Mr. Justin Tang, the Founder, Chief Executive Officer and Chairman of the Company, commented, “We closed out the year with a solid quarter of financial and operational results. We remain committed to providing the most user-friendly and convenient financial and business services to borrowers and made significant progress in doing so during the quarter while ensuring we remain fully compliant with the rapidly changing regulatory environment.”

“We rapidly made necessary adjustments to our operations and loan product portfolio during the quarter to comply with recent regulations governing the maximum interest rate lenders can charge. As a result of the new regulations and adjustments made to our loan product portfolio, total loans facilitated declined on a sequential basis during the quarter.”

“Yaoqianhua and Xiaoying Online Mall however maintained rapid growth momentum as consumers increasingly turn to online platforms for consumption. This trend has accelerated significantly since the Coronavirus Disease (the “COVID-19”) outbreak at the beginning of 2020 and we are well-positioned to capitalize on it. The GMV of Xiaoying Online Mall rose to RMB160.9 million in the fourth quarter of 2019, representing an increase of 107.9% from RMB77.4 million in the third quarter of 2019.”

“Transaction volumes for Yaoqianhua, our revolving loan product previously known as Xiaoying Wallet, jumped significantly to RMB2,204 million this quarter from RMB1,405 million in the last quarter while its outstanding loan balance increased to RMB1,503 million as of December 31, 2019 from RMB949 million as of September 30, 2019. Yaoqianhua now has an approved cumulative credit line of RMB6 billion and currently has a credit utilization rate of around 25.6% as of December 31, 2019.”

“Institutional funding accounted for 50.2% of the loans facilitated through our platform in the fourth quarter, an increase from 35.7% in the previous quarter. This trend is continuing with the proportion of funding from institutions increasing to 82.9% in January 2020. We expect that all the funding for new loans will come from institutional partners or our own capital this year. As of December 31, 2019, the credit line provided by our institutional partners expanded to RMB46.7 billion from RMB38.4 billion as of September 30, 2019, which I believe reflects their trust in the quality of the underlying assets and the strength of our risk management systems.”

“Since the outbreak of COVID-19, we have been tightening our risk management policies by adopting stricter requirements to evaluate borrowers and have reduced credit lines in addition to reinforcing our risk models. Over the course of last year, we have focused on strengthening our risk control capabilities and adopted even stricter control and evaluation of borrowers at the beginning of the loan process which is critical to reducing loan defaults at a later state. The measures we enacted in response to the COVID-19 outbreak have been already firmly rooted into our processes for a while now and have been strengthened during these trying times.”

“Yaoqianhua and Xiaoying Online Mall have maintained a solid growth since the COVID-19 outbreak as consumers were forced to consume online under government mandated quarantine. The number of new borrowers and repeat borrowers of Xiaoying Credit Loans declined in both January and February.”

“With the macroeconomic environment remaining highly uncertain as the outbreak of COVID-19 spreads overseas, our business will be adversely impacted during the first quarter of 2020. We expect total loan facilitation amount to decline on a sequential basis. With a clouded outlook for next quarter, we are turning our focus to acquiring more high-quality borrowers with better credit profile during this time.”

“In conclusion, we are confident that our growth strategy has laid a solid foundation to adapt to changing times, while we transition from a pure financial service provider to a more comprehensive business service provider. We are ideally positioned to continue benefiting from the enormous growth opportunities in China’s personal finance industry. We are committed to providing the most user-

friendly, convenient and comprehensive financial and business services and the best loan services to our customers.”

Mr. Simon Cheng, President of the Company, added, “We continued to ramp up investment in our technology-driven risk infrastructure and customer acquisition as we believe this is the foundation of our business growth and a major factor to attract institutional investor interest in the underlying assets on our platform. Based on our robust risk management capability, we will weather the storm of the COVID-19 and emerge stronger than before.”

“Yaoqianhua continues to generate strong growth momentum. The number of transactions on Yaoqianhua continues to grow rapidly, increasing significantly to 4.9 million during this quarter from 0.2 million during the same period last year. As of December 31, 2019, the number of active users of Yaoqianhua was around 408,000, representing an increase from around 330,000 as of September 30, 2019. This business is rapidly contributing to a larger percentage of revenue given its longer customer life time and the multiple opportunities it offers to cross sell.”

“We continue to actively negotiating with our funding partners including, among others, CITIC Trust, Kunlun Bank, Blue Ocean Bank, Huishang Bank, and Yantai Bank, to further lower our funding costs. We are making solid progress in driving institutional funding for all new loan products on our platform in 2020. There is sufficient institutional credit line. We are confident to achieve 100% institutional funding in 2020.”

Mr. Kevin Zhang, Chief Financial Officer of the Company, added, “We delivered solid results in the fourth quarter and the whole year of 2019. Total loan facilitation amount was RMB39,441 million in 2019, an increase of 6.8% year-over-year. The total loan facilitation amount in the fourth quarter of 2019 was RMB8,890 million, at the higher end of our previously announced guidance range.”

“We are steadily executing our strategies to capitalize on the enormous potential of China’s consumption upgrade with highly-customized personal finance solutions that will likely be in demand once the recovery from the pandemic begins. Our revenue and non-GAAP adjusted net income in the fourth quarter of 2019 decreased both quarter-over-quarter and year-over-year. Even though the total number of loans facilitated of Xiaoying Term Loan in the fourth quarter decreased year-over-year, the average loan amount per transaction was RMB14,611, an increase of 63.6% from the same period of 2018 and an increase of 13.7% sequentially. The average consumption amount per user of Xiaoying Revolving Loan also increased 45.9% in the fourth quarter to RMB8,268 compared to RMB5,668 in the third quarter of 2019.”

“We are also glad to see total cumulative registered users on the platform reach 38.8 million as of December 31, 2019, demonstrating the continued value we are able to offer borrowers. The number of active borrowers during the quarter decreased 29% because certain existing borrowers are not qualified to borrow money on our platform anymore after we implemented a more stringent standard to evaluate borrowers in October 2019. The delinquency rates for all outstanding loans that are past due for 31-90 days and 91–180 days as of December 31, 2019 were 4.05% and 5.11% respectively, compared with 2.95% and 4.50%, respectively as of September 30, 2019. The cumulative number of active individual investors increased to 499,855 as of December 31, 2019.”

“The percentage of loan products we facilitated that were covered by ZhongAn Insurance decreased further to 73.0% during the quarter as we continue to reduce our insurance coverage rate to lower our customers' borrowing costs.”

“It is our mission to create more value for our customers and shareholders as we recover from the highs and lows of 2019 and navigate the challenging market in 2020. We remain in full compliance with current regulations, are confident in our ability to stand out amongst our peers and take advantage of market consolidation, and will reduce costs further by improving operational efficiency.”

Use of Non-GAAP Financial Measures Statement

In evaluating our business, we consider and use non-GAAP measures as supplemental measures to review and assess our operating performance. We present the non-GAAP financial measures because they are used by our management to evaluate our operating performance and formulate business plans. We also believe that the use of the non-GAAP financial measures facilitates investors' assessment of our operating performance.

We use in this press release the following non-GAAP financial measures: (i) adjusted net income, (ii) adjusted net income attributable to X Financial shareholders, (iii) adjusted net income per basic ADS, and (iv) adjusted net income per diluted ADS, each of which excludes share-based compensation expense. These non-GAAP financial measures are not defined under U.S. GAAP and are not presented in accordance with U.S. GAAP. These non-GAAP financial measures have limitations as analytical tools, and when assessing our operating performance, investors should not consider them in isolation, or as a substitute for the financial information prepared and presented in accordance with U.S. GAAP.

We mitigate these limitations by reconciling the non-GAAP financial measures to the most directly comparable U.S. GAAP financial measures, which should be considered when evaluating our performance. We encourage you to review our financial information in its entirety and not rely on a single financial measure.

For more information on these non-GAAP financial measures, please see the table captioned "Reconciliations of GAAP and Non-GAAP results" set forth at the end of this press release.
