDA should not be considered in isolation from and is not intended to represent an alternative to our GAAP results.

⁽²⁾ During Q1 2017, we adopted ASU 2017-07. This ASU requires us to show components of pension and other post retirement benefit costs (interest, expected return on plan assets, amortization of actuarial gains or losses, amortization of prior service credits or costs) on the Consolidated Statement of Operations as a line item outside of "Operating income." We reclassified these components for all periods presented.
