Mr. Justin Tang, the Founder, Chief Executive Officer and Chairman of the Company, commented, “We are very pleased to conclude 2021 with another solid quarter of financial results, delivering profitability for the full year. Both our top and bottom lines for the fourth quarter significantly improved over the same period of 2020. Despite a challenging macro economy and regulatory environment in 2021, we have successfully turned our business back on track and maintained steady growth momentum compared with 2020. The total loan amount facilitated and provided in 2021 increased by 75% year-over-year to RMB52 billion from RMB30 billion. With a very focused product strategy and effective cost control initiatives, we turned profitable in 2021 and our bottom line outperformed the full year of 2019, the year before the COVID-19 outbreak.”

“In the fourth quarter of 2021, we invested RMB315 million and become an indirect minority shareholder of Newup Bank of Liaoning, a PRC company and non-state-owned bank (“Newup Bank”). We are exploring opportunities to cooperate with Newup Bank to better serve Small-Medium Companies (“SMEs”) and we are confident that, based on our advantages in technology and risk management capabilities, the co-operation with Newup Bank could bring more possibilities to our business to jointly empower and support the development of the economy in China.”

“Heading into 2022, we expect regulatory uncertainties to subside with clearer guidelines from authorities. The Chinese government has affirmed the value of Fintech industry to address people’s inclusive financial needs and support the development of SMEs. We remain cautiously optimistic about our business outlook while being prepared for any macro uncertainties that may emerge in 2022.”

“In order to pass on our confidence to the market and increase shareholders value, our board has been timely evaluating, based on current market environment, regulatory policy and condition of business operation, multiple ways of returning profits to our shareholders, including share repurchase as well as cash dividend distribution. Recently, our board approved a US\$15 million share repurchase plan, which reflects our confidence in the Company’s fundamentals, strategy and sustainable growth. We are looking forward to an increase of shareholder value in the future.”

Mr. Kent Li, President of the Company, added, “During the fourth quarter, our total loan amount facilitated and provided reached RMB13 billion, an increase of 51% year-over-year. As mentioned in our previous guidance, we saw a moderate sequential decline in the loan volume in the fourth quarter, which was mainly attributed to the year-end outstanding loan balance requirements of our institutional funding partners. In the first quarter of 2022, the level of available funds has resumed its normal pattern. Since 2020, we have shifted our product focus to Xiaoying Card Loan, which contributed 100% to the total loan amount facilitated and provided in 2021. With this focused and proven product strategy, we are confident in our ability to sustain steady growth in the loan facilitation business in 2022.”

“Regarding asset quality, the delinquency rate for all outstanding loans that are past due for 31-60 days as of December 31, 2021 was 1.48%, higher than 0.96% as of September 30, 2021 and 0.79% as of December 31, 2020. This fluctuation is mainly attributed to the liquidity tightening in the fourth quarter of 2021. Since February 2022, we have seen our asset quality gradually improving as a result of ample liquidity in financial markets and our stricter risk management measures.”

“In 2021, we officially commenced operation of our microcredit business in the third quarter after we received regulatory approval for our microcredit license, and during the fourth quarter, we further increased its registered capital to RMB1 billion in compliance with the regulations. We are on track with our microcredit business and look forward to creating more value for our shareholders.”

Mr. Frank Fuya Zheng, Chief Financial Officer of the Company, added, “We are pleased to deliver solid financial results for both the fourth quarter and the full year of 2021. Total net revenue increased by 15% year-over-year to RMB823 million in the fourth quarter. We saw a significant improvement in our bottom line. In the fourth quarter, net income improved to RMB146 million from a loss of RMB656 million in the same period of 2020, and Non-GAAP adjusted net income improved to RMB183 million from a loss of RMB631 million in the same period of 2020. For the full year 2021, total net revenue increased by 65% to RMB3,626 million. Thanks to our relentless efforts on cost management, total operating costs and expenses decreased by 36% to RMB2,315 million. Net income improved to RMB825 million in 2021 from a loss of RMB1,309 million, and Non-GAAP adjusted net income improved to RMB914 million in 2021 from a loss of RMB1,228 million a year ago.”

“In conclusion, we are greatly encouraged by the strong results we delivered in 2021, which fully demonstrate the resilience and growth potential of our business. Going forward, we will continue to expand and deepen our cooperation with more institutional funding partners to meet the needs of consumers and SMEs, and execute our proven strategy to drive sustainable long-term growth and returns for our partners and shareholders.”

We present the non-GAAP financial measures because they are used by our management to evaluate our operating performance and formulate business plans. We believe that the use of the non-GAAP financial measures facilitates investors' assessment of our operating performance and help investors to identify underlying trends in our business that could otherwise be distorted by the effect of certain income or expenses that we include in income (loss) from operations and net income (loss). We also believe that the non-GAAP measures provide useful information about our core operating results, enhance the overall understanding of our past performance and future prospects and allow for greater visibility with respect to key metrics used by our management in its financial and operational decision-making.

We use in this press release the following non-GAAP financial measures: (i) adjusted net income, (ii) adjusted net income attributable to X Financial shareholders, (iii) adjusted net income per basic ADS, and (iv) adjusted net income per diluted ADS, each of which excludes income (loss) from financial investments and share-based compensation expense. These non-GAAP financial measures are not defined under U.S. GAAP and are not presented in accordance with U.S. GAAP. These non-GAAP financial measures have limitations as analytical tools, and when assessing our operating performance, investors should not consider them in isolation, or as a substitute for the financial information prepared and presented in accordance with U.S. GAAP.

We mitigate these limitations by reconciling the non-GAAP financial measures to the most directly comparable U.S. GAAP financial measures, which should be considered when evaluating our performance. We encourage you to review our financial information in its entirety and not rely on a single financial measure.

For more information on these non-GAAP financial measures, please see the table captioned "Reconciliations of GAAP and Non-GAAP results" set forth at the end of this press release.
