Use of Non-GAAP Financial Measure

In evaluating the business, the Company considers and uses adjusted net loss, a non-GAAP financial measure, to supplement the review and assessment of its operating performance. The Company defines adjusted net loss as net loss adjusted for the impact of share-based compensation expenses, amortization of intangible assets resulting from business acquisition and tax effects of the non-GAAP adjustments, which are non-cash expenses. The Company believes that the non-GAAP measure facilitates comparisons of operating performance from period to period and company to company by adjusting for potential impacts of items, which the Company's management considers to be indicative of its operating performance. The Company believes that the non-GAAP financial measure provides useful information to investors and others in understanding and evaluating the Company's consolidated results of operations in the same manner as it helps the Company's management.

The non-GAAP financial measure is not defined under U.S. GAAP and is not presented in accordance with U.S. GAAP. The presentation of the non-GAAP financial measure may not be comparable to similarly titled measure presented by other companies. The use of the non-GAAP measure has limitations as an analytical tool, and investors should not consider it in isolation from, or as a substitute for analysis of, our results of operations or financial condition as reported under U.S. GAAP. For more information on the non-GAAP financial measure, please see the tables captioned “Unaudited Reconciliations of GAAP and Non-GAAP Results” set forth at the end of this press release.
